1_Context

Read about the macroeconomic scenario and our strategies that influenced our business in 2015.
Macroeconomic context

Global context

The 2008 crisis in the global financial markets significantly affected the world economy. The crisis led to: (i) recession and higher unemployment in the world’s leading economies; (ii) a decrease in investment on a global scale; (iii) a decline in credit availability and liquidity; and (iv) a general decrease in the number of transactions in capital markets worldwide. The world economy, as well as the credit and capital markets, has recovered substantially since 2008. However, the overall condition of the global financial markets is still relatively fragile.

The world economy is recovering from the 2008 crisis, but global GDP growth is still below potential. As noted below, U.S. real GDP grew 2.4% in 2015 and is expected to expand at a rate of 2.6% in 2016 (according to the Federal Reserve Bank of Philadelphia’s Survey of Professional Forecasters). The Eurozone and Japan are still struggling to improve their modest economic growth rates. Meanwhile, growth in China is decelerating, and growth in other emerging markets has been slow.

In the Eurozone, growth resumed in the second quarter of 2013 and continued at a moderate pace through 2014 and 2015. More fundamentally, fiscal reforms have been implemented in European countries, and both confidence and financial conditions have improved when compared with recent years, creating conditions that support moderate growth. In January 2015, the European Central Bank (ECB) responded to falling inflation and inflation expectations by announcing a quantitative easing program (in addition to the interest rate cuts and other measures introduced in the second half of 2014) that included the purchasing of a target amount of €60 billion per month in assets, including government bonds. In December 2015, the minimum length of the quantitative easing program was extended by an additional 6 months, meaning that it will run through at least March 2017. In March 2016, the European Central Bank increased the purchasing of assets in an additional amount of €20 billion per month.

Given the unprecedented monetary policy measures implemented by developed countries since 2008, liquidity has been available for investment in emerging markets, which has in turn boosted asset prices in those markets. As the U.S. economy has continued its recovery and its outlook remains positive, the U.S. Federal Reserve has begun to raise interest rates, as announced at the Federal Open Market Committee December 2015 meeting. The U.S. Federal Reserve currently anticipates it may well be appropriate to continue gradually increasing the target range for interest rates.

Significant amounts of financial resources have been withdrawn from investments in the emerging markets and other high-yield investments in anticipation of the gradual monetary tightening that is likely to occur in years ahead. However, engineering a smooth withdrawal of funds from investments in emerging markets from a period of extraordinary liquidity remains a challenge for the years ahead. We believe that this transition is likely to be gradual, but may still result in more volatile asset prices in emerging markets and could affect our operational results.

U.S. real GDP grew 2.4% in 2015, according to U.S. Bureau of Economic Analysis advanced estimates, the same growth rate as in 2014. The economic expansion is expected to continue at a moderate pace in 2016 (according to the Survey of Professional Forecasters issued by the Federal Reserve Bank of Philadelphia), sustained by a solid domestic demand. Domestic demand should be supported by: (i) accommodative monetary and financial conditions; (ii) optimism among consumers and businesses, according to January 2016 survey data published by The Conference Board and the Institute for Supply Management, respectively; and (iii) a healthy labor market, with net job growth averaging 229,000 per month in 2015 and a decline in the U.S. unemployment rate to 5.0% in December 2015.

United States Job Creation – Nonfarm Payroll
(seasonally adjusted, thousands)

China’s GDP increased 6.8% year over year in the fourth quarter of 2015, continuing its slowing trend. Chinese policymakers are showing signs of a renewed commitment to medium-term reforms to improve overall productivity, and appear willing to accept slower but more balanced GDP growth. This is expected to help the ongoing rebalance from investment led growth towards consumption and services growth, although some implementation risks remain. More balanced growth means that growth in demand for industrial metals may continue to decelerate more than overall economic growth.

**Latin America context**

In Latin America, the commodity-exporting economies continue to grow at a slower rate than they did over the previous decade, as lower commodity prices weigh down investment, confidence and national income. Mexico has not fully benefited from the recovery of the U.S. economy, and the drop in oil prices has been an obstacle to the implementation of energy reform in the country. Low oil prices have also hurt Colombia’s GDP growth. After growing by 4.6% in 2014, Colombia’s GDP grew by only 3.1% in 2015. A potential peace agreement with FARC leaders may improve the business environment in Colombia in the coming years. Low copper prices have had a negative effect on the Chilean economy. In 2015 Chile’s GDP grew by only 2.1%.

Due to weaker currencies, inflation has been high in most of the region, with a number of central banks raising policy rates despite slow economic growth. Furthermore, the economic slowdown and lower commodity-linked fiscal revenues have led some governments to cut expenditures.

Solid fundamentals built over the past decade have helped Chile, Colombia, Peru and Mexico to avoid recession.

The table below shows the real GDP growth rates in seven Latin American countries as of and for the years ended December 31, 2015, 2014, 2013, 2012 and 2011, except as otherwise indicated.

Sluggish economic growth in developed countries and inflation and other issues in developing economies – particularly in Latin America – may have an impact on our future growth in Brazil and other places where we operate, and therefore, also on the results from our operations.

**Brazilian context**

As a Brazilian bank with most of our operations in Brazil, we are significantly affected by the economic, political and social conditions in the country. From 2004 to 2011, we benefited from Brazil’s generally stable economic environment, with average annual GDP growth of approximately 4.4%, which led to increased bank lending and deposits. However, Brazil’s GDP growth rate declined to 1.9% in 2012, 3.0% in 2013 and 0.1% in 2014, with last year’s economic slowdown partly reflecting a deceleration in potential growth. In 2015, GDP decreased by 3.8%.

In April 2013, the Central Bank initiated a monetary tightening cycle. The Central Bank gradually increased the benchmark interest rate payable to holders of securities issued by the Brazilian government and traded through the Special Clearing and Settlement System (Sistema Especial de Liquidação e Custódia, or Selic) from a low of 7.25% in March 2013 to a high of 14.25% in July 2015, with no further increases since then. The recent increase in interest rates has also triggered an increase in the reference interest rate (Taxa Referencial, or TR), which has risen from approximately 0.11% per month at the end of July 2014 to approximately 0.23% per month at the end of December 2015. Bank lending as a proportion of GDP increased to 54.2% in December 2015 from 53.1% in December 2014.

The monetary tightening cycle implemented by the Central Bank since April 2013 has affected domestic economic activity. If inflation persists or economic activity continues to decline, families income may keep decreasing in real terms. In 2015, real wages decreased by 3.7% compared with 2014, which could result in higher delinquency rates for loans in the Brazilian banking system. The non-performing rate for household loans has increased recently, rising from 3.7% in June 2015 to 4.2% in December 2015.

The Brazilian primary public budget result continued on a downward trend in 2015. Cuts in discretionary spending and tax hikes were insufficient to offset the drop in tax revenues and growth in mandatory expenditures. The Brazilian primary public budget balance ended the year at -1.9% of GDP (-0.9% excluding payment of delayed expenses), after a deficit of 0.6% of GDP in 2014. The decrease in the primary surplus, combined with the recent increase in the Brazilian government’s debt-financing costs, has added to the relative pressure on public debt. The outlook for 2016 remains challenging, given the trend of falling revenues and rising mandatory expenses will likely continue, since the fiscal adjustment program faces political challenges at the National Congress. Standard & Poor’s cited these challenges in explaining its decision to lower the rating of the Brazilian sovereign debt to below investment grade on September 9, 2015. Fitch also downgraded Brazil’s sovereign rating to non-investment grade on December 16, 2015. On February 25, 2016, Moody’s downgraded Brazil’s sovereign debt rating to non-investment grade.

In addition, Brazil has in recent years implemented a large number of regulatory changes, such as changes in reserve and capital requirements for financial institutions, as well as other macro-prudential policies, such as capital controls. Please refer to section Our Risk Management, item Regulatory Environment, Implementation of Basel III in Brazil and to section Performance, item Required Reserve Deposits with the Central Bank, for further information.

Outstanding loans provided by Brazilian financial institutions decreased in 2015 adjusted for inflation. Year-to-year total bank loans fell by 3.7% as of December 2015 in real terms, compared with an expansion of 4.6% as of December 2014. New loans decreased, in all sectors, by 11.1%, as of December 2015 compared with a decline of 1.1% in December 2014, both on an annualized basis. Non-performing household loans increased 0.5 p.p. to 4.2% as of December 2015 when compared with the same month in 2014. Non-performing loans to non-financial corporations have increased since January 2015, reaching 2.6% in December 2015, compared with 1.9% in December 2014.
The Brazilian real has depreciated against the U.S. dollar, with the exchange rate reaching R$3.96 per US$1.00 as of December 31, 2015, compared with R$2.66 per US$1.00 as of December 31, 2014. The strengthening of the U.S. dollar against major currencies and the drop in commodity prices have been important drivers of the depreciation of the Brazilian real in dollar terms. Economic and political uncertainties, as well as the downgrading of Brazil’s sovereign rating to speculative grade by Standard & Poor’s and Fitch, have affected the country’s foreign exchange market. In an attempt to contain excess volatility, the Central Bank intervened in the foreign exchange market through the sale of foreign exchange derivatives from January to March 2015 and in September 2015.

Following the Central Bank’s revision of its methodology for calculating Brazil’s external accounts in March 2015, Brazil’s current account deficit (the net balance from the trade of goods and services and international transfers) was 4.3% of GDP for December 2014. By December 2015 the deficit decreased to 3.3% of GDP. Brazil has maintained its external solvency, with US$369 billion in international reserves and US$335 billion in external debt as of December 2015.

General elections were held in Brazil in October 2014 to elect the president, senators and representatives for the National Congress, state governors and state legislatures. After failing to win a majority in a first round of voting, Dilma Rousseff was re-elected president of Brazil in a runoff. The next general elections will be in October 2018.

The table below shows real GDP growth, the inflation rate, exchange rate variation and interest rates in Brazil as of and for the years ended December 31, 2015, 2014, 2013, 2012 and 2011.
Dear Stockholders,

In the last years, our institution was able to generate consistent results at levels that increasingly outdid the performance of previous records. In addition to the quality of our teams, working in an environment driven by a unique corporate culture and based on meritocracy, this development may be explained by strategic decisions proven right to the point, such as strong technology investments, our adequate appetite for risk in increasingly challenging scenarios, diversified sources of income, focus on service provision and a strong-willed search for higher management efficiency. Accordingly, Itaú Unibanco’s net income reached R$12.6 billion in 2012, R$16.4 billion in 2013, R$21.6 billion in 2014, and R$25.7 billion in 2015, thus showing that the strategies adopted were adequate, even under rather volatile macro-economic circumstances.

In spite of a substantial reduction in Brazil’s GDP in 2015 and a new massive fall expected for this year, we continue to invest and carry out changes in our bank to make it increasingly simpler, easier to understand and able to serve clients with quality and whenever they need it most. Accordingly, we expanded the number of digital branches and developed new channels for our millions of clients, such as applications and communications tools for the most diverse interfaces. Noteworthy is the opening of our new Data Center in 2015, a more energy efficient center able to increase our processing capacity 25-fold.

We also carried out significant advancements in connection with our institution’s corporate culture by revisiting Our Way of Making it Happen, with the purpose of reinforcing attitudes that will be defining in the present moment of our history and ought to guide the actions of all of us in face of new arising challenges. Among other things, the attitudes of Our Way seek to establish high standards we must adopt in our relationships with clients, employees, stockholders, competitors, suppliers, governments and society in general. These attitudes reflect the way we intend to proceed towards our vision: being the leading bank in sustainable performance and client satisfaction.

Early 2015 we announced a significant change in our management structure, which is now composed of three general directors and two vice-presidents. In addition to making the organization ready for the succession process of our CEO, Mr. Roberto Setubal, with this new governance, our decision making became more standardized and expeditious, and we could create more synergy among teams, as well as improve the internal dialogue.

In the international front, noteworthy is the merger of Itaú Chile with Corpbanca on April 1st, 2016, creating one of the most important financial institutions in Latin America. Itaú Corpbanca strengthens our credit portfolio in Chile from the 7th to the 4th position, and places us in the 5th position in Colombia.

In 2015, we expanded our repurchases of preferred shares in the capital markets – and, in line with this, we canceled 100 million treasury shares, assuring stockholders an increased stake in the institution’s earnings per share. These repurchases are also important to optimize the bank’s use of capital and make shares available for our executive’s long-term compensation programs.

I invite everyone to know more about Itaú Unibanco by reading this report. Here we talk about our history, we present details of operations, strategies, results and corporate governance practices, sustainability and risk management, among other matters.

I wish you all a good reading.

Cordially,

Pedro Moreira Salles
Chairman of the Board of Directors
Dear reader,

The year 2015 was characterized by major challenges in the political and economic scenario. While we observed recovery movements in the economies of the United States and Euro Zone, the Brazilian GDP posted a reduction for the second consecutive year. A few years ago we began to prepare for a less favorable scenario, adopting a strategy based on investments in technology, appetite for credit with lower risk profile, expansion of our capabilities as a provider of insurance, pension plan and premium bonds products and services, as well as discipline in the control over operating costs, and international expansion in Latin America.

These medium and long-term decisions enabled us to be a more efficient institution and less exposed to macroeconomic risks in Brazil. With discipline and focus on the implementation of this strategy, the trust of our clients and efforts of our employees, we were able to close another year with record results: our net income in 2015 reached R$25.7 billion, a 19.4% increase as compared to 2014. Our annualized recurring profitability on average stockholders' equity was 24.8%. Earnings per share grew additionally 2.3% due to the repurchase, in 2015, of 1.9% of own shares issued.

Value added to the economy reached R$59.5 billion, a 7.6% increase in relation to the previous year, distributed among employees (30%), taxes (24%), reinvestment of profit (34%), stockholders (10%) and rents (2%). Our efficiency ratio, which represents the relation between the bank’s expenses and revenues, reached 44.0%, with improvement of 3 percentage points. The Basel ratio was 17.8%, above that required by the Central Bank of Brazil, showing soundness and capital availability. Our expanded total credit portfolio posted a 4.2% growth in 12 months, reaching R$548.5 billion.

The year 2015 was also characterized by our continuous work to become an increasingly Digital Bank, expanding the number of digital branches to 94, an addition of 63 in relation to 2014, and by the development of new channels for the client, such as applications and digital communication mechanisms. Last year, 67% of the transactions carried out in the bank, equivalent to 8.9 billion operations, originated from internet and mobile phones. In addition to this initiative, noteworthy are the opening of our new Data Center, more efficient in energy consumption, and that will increase by 25 times our processing capacity, and the reorganization of our Executive Committee, which expedited our decision making process.

In the international area, in the beginning of April of this year, we carried out the merger of Itaú Chile with Corpbanca, giving rise to Itaú Corpbanca. This operation significantly increases our presence in Latin America and represents an important step of our strategy to regionalize the bank. Currently, approximately 13.1% of our loans are made to clients in Latin America (excluding Brazil). During the next 2 to 3 years, we will be integrating these operations. The organization resulting from the merger will be one of the most robust financial institutions in Latin American, and it will be benefited by synergy gains, lower funding costs and a larger customer service network.

We expect once again a challenging scenario in 2016; thus, we will maintain our strategy of managing risks very carefully, keeping the high capitalization level of the bank, focusing on operations efficiency and services quality.

Good reading to you all.

Cordially,

Roberto Setubal
Executive President & CEO
A bank made for people and, above all, by people

We have 91 years of history, we are the largest private bank in Latin America in terms of total assets, and we are present in 19 countries. In spite of becoming increasingly international, our roots are yellow and green. We were started by five people who dared to dream big. Five visionaries who were committed to the business, the country and, above all, to people. From the very beginning, we have always sought to think ahead and to promote positive changes in the lives of people. Therefore, we place our structure and our intellectual and technology skills at their service.

Back in 1960, when no one could imagine that technology would one day be an integral part of our lives, we were guided by the vision that technology would be the only way to keep us going on in an ever-changing world. We started up from the principle that technology would not only make the banking activity easier, but also that it would be at its core. Therefore, in 1970, Itaú built up one of the four largest data processing centers in Brazil. Still back in the 1970s, Unibanco was the first bank to adopt the IBM 3600 processing system. And so, with this emphasis on innovation we have proceeded, to go along with the world as it progressed.

Over the years, we have thought about and revised our solutions, our branches, our customer service model, and the way we work. We progressed by bringing the client into the core of our operation, working to strengthen the bank's availability and the client's experience. For instance, in 1983, we implemented the first ATM in Brazil, and, in 1991 we created the “Banco 30 Horas”, pioneering a service that made the bank available to clients around the clock, for 30 hours, six hours at the branches and the other 24 hours on the phone.

This is the way we have carried on until now, by looking ahead and focused on people. In 2015, we opened the most state-of-the-art data center of the banking sector. This infrastructure provides for our ongoing growth towards the next decade, by expanding our capacity to serve clients with more quality, speed and security. This is the basis we have built upon for the future.

Today over 67% of our operations are conducted via digital channels (internet and mobile banking). We expect it to grow even more by the end of 2016. This is a reflection of people's behaviors. We are also increasingly getting ready to serve this new customer profile with excellence – the same excellence that has characterized us over our whole history.

The world is increasingly changing, faster and faster. Continuing to be alert to changes is an assumption of ours; nevertheless, thinking ahead of our time is what will ensure our relevance to people. We have the ongoing challenge to be the driving force to change society, to be agile and to prize excellence in our services and experience wherever people are and want to be. It is an integral part of our culture. We believe that it is good for us only if it is good for the client. We are people serving people. We are over 90 thousand people building up this bank every day, people who go beyond, who build up an increasingly relevant and changing bank for all those who have a relationship with Itaú Unibanco.

Business Strategy

Our Board of Directors is the body responsible for establishing the general guidelines of our business. Strategic decisions taken by our board of directors are supported by the Strategy Committee, which provides data and information about critical strategic matters. The Strategy Committee's activities and responsibilities range from evaluating investment opportunities and budget guidelines to issuing opinions and recommendations in order to support the decisions of the Board of Directors. The Economic Scenarios Sub-Committee supplies macroeconomic data to the Strategy Committee, supporting its discussions. Please refer to section Our Governance, Item Management Structure, Committees of the Board of Directors, Strategy Committee for further information.

Expand our operations in Brazil and abroad

We continue to examine potential business operations which would create additional value to our stockholders, in Brazil and abroad. In line with our Latin America expansion strategy, and with a vision to create value and sustainable performance in 2015, the merger between Itaú Chile and CorpBanca was approved by the respective stockholders’ meetings as well as by the regulatory authorities in Chile, Brazil, Colombia and Panama. As provided in the amendment to the Transaction Agreement dated of June 2, 2015, the merger of Itaú Chile with and into CorpBanca occurred on April 1, 2016.

In March 2015, we entered into an agreement with MasterCard Brasil Soluções de Pagamento Ltda, to establish an alliance for a 20-year term, in the payment solutions market in Brazil. This alliance will operate a new electronic payments network through a company controlled by MasterCard, in which we will have certain veto and approval rights. This alliance is subject to approval by regulatory authorities in Brazil.

In August 2014, reaffirming our commitment to the Chilean market and the vision of being the largest private bank in the Latin American market, in furtherance of the joint venture agreement entered into in 2011 with Munita, Cruzat & Claro S.A. Corredores de Bolsa, a brokerage house, we obtained 100% of the ownership interest in MCC Securities Inc., an investment advisory financial services firm based in Chile.
In 2013, we carried out a series of transactions aimed at expanding our operations in Brazil. In December 2013, we concluded the acquisition of 100% of the shares of Banco Citicard S.A. and Citifinancial Promotora de Negócios S.A., for approximately R$2.8 billion in cash, including the "Credicard" brand. In Latin America, we acquired Citibank Uruguay on June 28, 2013, including both retail banking and credit card operations. In addition, in order to consolidate and expand our operations in Europe, in 2013 we completed the transfer of the central administration and registered offices of our corporate banking unit in Europe by means of a cross-border merger of Banco Itaú BBA International S.A., a bank headquartered in Portugal into Itau BBA International plc (formerly Itau BBA International Limited). Please refer to section Our Profile, item Our Business, Our International Business, Itaú BBA International for further details about Itau BBA International's business.

Focus on Non-Interest Income
We have continued to focus on the offering of new products and services which, we believe add value to our customers and, at the same time, allow us to increase our fee-based income. This increase is mainly due to an increased volume of account service packages and services. New subscriptions to current account service packages and the adjustment of services provided to our higher-income Uniclass clients and by our Itaú Empresas business unit also contributed to this growth.

In addition, we continue to focus on our insurance services by operating under the bancassurance model, with a focus on the sale of massive personal and property insurance services, largely provided through our retail banking. As part of this strategy, in October 2014 we announced the sale of our large risks operations to the ACE group and the early termination of operating agreements between Via Varejo S.A. and our subsidiary Itaú Seguros S.A. for the offer of extended warranty insurance in "Ponto Frio" and "Casas Bahia" stores.

Continue to improve efficiency

In 2010, we established an Efficiency Program aimed at identifying, implementing, and monitoring costs and revenues, in addition to promoting a strong culture of operational efficiency. In the years thereafter, we focused on increasing cost savings by reducing unnecessary costs, promoting the simplification and centralization of processes and job descriptions, promoting synergy gains and combining the management of certain business units.

In February 2015, we created the Technology and Operations executive area with the aim of optimizing our structure in order to sustain growth. This executive structure, will enable us to organize our operations in a simpler and more efficient manner. We are committed to improve processes, to streamline operations and to be more efficient in everything we do with the clear purpose of client satisfaction.

Throughout 2015, we increased the number of our digital branches in response to the profile of our customers, which includes an increasing demand for services through digital channels. The clients of our digital branches can be in contact with their relationship managers from 7:00 am to midnight, from Monday to Friday through a variety of digital channels. This allows us to strengthen our relationship with clients and improve the efficiency and profitability of our operations.

Maintain asset quality in our loan portfolio
We are constantly seeking to improve our models for risk management and our economic forecasts and scenario modeling. In the last three years, we focused on the improvement of our asset quality by increasing credit selectivity, by changing our loan portfolio mix, and prioritizing the offer of less risky products, such as real estate and payroll loans, reducing the origination of higher risk portfolios, such as vehicle loans.

Develop strong relationships with our clients based on client segmentation
We will continue to work on our client segmentation strategy in order to identify our clients' needs and enhance our relationship with our client base, as well as to increase market penetration. We believe that our client segmentation tools and strategies provide us with an important competitive advantage developed over the course of more than 25 years. We aim to fulfill clients’ financial needs through a wide product portfolio by cross-selling banking and insurance products and making sales through a variety of channels. We are focused on delivering “best-in-class” client service, in order to maintain and increase client satisfaction and increase portfolio profitability.

In an effort to continuously improve our segmentation strategy, in 2015 we merged our Commercial Bank – Retail segment with our Consumer Credit – Retail segment and created the Retail Banking segment. We also migrated our Private Banking, Asset Management and Latin America Activities to our Wholesale segment. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 34 – Segment Information, for further details.

Context of this report
This edition reflects structural and conceptual changes since our 2013 annual report, in a search for innovation, transparency, and efficiency in obtaining information and in the communication with the public of interest. This report unifies the content of our major annually released reports, such as the annual report on Form 20-F, the Annual Report, and the Offering Memorandum for the Medium-Term Note Program, or MTN Program. The annual report on Form 20-F, filed with the U.S. Securities and Exchange Commission, or SEC, has served as the reference for the content of this report.
The annual report describes our strategy, structure, activities and operations, using plain and straightforward language to be clear to all audiences who may consult this annual report.

The information presented is aligned with Pronouncement 13 of the Market Information Disclosure Steering Committee (Comitê de Orientação para Divulgação de Informações ao Mercado, or CODIM), a Brazilian joint initiative of entities representing the capital markets, focused on improving transparency and information reporting in the Brazilian capital markets.

This annual report contains data from January 1 to December 31, 2015, presenting our corporate and business structure, governance and financial performance, among other matters. It also includes information on all entities subject to the significant influence or control of Itaú Unibanco Holding. Any potential changes or impacts on the data collected as a result of certain transactions, the acquisition or sale of assets, or any important change for the business is indicated throughout this report. The annual report is divided into the following sections: (i) Context, (ii) Our profile, (iii) Our governance, (iv) Our risk management, (v) Performance, and (vi) Attachments. GRI G4-3 | G4-23 | G4-28 | G4-30

The audit of our financial statements in International Financial Reporting Standards as adopted by the International Accounting Standards Board, or IASB, is carried out by PricewaterhouseCoopers Auditores Independentes, or PwC.

Documents on display
We are subject to the informational requirements under the U.S. Securities Exchange Act of 1934, as amended, for foreign private issuers. Accordingly, we are required to file reports and other information with the SEC, including annual reports on Form 20-F and reports on Form 6-K. You may inspect and copy reports and other information filed with the SEC at the public reference facilities maintained by the SEC at 100 F Street, N.W., Washington D.C. 20549. Copies of the materials may be obtained by mail from the Public Reference Room of the SEC at 100 F Street, N.W., Washington, D.C. 20549 at prescribed rates. The public may obtain information on the operation of the SEC’s Public Reference Room by calling the SEC in the United States at 1-800-SEC-0330. In addition, the SEC maintains an Internet website at www.sec.gov, from which you can electronically access those materials, including this annual report and the accompanying exhibits. We also file financial statements and other periodic reports with the CVM located at Rua Sete de Setembro, 111, Rio de Janeiro, Rio de Janeiro 20050-901, Brazil. The CVM maintains an Internet website at www.cvm.gov.br.

Copies of our annual report on Form 20-F will be available for inspection upon request to the Investor Relations department at our office at Praça Alfredo Egydio de Souza Aranha 100, Torre Conceição, 9º andar – São Paulo – SP – 04344-902 – Brazil.

Investors may receive a hard copy of this annual report, including our complete audited financial statements for the last fiscal year, free of charges, by requesting a copy from our Investor Relations department, by e-mail, at investorrelations@itau-unibanco.com.br, indicating their contact information and their complete mailing address. Comments and suggestions regarding this report may be sent to the same e-mail. GRI G4-31

Reading this Report
In this report, the terms:

- “Itaú Unibanco Holding”, “Itaú Unibanco Group”, “we”, “us” or “our” refer to Itaú Unibanco Holding S.A. (previously Banco Itaú Holding Financeira S.A.) and all its consolidated subsidiaries and affiliates, except where specified or differently required by the context; GRI G4-17
- “Itaú Unibanco” refers to Itaú Unibanco S.A. (previously Banco Itaú S.A.), together with its consolidated subsidiaries, except where specified or differently required by the context;
- “Itaú BBA” refers to Banco Itaú BBA S.A., with its consolidated subsidiaries, except where specified or differently required by the context;
- “Brazil” refers to the Federative Republic of Brazil;
- “Brazilian government” refers to the federal government of the Federative Republic of Brazil;
- “Central Bank” means the Central Bank of Brazil;
- “CMN” means the National Monetary Council;
- “CVM” means the Securities and Exchange Commission of Brazil;
- “Preferred shares” and “common shares” refer to authorized and outstanding preferred and common shares with no par value;
- “ADRs” refer to our American Depositary Shares (1 (one) ADS represents 1 (one) preferred share);
- “R$”, “reais” or “Brazilian real” mean real, the Brazilian official currency; and
- “US$”, “dollars” or “U.S. dollars” mean United States dollars.

Additionally, acronyms used repeatedly, technical terms and specific market expressions in this annual report will be explained or detailed in the section Attachments, item Glossary, as well as the full name of our main subsidiaries and other entities referenced in this annual report.

The reference date for the quantitative information for balances found in this annual report is as of December 31, 2015 and for results is for the year ended December 31, 2015, except where otherwise stated.

Our fiscal year ends on December 31 and, in this annual report, any mention to any specific fiscal year refers to the 12-month period ended on December 31 of that year.

The information found in this annual report is accurate only as of the date of such information or as of the date of this annual report, according to the situation. Our activities, the situation of our finances and assets, the results of transactions and prospects may have changed since that date.
This document contains information, including statistical data, about certain markets and our competitive position. Except as otherwise indicated, this information is taken or derived from external sources. We indicate the name of the external source in each case where industry data is presented in this annual report. We cannot guarantee the accuracy of information taken from external sources, or that, in respect of internal estimates, a third party using different methods would obtain the same estimates as we have.

Information contained in or accessible through the websites mentioned in this annual report does not form part of this report unless we specifically state that it is incorporated by reference and forms part of this report. All references in this report to websites are inactive textual references and are for information only.

Forward-Looking Information

This annual report contains statements that are or may constitute forward-looking statements within the meaning of Section 27A of the United States Securities Act of 1933, as amended, and Section 21E of the United States Securities Exchange Act of 1934, as amended. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting our business. These forward-looking statements are subject to risks, uncertainties and assumptions including, among other risks:

- General economic, political, and business conditions in Brazil and variations in inflation indexes, interest rates, foreign exchange rates, and the performance of financial markets;
- General economic and political conditions abroad and in particular in the countries where we operate;
- Government regulations and tax laws and respective amendments;
- Developments in high-profile investigations currently in progress and its impact in customers or our tax exposures;
- Disruptions and volatility in the global financial markets;
- Increases in compulsory deposits and reserve requirements;
- Regulation and liquidation of our business on a consolidated basis;
- Obstacles for holders of our shares and ADSs to receive dividends;
- Failure or hacking of our security and operational infrastructure or systems;
- Strengthening of competition and industry consolidation;
- Changes in our loan portfolio and changes in the value of our securities and derivatives;
- Losses associated with counterparty exposure;
- Our exposure to the Brazilian public debt;
- Incorrect pricing methodologies for insurance, pension plan and premium bond products and inadequate reserves;
- The effectiveness of our risk management policy;
- Damage to our reputation;
- The capacity of our controlling stockholder to conduct our business;
- Difficulties during the integration of acquired or merged businesses;
- Effects from socio-environmental issues; and
- Other risk factors listed in the section Our Risk Management, item Risk Factors.

The words “believe”, “may”, “will”, “estimate”, “continue”, “anticipate”, “intend”, “expect” and similar words are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. We undertake no obligation to update publicly or revise any forward-looking statements because of new information, future events or otherwise. In light of these risks and uncertainties, the forward-looking information, events and circumstances discussed in this annual report might not occur. Our actual results and performance could differ substantially from those anticipated in such forward-looking statements.

About our financial information

Our consolidated financial statements, included elsewhere in this annual report, are prepared in accordance with the International Financial Reporting Standards, or IFRS, as issued by the IASB. All consolidated financial information related to 2015, 2014, 2013, 2012 and 2011 included in this report were prepared in accordance with IFRS.

We use accounting practices adopted in Brazil and applicable to institutions authorized to operate by the Central Bank for our reports to Brazilian stockholders, filings with the CVM, and calculation of payments of dividends and tax liabilities.

The CMN establishes that financial institutions meeting certain criteria, such as Itaú Unibanco Holding, are required to present consolidated financial statements in accordance with IFRS.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 34 – Segment Information for further details about a discussion on the main differences between our management reporting systems and the consolidated financial statements according to IFRS.

Our consolidated financial statements as of December 31, 2015 and 2014 and for the twelve-month periods ended December 31, 2015, 2014 and 2013 were audited by PricewaterhouseCoopers Auditores Independentes, an independent audit firm, as stated in its report in section Performance, Item Financial Performance in this report.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 2 – Significant Accounting Policies for further details about the significant accounting policies applied in the preparation of our consolidated financial statements according to IFRS.

Annual Report 2015

Our profile
2015 highlights GRI G4-13 | G4-23

Corporate events and partnerships

Alliance with MasterCard in the payment solutions market in Brazil

On March 13, 2015, through our subsidiary Itaú Unibanco, we executed an agreement with MasterCard Brasil Soluções de Pagamento Ltda., or MasterCard, to create an alliance in the payment solutions market in Brazil (the Strategic Alliance).

During the 20-year term of this Strategic Alliance, Itaú Unibanco and MasterCard will operate a new electronic payments network through a company controlled by MasterCard, in which Itaú Unibanco will have certain approval and veto rights. Such new electronic payments network will operate under a brand that will have domestic and international acceptance.

Our objectives with respect to the Strategic Alliance are (a) to access new payment solutions technologies, (b) to realize important gains of scale and efficiency, and (c) to capitalize on MasterCard’s expertise in the management of payment solutions brands.

The effectiveness of the Strategic Alliance is subject to the satisfaction of certain precedent conditions, including approvals by Brazilian regulators, such as the Administrative Council for Economic Defense (Conselho Administrativo de Defesa Econômica, or CADE). On January 26, 2016, the General Superintendency of CADE determined that the transaction includes market competition aspects that require a final decision by CADE’s Tribunal.

Itaú CorpBanca

On June 2, 2015, Itaú Unibanco Holding and its subsidiary, Banco Itaú Chile, executed an amendment to the Transaction Agreement dated January 29, 2014, under which they agreed, among other things, (i) to allow CorpBanca to distribute to its stockholders additional dividends corresponding to (a) CLP$239,860 million during the fiscal year of 2015 (equivalent to approximately US$395 million) and (b) an amount equivalent to UF 124,105 (unidades de fomento – a Chilean indexed unit of value adjusted daily to reflect the previous month’s inflation in Chile) (equivalent to approximately US$5 million), at the same time that it distributes the profits generated during the fiscal year of 2015, and (ii) to reduce the amount of dividends to be paid to stockholders of Banco Itaú Chile with respect to distributable earnings for the year ended December 31, 2014 by CLP$16,399 million (equivalent to approximately US$27 million).

In the last week of June 2015, Banco Itaú Chile and CorpBanca held their stockholders meetings whereby stockholders representing more than two-thirds of each of the banks approved the merger of Banco Itaú Chile with and into CorpBanca, as well as the new dividend provisions agreed in the amendment to the Transaction Agreement. On September 4, 2015, the last pending regulatory approval, from the Chilean Superintendency of Banks and Financial Institutions (Superintendencia de Bancos e Instituciones Financieras), was obtained and the merger was consummated on April 1, 2016, with the surviving entity – Itaú CorpBanca – succeeding Banco Itaú Chile with respect to all of its assets, liabilities, rights, obligations and licenses.

Acquisition of ConectCar shares

On October 21, 2015, our subsidiary Redecard S.A., or REDE entered into an agreement for the purchase and sale of shares, by which it agreed to acquire 50% of the capital stock of ConectCar Soluções de Mobilidade Eletrônica S.A., or ConectCar, by paying R$170 million to Odebrecht Transport S.A. The remaining 50% of ConectCar’s capital stock is held by Ipiranga Produtos de Petróleo S.A., a company controlled by Ultrapar Participações S.A.

ConectCar is a company that provides intermediation services for the automatic payment of tolls, gas and parking fees. As of October 2015, it was ranked second among the largest companies in the sector.

On November 9, 2015, CADE approved the transaction without restrictions, as published in the Official Gazette and on December 23, 2015 the transaction was approved by the Central Bank.

The closing of the transaction occurred on January 29, 2016, after the fulfillment of certain precedent conditions usual in similar transactions. As a result, REDE and Ipiranga Produtos de Petróleo S.A. assumed joint control over ConectCar.

Recovery

On December 31, 2015, through our subsidiary Itaú Unibanco, we entered into a Sale and Purchase Agreement and Other Covenants with Banco BTG Pactual S.A., or BTG, pursuant to which Itaú Unibanco agreed to acquire, directly or indirectly, BTG’s entire stake in Recovery do Brasil Consultoria S.A., or Recovery, equivalent to 81.94% of the company’s equity stock. Itaú Unibanco will pay BTG the amount of R$640 million for its equity stake in Recovery.

The agreement also contemplated the acquisition by Itaú Unibanco, directly or indirectly, of approximately 70% of a portfolio of R$38 billion in credit rights associated with recovery activities held by BTG. Itaú Unibanco will pay BTG the amount of R$570 million for such share of the portfolio.

Founded in Argentina in 2000 and present in Brazil since 2006, Recovery is a market leader in the management and administration of non-performing credit portfolio. Recovery’s activities consist in prospecting and evaluating portfolios, structuring operations, and conducting operational management, with presence in every segment, from individuals to corporate credit, with financial and non-financial institutions, offering a distinctive competitive edge to its customers.

Recovery’s and its management team’s expertise in the provision of non-performing credit recovery services will optimize our operations, which, together with the continued provision of services to third parties, will result in increased growth potential for Recovery’s activities.
On March 31, 2016, Itaú Unibanco concluded the acquisition of an 89.08% stake in the capital stock of Recovery, being 81.94% from BTG and 7.14% from other shareholders, and the acquisition of approximately 70% of a portfolio of R$38 billion (face value) in credit rights owned by BTG.

### Awards and Recognition

In 2015, we received a series of awards and acknowledgements helping to strengthen our reputation. A few of our most significant awards and acknowledgements are listed below:

- **Latin American 9th Excellence in Best Practices Awards** (Frost & Sullivan) – In January 2015, Frost & Sullivan, an international market intelligence consulting company, elect us as the winners in the “Brazilian Competitive Strategy Innovation and Leadership Award The Future of Mobility” category. In its ninth edition, this award acknowledges the most outstanding companies in the Latin American market for their performance and excellence in areas such as leadership, technology innovation, client service and products development.

- **Brill Awards for Efficient IT** (Uptime Institute) – In February 2015, our Transforming Data Center – Virtualization project was elected as the winner in the “IT Efficiency – Latin America” category in the second edition of the Brill Awards for Efficient IT. This award is granted by the Uptime Institute, a pool of companies focused on the fields of education, advisory, conferences, seminars and issue of certificates related to the data center industry.

- **BeyondBanking Awards** (Inter-American Investment Corporation – IIC) – In March 2015, our 2013 Integrated Report was one of the winners in the fifth edition of the beyondBanking Awards, organized by the Inter-American Investment Bank (IDB). We were acknowledged in the “clearBanking” category, which envisages successful practices adopted by Latin American and Caribbean financial institutions in the risk management, transparency and corporate governance areas.

- **Brazilian Consumer Satisfaction Index** (ACSI – American Customer Satisfaction Index) – In April 2015, the Communications and Arts Faculty of the University of São Paulo (USP) disclosed the outcome of the 2014 Brazilian Consumer Satisfaction Index (BCSI) survey. In the consumers’ opinion, we were the most reputable bank Among retail banks. This assessment was conducted based on the ACSI (American Customer Satisfaction Index) method, used in the U.S. for over 21 years, which is applied in over 15 countries.

- **Efinance** (Executivos Financeiros Magazine) – In June 2015, we received the Efinance award in the “Mainframe” category, with the “Credit Quality” case. This award highlights the most innovative solutions, implementations and applications in the IT and Telecom area of financial institutions.

- **ABEMD Award** (ABEMD, the Brazilian Direct Marketing Association) – In June 2015 we won the gold trophy in the “BtoE – Program” category, with the “Campeonato Craques Itaú Unibanco” (Itaú Unibanco talent championship) case. In its 21st edition, the ABEMD award acknowledges the Best direct marketing initiatives in terms of Creation, Strategy and Results.

- **“Conciliar é Legal” award** (Brazilian Justice Council – CNJ) – In May 2015, we won the “Conciliar é Legal” (conciliation is legally cool) from the Brazilian Justice Council, in the Civil Society category. This initiative is in its 5th year, acknowledging the good practices of companies, government bodies and universities to adopt alternative methods to settle judicial conflicts throughout Brazil. Our project consisted of a new litigation management model, designed by our Legal department, focused on reducing the number of lawsuits and strengthening the dialogue with consumers.

- **Global 2000** (Forbes Magazine) – In May 2015, the Global 2000 ranking, which convenes the 2,000 most valuable companies in the world, according to the Forbes magazine, listed us as the largest company in Brazil and the 42nd largest in the world. Among regional banks, we are mentioned as the 5th largest one. In its 13th edition, this survey assesses revenue, profit, assets and market value to list the most valuable stock exchange listed companies.

- **Prêmio Inovação Brasil 2015** (2015 Brazil Innovation Award – Valor Econômico Newspaper) – In July 2015, we were elected the most innovative company in Brazil in the “Financial Services” segment. We were also in the 9th position in the general study, which had the participation of 130 Brazilian companies with revenues exceeding R$750 million and interest of private capital of at least 5%. This ranking was prepared together with Strategy & consulting firm, which has published surveys on the topic for over ten years.
Melhores e Maiores da Exame (Exame Best and Largest – Exame Magazine) – In July 2015, we were ranked first among the 200 largest corporate groups in Brazil. This survey also ranks us as the largest bank in terms of equity in Brazil and Latin America. With over 40 years of tradition, this is considered one of the most comprehensive and respected rankings on business environment.

Época Negócios 360º (Época Business 360º – Época Negócios Magazine) – In August 2015, we were the greatest winner of the 4th edition of the Época Negócios 360º yearbook. We were elected company of the year and also granted the top award in the Banking sector category. This guide is carried out in partnership with Fundação Dom Cabral, which conducted a complete assessment of the largest companies in Brazil, considering financial performance, corporate governance, human resources practices, innovation, vision of future and social, environmental and responsibility dimensions.

Prêmio CONAREC (CONAREC Award – National Congress of Company-Client Relationships) – In August 2015, we were the winners in the Banks category of the CONAREC (National Congress of Company Client Relationship) award, which acknowledges the best customer service operation centers, technology vendors and sector’s professionals.

The Most Sustainable Company – In September 2015, we were recognized as the Most Sustainable Company of the Year at the Época 360º Awards, organized by Época Negócios magazine, which assesses the sustainable performance management of companies in Brazil. Also in September 2015, we were one of the highlights among the companies recognized at Euromoney Awards, one of the most important awards in Europe, organized by Euromoney magazine, as a role model for corporate and social responsibility (CSR) in Latin America.

Marcas Mais (More Brands – O Estado de S. Paulo Newspaper and Troiano Branding) – In September 2015, we were ranked 1st among banks in the Marcas Mais study, a new publication of the Estado de São Paulo newspaper in partnership with Troiano Branding. The survey, which was responded by 2,500 interviewees, conducts an in-depth assessment of consumers’ engagement with brands.

Valor 1000 (Valor Econômico Newspaper) – We assumed the leadership in the following rankings of the Yearly Edition: “20 largest companies in net equity”, “20 largest companies in net income” and “20 companies with the best operating income without equity in earnings” in August 2015. In its 15th edition, the Anuário Valor 1000 (Valor 1000 Yearly Edition) shows the ranking of the 1,000 largest companies by net revenue, based on the IFRS balance sheet for the previous year.

As Empresas Mais Admiradas do Brasil (most admired companies of Brazil) – In October 2015, we ranked first in the “Retail Bank” segment in the 18th edition of the survey conducted by Carta Capital Magazine. In the overall ranking (irrespective of industry sectors) we ranked fifth.

Caboré 2015 – In November 2015, we were awarded the Caboré Award for Advertiser of the Year for the fifth time, maintaining our position as the most awarded company in this category. Created in 1980 by Meio & Mensagem newspaper, the Caboré Award is regarded as the most important award in the Brazilian advertising segment, acknowledging the professionals and companies who contributed to the development of the communications sector in Brazil.

Prêmio Aberje 2015 – In November 2015, we won a number of prizes at the 2015 edition of the Aberje Award, both at the regional and national levels. The winning projects were “90 years of Itaú Unibanco” in the “Historical responsibility and corporate heritage” category and “Urban mobility in Itaú: a cause beyond our little orange bikes” in the “Communication and relationship with government organizations” category. At the regional level, the highlight was the case named “The comics of memories – the history of 90 years of Itaú Unibanco told in comics”.

DataCenterDynamics Awards Brazil 2015 – In November 2015, we won the “Best Transformation Project in Data Center” award with “Itaú Unibanco: Transforming a data center into a power density environment”. In its 5th edition in Brazil, the DatacenterDynamics Awards recognizes innovation, leadership and original thinking in the Brazilian data center industry.
Recent Developments

Credit Intelligence Bureau

On January 21, 2016, we announced that our subsidiary Itaú Unibanco entered into a non-binding memorandum of understanding (MoU) with Banco Bradesco S.A., Banco do Brasil S.A., Banco Santander (Brasil) S.A. and Caixa Econômica Federal in order to create a credit intelligence bureau, or CIB. The CIB will be structured as a Brazilian corporation (sociedade por ações) and the parties to the MoU will share its control, each of them holding a 20% equity ownership. The board of directors will be comprised of members appointed by the parties to the MoU and its executives will be exclusively dedicated to the business, preserving the independent nature of CIB’s management. The technical implementation of the CIB will be performed together with LexisNexis® Risk Solutions FL Inc., the technical partner selected to develop and implement the technical and analytical platform of the CIB, through a service rendering agreement. CIB’s incorporation is subject to the execution of definitive agreements, as well as the satisfaction of certain conditions precedent, including the approval by applicable regulatory authorities in Brazil.
Our history

Timeline

1944 – Establishment of Banco Central de Cédito S.A.
1945 – Banco Central de Cédito S.A. started its operations

Change of corporate name to Banco Federal de Cédito S.A., later Banco Federal Itaú and, subsequently, Federal Itaú Sul Americano S.A., after mergers with other Brazilian Banks
Merger of Itaú América after the takeover of Banco da América

1940s to 1960s

1970s to 1990s

2000s to 2010s

Acquisitions of other financial institutions, such as Banco Nacional, making Unibanco one of the three largest financial institutions in Brazil

Takeover of Banco Bandeirantes and Credicard, when the Unibanco was ranked among the five largest banks in Latin America and the third largest private bank in Brazil

Acquisition of the state banks Banestado and Bemg, of Banco Fiat and of the Brazilian operations of Bank Boston, which increased Itaú’s presence in the high-income segment, and of BBA Creditanstalt, predecessor to Itaú BBA, the largest wholesale bank in Brazil

Mergers of Casa Bancária Moreira Salles, Banco Machadense and Casa Bancária de Botelhos originating Banco Moreira Salles, subsequently União de Bancos Brasileiros S.A. Organization of BIB – Banco de Investimentos do Brasil

1940s to 1960s

1970s to 1990s

2000s to 2010s

2008 Itaú and Unibanco merger

2009 Association with Porto Seguro

2012 Association with Banco BMG for payroll loan transactions and acquisition of total outstanding shares of Redecard

2013 Acquisition of 100% of the shares of Banco Citicard S.A. and Citifinancial Promotora de Negócios S.A., including the brand “Credicard”

2015 Opening of the Technological Center, Latin America’s largest green data center

Alliance with MasterCard Brazil Soluções de Pagamento Ltda. in the market of payment solutions in Brazil
Redecard S.A. acquired 50% of the capital stock of ConectCar Soluções de Mobilidade Eletrônica S.A.
Sale and Purchase Agreement for the acquisition of 81.94% of the capital stock of Recovery do Brasil Consultoria S.A.
Our history begins back in 1924, when Casa Moreira Salles, founded by João Moreira Salles in Poços de Caldas, Minas Gerais, received the letter patent issued by the national Government, which allowed it to operate as a banking section, i.e., as a correspondent of the state mainstream banks. This entity eventually became Unibanco.

On the other hand, Itaú was established about two decades later, in 1945, when Alfredo Egydio de Souza Aranha, a businessman in the textile industry, and his partner Aloysio Ramalho Foz founded Banco Central de Crédito S.A., which was located in downtown São Paulo.

Gradually João Moreira Salles passed the management of Casa Moreira Salles to his son Walther Moreira Salles, who took over in 1933 while he was still a law student. In 1959, Alfredo Egydio transferred the management to his nephew Olavo Setubal, who counted on the support of the founder’s son-in-law, Eudoro Villela, in this new venture.

During their separate histories, Itaú and Unibanco exhibited a number of common attributes such as their concern for ethics and transparency in doing business, adherence to the law and appreciation of their employees. The two organizations also shared the same proximity to their clients by understanding their needs and their economic setting, thereby allowing the institutions to support businesses expansion by means of innovative services.

Pioneering in the dissemination of the use of technology to process banking transactions and services offered to clients, they made heavy investments in automation and support of modern operational centers. Moreover, the expansion on the basis of mergers, acquisitions and incorporations is another constant characteristic seen in the evolution of both banks.

Another element common to the two institutions was the support of arts and culture and the social and environmental responsibility that are manifested in Institute Moreira Salles and Instituto Itaú Cultural and, in the social realm, in Fundação Itaú Social and Instituto Unibanco.

After nine decades of history, we continue to follow the principles and values of those who laid the foundations of what we are and, like them, we remain focused on the future to build a better world for future generations. For this reason, sustainability is a concept that permeates our organization and is widespread in our culture.

Today we are one of the largest banks in the world with international operations and strong bases in Latin America. Our commitment to Brazil leads us to serve as an agent of transformation of the society by working for great causes, such as culture, education, sports and urban mobility, continuously seeking the common good and contributing to the country’s development.

**Our Vision**

Our objective is to be the leading bank in sustainable performance and customer satisfaction. For us, sustainable performance means creating shared values for employees, customers, stockholders and society so as to ensure the longevity of our business.

**Our Culture**

One of the greatest challenges of the merger of Itaú and Unibanco was to disseminate a new corporate culture, both distinctive and unique, which respected the history of the two institutions.

Since the merger, we have succeeded in developing a solid corporate culture, *Nosso Jeito de Fazer* (Our Way of Making it Happen), which having been put into practice, has been instrumental in the achievement of significant results and has established our distinctiveness in the market. Today, after five years, we have moved on to another level where it is important to emphasize certain attitudes. *Nosso Jeito* (Our Way), made up of seven attitudes, encapsulates our culture and their practice is what we believe will make us a leading bank in sustainable performance and customer satisfaction.

**Our Way**

1. **it’s only good for us if it’s good for the client**
2. **we’re passionate about performance**
3. **people mean everything to us**
4. **the best argument is the one that matters**
5. **simple. always**
6. **we think and act like owners**
7. **ethics are non-negotiable**

Several initiatives reinforce the practice of these attitudes by our employees. These include (i) events related to corporate culture, which include the annual meeting with managers *Encontro entre Líderes* (Meeting among Leaders) and our Walther Moreira Salles Award; (ii) the behavioral attitudes incorporated into our employee performance evaluation, which are direct derivatives and the palpable result of *Nosso Jeito* attitudes; and (iii) campaigns conducted through our channels of communication.

In 2015, the Meeting among Leaders was held with an onsite audience of more than 5,700 of Itaú Unibanco Holding’s leaders in addition to another 3,700 via telepresence, where Pedro Moreira Salles and Roberto Setubal presented information regarding our results, the current economic context and our businesses, in addition to covering how we are preparing to meet new challenges. Our culture served as a backdrop to the entire presentation, embodying all that we have already achieved.
and where we want to go. After the Meeting among Leaders, leaders who participated were delegated the task of disseminating the key messages in alignment with our vision and our corporate culture.

The meeting has taken place annually since 2010, representing a means of maintaining the organization’s leadership aligned with our strategy in what is an increasingly demanding market, and ensuring the continued commitment and engagement of all our employees.

Employees

The number of employees within the Itaú Unibanco Group decreased from 93,175 in 2014 to 90,320 in 2015. GRI G4-9

The decrease in the number of employees is a reflection of our natural turnover. The tables below show the total number of employees for the years ended December 31, 2015, 2014 and 2013, segmented by region (Brazil and abroad) and operating unit:

The Turnover Rate is the ratio of employees hired to employees terminated (either voluntarily or not) in a given period. We monitor this rate on a monthly basis and submit it to the Executive Committee (the criteria used do not include employees outside of Brazil and those of Rede, or apprentices, expatriates, disability retirees, officers and interns).

\[
\text{Turnover Rate} = \frac{\text{Total terminations}}{(\text{Total employees at the beginning of the period} + \text{Total employees at the end of the period})/2}
\]

Our Turnover Rate for the year ended December 31, 2015 was 10.6%. We invested in an employee redeployment program, which is intended to create in-house opportunities taking into account the availability of open positions and the professional profile of internal candidates.

Compensation and Benefits

We have adopted market parameters and compensation strategies, which vary according to the business area of each employee. We periodically verify these parameters through the commissioning of salary surveys conducted by specialized consultants, participation in surveys conducted by other banks, as well as participation in specialized forums on compensation matters.

Fixed compensation under our compensation strategy takes into account the complexity of an individual’s work duties and such individual’s performance with respect to such duties. Employees’ fixed compensation changes according to the policy on promotion and merit, which takes into consideration the seniority of the employees and their performance when carrying out their duties.

The variable compensation, in turn, acknowledges the level of dedication, the results achieved and the short-term, medium-term and long-term sustainability of such results.
In addition, employees are entitled to receive salary adjustments and are entitled to profit sharing, pursuant to the collective bargaining agreements applicable in the relevant jurisdictions.

Our share-based profit sharing plan, specifically designed for managers and senior managers, acknowledges those who stood out during the relevant year. The profit sharing plan includes grants of preferred shares (ITUB4) – or equivalent instruments, subject to the limits established by the Compensation Committee. Of such instruments, one third are delivered each year over a period of three years. The number of preferred shares or share based instruments granted is determined by the financial results of the organization/area as well as individual performance. The preferred shares or share based instruments are delivered on the same date as the final portion of the profit sharing payment, as determined in the relevant collective bargaining agreements. Compensation based on shares is not proportional to working time. The preferred share price is calculated using the average price of ITUB4 on BM&FBovespa in the preceding thirty days.

We also have an institutional program called the Partners Program (Programa de Sócios), comprised of members of management and employees, in each case approved by our Personnel Committee, having outstanding contributions and performance. Eligible employees are entitled to use part or their total annual variable compensation to purchase our preferred shares, or Own Shares. If they hold the ownership of these Own Shares for 3- and 5-year terms as from the initial investment, free of any liens or encumbrances and of other suspension conditions set forth in the program regulation, the return on investment will be made through the receipt of our preferred shares, or Partners Shares. If they hold the ownership of these Own Shares for 3- and 5-year terms as from the initial investment, free of any liens or encumbrances and of other suspension conditions set forth in the program regulation, the return on investment will be made through the receipt of our preferred shares, or Partners Shares. If they hold the ownership of these Own Shares for 3- and 5-year terms as from the initial investment, free of any liens or encumbrances and of other suspension conditions set forth in the program regulation, the return on investment will be made through the receipt of our preferred shares, or Partners Shares. We maintain our ongoing relationship with labor entities. In addition, we allow labor unions to run unionization campaigns and when requested, we hold meetings between unions, our managers and/or employees.

We provide several benefits established in the relevant collective bargaining agreements with unions, which represent many categories of employees. The conditions of such benefits are set forth in the relevant collective bargaining agreements (allowances for meals, nursery/nanny care for children, transportation, etc.). There are also additional benefits, such as: (i) medical and dental care plans, (ii) private pension plans, (iii) group life insurance, (iv) psychosocial services, and (v) personalized treatment in the use of banking products and services. The granting of these benefits may vary according to the category of employees and/or market or regulatory considerations with respect to the relevant jurisdictions applicable to a particular employee. GRI G4-LA2

**Labor Relations** GRI G4-11

We maintain an ongoing dialog with the labor unions representing all our employees in different professional categories. Among our principles utilized in our relations with labor unions are respect, transparency and direct interaction. Our priority is to find creative and negotiated solutions to minimize possible differences and points of conflict involving our employees.

We guarantee our employees the right to free association and recognize the rights and privileges of those elected to executive positions in the unions in compliance with Brazilian law and the current collective labor agreements of each professional category, to which we are a party. In addition, we allow labor unions to run unionization campaigns and when requested, we hold meetings between unions, our managers and/or employees.

We maintain our commitment to prioritize collective negotiations and a permanent agenda of issues to be discussed with the unions. This agenda allows us to resolve conflicts more efficiently and reinforces our commitment to maintaining an ongoing relationship with labor entities.

All our employees in Brazil enjoy the support of collective labor agreements that guarantee rights in addition to those provided under applicable labor laws as well as other benefits that may be granted to our employees on a non-recurring basis in accordance with our policies.

During the collective negotiations involving bank employees in 2015, the financial sector was subject to a 14 business day strike, affecting an average of 37.7% of our branches. As with previous years, these stoppages did not result in losses for Itaú Unibanco, given that the movement was widespread, affecting the entire Brazilian financial system. Further, since a growing volume of operations are conducted through electronic channels, the impact of shutdowns on our operations was minimal, allowing our customers to use alternative channels to execute their operations with the bank.

During the collective negotiations of bank employees in 2014, our branches were subject to strikes for 5 business days, resulting in approximately an average of 25.4% of branches being closed during the period.

During the collective negotiations with bank employees in 2013, our branches were subject to strikes for 18 business days, resulting in approximately 31.6% of our branches being closed during this period.

All such protests and strikes, which affect our branches, have only had a partial impact since some of the branches are able to reopen during the course of the day and there has never been a total shutdown in our branch network.
Brand
Our brand aims to promote positive changes in the lives of people and in society. We deliver products and services – focused on our client’s needs – that reflect our continuous efforts to provide the best experience for everyone who interacts with us, every day. Our efforts to foster financial education permeate our entire organization and encourage people to have a more balanced relationship with their money by choosing the best type of credit and by planning their investments more efficiently. Our responsibility for the development of the nation is at the very heart of our brand, which is why, in addition to the transformation that is inherent to our core business, we also invest in projects related to education, culture, sports and urban mobility.

In 2015, we were once again ranked at the top of the Interbrand ranking of most valuable Brazilian brands with an estimated value of R$24.5 billion. This is the twelfth consecutive year in which we have been at the top of this ranking. The analysis is based on our brand’s ability to generate financial results, influence the client selection process and ensure long-term demand. GRI G4-9

The #issomudaomundo (#thischangestheworld) platform, which guides our causes and our investments in various projects, continues to illustrate our institutional campaigns. This year, with the Leia para uma criança (Read to a child) campaign, we reached an impressive milestone: over 45 million books were donated. This shows that we continue to mobilize clients and non-clients to make a difference in children’s lives.

Our capacity to inspire and engage people can also be seen on social media. We publish a series of articles and videos that express our point of view and tell stories that encourage people to implement positive changes in their lives. In 2015, we reached 192 million views, which means we remain the largest Brazilian brand channel on YouTube and the largest in the world from the financial sector.

Social media is increasingly important to our strategy. This year, we reached 7.6 million fans on Facebook. We have the largest Facebook community of any bank in the world and one of the 15 largest fan bases of any Brazilian brand, according to Socialbakers. Our Twitter profile has over 594 thousand followers, making us number one in the country’s financial sector. We also have 64.7 thousand followers on Instagram.

We continue to monitor all of our social media profiles 24 hours a day, 7 days a week. We have a specific structure to interact with the public on all matters related to Itaú: questions, suggestions, comments and complaints. We have received more than 549 thousand mentions on social media, 74% of which were positive and neutral comments, according to Gauge, a consulting agency that assists us in the analysis of social media data.

2015 was a special year for Itaú. We reinforced our positioning as a digital bank by combining innovative technology with our vision of making people’s daily lives easier through increasingly simpler financial transactions. We have started using emoticons in our communications to make the bank more relatable to people in their daily lives.

Patents
We are the owners of patents and patent applications in Brazil and abroad for a method for generating a virtual keyboard for entry of a security code or user PIN number. Applications related to this patent are still pending analysis in Brazil, Uruguay and Venezuela. We are the owners of a patent for such method in Germany, Argentina, Austria, Belgium, Chile, Denmark, Spain, Finland, France, Greece, the Netherlands, Ireland, Italy, Luxembourg, Peru, Portugal, United Kingdom, Sweden and Switzerland. Additionally, we are the owners of patent applications for a method to identify a financial institution’s access PIN and for a method, user device and system to submit financial transaction information, which are still pending analysis in Brazil.

In Brazil, the effective term for protection of invention patents is 20 years from the date when the patent application is made. The effective terms and requirements for extension of patents outside of Brazil depend on the laws of each country or region where a patent is registered.

Main Stockholders
We are controlled by IUPAR, which is jointly controlled by Itaúsa and Cia. E. Johnston. Itaúsa is controlled by members of the Egydio de Souza Aranha family, and Cia. E. Johnston is controlled by members of the Moreira Salles family.

Except for the shares indirectly owned by our controlling stockholders (through their participation in IUPAR and Itaúsa), the members of our Board of Directors and our Board of Officers, on an individual basis and as a group, beneficially own less than 1% of our common shares and less than 1% of our preferred shares.

According to Brazilian regulation and as approved by the Central Bank, foreign investors may have a maximum of 30% of our common shares.
The table below presents information on the persons that, to our knowledge, held over 5% of our common or preferred shares as of March 31, 2016:

(1) Share ownership information provided by stockholder.

As of March 31, 2016, 12,647,969 common shares and 1,932,291,275 preferred shares were held by non-Brazilian investors (calculated based on the investors’ addresses indicated in our records related to the shares that are in our custody), representing 0.4% and 67.1%, respectively, of the total of each class outstanding.

Ownership Structure

The following chart is an overview of the ownership structure of the Itaú Unibanco group as of March 31, 2016, which includes our controlling stockholders and some of our main subsidiaries:

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 2.4a I - Summary of main practices for further information about our subsidiaries.
IUPAR stockholders’ agreement
Itaúsa and Cia. E. Johnston have a stockholders’ agreement that governs their relationship as controlling stockholders of IUPAR and, indirectly, as our controlling stockholders and as controlling stockholders of our subsidiaries. Please refer to www.itau.com.br/seuporte/pt/itauinges.pdf, for further details. Its main terms and conditions are described below.

The Board of Directors and the Board of Officers of IUPAR are composed of four members each: two members are nominated by Itaúsa and two members by Cia. E. Johnston for each one of these bodies. Pursuant to the IUPAR stockholders’ agreement, IUPAR shares held by Itaúsa and Cia. E. Johnston cannot be transferred to third parties until November 3, 2018. After this period, if any stockholder party to the IUPAR stockholders’ agreement decides to transfer its IUPAR shares to a third party, the other stockholders will have right of first refusal or tag-along rights. If both Itaúsa and Cia. E. Johnston decide to transfer all of their shares held in IUPAR or the total shares held by IUPAR in Itaú Unibanco Holding to third parties, Itaúsa may exercise its tag-along rights, so as to include in the sale all or part of the shares directly held by it in Itaú Unibanco Holding. All shares held directly by Itaúsa in Itaú Unibanco Holding may be freely transferred.

IUPAR stockholders’ agreement is effective for a 20-year period from January 27, 2009, and may be automatically extended for successive 10-year periods, except if otherwise indicated.

Transfer of control and increase of interest in the share capital
Subject to the provisions of the IUPAR stockholders’ agreement, our Bylaws do not contain any provision that is intended to delay, defer or prevent a change in our shareholding control or that would operate only with respect to a merger, acquisition or corporate restructuring of the Company or its subsidiaries. However, according to Brazilian regulation all such transactions must be carried out in accordance with procedures established by CMN and be previously approved by the Central Bank.

Brazilian legislation provides that acquisition of control of a publicly held company triggers the requirement for the acquiring party to make a tender offer for all outstanding common shares, at a price equivalent to at least 80% of the price per share paid to the controlling stockholders. Additionally, our Bylaws establish the same price rule for the holders of our preferred shares.

Such legislation also requires our controlling stockholders to make a tender offer for all of our shares if they increase their interest in our share capital to a level that materially and negatively affects the liquidity of our shares.

Distribution Channels GRI G4-FS13
We provide integrated financial services and products to our clients through a variety of distribution channels. In addition to our traditional portfolio of banking products, we offer products such as insurance, investments, foreign exchange and brokerage. Our portfolio of corporate products suited for large companies is managed by our wholesale banking segment.

Our distribution network is divided into standard channels, which include branches, Customer Site Branches (which are banking service centers located at certain corporate clients), or CSBs, Automatic Teller Machines, or ATMs, and telephones, and digital channels, such as internet banking and mobile banking. The volume of banking transactions carried out through internet and mobile channels has grown significantly in recent years.

Volume of transactions (in %)

Standard Channels (branches, CSBs and ATMs) GRI G4-FS13
Our branch network serves as a distribution network for all of the products and services we offer to our clients. As of December 31, 2015 our standard branch network reach 3,910 branches. We have 25 branches in Brazil, especially refurbished for shopping malls, with a new visual identity and service proposal. The spaces present a new concept of client service, with a differentiated layout inspired by the design of a retail store. Focusing on the relationship with the client as a way to strengthen contact with the public, these branches are open from 12 p.m. to 8 p.m., with exclusive service to our clients from 5 p.m. on. We intend to extend this concept in the next few years.

Similarly, we also implemented changes in service hours for certain branches located in commercial hubs, which now open at 8 a.m. or 9 a.m. and close at 6 p.m. or 8 p.m. This initiative was designed to adapt our services to the routine of our clients. We intend to extend this model to other malls and trade centers in Brazil in the next few years.

The range of services provided at CSBs may be the same as those provided at a full service branch, or more limited according to the size of a particular corporate client and its needs. CSBs represent a low-cost alternative to opening full service branches. In addition, we believe CSBs
provide us with an opportunity to target new retail clients while servicing corporate clients and personnel.

ATMs are low-cost alternatives to employee-based services and give us points of service at significantly lower costs than branches. Our clients may conduct almost all account-related transactions through ATMs. We also have arrangements with other network operators, such as the brands “Cirrus” and “Maestro”, to allow our clients to use limited services through their networks.

Since 2012, we have made differentiated services available to certain registered clients. In addition to services available to our clients in general, these registered clients are able to withdraw funds and check current account balances and statements just by using biometric technology. Biometrics enables these registered clients to carry out transactions with fingerprint identification, without typing a password or using a card, providing more security and convenience for our clients. To be able to use biometrics, clients simply register with any Itaú Unibanco branch.

**Digital Channels (internet and mobile banking) GRI G4-FS13**

As a result of our strategy to be a “digital bank” based on the profile of our clients, our transactions through digital channels have already reached 67% of our total client transactions in 2015, followed by new features that have been made available through this channel throughout the year.

The internet banking channel became important in recent years given the continuous growth in demand for online transactions. In a traditional bank, the customer goes to the bank, while in a digital bank the bank goes to the customer. Since 1998, we have been transforming the experience of our customers, offering convenience through services and products to our individual and corporate clients, such as money transfers, payments, credit, investments, insurance and others.

Mobile banking is our fastest growing channel and became one of the main channels for the bank, representing 59.7% of our customer base of digital channels in December 2015. One of our most important recent technological innovations has been in mobile banking applications, which allow clients to access their accounts and perform banking transactions using smartphones or tablets through applications designed with a focus on innovation, transaction effectiveness and high-level experience for the customer. In the fourth quarter of 2015, we had a significant increase of 32.2% in users in our mobile banking applications when compared to the fourth quarter of 2014. Accordingly, we are investing in our mobile banking channel across multiple applications, or apps. With the launch and updates, mobile phones have become increasingly better tools to meet the needs of our customers in a safe and practical environment. Recently, we launched the Itaú Pagcontas app, a unique application for the payment of bills, providing more convenience to our customers.

For our operations in Latin America, we also implemented the Itaú tokpag app for individual clients in Paraguay, an application that allows transfers of money using the mobile phone number quickly and safely.

The table below shows our branches, CSBs and ATMs network broken down by types of services provided and geographic distribution, as of December 31, 2015, 2014 and 2013:

(1) Since December 31, 2014, total branches include digital branches and business branches, which are considered points of service by the CMN Resolution No. 4,072/2012.

(2) 79.2% of our branches were located in the states of São Paulo, Rio de Janeiro and Minas Gerais in the southeast of Brazil, Paraná in the south of Brazil, and Goiás in the center-west of Brazil.

**Our business GRI G4-4**

**Overview**

In 2015, we changed our organizational structure. The previous four segments (Commercial bank – Retail, Consumer Credit – Retail, Wholesale bank and Activities with the Market and Corporation) were reorganized and now consist of three segments: (i) Retail Banking, (ii) Wholesale Banking, and (iii) Activities with the Market and Corporation. The Retail Banking segment now covers the former segments Commercial Banking – Retail and Consumer Credit – Retail, with the transfer of operations from Private Banking and Latam to the Wholesale Banking segment.
Through these new operational segments, we continue to provide a broad range of banking services to a diverse client base that includes individuals and corporate clients, on an integrated basis as follows:

The **Retail Banking** segment offers services to a diversified base of account holders and non-account holders, individuals and companies. The segment includes retail clients, high net worth clients (Itaú Uniclasse and Personnalité) and the corporate segment (very small and small companies). This segment comprises financing and lending activities carried out in units other than the branch network, and offering of credit cards, in addition to operations with Itaú BMG Consignado. The Retail Banking segment represents an important funding source for our operations and generates significant financial income and banking fees.

The **Wholesale Banking** segment is responsible for our private banking clients, the activities of Latin America units, our middle-market banking business, and the activities of Itaú BBA, which is the unit in charge of corporate and investment banking activities. Our wholesale banking management model is based on building close relationships with our clients by obtaining an in-depth understanding of clients’ needs and offering customized solutions. Corporate activities include providing banking services to large corporations and investment banking activities include offering funding resources to the corporate sector, including through fixed and variable income instruments.

The **Activities with the Market and Corporation** segment manages interest income associated with our capital surplus, subordinated debt surplus and the net balance of tax credits and debits, as well as net interest income from the trading of financial instruments through proprietary positions, management of currency interest rate gaps and other risk factors, arbitrage opportunities in the foreign and Brazilian domestic markets, and mark-to-market of financial instruments. This segment also includes our interest in Porto Seguro.

We carry out a wide range of operations outside of Brazil with units strategically located in the Americas, Europe and Asia. Our international presence creates significant synergies in foreign trade finance, in the placement of Eurobonds and in the offering of more sophisticated financial transactions to our clients.

Please refer to section Performance, item Financial Performance, Results, and section Performance, item Consolidated Financial Statements (IFRS), Note 34 – Segment Information, for further information about our segments.

The diversification of our business is reflected in the changing composition of our loan portfolio over the last few years, focusing on origination in lower risk segments with increased guarantees. We are constantly seeking to implement and focus on the offer of new products and services that add value to our clients and diversify our sources of income, allowing for growth of our non-financial income arising mainly from banking service fees, income from bank charges and from insurance, pension plan and capitalization operations. Some details of our loan portfolio and services are presented as follows:

**Credit Cards and Commercial Agreements**

Through proprietary and partnership operations with major retailers, telephone carriers, automakers and airline companies established in Brazil, we offer a wide range of credit and debit cards to more than 60.3 million current and non-current account holders (in number of accounts as of December 31, 2015).

Our main goals in the credit card business are to continually grow our portfolio, improve its profitability, manage the quality of our assets and pursue the total satisfaction of our clients. To this end, our credit card division focuses on the development of new products, assessment of our partnerships, control of the credit quality of our portfolio and on more efficient cost management.

The Itaucard 2.0 is the only credit card in Brazil consistent with the standard international interest model, which charges the revolving interest rates from the date of purchase instead of the invoice due date, allowing lower interest rates. A total of 6.7 million cards have been issued since its launch in August 2012.

In September 2014, we launched the **TudoAzul Itaucard** co-branded card in partnership with Azul Linhas Aéreas, one of the main airlines in Brazil. This action is aligned with our goal of offering a diversified portfolio, providing the best suited product to our clients. In February 2015, the **TudoAzul Itaucard** received an award from Flightglobal Magazine, one of the world’s leading commercial aviation publications, with respect to its loyalty awards. In selecting the winner of the award, Flightglobal took into consideration various aspects for this recognition, such as airplane tickets purchase and travel convenience, plus the traditional benefits already present in the Itaucard platform.

In November 2015, Itaucard and Netshoes, Brazil’s largest online provider of sports apparel, reached an agreement to launch a co-branded credit card that will offer benefits and exclusive discounts, in addition to a complete digital experience.

Itaucard has made innovations in the way it interacts with its Facebook followers by using more informal language, even using references to classic “memes”. A new campaign uses “emoticons” to recreate popular videos from the Internet, aimed at disseminating the Digital Statement and the Itaucard chat application. The videos have been watched by over 4 million people, between June 2015 (launch of the campaign) and December 2015.

The Itaucard app has made strides in transforming the user experience with respect to its credit card. With new functionalities, it now has the Virtual Card, which generates a unique credit card number to be
used in an online transaction, bringing more security and practicality in the internet. Another new feature of the app is the Timeline, in which the purchases and transactions can be seen in real time. Live representatives are available to communicate by app chat 24 hours per day and are available for clients to ask questions and get the answers any time and anywhere they may be. The app was broadly marketed through a number of media platforms, between the end of October and beginning of November 2015, after which there was a 33% increase in the app downloads until December 2015.

The table below shows the market position and information about competitors for the business listed below:

### Payroll Loans

A payroll loan is a loan with fixed installments that is directly deducted from the borrower’s payroll to the bank’s account without being recorded in the debtor’s account. Our strategy is to expand our activities in businesses with historically lower risk, achieving a leading position in the offering, distribution and sale of payroll loans in Brazil.

To expand this business and complement our strategy, on July 9, 2012 we entered into an association agreement with Banco BMG S.A. to offer, distribute and market payroll loans originated by that financial institution. Itaú BMG Consignado, the entity used for purposes of this joint venture, began operations in December 2012 and is present throughout the Brazilian territory. This association was designed with the purpose of diversifying our loan portfolio, supplementing our payroll loan strategy, and improving the risk profile of our portfolio of loans to individuals.

Itaú BMG Consignado also enables us to expand our business in the payroll loan sector in line with our values and transparency principles, following best management practices and policies.

Our strategy of higher growth in the National Social Security Institute (Instituto Nacional do Seguro Social, or INSS) beneficiaries sector, combined with certain credit policies we adopted, allowed our portfolio evolution to be followed by a decrease in delinquency levels.

This increase in payroll loans resulted in a higher share of payroll loans within the personal loan portfolio, from 21.8% as of December 2014 to 24.3% as of December 2015.

The table below shows the market position and information about competitors for the business listed below:

### Vehicle Financing

As of December 31, 2015, our portfolio of vehicle financing to individuals amounted to R$20.1 billion, a 30.9% decrease from the same period of the previous year. The average loan to value ratio of our vehicle portfolio (the ratio of a loan to the value of an asset purchased) was 70.8% in December 2015, following a downward trend since the previous year, when the loan to value ratio reached 73.7% as of December 31, 2014. Since 2012, we have reduced our risk exposure in this sector and focused on clients with better risk profiles, which allowed us to improve the credit quality of our vehicle loan portfolio.

From January to December 2015, the average term of vehicle financing was 40 months, and half of the transactions were carried out with terms of up to 36 months.

The table below shows the market position and information about competitors for the business listed below:
Real Estate Financing and Mortgages

Our mortgage business is dedicated to:

- Creating loyalty – the relationships established in this sector are typically long-term;
- Contributing to the social and financial development of our clients; and
- Being aligned with our strategy of investing in lower risk businesses.

We have been leaders in mortgage loans to individuals among Brazilian private banks from 2008 to 2015, which reflects our focus on this business aligned with our strategy of migrating to lower risk portfolios.

We offer products through our network of branches and brokers, as well as through our partnership with RE/MAX and our joint venture with LPS Brasil Consultoria de Imóveis S.A. (Lopes), called "Credipronto". These two long-term agreements provide us with exclusive real estate financing origination at a greater number of locations throughout Brazil.

One competitive advantage we have is the speed of our credit approval process and in the formalization of the relevant loan documentation. As of December 31, 2015 the average time between finalizing a financing and our receipt of the requisite documentation was 13 days, which we believe is a significantly shorter time period than those of our competitors.

As of December 31, 2015, our outstanding loans to individuals were granted in the form of first mortgages and 99.6% were guaranteed by mortgage liens. In 2015, our entire credit origination was based on the constant amortization system and this portfolio loan to value ratio was 43.7% compared to 42.4% in 2014.

Euromoney’s Real Estate Survey – In September 2015, we were ranked first in three categories for Latin America and three categories for Brazil. This survey acknowledges the best companies operating in the real estate sector worldwide.

Microcredit

Our microcredit unit offers to low-income entrepreneurs who do not have the necessary attributes to participate in the traditional financial system the chance to expand and develop their businesses. Itaú Microcrédito’s loan officers reach out to new and existing clients, offering loans (coupled with free loan-protection microinsurance), and point of sale, or POS, machines. Loan officers are also responsible for disseminating information regarding financial concepts related to the responsible use of money.

A major benefit arising from this initiative is that micro-entrepreneurs start to develop a relationship with the formal financial system. Our microcredit activities are split into two levels:

- 1st Tier Lending: includes working capital loans, or loans for upgrades and fixed assets provided to formal and informal business people engaged in small business activities. Any granting of loans requires the presence of a trained microcredit loan officer; and
- 2nd Tier Lending: loans to micro-entrepreneurs through partner civil society organizations registered with the National Productive Microcredit Program. We are committed to promoting microfinance best practices and trading experiences with partner organizations.
Our investment in microcredit is part of our strategy to act as agents of transformation in society. Microcredit is also important as it reinforces our vision of sustainability and increases our ability to spread our knowledge in financial education. The end goal is to create a virtuous cycle in which our bank stimulates the social and economic development of Brazil’s low-income population.

**Consortia**

A consortium is a self-financing system created in Brazil with a view to foster savings for the purchase of vehicles and other assets, such as real estate. Pursuant to consortium agreements, participants are pooled according to the specific asset they elect to purchase (e.g., a vehicle of a particular manufacturer and model), which will be paid for in installments. Payments made by the participants of a given consortium are used to create a “pool” of funds, which are used by one or more members of the consortium at a time to acquire the assets elected by the participants, e.g., once a month, and such members continue to make payments as scheduled. Generally, participants may receive the asset, (i) during the course of the consortium agreement (before all installments are paid), if the participant pays an amount (in addition to the regularly scheduled installment due) that is higher than such an additional amount offered by any other consortium member for that period, or (ii) during the course of the consortium agreement (before all installments are paid), if the participant is selected by random drawing, organized by the bank, to receive the asset, while continuing to pay for the remaining installments as scheduled.

As consortia are regarded as a provision of services under Brazilian law, the management of consortia does not give rise to default risk or regulatory capital requirements for us.

Since consortia do not charge interest rates, our revenues come mainly from the administration fee charged to clients.

Given these characteristics, this business is strategic to us, contributing to revenue diversification and to a more complete product portfolio offering to our clients. In December 2015, we reached the following results:

- 415.0 thousand in active contracts, with a growth of 3.3% when compared to December 2014;
- R$11.8 billion in balance of installments receivables, with a growth of 8.0% when compared to December 2014; and
- R$683.7 million in administration fees from January to December 2015, with a growth of 12.0% when compared to the same period of 2014.

**Source: Central Bank.**

**Merchant Acquirer**

REDE (formerly Redecard) is one of the two largest multi-brand acquirers of credit, debit and benefit card transactions in Brazil. REDE’s activities include merchant acquiring, capturing, transmission, processing and settlement of credit and debit card transactions, prepayment of receivables to merchants (resulting from sales made with credit cards), rental of point-of-sale terminals, or POS, check verification through POS terminals, and the capture and transmission of transactions using coupons, and loyalty programs.

Our goal is to be the main partner for merchants that are seeking higher business potential with a focus on IT investments, infrastructure and POS modernization. For those partners, REDE offers a series of products that follow the market’s latest trends. Among these products we highlight Mobile REDE, which captures the transaction using a device attached to the smartphone or tablet. It allows card reading and input of purchase data for client’s signature, reinforcing our position in new payments solutions for freelancers and micro entrepreneurs. Through e-REDE we intensified and improved the quality of our electronic payments platform, offering not only the acquisition service, but also an antifraud gateway. We offer a single platform for efficient, fast and complete solutions for online payments using a robust antifraud system.

We have experienced significant growth in the e-commerce facets of our merchant acquiring business. In September 2014, we acquired maxiPagol, a Brazilian electronic payment means company focused on e-commerce, for purposes of improving account safety and convenience to our customers, as well as otherwise maintaining our strong digital platform.

In October 2015, we acquired 50% of the capital stock of ConectCar, a company which operates in the payment services business that provides intermediation services for the automatic payment of tolls, gas and parking fees. The acquisition is in line with REDE’s strategy of developing innovative electronic payment channels with high growth potential in the Brazilian market, underscoring our commitment to quality in the services provided to our clients.
The following table sets forth the financial volume of transactions and the amount of transactions of credit and debit cards processed by us in 2015, 2014 and 2013:

**Other products and services portfolio**

**Insurance**

Our insurance business provides a wide range of life and personal accident products, automobile and property insurance, credit insurance and travel insurance. Our insurance core activities, which include our 30% stake in Porto Seguro, consist of mass-market insurance products related to life, property and credit. These products are offered in synergy with retail channels – our branch network, partnership with retailers, credit card clients, real estate and vehicle financing, personal and payroll loans – and the wholesale channel. These products have characteristics such as a low loss ratio, low volatility in results and less use of capital, making them strategic and increasingly relevant in the diversification of the conglomerate’s revenues. Other insurance activities correspond to extended warranty, health insurance, our stake in IRB – Brasil Ressseguros S.A. and other activities.

The table below shows the market position and information about competitors for the business listed below:

<tr>
<td>Insurance</td>
<td>Giving effect to our 30% ownership interest in Porto Seguro S.A., we reached 11.1% of share in total insurance market based on earned premiums, excluding VGBL (Redeemable Life Insurance), from January to December, 2015, positioning us as the third largest insurance provider in this segment in Brazil. Considering only our insurance core activities, our market share reached 14.3% of this market in the same period.</td>
<td>The Brazilian insurance market is highly competitive. Our main competitors in this sector, excluding health insurance providers, are affiliated with large commercial banks, such as Banco Bradesco S.A. and Banco do Brasil S. A. Although there is a great concentration of Brazilian banks, this market is still dispersed, especially with players acting in specific niches. As of November 2015, this industry consisted of approximately 154 insurance companies of various sizes, including 41 conglomerates and 48 independent companies. We believe that our alliance with Porto Seguro S.A. resulted in gains in scale and efficiency for us.</td>
</tr>
</tbody>
</table>

Source: SUSEP. Insurance core activities include: Personal Insurance (Life, Personal Accidents, Credit Insurance, Educational, Travel, Unemployment, Funeral Allowance, Serious Diseases, Random Events), Housing, Multiple Peril and Domestic Credit – Individuals.

**Private Pension Plans**

We offer private pension plans to our clients as an option for wealth and inheritance planning and income tax purposes (these products are tax-deferred). We provide our clients with a solution to ensure the maintenance of their quality of life, as a supplement to government plans, through long-term investments.

The contributions reached R$17.3 billion from January to December 2015, mainly due to the increase in our VGBL product, and technical provisions, which increased 19.9% in the same period, totaling R$124.6 billion on December 31, 2015.

### Premium Bonds (títulos de capitalização, or capitalization plans)

Premium bonds are fixed deposits products pursuant to which a client makes a one-time deposit or monthly deposits of a fixed sum that will be returned at the end of a designated term. Ownership in premium bonds automatically qualifies a customer to participate in periodic raffles, each time with the opportunity to win a significant cash prize. In 2015, we distributed R$61.2 million in raffle prizes for 3,128 clients.

We currently market our premium bonds portfolio of products through our branch network, electronic channels and ATMs, and we are currently developing new technologies for channel diversification. Revenues from capitalization plans increased 5.2% in 2015 when compared to 2014.

Focusing in corporate responsibility principles, since August 2014 we maintain a partnership with Instituto Ayrton Senna, a non-profit organization which focuses on promoting quality of public education in Brazil. A portion of the revenues upon purchase of PIC, our bank’s premium bonds, is provided to the Instituto Ayrton Senna’s education projects.

### Retail Banking

We have a large and diverse portfolio of products, such as credit and investments, and services to address our clients’ needs. Our retail banking business is segregated according to customer profiles, which allows us to be closer and understand our customer’s needs, enabling us to better offer the most suitable products to meet their demands.

**Itaú Retail Banking (individuals)**

Our core business is retail banking and through our retail operation we offer a dedicated service structure to consumer clients throughout Brazil. Our client service structure is targeted to offer the best solutions for each client profile. We classify our retail clients as individuals with a monthly income up to R$4,000.

Our Itaú Uniclass services are available at every branch for clients who earn more than R$4,000 and below R$10,000 per month, depending on the region, an innovation for Brazil’s banking sector. We offer exclusive services to our Itaú Uniclass clients, including investment advisory services, exclusive cashiers, special telephone service and higher credit limits and a large team of dedicated relationship managers.

Our retail network is focused on building lasting, transparent relationships with our clients.

Itaú Personnalité (banking for high-income individuals)

We began providing customized services to high-income individuals in 1996 with the creation of Itaú Personnalité, which currently serves individuals who earn more than R$10,000 per month or have investments in excess of R$100,000.

Itaú Personnalité is focused on providing (i) financial advisory services by managers who understand the specific needs of our higher-income clients, (ii) a large portfolio of exclusive products and services and (iii) special benefits based on the type and length of relationship with the client, including discounts on various products and services. Itaú Personnalité services its clients through a dedicated network comprised of 288 branches, located in the main Brazilian cities. Itaú Personnalité clients also have access to our retail banking network of branches and ATMs throughout the country, as well as through services by internet, telephone and mobile banking. For clients who prefer remote services, Itaú Personnalité provides a “digital bank platform” where relationship managers service clients through telephone, email, SMS and videoconference from 7 a.m. to midnight on business days.

Itaú Empresas (very small and small companies)

To meet the needs of our corporate clients we offer customized solutions and provide detailed advice on all products and services to:

- Very small companies: a client base comprised of companies with annual revenues up to R$1.2 million served by 2,153 banking branches with 2,417 managers as of December 31, 2015; and
- Small companies: a client base comprised of companies with annual revenues from R$1.2 million to R$30 million served by 360 business offices with 1,772 managers as of December 31, 2015.

All our managers are certified by the Brazilian Financial and Capital Markets Association (ANBIMA), and throughout the year they receive training to offer the best solutions for each client profile. Our clients rely on our ability to provide products, terms and rates customized to their needs.

Our strategy is to capture market opportunities by meeting the needs of these companies and their owners, particularly with respect to the management of cash flow, credit facilities, investment needs and services.

As was the case in 2014, improving our credit portfolio and reducing our overdue loans volume remained our goal in 2015; credit processes, policies and tools were enhanced and we intensified our revenue collection.

Focused on meeting our clients’ needs, we expanded “Conta Certa,” for more than 90% of our customers. “Conta Certa” provides an account plan with customizable service bundles, and we extended our offerings in electronic channels enabling clients to borrow and purchase a wide range of services without having to go to one of our branches. In 2015, more customers joined the “Flex” plan. With this plan, our customers have a different commercial regime, which allows them to receive their credit card sales proceeds within 48 hours after sale. In addition, we improved our integrated pricing loans, cash services and acquiring services.

Improving and simplifying our operational and commercial processes were also in our agenda as we worked on simplifying time-consuming processes such as current account opening and organized our operational and commercial units to function and report in a more standardized manner, resembling a franchise model.

Public Sector

Our public sector business operates in all divisions of the public sector, including the federal, state and municipal governments (in the Executive, Legislative and Judicial branches).

To service public sector clients, we use platforms that are separate from our retail banking branches, with teams of specially trained managers who offer customized solutions in tax collection, foreign exchange services, administration of public assets, payments to suppliers, payroll for civil and military servants and retirement. Based on these platforms, we have a significant amount of business with public sector clients, particularly in those Brazilian states where we acquired previously state-owned financial institutions. In December 2015, we had 4,983 public sector clients and 12 offices in Brazil.

Wholesale Bank

Wholesale Bank is the segment responsible for banking operations of large (annual revenues over R$300 million) and middle-market companies (annual revenues from R$30 million to R$300 million) and investment banking activities. It offers a wide range of products and services to the largest economic groups of Brazil and of other countries in Latin America.

Our activities in this business range from typical operations of a commercial bank to capital markets transactions and advisory services for mergers and acquisitions. These activities are fully integrated, which enables us to achieve a performance tailored to our clients’ needs.

One of the most important features of our Wholesale Bank is the set of initiatives linked to improving efficiency in our operations. These continuous actions, which are expected to continue to grow in the coming years, are designed to increase revenues, improve processes and reduce costs, based on a high-quality service to our clients.

Investment Banking

Our investment banking business carried out through Itaú BBA, assists companies raising capital through fixed income and equity instruments in public and private capital markets, and provides advisory services in mergers and acquisitions. We advise companies, private equity
funds and investors in the structuring of variable income products and in mergers and acquisitions. From research to execution, we believe we offer a wide portfolio of investment banking services with respect to Brazilian and other Latin American companies.

In investment banking, the fixed income department acts as bookrunner or manager in the issuance of debentures, promissory notes and securitization transactions.

**The Banker’s Investment Banking Awards 2015** – Promoted by *The Banker* magazine, Itaú BBA was recognized as the “Most Innovative Investment Bank in LatAm 2015”.

**World’s Best Investment Banks 2015** – Organized by Global Finance, we were selected as the “Best Investment Bank in Latin America”, “Best Investment Bank in Brazil”, “Best Investment Bank in Argentina”, “Best M&A Bank in Latin America” and “Best Equity Bank in Latin America”.

**Itaú Private Bank**

With a full global wealth management platform, we are the market leaders in Brazil with a market share exceeding 26% and one of the main players in Latin America. Our multidisciplinary team of more than 650 professionals, which is comprised of 110 private bankers, as of December 31, 2015, supported by a team of investment advisers and product experts, provide comprehensive financial services to clients, understanding and addressing their needs from our eight offices in Brazil and in our offices located in Zurich, Miami, New York, Santiago, Asuncion and Nassau.

Our clients have access to a complete portfolio of products and services, ranging from investment management to wealth planning, credit and banking solutions. In addition to our in-house customized products and services, we offer our clients access to an open architecture of alternatives from third-party providers.

Aligned with our vision to be the leading bank in sustainable performance and customer satisfaction, we decided to focus our strategic priorities, and we intend to continue to do so during the next year, on the following Itaú Private Bank initiatives:

- Being the Private Bank leader in client satisfaction;
- Adding value to client and stockholders with a complete offering and long term proactive advisory services;
- Continuing to invest in our international platforms to enhance Brazilian clients’ experience and expand our operations in Latin America;
- Increased operational efficiency of our platform through continuous investments in our IT platforms; and
- Maintaining a focus on risk management and regulatory considerations.

**Global Private Banking Awards 2015** – Sponsored by the *Professional Wealth Management* and *The Banker* magazines in October 2015, we were acknowledged for the fifth time as the “Best Private Bank in Brazil”.

**25th Global Wealth Summit & Awards** – In October 2015, we were chosen for the fifth time as the “Outstanding Global Private Bank in Latin America”, in the award promoted by Private Banker International.

**The World’s Best Private Banks 2015** – Organized by *Global Finance* magazine, we were recognized as the “Best Private Bank in Brazil” and “Best Private Bank in Latin America”.

**Private Banking Survey 2015** – Promoted by *Euromoney* magazine, we were recognized for the seventh time in the “Best Private Banking Services Overall in Brazil”.

**Itaú Asset Management**

Itaú Asset Management is responsible for managing clients’ assets. It has positioned itself as the largest private asset manager in Brazil, and one of the leading institutions of its kind in Latin America, by having over R$473.1 billion, according to ANBIMA, in assets under management, more than 260 professionals present in 8 countries, and over 50 years of experience in managing resources.

Furthermore, it has one of the biggest research teams in Latin America, which is composed of professionals focused on specific industries and investment strategies. The consistent investment in market research allows us to analyze investment opportunities in detail, under multiple perspectives. Through flagship strategies, we offer a range of customized products and solutions, tailored to the uniqueness of each client segment, considering different investment objectives and risk profiles. Besides, we have a committed risk management team, responsible for the support of the operation.

Kinea, an alternative investments management company of Itaú Unibanco, held R$6.9 billion in managed assets at the end of 2015.

**Securities Services**

Itaú Securities Services business units provide (i) local custody and fiduciary services, (ii) international custody services, and (iii) corporate solutions that act as transfer agent and stockholder servicer for Brazilian companies issuing equity, debentures, promissory and bank credit notes. We also work as guarantor in transactions for project finance, escrow accounts and loan and financing contracts.

Our focus is to be a full service provider for institutional clients by offering integrated solutions and an exclusive channel with specialized professionals. To be efficient, these businesses have the technology as a foundation.

Pension funds, insurance companies, asset managers, international institutional investors and equity and debt issuers are our primary clients in these businesses, representing approximately 3,429 clients in 22 countries that reached R$2.3 trillion of assets under service as of December 31, 2015, which includes investment funds, underwriting, pension funds, trustee and brokerage services.

Our International Business  GRI G4-6 | G4-8
Itaú Unibanco Holding’s Global Footprint

In Argentina, Chile, Paraguay and Uruguay, we offer commercial banking (retail) and wholesale banking with the main focus on commercial banking. In Peru, we have an Itaú BBA representation office and in Colombia we are gradually intensifying our presence through our corporate and investment banking operations.
Additionally, we have operations in Europe (France, Germany, Portugal, United Kingdom, Spain, and Switzerland), in the United States (Miami and New York), in the Caribbean (Cayman Islands and the Bahamas), in the Middle East (Dubai), and in Asia (Hong Kong, Shanghai and Tokyo). These are operations that mainly serve institutional, corporate and private banking clients.

Please refer to section Our Profile, item Employees, for further details about our number of employees abroad.

Please refer to section Performance, item Financial Performance, Results, Revenues from Operations in Brazil and Abroad, for further information.

**Latin America**

Latin America is a priority in our international expansion strategy due to the geographic and cultural proximity to Brazil. Our purpose is to be recognized as the “Latin American Bank”, becoming a reference in the region for all financial services provided to individuals and companies. We have expanded our business in the region in a sustainable manner over the past years and our priority now is to gain economies of scale, maintain a strong presence in the local retail markets and strengthen our relationships with local companies.

In order to support our more than 1.9 million clients, as of December 31, 2015 we had a network of 246 branches and client service branches (CSBs) in Latin America (ex-Brazil). In Paraguay, we had 45 non-bank correspondents, which are points of service with a simplified structure, strategically located in supermarkets to provide services to our clients in that country. As of December 31, 2015, we also had 36 points of service through OCA S.A., our credit card operator in Uruguay. Please refer to section Our Profile, item Distribution Channels, for further details about our distribution network in Latin America.

**Banco Itaú Argentina**

We operate in Argentina since 1979, where we focus on large companies with business ties to Brazil. In 1994, we initiated our retail operations in Buenos Aires. In 1998, we increased our presence through the acquisition of Buen Ayre Bank, subsequently renamed Banco Itaú Argentina.

Through Banco Itaú Argentina we offer products and services in corporate banking, small and middle-market companies and retail banking. Our corporate banking business focuses on large and institutional clients, providing lending, structured finance, investment and cash management services. Our small and middle-market operations provide credit for working capital and investments in production capacity increases. Our retail banking business focuses on middle and upper-income clients, and our services offerings include current and savings accounts, personal loans and credit cards.

**Banco Itaú Chile**

Our business in Chile is mainly focused on retail and high-income clients, but we also operate with middle-market and large corporate clients. We started our activities in Chile in 2007, after Bank of America Corporation transferred the operations of BankBoston Chile and BankBoston Uruguay to us. In August 2014 we extended our agreement signed in 2011 obtaining a 100% interest in Munita, Cruzat & Claro, a leader in wealth management in Chile. The integration, through Itaú Private Bank, will be focused on the continuity of the relationship with clients. Accordingly, we reaffirm our commitment to the Chilean market and the aim to be the largest private bank in the Latin American market.

**Itaú CorpBanca**

In 2015, the merger of Itaú Chile with CorpBanca was approved by the Superintendency of Banks and Financial Institutions, or SBIF (Superintendencia de Bancos e Instituciones Financieras), in Chile. As a result, we have obtained all the required regulatory authorizations in Brazil, Chile, Colombia and Panama to complete the merger, which occurred on April 1, 2016. This operation represents an important step in our strategy to expand our presence in Latin America, placing the bank in, what we believe to be, an outstanding position in Chile and Colombia, as well as diversifying our operations in the region.

Banco Itaú Paraguay
Our operations in Paraguay began in 1978 and comprise retail and wholesale banking, through Interbanco, which was acquired in 1995 by Unibanco. In 2010, the Itaú brand was introduced and our bank’s name was changed to Banco Itaú Paraguay. Banco Itaú Paraguay distributes products and services to small and middle market companies, agribusiness, large companies, institutional clients and consumer clients. Banco Itaú Paraguay’s main sources of income are consumer banking products, primarily credit cards. The retail segment also focuses on payroll clients. Under corporate banking, Banco Itaú Paraguay has a well-established presence in the agribusiness sector. We hold the leading position among banks in Paraguay in terms of results and deposits (data provided by the Central Bank of Paraguay, December 2015).

Banco Itaú Uruguay
Our banking operations in Uruguay include Banco Itaú Uruguay, OCA (the largest credit card issuer in Uruguay) and the pension fund management company Unión Capital. Our strategy in Uruguay is to serve a broad range of clients through customized banking solutions.

Our retail banking business is focused on individuals and small business clients. Retail products and services focus on the middle and upper-income segments, and also include current and savings accounts, payroll payment, self-service areas and ATMs in all branches, and phone and internet banking. The wholesale banking division is focused on multinational companies, financial institutions, large and middle market companies and the public sector, providing lending, cash management, treasury, trade and investment services.

Colombia
In Colombia, our wholesale and investment bank has been operating since the end of 2012. Our target market in Colombia consists of institutional investors and large Brazilian companies operating in Colombia as well as Colombian companies operating in Brazil. The product portfolio includes loan operations, foreign trade financing, foreign exchange and derivatives and investment bank activities, such as advising on mergers and acquisitions and accessing the capital markets.

Our presence in Colombia is growing and now will be part of a larger operation as a result of the merger with Corpbanca.

Please refer to section Our Profile, item 2015 Highlights, Recent Developments, for further information about the merger of Banco Itaú Chile with CorpBanca.

Peru
In Peru, we have a representative office and we are considering increasing our activities in the corporate and investment banking segments, following the same strategy as in Colombia, in order to take advantage of the country’s strong growth.

Mexico
Mexico will continue with research on local companies.

Itaú BBA International
Our banking activities carried out under the corporate structure of Itaú BBA International are mainly focused on two business lines:

- Corporate and Investment Banking: headquartered in the United Kingdom, but with business platforms in several cities in Europe, we meet the financial needs of companies with international presence and operations, focusing on transactions related to financing and investment relationships between companies in Latin America and Europe. The services offered include the origination of structured financing, hedging, trade financing and advisory to both European companies investing in Latin America and Latin American companies investing overseas.
- Private Banking: under the corporate structure of Itaú BBA International, we manage private banking activities in Miami and Switzerland, offering specialized financial products and services to high net worth Latin American clients.
Other International Operations

To support our clients in cross-border financial transactions and services, our international units are active in providing our clients with a variety of financial products, such as trade financing, loans from multilateral credit agencies, off-shore loans, international cash management services, foreign exchange, letters of credit, guarantees required in international bidding processes, derivatives for hedging or proprietary trading purposes, structured transactions and international capital markets offerings. These services are offered mainly through our branches in the Bahamas, New York and Cayman Islands, as well as through our other international operations.

We manage proprietary portfolios and raise funds through the issuance of securities in the international market. Fund raising through the issuance of securities, certificates of deposit, commercial paper and trade notes can be conducted by our branches located in the Cayman Islands, the Bahamas and New York, as well as through Itaú Bank Ltd., a banking subsidiary incorporated in the Cayman Islands. Our proprietary portfolios are mainly held by Itaú Bank and our Nassau and Cayman Islands branches. These offices also enhance our ability to manage our international liquidity.

Through our international operations, we establish and monitor trade-related lines of credit from foreign banks, maintain correspondent banking relationships with money centers and regional banks throughout the world and oversee our other foreign currency-raising activities.

Additionally, Itaú BBA participates in the international capital markets as a dealer, as it has equity and fixed income sales and trading teams in São Paulo, New York, Santiago, London and Hong Kong. We provide extensive research coverage of over 206 listed companies in Brazil, Mexico, Chile, Colombia, Peru, Panama and Argentina. Our international fixed income and equity teams are active in trading and offering Brazilian and Latin American securities to institutional investors.

Competitive strengths

We believe the following strengths provide us with significant competitive advantages and distinguish us from our competitors.

Premier banking brand in Brazil

We believe that our brands are very strong and very well recognized in Brazil and that they have been associated with quality, reliability, and with our large portfolio of products, which help us maintain a low client turnover rate, especially among clients in the high-income segment. In 2015, our brand was elected by consulting firm Interbrand as “the most valuable brand” in Brazil for the twelfth consecutive time. Please refer to section Our Profile, item Brand for further information.

Large branch network in geographic areas with high economic activities

Our Brazilian branch network, while national in scope, is strategically concentrated in the southeast region of Brazil. Our branch network in other countries of the Southern Cone (Argentina, Chile, Paraguay, and Uruguay) is also positioned in regions with high levels of economic activity. Having our branch network in key economic areas gives us a strong presence and a competitive advantage to offer our services to a broad range of clients and benefit from selective market opportunities. Our exclusive ATM network allows us to offer a wide range of products and services to our clients, which we see as one of our competitive strengths.

Additionally, we have refurbished branches, especially in shopping malls. These branches have a new visual identity and service proposition, offering a new concept of client service and a differentiated layout inspired by the design of a retail store. Shopping mall branches have extended hours, which offers added convenience for our clients. We have an extensive network, including branches, client site branches and ATMs in Brazil and abroad. Please refer to section Our Profile, item Distribution Channels for further information.

Diversified line of products and services

We are a multi-service bank offering a diverse line of products and services designed to address the needs of various types of clients, including corporate clients, very small and small companies, retail clients, high-income individuals, private bank clients, non-accountholders and credit card users. We believe that this business model creates opportunities to improve our relationship with clients and thereby increases our market share. We expect to maintain our leading presence by capturing a solid and increasing number of transactions across various business segments.

Technology and electronic distribution channels as drivers for sales

Our intensive use of technology and electronic distribution channels, which has contributed significantly to an increase in sales of products and services, is one of our most important competitive advantages. We invest in technology because we believe that it is how we will be able to improve the environment for our employees and clients. We focus our efforts on the development of platforms and services that use the best of technology, with the purpose of streamlining and making easier the lives of everybody who relate with the bank, with a focus on mobility and convenience.

Our sophisticated technology supports certain remote banking capabilities (such as call centers and internet banking) and offers clients the ability to verify statements and perform transactions online or over the phone. In addition, our sales teams can access client credit scores with ease and credit proposals can be sent over the internet by any broker registered with our systems.
On December 31, 2015, we completed our IT investments planned for the period from 2012 to 2015, financed by internal funds. These investments were made in data processing systems, purchase of software, system development and in our new Data Center built in the State of São Paulo. Our Data Center, one of the largest in Latin America, had its construction concluded as planned and the configurations of the environmental infrastructure were successfully established. The new data center will support our growth up to 2050, ensuring the high performance and availability of our operations.

Additionally, through our online platforms Uniclass and Personnalité Digital we expanded our client relationship model by allowing the relationship managers to offer personalized customer services from 7 a.m. to midnight, from Monday through Friday. We have also redesigned and are offering to our clients other digital channels such as our Itaucard and Itaú Empresas applications. Please refer to section Our Profile, item Distribution Channels, for further information about Personnalité Digital and other digital channels.

### Risk-based pricing model as a tool to manage risk while exploring opportunities

Our risk-based pricing model, as applied to our products, is an important competitive advantage as it gives us a more precise dimension of risk-return in various scenarios. This is an essential tool to explore commercial opportunities and simultaneously manage risk. Depending on the product, each contract is individually priced using risk adjusted return on capital models that give us a better assessment of the relevant market.

### Competition

The last several years have been characterized by increased competition and consolidation in the financial services industry in Brazil. As of September 30, 2015, there were 132 multiple-service banks, 25 commercial banks, and numerous savings and loan, brokerage, leasing and other financial institutions in Brazil.

We, together with Banco Bradesco S.A. and Banco Santander Brasil S.A., are the leaders in the privately-owned multiple-services banking sector. As of September 30, 2015, these banks accounted for 34.5% of the Brazilian banking sector’s total assets. We also face competition from state-owned banks, which has increased. As of September 30, 2015, Banco do Brasil S.A., Caixa Econômica Federal, and BNDES accounted for 42.6% of the banking system’s total assets.

The following table sets forth the total assets of the 10 main banks in Brazil, classified according to their interest in the total assets of the Brazilian banking sector:

(1) American Depositary Shares, or ADSs.
(2) Argentine Certificates of Deposits, or CEDEARs.
Common shares entitle the holder to one vote at our general stockholders’ meetings. The voting rights of our controlling stockholders do not differ from the voting rights of other holders of common shares.

Preferred shares are nonvoting but entitle the holder to:

• priority to receive mandatory dividends, in the amount of R$0.022 per share, non-cumulative with minimum dividend; and
• tag-along rights in the event of sale of a controlling stake, assuring a price equal to 80% of the amount paid for the controlling stockholders’ common shares.

Brazilian Corporate Law sets forth that preferred stockholders may vote when the company does not pay fixed or minimum dividends to which they are entitled for the period established in the company’s Bylaws, which may never exceed three consecutive fiscal years. The preferred stockholders maintain such right until the payment is made if these dividends are not cumulative or until cumulative dividends are paid.

The creation of a new class of shares with priority over preferred shares, as well as any change in preference or in rights associated with preferred shares, must be approved by at least 50% of common shares and also approved by stockholders representing the majority of preferred shares in a special general meeting. Please refer to section Our Governance, item Management Structure, Annual General Stockholders’ Meetings, for further information about the procedures for calling general and special stockholders meetings.

The following table sets forth the high and low market closing prices for the preferred shares for the periods indicated:

The graph on the side shows the evolution of R$100 invested from December 29, 2005 to December 30, 2015, comparing our preferred share (ITUB4) price, with and without reinvestment of dividends, to the performance of Ibovespa and CDI.

Information for the Investor

Adoption of Multiple Voting

Under Brazilian Corporate Law and CVM’s regulation, stockholders that represent at least 5% of share capital with voting rights may demand a multiple voting process up to 48 hours before a general stockholders’ meeting. Each share will be entitled to as many votes as the members of the board being elected, and the stockholder has the right to concentrate votes in one candidate or distribute them among several candidates. The presiding officer must inform the stockholders in advance about the number of votes required for the election of each member of the Board of Directors.

Whenever the election of the Board of Directors is held under the multiple vote process and the common or preferred stockholders exercise their right of electing one director, the controlling stockholder will have the
right to elect directors in the same number as those elected by the other stockholders plus one, regardless of the number of directors that, according to our Bylaws, compose the board.

Additionally, as our Bylaws do not provide for staggered intervals, our directors may be reelected consecutively without interruption. Whenever the election has been conducted through a multiple voting process, the removal from office of any of our directors by our stockholders, at a stockholders’ meeting will result in the removal from office of all of the remaining directors and a new election shall be arranged. In order not to affect the management of the company as a result of the removal of directors, Brazilian Corporate Law provides that despite the removal, the same directors may continue to exercise their functions until the newly elected board members take office.

Preemptive right, capital increase and payment for subscribed shares
Each stockholder has the preemptive right to subscribe for shares in any capital increase, in proportion to his equity interest, except in specific cases, in compliance with Brazilian Corporate Law.

Our Bylaws authorize the Board of Directors to increase our share capital up to a limit of 7,986 billion shares, of which 3,993 billion must be common shares and 3,993 billion must be preferred shares (authorized capital). Up to the limit of our authorized capital, the issuance of our shares may be made without considering our stockholders’ preemptive rights if (i) made for the sale on a stock exchange; (ii) by a public subscription; and (iii) exchange for our shares in a public offering for the acquisition of our control. Regardless of this provision, all increases in our share capital must be ratified by our stockholders and approved by the Central Bank.

After the approval of the capital increase by the Central Bank, a stockholder must pay the value corresponding to the subscribed shares under the terms established in the subscription documentation related to that capital increase. A stockholder that fails to make payment under the terms of the subscription documentation will be deemed to be in default, in accordance with Brazilian Corporate Law.

Brazilian legislation does not provide for liability in capital calls, therefore the ownership interest of our stockholders may be diluted if they decide not to exercise their preemptive rights to subscribe shares in cases of capital increase.

Form and Transfer
Our shares are book-entry and Itaú Corretora de Valores S.A. is our bookkeeping service provider. Therefore, the shares issued by us are to be kept in deposit accounts, under the investor’s name.

As an alternative, the investor may also deposit shares in the BM&FBovespa via a custodian institution authorized by the CVM. In such case, the BM&FBovespa, as central depository, holds the shares under its name but controls the ownership of the securities through a structure of deposit accounts kept under the investors’ name. There is no distinction in the rights and obligations of stockholders, regardless of whether their shares are deposited with a broker-dealer or with BM&FBovespa.

Redemption and withdrawal rights
Our common shares and our preferred shares are not redeemable, except upon delisting. Pursuant to Brazilian Corporate Law, however, the approval of certain matters entitles a dissenting stockholder to withdraw from the company, such right expiring thirty days after publication of the minutes of the applicable stockholders’ meeting. This withdrawal right may occur under certain conditions of reimbursement of the value of such holder’s shares, calculated based on criteria set forth under Brazilian Corporate Law. Also, in accordance with Brazilian Corporate Law, we are entitled to reconsider any resolution that gives rise to a withdrawal within ten days following the expiration of the withdrawal period, if such exercise of withdrawal rights jeopardizes our financial stability.

Withdrawal rights are not available to stockholders whose shares have liquidity and are actively traded in the stock market in cases of merger or takeover or in case the company elects to take part in a group of companies.

Common and preferred shares should be reimbursed upon cancellation of their registration at their value, calculated based on the criteria set forth under Brazilian Corporate Law. Our preferred shares are not redeemable, except upon delisting. Pursuant to Brazilian Corporate Law, however, the approval of certain matters entitles a dissenting stockholder to withdraw from the company, such right expiring thirty days after publication of the minutes of the applicable stockholders’ meeting. This withdrawal right may occur under certain conditions of reimbursement of the value of such holder’s shares, calculated based on criteria set forth under Brazilian Corporate Law. Also, in accordance with Brazilian Corporate Law, we are entitled to reconsider any resolution that gives rise to a withdrawal within ten days following the expiration of the withdrawal period, if such exercise of withdrawal rights jeopardizes our financial stability.

Withdrawal rights are not available to stockholders whose shares have liquidity and are actively traded in the stock market in cases of merger or takeover or in case the company elects to take part in a group of companies.

In the United States
Our preferred shares have been traded on the NYSE in the form of ADSs (one ADS represents one preferred share) since February 21, 2002, in compliance with NYSE and SEC requirements. These requirements include disclosure of financial statements in IFRS since 2011 and compliance with U.S. legislative requirements, including the Sarbanes-Oxley Act of 2002.

Our ADSs are issued by The Bank of New York Mellon, as depositary, under a Deposit Agreement, dated as of May 31, 2001, as amended and restated as of February 20, 2002 and as of March 30, 2009, effective as of April 3, 2009, among us, the depositary and the owners and beneficial owners of ADSs from time to time. The depositary’s principal executive office is located at 225 Liberty Street, New York, New York 10281.
ADS holders have no stockholder rights, which are governed by Brazilian Corporate Law. The depositary is the holder of the preferred shares underlying the ADSs. Holders of ADSs have ADS holder rights.

An investor may hold the ADSs directly, registered under his or her name, or indirectly, through a broker or another financial institution. The holders of our ADSs do not have the same rights as our stockholders and the depositary and holders of corresponding shares in Brazil. The deposit agreement determines the rights and obligations of the ADS holders and is governed by New York law.

In the event of a capital increase that maintains or increases the proportion of our capital represented by preferred shares, the holders of ADSs, except as described above, have preemptive rights to subscribe only to newly issued preferred shares. In the event of a capital increase that reduces the proportion of capital represented by preferred shares, the holders of ADSs, except as described above, have preemptive rights to preferred shares in proportion to their interests and to common shares only to the extent necessary to prevent dilution of their interests.

Please refer to section Attachments, item Considerations for ADS holders for further information.

**Fees and Expenses**

The following table summarizes the fees and expenses payable by holders of ADSs to the depositary:

<table>
<thead>
<tr>
<th>Event</th>
<th>Fees</th>
</tr>
</thead>
<tbody>
<tr>
<td>Issuance(^{(1)}) or cancellation for the purpose of withdrawal(^{(2)}) of ADSs</td>
<td>US$3.00 (or less) per 100 ADSs (or portion thereof) plus any additional fees charged by any governmental authorities or other institutions for the execution and delivery or surrender of ADSs.</td>
</tr>
<tr>
<td>Any cash distribution</td>
<td>US$0.02 (or less) per ADS (or portion thereof).</td>
</tr>
<tr>
<td>Depositary services</td>
<td>US$0.02 (or less) per ADS (or portion thereof) per calendar year (in addition to cash distribution fee of US$0.02 per ADS during the year).</td>
</tr>
</tbody>
</table>

\(^{(1)}\) Including issuances resulting from a distribution of preferred shares or rights or other property, substitution of underlying shares and transferring, splitting or grouping of receipts.
\(^{(2)}\) Including if the deposit agreement terminates.

In addition, set below are other fees and expenses payable by holders of ADSs:

- **Registration fees**: registration of transfers of preferred shares on our preferred share register to or from the name of the depositary or its agent when you deposit or withdraw preferred shares.
- **Distribution of securities by the depositary to ADS holders fee**: equivalent to the fee that would be payable if securities distributed to the holder thereof had been preferred shares and the shares had been deposited for issuance of ADSs.
- **Foreign currency conversion expenses**: expenses of the depositary in converting foreign currency to U.S. dollars.
- **Depositary expenses**: cable, telex and facsimile transmissions (when expressly provided in the Deposit Agreement).

Moreover, taxes and other governmental charges the depositary or the custodian have to pay on any ADR or preferred share underlying an ADS (for example, stock transfer taxes, stamp duty or withholding taxes) as necessary would be payable by holders of ADSs. Any other charges incurred by the depositary or its agents for servicing the deposited securities are not currently made in the Brazilian market.

**Payment of Taxes**

The depositary may deduct the amount of any taxes owed from any payments to investors. It may also sell deposited securities, by public or private sale, to pay any taxes owed. Investors will remain liable if the proceeds of the sale are not sufficient to pay the taxes. If the depositary sells deposited securities, it will, if appropriate, reduce the number of ADSs to reflect the sale and pay to investors any proceeds or send to investors any property remaining after it has paid the taxes.

**Reimbursement of Fees**

The Bank of New York Mellon, as depositary, has agreed to reimburse us for expenses we incur that are related to establishment and maintenance of the ADS program. The depositary has agreed to reimburse us for our continuing annual stock exchange listing fees. The depositary has also agreed to pay the standard out-of-pocket maintenance costs for the ADSs, which consist of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of United States federal tax information, mailing required tax forms, stationery, facsimile, and telephone calls, as well as to reimburse us annually for expenses we incur that are related to establishment and maintenance of the ADS program. The depositary has agreed to reimburse us for expenses we incur that are related to establishment and maintenance of the ADS program.

Moreover, taxes and other governmental charges the depositary or the custodian have to pay on any ADR or preferred share underlying an ADS (for example, stock transfer taxes, stamp duty or withholding taxes) as necessary would be payable by holders of ADSs. Any other charges incurred by the depositary or its agents for servicing the deposited securities are not currently made in the Brazilian market.
In 2015, we received from the depository US$21.4 million for promoting and encouraging the ADR program in the market, out-of-pocket maintenance costs for the ADSs (as described above), any applicable performance indicators relating to the ADS facility, underwriting fees and legal fees.

In Argentina
We also issue CEDEARs, which represent shares of foreign companies traded in Argentina. Our CEDEARs are backed by our preferred shares and they are listed at the BCBA, which is a not-for-profit self-regulatory private association. The BCBA is responsible for registering business and publishing quotations and volume of transactions. Its inspection authority permits, among other measures, the suspension of the trading session whenever it is deemed to be necessary to control or prevent unusual variations in quotations.

Stockholders’ Payment
Our Bylaws establish the distribution to stockholders of mandatory dividends equivalent to 25% of our net income calculated for each fiscal year, adjusted by the decrease or increase of amounts related to legal reserve, to reserve for contingencies and to its reversal related to prior years.

The mandatory dividend may be paid as dividends or interest on capital. The main difference between these forms of payment is tax-related. The payment of dividends is tax-free for stockholders.

The amount paid to stockholders as interest on capital is subject to withholding income tax at a 15% rate, or 25% if the stockholder is a resident of or domiciled in a tax haven jurisdiction or a privileged tax regime.

The amount paid to stockholders as interest on capital, net of any withholding tax, may be included as part of the mandatory dividend. In such cases, we are required to distribute to stockholders an amount sufficient to ensure that the net amount received by stockholders, after the payment by us of applicable withholding taxes in respect of the distribution of interest on capital, is at least equal to the mandatory dividend. Please refer to section Attachments, Item Considerations for ADS Holders, Taxation for the ADS Holders, for further details.

Our Stockholder Remuneration Policy, approved by our Board of Directors, establishes the monthly payment of R$0.015 per share as an advance mandatory dividend. The date used in Brazil as a reference to determine which stockholders are entitled to receive the monthly dividend is determined according to the shareholding position registered on the last day of the preceding month. With respect to our ADSs, however, the date used to determine the stockholders that are entitled to receive the monthly dividend is three days after the Brazilian reference date. In both cases, monthly dividends for a given month are paid on the first business day of the next month.

Once our net income is calculated, we intend to pay the difference between the mandatory dividend, calculated as mentioned before, and the accumulated amount of advanced monthly dividends. Additionally, our Board of Directors may declare interim dividends, which will be submitted for ratification at our annual stockholders’ meeting.

A stockholder may claim payment of any dividend for a period of three years counted from the dividend payment date. After this period we have no responsibility for such payment.

Stockholders not residing in Brazil must register with the Central Bank so that dividends, interest on capital and other amounts related to their shares can be remitted abroad in a foreign currency.

Currently, we pay dividends and interest on capital equivalent to or higher than the mandatory dividends, but this may not continue to happen if our stockholders decide that such distribution is not advisable in view of our financial condition. In this case, if our Fiscal Council is constituted, it must issue an opinion about that decision, and management must present a report to the CVM detailing the reasons for the suspension of the dividend payment. Profits not distributed due to a suspension of the dividend payment must be allocated to a special reserve and, if it is not absorbed by losses in subsequent years, it must be paid as dividends as soon as our financial position so permits.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 21b, and section Our Risk Management, item Regulatory Environment, Implementation of Basel III in Brazil.

ADS holders’ Payment of Dividends
Preferred shares underlying ADSs are kept in Brazil by the custodian, Itaú Unibanco, which is the owner recorded in the register service of our preferred shares. The depository of our ADS program is The Bank of New York Mellon. The payments of dividends and distributions in cash for our preferred shares underlying the ADSs are made directly to the depositary bank abroad, which is responsible for passing them on to the stockholders within an average period of 10 days after payment is made in Brazil. The amount received by the ADS holder may be reduced if we, the custodian or the depositary are required to retain an amount related to taxes and other government charges.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 21 – Stockholders’ equity, for further information about dividends and shares outstanding.

On August 3, 2015, our Board of Directors declared the payment of interest on capital, in the amount of R$0.3460 per share (or R$0.2941 per share, net of taxes) which was paid out on August 25, 2015 to all stockholders of record as of the close of trading on August 12, 2015.

On November 26, 2015, our Board of Directors declared interest on capital in the amount of R$0.20900 per share (or R$0.17765 per share,
net of taxes) to all stockholders of record as of the close of trading on December 9, 2015. On February 1, 2016, our Board of Directors declared interest on capital in the amount of R$0.4564 per share (or R$0.38794 per share, net of taxes) to all stockholders of record as of the close of trading on February 18, 2016. Payment of both such declared payments of interest on capital will be paid out on February 29, 2016.

10% bonus for Itaú Unibanco shares
In July 2015, for the third consecutive year, we granted a 10% bonus for our shares and our stockholders received a new share for every ten shares of the same type held by them.

Further information for the investor

We are organized as a publicly held corporation for an unlimited period of time under the laws of Brazil. Our head offices are located at Praça Alfredo Egídio de Souza Aranha, 100, 04344-902, São Paulo, SP, Brazil and our telephone number is +55-11-2794-3547. We are primarily governed by Brazilian Corporate Law and our Bylaws. Our Tax Payer’s Registry (CNPJ) is 60.872.504/0001-23, and we are registered with the São Paulo Commercial Registry (Junta Comercial do Estado de São Paulo) under NIRE 35300010230. Our corporate purpose, as set forth in Article 2 of our Bylaws, is to perform banking activity in all its authorized forms, including foreign exchange transactions. Our agent for service of process in the United States is the general manager of our New York branch, which is located at 767 Fifth Avenue, 50th floor, New York, NY 10153.

2016 CORPORATE CALENDAR
Annual General Stockholders’ Meeting
April 27, 2016
Earnings Release – First Quarter, 2016
May 3, 2016
Earnings Release – Second Quarter, 2016
August 2, 2016
Earnings Release – Third Quarter, 2016
October 31, 2016

Our commitment to best practices in corporate governance is directly related to our focus on stockholders and investors, transparency and accountability. We are particularly focused on platforms for communication with these groups and are continuously investing to upgrade channels and the quality of our services.

To encourage communications with and further strengthen our relationship with our stockholders, capital market investors and analysts, we disclosed the organization’s results, strategies and perspectives, in public meetings that drew approximately 2.7 thousand attendees in several cities that were held in partnership with the Association of Capital Markets Investment Analysts and Investment Professionals (Associação dos Analistas e Profissionais de Investimento do Mercado de Capitais, or APIMEC). In 2015, we held 22 meetings and took part in 30 conferences and 9 road shows in Brazil and abroad.

We held 4 quarterly conference calls during 2015, in each case on the day after each quarterly earnings release. All calls are transmitted in real time in Portuguese and English and may be accessed by telephone or on the Internet.

Our corporate information is posted on our Investor Relations website (www.itau.com.br/relacoes-com-investidores). In addition, our bank was the first Brazilian bank to have an IR profile on Twitter and a Facebook page.
Credit ratings
We subscribe to independent credit rating agency reviews by Fitch Ratings, Moody’s and Standard&Poor’s (S&P). These ratings assess our credit worthiness and are based on reviews of a broad range of business and financial attributes including risk management processes and procedures, capital strength, earnings, funding, liquidity, accounting and governance, besides government and/or group support.

(1) International Scale Foreign Currency Ratings.
(2) Refers to Itaú Unibanco Holding S.A. Senior Unsecured Debt Rating. Moody’s does not assign Deposit Ratings to Itaú Unibanco Holding.
(3) Refers to Itaú Unibanco S.A. Senior Unsecured Debt Rating. Itaú Unibanco S.A. Long Term Deposit Rating is Baa3.

In April 2015, as a consequence of Fitch Ratings’ revising the ratings outlook for Brazil (sovereign) from stable to negative, the agency also revised the ratings of 20 Brazilian financial institutions, including Itaú Unibanco, Itaú Unibanco and Itaú BBA, whose international scale ratings (except for the ratings with respect to Long Term Foreign Currency, which were affirmed as BBB+) were downgraded by one notch and had their long term international scale ratings outlooks revised from stable to negative.

In May 2015, prompted by the publication of its new global methodology for banks that occurred in March 2015, Moody’s completed a review and announced ratings actions on nine Brazilian banks, including Itaú Unibanco Holding, Itaú Unibanco and Itaú BBA. In June 2015, S&P began assigning ratings to Itaú Unibanco. The ratings and outlook are equal to those of Itaú Unibanco Holding, on account of Itaú Unibanco’s status as a “core” subsidiary of the Itaú Unibanco Group.

In August 2015, due to the Moody’s downgrade of Brazil’s sovereign credit rating in the same period, the rating agency announced the change in the ratings of 14 Brazilian financial institutions, including Itaú Unibanco and Itaú Unibanco Holding. Brazil’s sovereign credit ratings, however, maintained an investment grade.

In September 2015, Standard & Poor’s downgraded Brazil’s ratings to below investment grade. As a result, the rating agency also announced reviews of the ratings in a global scale of 13 Brazilian financial institutions, including Itaú Unibanco and Itaú Unibanco Holding, which also were downgraded to speculative grade.

The long term foreign currency rating of both Itaú Unibanco Holding and Itaú Unibanco was lowered to BB+ with a negative outlook.

In October 2015, Fitch Ratings’ announced the downgrade of Brazil’s sovereign credit rating and, as a consequence, the rating agency also reviewed the ratings of 17 Brazilian financial institutions, including Itaú Unibanco and Itaú Unibanco Holding. However, the ratings of Brazil, Itaú Unibanco and Itaú Unibanco Holding were kept at investment grade, albeit with a negative outlook.

In December 2015, Moody’s changed the outlook on Brazil’s sovereign bond ratings from ‘stable’ to ‘ratings under review for downgrade’, and also placed on review for downgrade the ratings of multiple Brazilian financial institutions, including Itaú Unibanco Holding and Itaú Unibanco.

Also in December 2015, Fitch Ratings announced the downgrade of Brazil’s sovereign rating to below investment grade and subsequently announced various rating actions with respect to a number of Brazilian financial institutions, including Itaú Unibanco and Itaú Unibanco Holding. Nevertheless, the ratings of Itaú Unibanco and Itaú Unibanco Holding were kept at investment grade, albeit with a negative outlook.

These reviews are related to the sovereign ratings and are not specific to the individual conditions of the banks. The ratings of Itaú Unibanco continue to be rated investment grade by Fitch Ratings’ and Moody’s. Itaú Unibanco Holding continues to be rated investment grade by Fitch Ratings.

Subsequent Events
In mid-February 2016, Standard & Poor’s downgraded Brazil’s ratings again. As a result, the rating agency also announced reviews of the ratings of 44 Brazilian financial services institutions, including Itaú Unibanco and Itaú Unibanco Holding, which were also downgraded.

Following Moody’s downgrade of Brazil’s sovereign bond rating from Baa3 to Baa2, with a negative outlook, on February 24, 2016, Moody’s announced on February 25, 2016 that it had downgraded ratings assigned to 31 Brazilian banking entities, including Itaú Unibanco and Itaú Unibanco Holding. According to Moody’s, the affected ratings were constrained by the sovereign rating because of the relevant issuers’ close economic linkages to the government.
3. Our governance

We have adopted corporate governance practices aligned with the best market practices, which also are in compliance with CVM and the Central Bank rules. Read about the details of our structure and our administrators.
Our governance

Our practices

The adoption of good corporate governance practices adds value to a company, facilitates its access to capital and contributes to its longevity. Therefore, we have adopted corporate governance practices aligned with best practices adopted in the Brazilian and foreign markets. Furthermore, we comply with the corporate governance rules issued by the Central Bank and the CVM. We seek constant development of our management policies and mechanisms so as to ensure excellence in our practices and sustainable growth for our company.

In line with such principles, we voluntarily comply with the Code of Self-Regulation and Good Practices for Publicly Held Companies of the Brazilian Association of Publicly Held Companies (Associação Brasileira de Companhias Abertas, or ABRASCA), which was based on the best corporate governance practices in effect in Brazil and abroad. Our governance practices have been recognized and as a result, we have been named to the Dow Jones Sustainability Index and to the Corporate Sustainability Index (Índice de Sustentabilidade Empresarial da BM&FBovespa, or ISE). GRI G4-15

In December 2015 we were, for the first time, selected as a portfolio company to be included in the Euronext Vigeo Sustainability Index: Euronext Vigeo – Emerging 70. The index is made up of 70 companies, selected from approximately 900 listed companies in developing countries. Companies selected for the index reflect those with the best corporate responsibility performance according to ratings assigned by Vigeo. The index's constitution is reviewed twice annually, in June and December. Inclusion in Euronext Vigeo – Emerging 70 reflects our long-term commitment to ethical business behavior, compliance with the law, corporate governance, and social, cultural and environmental responsibility. Please refer to section Our Profile, item 2015 Highlights for further information about our awards and recognition.

We have adopted a Code of Ethics that applies to all of our employees, directors and officers. Our Code of Ethics is based on principles that support a corporate culture focused on valuing people, on strict compliance with rules and regulations and on a permanent pursuit of development. Please refer to www.itau.com.br/_arquivosestaticos/RI/pdf/itaucode.pdf for our Code of Ethics.

Additionally, we have adopted the Policy of Material Information Disclosure, which deals with the public disclosure of material information pursuant to CVM regulation. We also have adopted a Policy on Trading of Securities, which restricts the trading of securities during certain periods and requires the disclosure of all transactions carried out by the management with our securities, as permitted by CVM regulation. Please refer to www.itau.com.br/_arquivosestaticos/RI/pdf/en/ENGLISHpolitica_gc.pdf for our governance principles and practices we adopt.

Over the course of our history, as part of our corporate governance initiatives, we have made several decisions regarding the improvement of the disclosure of our information and the protection of minority stockholders rights. For example, we are listed as a publicly held company on BM&FBovespa and, in 2001, we were one of the first companies to voluntarily adhere to Corporate Governance Level 1 of the BM&FBovespa. In 2002, we listed our Level 2 ADSs on the NYSE, complying with both the SEC's rules and other U.S. legal requirements, such as the Sarbanes-Oxley Act of 2002.

Since 2002, in line with our commitment to strengthen our position in the Brazilian capital markets, we have made a number of presentations in the regional offices of Association of Capital Markets Investment Analysts and Investment Professionals (Associação dos Analistas e Profissionais de Investimento do Mercado de Capitais, or APIMEC). Beginning in 1996, we have also made presentations in the United States and Europe with respect to our governance practices. In these presentations, we have the opportunity to provide the financial community with details on our performance, strategies to add value, future perspectives and other important issues.
Management structure

Our management is structured so as to ensure that matters are extensively discussed and decisions are made on a collective basis. The chart and text below presents our management bodies, their main functions and the management members that compose them.

Annual General Stockholders’ Meeting and Extraordinary Stockholders’ Meeting

Our Annual General Stockholders’ Meeting is our highest decision-making body, which gathers stockholders on a regular basis before the end of April of each year and, on a special basis, whenever corporate interests so require.

It is the responsibility of our Board of Directors to call a stockholders’ meeting. The first notice of the stockholders’ meeting must be published no later than fifteen days before the date of the meeting on the first call. Brazilian Corporate Law establishes that under specified circumstances, the meeting may also be convened by the fiscal council or any stockholder.

The notice of a stockholders’ meeting must be published three times, on different dates, in official newspapers widely circulated in São Paulo, our principal place of business, setting forth the place, date and time of the meeting, the meeting’s agenda and, in the event of an amendment to our Bylaws, a description of the proposed change.

In addition to the requirements of Brazilian Corporate Law, we also publish notices in three different languages (Portuguese, English and Spanish) on our website and email our subscribed investors and stockholders, as well as through CVM, BM&FBovespa, the SEC, the NYSE and the BCBA.

As a general rule, Brazilian Corporate Law provides that a quorum for a stockholders’ meeting consists of stockholders representing at least 25% of a company’s issued and outstanding voting share capital, on the first date the meeting is called for, and, if a quorum is not reached, any percentage of the company’s voting share capital on a second date the meeting is called for. Generally, our meetings are held with a quorum representing approximately 90% of our voting share capital.

In order to attend a stockholders’ meeting, stockholders must present an identification document. A stockholder may be represented at a stockholders’ meeting by a proxy appointed less than a year before the meeting. The proxy must be a stockholder, an officer of the company, a lawyer or a financial institution. Investment funds must be represented by their investment fund officer.

Since 2012, we made available an “Online Meeting” tool. This tool is an electronic voting platform that provides stockholders with more accessibility, allowing them to exercise their voting rights in advance, from any place.

Board of Directors GRI G4-41

Our Board of Directors is the body responsible for establishing the general guidelines of our business, including our controlled companies, and is elected annually by our stockholders.

Board members must act impartially, in compliance with pre-established rules, so as to prevent conflicts of interest. Such rules include:

- not taking part in resolutions related to matters in which the director’s interests conflict with our interests. The director must inform the Board of Directors about the conflict of interest as soon as the matter giving rise to such conflict is included in the agenda or proposed by the Chairman of the Board, and in any event, before the beginning of any discussion on such matter;
The committee may hire outside experts but must always be careful to maintain the integrity and the confidentiality of their work.

Please refer to www.itau.com.br/investor-relations/corporate-governance/rules-and-policies, for each committee rules.

**Audit Committee**

GRI G4-DMA Audit (former F59)

The Audit Committee is a statutory body responsible for overseeing the quality and integrity of our financial statements, the compliance with legal and regulatory requirements, the performance, independence and quality of the services provided by our independent auditors and of the work performed by our internal auditors, and of the effectiveness of internal controls and risk management systems. It is a single body which is responsible for overseeing companies of the Itaú Unibanco Group that are authorized to operate by the Central Bank or supervised by the Superintendency of Private Insurance (Superintendência de Seguros Privados, or SUSEP).

All Audit Committee members are independent, pursuant to Brazilian banking regulation, and the Board of Directors will terminate the term of office of any member of the Audit Committee if such member's independence is affected by any conflict or potentially conflicting situation. In order to meet the requirements of CMN, National Council of Private Insurance (Conselho Nacional de Seguros Privados, or CNSP) as well as those of the SEC and the NYSE, the Board of Directors determined Mr Diego Fresco Gutierrez as an independent financial expert who qualifies as an “Audit Committee Financial Expert” as such term is defined in SEC rules.

The Audit Committee assessments are based on information received from management, external auditors, internal auditors, the units responsible for risk management and internal controls and on the Audit Committee’s members own analyses resulting from direct observation. After establishing an annual schedule to comply with its duties, the Committee held 169 meetings over 51 days in the period from January to December 2015.

“In 2015, the Committee held 169 meetings over 51 days and it was particularly engaged in the monitoring of internal controls and compliance of the organization, as well as the Internal Audit's activities, with a focus on units in Brazil and abroad.

*During this period, Alkimar Ribeiro Moura completed his term and he was replaced by new member Antonio Francisco Lima Neto.*

*Geraldo Travaglia Filho*

President of the Audit Committee

**Internal Audit**

GRI G4-DMA Audit (former F59)

Internal Audit, under the technical supervision of the Audit Committee, provides the Board of Directors and senior management with independent, impartial and timely evaluations of the effectiveness of risk management, the adequacy of controls and compliance with the regulations and rules related to the operations of the conglomerate. Such audit jobs occur periodically, with intervals from 12 to 36 months. Following the best practices and standards of The Institute of Internal Auditors, the Internal Audit methodology requires the assessed area to establish action plans for deficiencies identified, considering the deadlines which vary according to the risk ratings.

**Pre-approval of Policies and Procedures**

Among the Audit Committee’s responsibilities is to establish policies and procedures regarding services that can be provided by our external
auditors. On an annual basis, the Audit Committee issues (i) the list of those services which cannot be provided by our external auditors, due to the fact that such services could, eventually, affect their independence, (ii) the list of pre-approved services, and (iii) those services that need to be previously approved by the Audit Committee.

**Fees and Services of the Principal Auditor**

- **Audit Fees:** corresponds to the audit of our annual consolidated financial statements, the review of our quarterly financial statements, according to ISRE 2410, as well as the audit and review of financial statements of our subsidiaries, services relating to issuance of comfort letters in securities offerings and audit of internal controls in connection with the Sarbanes-Oxley Act requirements.
- **Audit-Related Fees:** corresponds to services provided in connection with the issuance of appraisal reports at book value, assistance related to review of documents to be filed with local and foreign regulatory bodies, including documents regarding compliance with legislation and regulations, audit of specific financial statements, compliance with Greenhouse Gas Emissions controls and policies, due diligence activities, assurance of special purpose reports and previously agreed-upon procedures to review profit share calculation with respect to commercial partnership contracts.
- **Tax Fees:** corresponds to tax consulting and advising on cross-border transactions, revision of tax contingencies and of potential tax risks, and review of Brazilian income tax.
- **Other Fees:** corresponds to internet security testing, evaluation of business continuity management, benchmarking and diagnostics, use of surveys and technical materials, independent review of accounting and tax matters of transactions outside Brazil, independent review of the implementation plan using the COSO 2013 framework, independent review of credit models, and consultancy related to internal processes and benchmarking of a middle market transaction.

**Personnel Committee**
The Personnel Committee is responsible for establishing the main guidelines related to personnel. Its duties include establishing guidelines related to talent attraction and retention, recruiting and qualification, and our long term incentive programs.

"In 2015, we took an important step in the consolidation of our corporate culture with the update of Nosso Jeito de Fazer (Our Way of Making it Happen). Five years after being launched, we noted the need for revisiting the "decalogue" – a set of ten attributes that translated our culture and reflected the needs of the period of its launch, soon after the merger. The current challenge is to emphasize the principal aspects that should support our strategy moving forward.

The discussion process involved the Associates, Partners and members of the Personnel Committee. Our Way was defined as follows: (1) It’s only good for us if it’s good for the client; (2) We’re passionate about performance; (3) People mean everything to us; (4) The best argument is the one that matters; (5) Simple. Always; (6) We think and act like owners; and (7) Ethics are non-negotiable. We went from ten to seven attributes, consisting of more modern and direct language.

Concurrently, we advanced in the harmonization of our human resources (HR) practices of Itaú BBA and Itaú Unibanco, which came together to constitute the Wholesale (DGA). We were successful in converging the different models and practices, while always respecting the particularities and needs of each area.

We continue acting strongly to attract talent from the best universities in Brazil and throughout the world, increasingly investing in vacation internships, trainee programs and international MBAs.

All this with a significant result in the employee satisfaction survey, which improved by 200 bps, from 80% to 82%.”

**Pedro Moreira Salles**
Chairman of the Board of Directors and President of the Personnel Committee

**Related Parties Committee**
The Related Parties Committee is responsible for analyzing transactions between related parties in the circumstances specified by our Transactions
Transactions with related parties

Our Policy for Transactions with Related Parties, or Related Parties Policy, defines the concept of related parties and establishes rules and procedures for transactions among them. It provides that such transactions must be carried out in writing, under market conditions, pursuant to our internal practices (such as the guidelines set forth in our Code of Ethics) and, subject to materiality criteria defined by accounting standards disclosed in our financial statements.

Transactions with related parties involving amounts higher than a certain threshold are subject to additional internal governance procedures. In December 2014, our Related Parties Policy was amended to establish that transactions with related parties, or sets of related transactions, that involve, in the period of one year, amounts higher than R$1.0 million must be approved by our Related Parties Committee, composed entirely of independent members of our Board of Directors. Moreover, such transactions are submitted to the review of our Ethics and Ombudsperson Superintendency and reported to our Board of Directors on a quarterly basis. Please refer to www.itau.com.br/_arquivosestaticos/RI/pdf/en/IHF_Politica_Partes_Relacionadas_ING.pdf for our Related Parties Policy.

Instruction CVM No. 480/2009 requires that transactions with related parties that meet the conditions set forth by Schedule 30-XXXIII of such rule be disclosed within seven business days of their occurrence, in accordance with the terms defined in such rule.

Additionally, Brazilian regulation sets forth that financial institutions are not allowed to grant loans, advances or guarantees to certain individuals and entities related to them, including:

(i) officers, and members of the board of directors, fiscal council, advisory councils and other statutory committees, as well as their spouses, ascendants, descendants and collateral relatives to the second degree, either blood relatives or in-laws;
(ii) individuals or legal entities that directly or indirectly control the financial institution or hold more than 10% of the financial institution’s share capital;
(iii) legal entities directly or indirectly controlled by the financial institution or legal entities in which the financial institution directly or indirectly holds more than 10% of the share capital; or
(iv) legal entities directly or indirectly controlled by the individuals mentioned in items “i” and “ii” above or legal entities in which such individuals directly or indirectly hold more than 10% of the share capital.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 35 – Related Parties, for further details about the related parties we do business with and the main terms of those transactions.

Nomination and Corporate Governance Committee

The Nomination and Corporate Governance Committee is responsible for stimulating and overseeing discussions of matters related to our governance. Its duties include analyzing and issuing opinions on situations of potential conflicts of interest between the directors and companies of the Itaú Unibanco Group, periodically reviewing the criteria for nomination of our independent directors, in accordance with governance principles and applicable regulation, giving methodological and procedural support for the assessment of the Board of Directors, individual directors, committees and chief executive officer, and discussing and making recommendations on the succession of the directors and chief executive officer. Please refer to section Our Governance, item Management Structure, for further information about changes in our Board of Officers.

“The Nomination and Corporate Governance Committee held 2 meetings in 2015; during which a number of topics were discussed, such as:

• Performance evaluations of the Board of Directors and its members, including the chairman and CEO;
• Approval of improved aspects of the evaluation of the CEO;
• Analysis of performance evaluations of the Executive Committee’s members;
• Detailed performance evaluations of the various committees and their members, and analysis of suggestions for improved effectiveness of the committees; and
• Approval of the proposal to adhere to the rotation rule for members of the Audit Committee.”

Fábio Colletti Barbosa
Independent Director and member of the Nomination and Corporate Governance Committee
Risk and Capital Management Committee
The Risk and Capital Management Committee is responsible for supporting the Board of Directors in performing its responsibilities related to our capital and risk management as well as submitting reports and recommendations on these topics for the approval of the Board of Directors. Its duties include establishing our risk appetite and minimum return expected on our capital, overseeing our risk control and management activities in order to assure their adequacy to the risk levels assumed and the complexity of our operations as well as the compliance with regulatory requirements. It is also responsible for promoting the improvement of our risk culture.

“During 2015, the Risk and Capital Management Committee, in the performance of its duties of supervising risk and capital management activities, continued overseeing our risk appetite, ensuring the alignment with the established strategies, monitored the conglomerate’s main credit risk exposures, assessed the sufficiency and adequacy of our capital levels, in normal and stress scenarios, and conducted an in-depth analysis of our credit models, information security and money laundering prevention.”

Pedro Luiz Bodin de Moraes
Independent Director and President of the Risk and Capital Management Committee

Strategy Committee
The Strategy Committee is responsible for leading discussions of strategic matters critical to us. Its duties include proposing budgetary guidelines for the Board of Directors, and issuing opinions and recommendations on the strategic guidelines and investment opportunities in order to support the decisions of the Board of Directors.

“In 2015, the Strategy Committee reviewed and validated certain points of its strategic plan, which covers the period ending in 2020. New technological challenges, including digital payment methods and security of banking operations, were subject to constant discussion by the Committee. Of note is the creation of the Technology Subcommittee as an advisory body to the Strategy Committee. The merger of our operations in Chile and Colombia with CorpBanca were completed as planned. The budget and goals of the Itaú Unibanco conglomerate for the 2016 fiscal year are aligned with this strategic plan.”

Nildemar Secches
Independent Director and member of the Strategy Committee

Compensation Committee
The Compensation Committee is responsible for leading discussions of matters related to our management compensation. Its duties include developing the Compensation Policy for our management members, proposing to our Board of Directors different methods of fixed and variable compensation, in addition to benefits and special recruiting and termination programs, discussing, analyzing and overseeing the implementation and operation of our existing compensation models, and discussing the general principles for the compensation of our employees.

“During 2015, the Compensation Committee was engaged in:

• Adjusting and correcting certain distortions in the models in use, particularly in certain pools and their effects on areas of support;
• Approving individual penalties as a consequence of realized Allowance for Loan Losses;
• Establishing the global amount for use in compensation of the members of the Board of Directors and Executive Board of Officers;
• Approving the individual compensation of the members of the Executive Committee; and
• Analyzing the comparative study on compensation and executive market research, and the conclusion was that our model is consistent with market levels and our results.”

Henri Penchas
Member of the Compensation Committee

Annual evaluation of the Board of Directors and Board Committees
To assess the performance of our management and in order to comply with best corporate governance practices, we annually carry out an evaluation of our Board of Directors, its members and its Chairman, as well as the Board committees.

Decisions regarding whether to propose the reelection of Board members to the Annual General Shareholders’ Meeting and of the members of the Board committees to the Board take into account both (i) positive performance results and high attendance to meetings during the previous term and (ii) the level of independence and industry experience.

Evaluation process
The evaluation process consists of the following stages: self-evaluation of the members of the Board, cross-evaluation of the members of the Board (Board members evaluate each other), evaluation of the Board itself by its members, evaluation of the Chairman by the Board members and evaluation of the Board committees by their members.

The evaluation process is structured taking into consideration the specific responsibilities of the Board, its members, its Chairman, and each of the Board’s committees. Therefore, we aim at a high level of expertise.

The evaluation process is conducted by an independent person, responsible for distributing specific questionnaires to the Board of Directors and to each of the Board committees, as well as interviewing members of the Board and Board committees individually. The independent person is also responsible for analyzing the answers and comparing them to the results from the previous years to identify and address any findings and/or gaps relating to the Board of Directors or the Board committees that may be revealed by this process.
Methodological support and independent evaluation
The Appointments and Corporate Governance Committee provides methodological and procedural support to the evaluation process. The Committee also discusses the results of the evaluation, as well as the composition and succession plan of the Board.

Besides such support by the Appointments and Corporate Governance Committee, an independent person is responsible for carrying out the evaluation process itself.

International Advisory Council
The International Advisory Council is responsible for evaluating the prospects for the world economy and the adoption by us of internationally accepted codes and standards, especially with respect to monetary and financial policy, corporate governance, capital markets, payments systems and prevention of money laundering, in order to contribute towards strengthening our presence in the international financial community and to provide guidelines for the Board of Directors. The International Advisory Council is comprised of the following individuals, some of whom are not members of our Board of Directors or employees of the Itaú Unibanco Group: Pedro Sampaio Malan, Alessandro Profumo, André Lara Rezende, Andres Velasco, Angel Corcóstegui, Pascal Lamy, Pedro Moreira Salles, Ricardo Villela Marino, Roberto Egydio Setubal and Vikram Pandit.

Fiscal Council
The Fiscal Council is an independent body composed of three to five members, and the same number of alternates, elected annually by our stockholders to supervise the activities of our management, to examine our financial statements for the year ended and to issue an opinion on such financial statements, among other duties established by Brazilian law. The fiscal council must operate independently from management, our external auditors and the Audit Committee.

Although its permanent existence is not legally mandatory, we have had a Fiscal Council established and functioning uninterruptedly since 2000.

Board of Officers
Our Board of Officers is elected annually by the Board of Directors and its role is to implement the guidelines proposed by our Board of Directors. The officers manage our daily business activities, ensuring the best allocation and management of our funds to accomplish our established goals. The structure of our Board of Officers takes into account the segmentation of our businesses, which demands in-depth knowledge in different areas, skills and business sectors given our organization’s complexity.

Pursuant to Brazilian law, the election of each member of our Board of Officers must be approved by the Central Bank. Also under Brazilian law, an acting officer retains his or her position until he or she is reelected or a successor takes office. Our officers are subject to internal and periodic assessment, in which performance criteria such as client satisfaction, personnel and financial management are considered.

As announced on February 23, 2015, structural changes were made to the management of Itaú Unibanco Holding. The chart below presents our Board of Officers, made up of three General Managers and two Vice Presidents:

  - Legal, Institutional & People

**Itaú Unibanco Holding S.A.**
Disclosure and Trading Committee
The Disclosure and Trading Committee reports to the Board of Officers and is comprised of members of the Board of Directors and of the Board of Officers of Itaú Unibanco Holding or any company of the Itaú Unibanco Group, and professionals of proven knowledge in the capital markets area, appointed by our Investor Relations Officer, who is also a permanent member of the committee.

The committee is responsible for managing our Policy of Material Information Disclosure and our Policy on Trading of Securities. We were among the first publicly held companies in Brazil to have such a committee.

The duties of the Disclosure and Trading Committee include carrying out internal actions intended to improve the information flow and foster the ethical conduct of our management members and our employees in order to ensure transparency, quality, equality and security in the information provided to our stockholders, investors and other participants in the capital markets.

Our Directors and Executive Officers
Four of our directors, Alfredo Egydio Arruda Villela Filho, Ricardo Villela Marino, Alfredo Egydio Setubal and Roberto Egydio Setubal, are members of the Egydio de Souza Aranha family and one of our directors, Pedro Moreira Salles, is a member of the Moreira Salles family.

During the Board of Directors meeting held on March 26, 2015, Executive Officers Claudia Politanski and Eduardo Mazzillli de Vassimon kept their positions of Vice President, and Officer Alexandre Brodel Lopes was appointed as an Executive Officer. During the same meeting, Officer Leila Cristiane Barboza Braga de Melo was appointed as an Executive Officer and Álvaro Felipe Rizzi Rodrigues and José Virgilio Vito Neto were elected as Officers.

Our Board of Directors was elected on April 29, 2015 at our annual stockholders’ meeting. Pedro Moreira Salles, Alfredo Egydio Arruda Villela Filho, Roberto Egydio Setubal, Alfredo Egydio Setubal, Candido Botelho Bracher, Demarthenes Madureira de Pinho Neto, Gustavo Jorge Laboissière Loyola, Henri Penchas, Nildemar Secches, Pedro Luiz Bodin de Moraes and Ricardo Villela Marino were reelected as members of our Board of Directors, each for a term of one year. On the same date, Fábio Colletti Barbosa was also elected as a member of the Board of Directors. Israel Vainboim was not reelected, having reached the age limit provided in our Bylaws.

In addition, Iran Siqueira Lima, Alberto Sozin Furuguem and Luiz Alberto de Castro Falleiros were reelected as members of our Fiscal Council, and José Caruso Cruz Henriques and João Costa were reelected as alternate members of our Fiscal Council. At the same time, Carlos Roberto de Albuquerque Sá was elected as an alternate member of the Fiscal Council, replacing Ernesto Rubens Gelbecke.

During the Board of Directors meeting held on April 29, 2015, the members of our Board of Executive Officers were reelected for a term of one year. On the same date, Officers Marco Ambrogio Crespi Bonomi, Márcio de Andrade Schettini and Paulo Sergio Miron were nominated as members of the Board of Executive Officers for a term of office of one year. Also, on April 29, 2015, the members of the Strategy, Risk and Capital Management, Nomination and Governance, Personnel, Compensation and Related Parties Committees were reelected for a term of one year.

The members of the Audit Committee were also reelected for a term of one year, except for Alkimar Ribeiro Moura who was not reelected as a member of the Audit Committee, remaining in this office until the members elected on April 29, 2015 took office. On that date, Antonio Francisco de Lima Neto was also elected as a member of the Audit Committee.

On June 26, 2015, the Central Bank approved the election and re-election of the members of our Board of Directors, Board of Executive Officers, Fiscal Council and Audit Committee.

All members of our Board of Directors were reelected at the Ordinary Shareholders’ Meeting held on April 27, 2016, for a one-year term, with the exception of Henri Penchas, who has reached the ceiling age as per our Bylaws. On that same date, José Galló was elected a member of the Board of Directors.

Pursuant to best corporate governance practices, let the record show that Directors Fábio Colletti Barbosa, Gustavo Jorge Laboissière Loyola, José Galló, Nildemar Secches, and Pedro Luiz Bodin de Moraes are deemed to be independent members of the Board of Directors.

As concerns our Fiscal Committee, Iran Siqueira Lima was reelected as an effective member, with José Caruso Cruz Henriques, also reelected, as his alternate. Alkimar Ribeiro Moura was elected an effective member, with João Costa, also reelected, as his alternate. The current alternate Carlos Roberto de Albuquerque Sá was elected an effective member with Eduardo Azevedo do Valle, elected on the present date, as his alternate.

At the Meeting of the Board of Directors of April 28, 2016, the members of our Board of Officers were reelected for a term of office of one year, on the same occasion Atilio Luiz Magila Albiero Júnior, Fernando Barçante Tostes Malta, Gilberto Frussa and Sérgio Myckikis Goldstein being elected officers. The members of the Audit Committee were also reelected for a term of office of one year with the exception of Luiz Alberto Fiore. On the same date, Ricardo Baldin was elected to a seat on this Committee.

The elections and re-elections of the members are subjective to approval by the Central Bank of Brazil.

(1) Includes individuals that are not members of our Board of Directors: Israel Vainboim.
(2) Includes individuals that are not members of our Board of Directors or employees of the Itaú Unibanco Group: Alessandro Profuno, André Lara Resende, Andres Velasco, Ángel Carletegui, Pascal Lamy, Pedro Samper Malán, Vikram Pandit.
(3) Independence criteria for the members of the Board of Directors, Audit Committee and Fiscal Council are diverse, under our policies and applicable regulations in force.

Our governance A-58
Composition of the statutory bodies as at December 31, 2015

**Board of Directors**

Pedro Moreira Salles (Chairman) has held several positions within the Itaú Unibanco Group including Vice Chairman of the Board of Directors (February 2010 to April 2012) of Banco Itaú BBA S.A.; Vice Chairman of the Board of Directors (March 2008 to November 2008) and CEO of Unibanco Holdings S.A. (March 2007 to November 2008); Vice Chairman of the Board of Directors and CEO at Unibanco – União de Bancos Brasileiros S.A. (September 2004 to November 2008) and Chairman of the Board of Directors of Unibanco Seguros S.A. (December 1995 to February 2009).

He has also been a Member of the Board of Directors of Totvs S.A. since March 2010 and Chairman of the Board of Directors of Companhia E. Johnston de Participações since 2008 and Member of the Board of Directors since November 2008 at IUPAR having previously served as Chairman (November 2008 to April 2012).

He also served as Vice Chairman of the Board of Directors of Porto Seguro S.A. (November 2009 to March 2012) and as Chairman of the Board of Directors of E. Johnston Representação e Participações S.A. (2001 to February 2009).

He has a Bachelor's degree, magna cum laude, in Economics and History from the University of California, Los Angeles. He also attended the international relations master's program at Yale University and the OPM – Owner/President Management Program at Harvard University both in the United States.

Alfredo Egydio Arruda Villela Filho (Vice Chairman) has been a Vice Chairman of the Board of Directors since March 2003. He has also served a Member of the Board of Directors since April 1997; being Vice Chairman since January 2010; and having been Chairman (April 2009 to January 2010) and Vice Chairman (April 1997 to April 2009) of Itautec S.A.; Member of the Board of Directors (April 2004 to April 2010), being the Board’s Chairman (April 2009 to November 2009) and Vice Chairman (April 2004 to April 2009 and November 2009 to April 2010) of Elekeiroz S.A.; Member of the Board of Directors since 1996, being the Board’s Vice Chairman since 2008 of Duratex S.A.; Member of the Board of Directors since August 1995, serving as Chairman since May 2015 and CEO (September 2009 to May 2015) of Itaúsa.

He has also been a Member of the Itaú Unibanco Group serving as Vice Chairman of the Board of Directors of Itaú Unibanco (August 2002 to March 2003).

He has a Bachelor’s degree in Mechanical Engineering from Mauá Engineering School of the Mauá Technology Institute (IMT) and Postgraduate degree in Business Administration from the Getulio Vargas Foundation (Fundação Getulio Vargas, or FGV) both in Brazil.

Roberto Egydio Setubal (Vice Chairman) has held several positions within the Itaú Unibanco Group including Chief Executive Officer since November 1995 and currently responsible for the ombudsman area at Itaú Unibanco Holding; Chairman of the Board of Directors of Banco Itaú BBA S.A. (November 2004 to April 2015).

He has also served as Vice President of Itaúsa since May 1994; President and CEO (April 1994 to March 2015), General Manager (July 1990 to April 1994) and Member of the Board of Directors (May 1991 to March 2003) of Itaú Unibanco; Member of the Board of the International Monetary Conference since 1994; Member of the International Advisory Committee of The Federal Reserve Bank of New York since 2002; Member of the International Advisory Committee of the NYSE since April 2000; Member of the China Development Forum since 2010; President of the National Federation of Banks (FENABAN) and of the Brazilian Federation of Banks (FEBRABAN) (April 1997 to March 2001); President of the Advisory Board of the Brazilian Federation of Banks (FEBRABAN) since October 2008; Co-Chair of WEF 2015 (Word Economic Forum) since 2015.

He has a Bachelor’s degree in Production Engineering from the Polytechnic School of the University of São Paulo (Universidade de São Paulo, or USP) in Brazil and a Master’s degree in Science Engineering from Stanford University in the United States.

Alfredo Egydio Setubal (Member) has held several positions within the Itaú Unibanco Group including Vice President (April 1996 to March 2015); Executive Officer (May 1993 to June 1996), Managing Officer (between 1988 and 1993) and Investor Relations Officer (1995 to 2003) of Itaú Unibanco.

He has also served as Vice Chairman of the Board of Directors since September 2008; CEO and Investor Relations Officer since May 2015 of Itaúsa; Advisory Board Member of the Securities Dealers’ Association (ADEVAL) since 1993; Financial Officer for the São Paulo Museum of Modern Art (MAM) since 1992 and of ABRASCA since 1999.

He was Chairman of the Higher Committee for Guidance, Nomination and Ethics since 2009 and Member of the Board of Directors (1999 to 2009) of the IBRI. He was a Vice President (1994 to August 2003) and President (August 2003 to August 2008), of the National Association of Investment Banks (ANBID) (now Brazilian Financial and Capital Markets Association – ANBIMA).

He has a Bachelor’s degree in Business Administration from USP in Brazil and a specialization in Bank Management from the Wharton School of the University of Pennsylvania in the United States.

Luiz Alberto Fiore (Independent Member) was an Independent Auditor of PwC (1971 to 1973). He joined Deloitte Touche Tohmatsu, where was a Partner in the External Audit and Corporate Finance departments (1973 to 2010). He was also a Member of the Board of Officers and Board of Directors of Deloitte Brazil (1987 to 2008) and a Member of the International Board of Deloitte Corporate Finance (1998 to 2005).

He has a Bachelor’s degree in Business Administration from the Pontifical Catholic University of São Paulo (ESAN-PUC-SP) and a Bachelor’s degree in Accounting from Mackenzie University, both in Brazil.

Maria Helena dos Santos Fernandes de Santana (Independent Member) is a Member of the Board of Directors and Chairman of the Corporate Governance Committee at Companhia Brasilera de Distribuição S.A. since 2013; a Member of the Board of Directors and Coordinator of the Audit Committee at Totvs S.A. since 2013; and a Member of the Board of Trustees of the IFRS Foundation since January 2014. She was a Member of the Board of Directors at CPFL Energia S.A. (2013 to 2015); Chairperson (July 2007 to July 2012) and Commissioner (July 2006 to July 2007) at CVM; Chairperson of the Executive Committee (2010 to 2012) at the International Organization of Securities Commissions, or IOSCO; Vice President (2004 to 2006) and Member of the Board of Directors since 2001 at Brazilian Institute of Corporate Governance (Instituto Brasileiro de Governança Corporativa, or IBGC). Worked for BOVESPA – São Paulo Stock Exchange (now BM&FBovespa S.A.) for 12 years, acting as Head of Listings and Issuer Relations from 2000 to June 2006. Was involved, since the beginning, with the creation
of the Novo Mercado and the Corporate Governance Listing Tiers, having been in charge of their implementation.

She has a Bachelor's degree in Economics from the School of Economics, Business and Accounting at the University of São Paulo (Faculdade de Economia, Administração e Contabilidade da Universidade de São Paulo, or FEA-USP) in Brazil.

**Sergio Darcy da Silva Alves (Independent Member)** served as a Member of the Audit Committee of Banco Santander S.A. (October 2006 to March 2013) and Member of the Regulatory Committees as Coordinator and Auditor at BM&FBovespa S.A. since January 2007. He has held several positions: Director of the National Financial System Regulation and Organization (September 1997 to April 2006) in the Central Bank; Head of the National Financial System Regulation and Organization Department (April 1991 to August 1997); Deputy Head of the National Financial System Regulation and Organization (March 1985 to March 1991); Coordinator of the Capital Markets Department in the Division of Financial Institutions Authorization up to 1985.

He has a Bachelor's degree in Economics from Faculdade de Economia e Administração de UFRJ (1968) and an Advance Course on Accounting Sciences from the Associação de Ensino Unificado de Brasília (AEUDF) (1975 to 1978) both in Brazil.

**Fiscal Council**

**Alberto Sozin Furuguem (Independent Member)** previously held several positions at the Central Bank, including Economist and Head of the Economic Department (1981 to 1983), Officer (1985), Regional Delegate in São Paulo (1991 to 1992) and Clerk (1963 to 1966). He also worked at the Ministry of Finance as Minister Mário Henrique Simonsen's Assistant (March 1974 to March 1975) and at the Government of the State of Rio de Janeiro as a Development Bank Officer (1975 to 1979).

He graduated with an undergraduate degree in Economics and with a Postgraduate Degree from FGV, both in Brazil (January 1967 to December 1968).

**Iran Siqueira Lima (Independent Member)** held several positions at the Central Bank holding various positions (1967 to 1993), including: Deputy Head of the Capital Markets Inspection Department (1976 to 1979), Head of the Capital Markets Department (1979 to 1984), Officer of the Capital Markets Department (1984), Officer of the Inspection Department (1985) and Regional Delegate in São Paulo, State of São Paulo (1991 and 1993). In 1986, he took a leave of absence from the Central Bank and served as Officer of the Capital Markets Department at Banco da Cidade S.A. In that same period (1986 to 1988), he founded a consulting firm in the capital markets field, where he held the position of Managing Partner from 1987 to June 1988. At the Brazilian Federal Government he worked as Secretary of Budget and Control of Government Companies – SEST (July 1988 to March 1990). He was Economic and Finance Officer of Telebrás – Telecomunicações Brasileiras S.A. (May 1991 to December 1992) and was a Member of the Board of Directors of the BNDES, of Telesp – Telecomunicações de São Paulo and of Telebrás – Telecomunicações Brasileiras S.A. Since 1972, he has been teaching courses related to Accounting and Finance in the following Universities: Association of Unified Education of the Federal District (AEUDF), UnB, USP, and the MBA courses of FIPECAFI.

He has a Bachelor's degree in Economics from the University of the State of Rio de Janeiro (Universidade Estadual do Rio de Janeiro – UERJ – 1969) and a Bachelor's degree in Accounting from the Associação de Ensino Unificado de Brasília (AEUDF) (1973). He has a Postgraduate degree in Economics Engineering and Industrial Administration from Candido Mendes University (1971) and Master's and Postgraduate degrees in Accounting and Controllership from USP (1976 and 1998, respectively).

**Luiz Alberto de Castro Falleiros (Independent Member)** has been a Member of the Board of Directors at Tiradentes University since April 2009, an Alternate Member of the Fiscal Council at AES, Tiete and Tupy S.A. since April 2010. He was a Member of the Fiscal Council at Banco Indusval (April 2010 to April 2012). Additionally, he was General Manager at Banco Alfa de Investimento S.A. (July 1998 to December 2000), Superintendent of Market Relations at SABESP – Companhia de Saneamento Básico do Estado de São Paulo (January 1997 to June 1998), Deputy Director Investment (January 1992 to December 1996) and Underwriting Officer (January 1991 to January 1992) at Banco ABC – Roma S.A.

He has a Bachelor's degree in Economics from UNICAMP, in Campinas (1978) and an MBA in Finance from the Schools of Campinas (Faculdades de Campinas, or FACAMP) (2004), both in Brazil.

**Directors’ and Senior Management’s Compensation**

Our Compensation Policy, applicable to directors and officers in Brazil (constituting a majority of the management of Itaú Unibanco Group), is in accordance with guidelines provided under applicable Brazilian regulation and is built upon our principles and practices and is intended to better align the interests of our stockholders and our management. Regarding variable compensation, the purpose of our Compensation Policy is to attract, retain and reward management achievements, as well as to stimulate the adoption of prudent levels of risk exposure in the short, medium and long term.

Accordingly, our Compensation Policy sets forth that of the total aggregate variable compensation paid, at least 50% must be paid in shares or share based instruments, and at least 50% must be deferred for future payment in a minimum period of three years. If the institution or business unit records a significant decrease in the realized recurring profit or a negative result during the deferral period, the deferred and
unpaid portions of the compensation will be reversed proportionally to the decrease in result (malus).

Our governance structure for the establishment of compensation sets forth clear and transparent processes, and is overseen by the Compensation Committee. Among others, its responsibilities comprise the formulation of our Compensation Policy, which must be submitted to the annual approval of the Board of Directors. Additionally, our Compensation Committee acts as an important liaison with the Central Bank, increasing the accuracy and transparency of information provided to this regulatory body. Please refer to www.itau.com.br/_arquivosstaticos/RI/pdf/CompensationCommittee.pdf for further information.

We have established a profit sharing plan pursuant to which each beneficiary is assigned annually a base amount for computation of payments. The final amount of the payment to an individual is based on the consolidated results of the Itaú Unibanco Group, the results of the business unit to which the individual belongs and the individual's performance. This individual amount is determined by multiplying the base amount by several indexes that represent those Key Performance Indicators (Itaú Unibanco Holding results and/or business unit results and individual performance).

We also have an institutional program called the Partners Program (Programa de Sócios), comprised of members of management and employees approved by the Personnel Committee as having provided an outstanding contribution and performance. The beneficiaries are entitled to use part or their total annual variable compensation to purchase our preferred shares ("own shares"). If they hold the ownership of these own shares, free of any liens or encumbrances and of other suspension conditions set forth in the program regulation for 3- and 5-year terms as from the initial investment, the return on investment will be through the receipt of our preferred shares ("partners shares") also for 3- and 5-year terms. These partners' shares will subsequently remain unavailable for 5- and 8-year terms as from the initial investment in own shares. The Partners Program may also consider instruments derived from shares rather than actual shares.

In 2015, we recorded expenses at Itaú Unibanco Group for our management compensation, including long term incentives plans (Partners Program and Stock Option Plan) in the amount of approximately R$907 million. Our long term incentive plans take into consideration amounts granted in the past but that are still being recorded. Management compensation also considers contributions to pension plans of approximately R$9 million and other benefits, such as health and dental care, which totaled R$3 million. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 35 – Related Parties – (b) Compensation of the Key Management Personnel, for further details.

Brazilian legislation does not require the disclosure of individual compensation of our management, except for the highest and lowest amount received, and it is not necessary to identify those individuals. The Brazilian Institute of Financial Executives of Rio de Janeiro (Instituto Brasileiro de Executivos de Finanças, or IBEF Rio de Janeiro) filed, on behalf of its members, a lawsuit challenging the legality of this disclosure requirement, and an injunction was granted to suspend such requirement. We do not intend to make this disclosure until the matter is finally determined. Please refer to section Our Risk Management, item Regulatory Environment, Compensation of Directors and Officers of Financial Institutions, for further information.

Our Compensation Policy provides post-employment benefits for our management, including medical benefits such as health plan and annual medical check-up. Except for the benefits established by our Compensation Policy, we do not have service contracts with our management providing for benefits upon termination of employment.

Stock Option Plan

We have a stock option plan through which our employees and management receive stock options. These options enable employees and management to share the risk of price fluctuations of our preferred shares with other stockholders and is intended to integrate the beneficiaries of our Stock Option Plan into the development process of our group in the medium and long term.

Our Personnel Committee manages the Stock Option Plan, including matters such as strike prices, vesting periods and effectiveness of options, in compliance with the rules set forth in the Stock Option Plan.

Options may only be granted to beneficiaries if there is net income sufficient for the distribution of mandatory dividends. Please refer to section Our profile, item Information for the Investor, Stockholders' Payment, for further information on the payment of dividends. Also, to avoid the dilution of stockholders, the sum of shares to be used for compensation of management and options to be granted each year will not exceed the limit of 0.5% of total shares outstanding at the closing balance sheet date of the same year. In the event the number of shares delivered and options granted is below the 0.5% limit, the difference may be added for purposes of share based compensation or granting of options in any one of the seven subsequent fiscal years.

In view of the effects related to Article 33 of Law No. 12,973/2014, the amounts granted under the Partners Program and not yet paid, which used to be under our Stock Option Plan, are now recognized as compensation. As a result, on April 29, 2015, our stockholders approved, among other modifications, to exclude from our Stock Option Plan the provisions on the granting of partner options (related to our prior Partners
Program), so that the Stock Option Plan will provide only the granting of simple options.

In 2015, no simple options were granted pursuant to our Stock Option Plan. On December 31, 2015, we still had 45,948,317 options to be exercised by the beneficiaries. Please refer to section Performance, Item Consolidated Financial Statements (IFRS), Note 22 – Share-based Payment, I - Stock Options Plan.

Main Differences between Brazilian and U.S. corporate governance practices

In the U.S., we have listed our ADSs on the NYSE as a foreign private issuer and, as a result, the NYSE allows us to comply with certain corporate governance requirements established by applicable Brazilian legislation in lieu of those under the NYSE's corporate governance listing standards applicable to U.S. companies with securities listed on the NYSE.

Under the NYSE rules, we are only required to: (i) have an audit committee or an audit board that meets certain requirements, as discussed below; (ii) provide notice by our chief executive officer to the NYSE with respect to any non-compliance by us with any applicable NYSE corporate governance listing standards; (iii) provide the NYSE with annual and interim written affirmations of our compliance with the NYSE corporate governance listing standards; and (iv) provide a statement of the significant differences between our corporate governance practices and practices required by the NYSE to be followed by U.S. companies. Except for those requirements, we are permitted to manage our corporate governance in accordance with applicable Brazilian legislation.

The description of the significant differences between our corporate governance practices and those required of U.S. listed companies follows below. Our main rules and policies can be found at www.itau.com.br/investor-relations/corporate-governance/rules-and-policies.

Majority of Independent Directors

The NYSE rules require that the majority of the board members be independent. Independence is defined by various criteria, including the absence of a material relationship between the director and the listed company. However, under NYSE rules, listed companies (whether U.S. or foreign) of which more than 50% of the voting power is held by an individual, a group or another company, such as in our case, are not required to comply with the majority independence requirement.

Brazilian legislation does not have a similar requirement. Nevertheless, our Board of Directors has four directors considered independent pursuant to the criteria established in our Corporate Governance Policy. For further information on the composition of our Board of Directors, see section Our Governance, item Management Structure, Our Directors and Executive Officers.

Executive Sessions

NYSE rules require that non-management directors meet at regularly scheduled executive sessions without the presence of directors who are also officers of the company.

Brazilian legislation does not have a similar requirement. However, we hold such executive sessions at least once a year. Currently, three quarters of the members of our Board of Directors are non-management directors.

Nomination and Corporate Governance Committee and Compensation Committee

NYSE rules require that listed companies have a nominating or corporate governance committee and also a compensation committee, each entirely comprised of independent directors and governed by a charter on the purposes and responsibilities of such committee. However, under NYSE rules, listed companies (whether U.S. or foreign) of which more than 50% of the voting power is held by an individual, a group or another company, such as in our case, are not required to comply with such requirement.

Brazilian legislation does not require us to have a nominating or corporate governance committee. However, we have elected to form a Nomination and Corporate Governance Committee responsible for stimulating and overseeing discussions of matters related to the company’s governance. Currently, one out of six members of our Nomination and Corporate Governance Committee is considered independent under our Corporate Governance Policy.

Brazilian legislation does not require listed companies to have a compensation committee. Nonetheless, we are required to establish a Compensation Committee pursuant to Brazilian banking regulation. In accordance with such regulation, our Compensation Committee reports to the Board of Directors and members of the Compensation Committee are not required to be independent. However, currently, two out of five members of our Compensation Committee are considered independent under our Corporate Governance Policy.
Audit Committee

NYSE rules require that listed companies have an audit committee that (i) is composed of at least three independent members who are financially literate; (ii) complies with SEC rules related to the audit committee of companies registered with NYSE; (iii) has at least one member who has accounting or financial management expertise; and (iv) is governed by a charter that expressly sets out the purposes and responsibilities of the committee and that establishes annual performance assessments.

The applicable Brazilian legislation regulates independent audit services rendered to financial institutions and requires the establishment of an audit committee composed of at least three independent members, pursuant to Brazilian banking regulation. Our Audit Committee, formed on April 28, 2004, meets applicable Brazilian legal requirements, is elected annually by the Board of Directors and is composed of professionals with proven technical qualification compatible with the responsibilities of this committee.

Under SEC rules, we are not required to have an Audit Committee constituted or operated in accordance with NYSE rules if we meet specified SEC requirements. We believe that our Audit Committee is compliant with the requirements of Rule 10A-3(c)(3) under the Exchange Act and that it is able to act independently when performing its responsibilities. Our Audit Committee, to the extent permitted by Brazilian legislation, performs all functions required to be performed by an audit committee by Rule 10A-3 under the Exchange Act.

In line with the applicable Brazilian legislation, hiring independent auditors is the responsibility of the Board of Directors, whereas the recommendation for hiring and removing independent auditors is the responsibility of the Audit Committee. Thus, our Board of Directors acts in lieu of the Audit Committee, as permitted by Rule 10A-3(c)(3) (v) under the Exchange Act, for the purpose of hiring our independent auditors.

Stockholders’ Approval of Management Members’ Compensation and Stock Option Plans

NYSE rules require that stockholders have the opportunity to vote on all share-based compensation plans and significant changes thereto, including significant increases in the number of shares available to the plan, with a few exceptions.

Brazilian legislation sets forth a similar requirement, as it establishes the need for approval of the aggregate annual compensation of management members (including shares) and stock option plans at General Stockholders’ Meetings. Please refer to section Our Governance, items Directors’ and Senior Management’s Compensation, for further information.

Corporate Governance Guidelines

NYSE rules require that listed companies adopt and disclose their corporate governance guidelines.

Brazilian legislation does not establish a similar requirement. However, we have a Corporate Governance Policy that consolidates the corporate governance principles and practices that we adopt. We believe such corporate governance principles and practices, consistent with Brazilian legislation, are compatible with the guidelines established by the NYSE. We have adopted stricter rules than those required by Brazilian legislation, since we voluntarily adhered to BM&FBovespa’s Level 1 of Corporate Governance and granted tag-along rights to all stockholders, regardless of their voting rights. Please refer to section Our Governance, item Our Practices, for further information.

Code of Ethics

NYSE rules require that listed companies adopt and disclose a code of business conduct and ethics for their directors, officers and employees. NYSE also requires that listed companies promptly disclose any waiver of the code provisions for directors or officers.

Brazilian legislation does not have a similar requirement. However, we have a Code of Ethics that, among other matters, governs the conduct of all directors, officers and employees of the Itaú Unibanco Group, detailing the principles that guide our attitudes and practices.

Internal Audit

NYSE rules require that listed companies maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company’s risk management processes and internal control systems.

Brazilian banking legislation establishes a similar requirement, since it requires that financial institutions have an internal audit function. Our internal audit function is responsible for assessing the sufficiency and effectiveness of our operating and management controls, as well as the adequacy of our risk identification and risk management processes. In addition, our internal audit function is independent from management in carrying out its activities and has access to all places, information and people deemed necessary for it to carry out its duties. The internal audit function is administratively subordinated to the Chairman of the Board of Directors, and its activities are supervised by the Audit Committee.
We believe risk management is an essential tool to optimize the use of resources and selecting the best business opportunities to maximize value creation for shareholders.
Risk factors

This section addresses the risks we consider relevant for our business and for investment in our securities. Should any of these events occur, our business and financial condition, as well as the value of the investments made in our securities, may be adversely affected. Accordingly, investors should carefully assess the risk factors described below and the information disclosed in this document.

Other risks that we currently deem irrelevant or we are not aware of may give rise to effects similar to those mentioned above should they actually occur.

Macroeconomic Risks

Changes in economic conditions may adversely affect us.

Our operations are dependent upon the performance of the Brazilian economy and, to a lesser extent, the economies of other countries in which we do business. The demand for credit and financial services, as well as clients' ability to pay, is directly impacted by macroeconomic variables, such as economic growth, income, unemployment, inflation, and fluctuations in interest and foreign exchange rates. Therefore, any significant change in the Brazilian economy and, to a lesser extent, in the economies of other countries in which we do business may affect us.

After a period of accelerated economic expansion, Brazil's growth rates began to slow down in 2011 and by 2015 the country was in recession. Growth may be limited by a number of factors, including structural factors, such as inadequate infrastructure, which entail risks of potential energy shortages and deficiencies in the transportation sector, among others, and lack of qualified professionals, which can reduce the country's productivity and efficiency levels. Low levels of national savings require relatively large financial flows from abroad, which may falter if political and fiscal instability is perceived by foreign investors. Depending on their intensity, these factors could lead to decreasing employment rates and to lower income and consumption levels, which could result in increased default rates on loans we grant for individuals and non-financial corporations and, therefore, have a material adverse effect on us.

Brazilian authorities exercise influence on the Brazilian economy. Changes in monetary, fiscal and foreign exchange policies and in the Brazilian government's structure may adversely affect us.

Brazilian authorities intervene from time to time in the Brazilian economy, through changes in fiscal, monetary, and foreign exchange policies, which may adversely affect us. These changes may impact variables that are crucial for our growth strategy (such as foreign exchange and interest rates, liquidity in the currency market, tax burden, and economic growth), thus limiting our operations in certain markets, affecting our liquidity and our clients' ability to pay and, consequently, affecting us.

In addition, changes in the Brazilian government's structure may result in changes in government policies, which may affect us. This uncertainty may, in the future, contribute to an increase in the volatility of the Brazilian capital markets, which, in turn, may have an adverse impact on us. Other political, diplomatic, social and economic developments in Brazil and abroad that affect Brazil may also affect us.

Inflation and fluctuations in interest rates may have a material adverse effect on us.

Sudden increases in prices and long periods of high inflation may cause, among other effects, loss of purchasing power and distortions in the allocation of resources in the economy. Measures to combat high inflation rates include a tightening of monetary policy, with an increase in the SELIC interest rate, resulting in restrictions on credit and short-term liquidity, which may have a material adverse effect on us. Changes in interest rates may have a material effect on our net margins, since they impact our funding and credit granting costs.

In addition, increases in the SELIC interest rate could reduce demand for credit; increase the costs of our reserves and the risk of default by our clients. Conversely, decreases in the SELIC interest rate could reduce our gains from interest-bearing assets, as well as our net margins.

Instability of foreign exchange rates may negatively affect us.

Brazil has a floating foreign exchange rate system, pursuant to which the market establishes the value of the Brazilian real in relation to foreign currencies. However, the Central Bank may intervene in the purchase or sale of foreign currencies for the purpose of easing variations and reducing volatility of the foreign exchange rate. In spite of those interventions, the foreign exchange rate may significantly fluctuate.

In addition, in some cases, interventions made with the purpose of avoiding sharp fluctuations in the value of the Brazilian real may result in changes in government policies, which may affect us. This uncertainty may, in the future, contribute to an increase in the volatility of the Brazilian real in relation to other currencies may have the opposite effect, leading to an increase in the volatility of the applicable foreign exchange rate.

Instability in foreign exchange rates could negatively impact our business. A potential depreciation of the Brazilian real could result in (i) losses on our liabilities denominated in or indexed to foreign currencies; (ii) a decrease in our ability to pay for obligations denominated in or indexed to foreign currencies, as it would be more costly for us to obtain the foreign currency required to meet such obligations; (iii) a decrease in the ability of our Brazilian borrowers to pay us for debts denominated in foreign currencies.
in or indexed to foreign currencies; and (iv) negative effects on the market price of our securities portfolio. On the other hand, an appreciation of the Brazilian real could cause us to incur losses on assets denominated in or indexed to foreign currencies. For further information on how the effects of these variables may affect us, please see “Crises and volatility in the financial markets of countries other than Brazil may affect the global financial markets and the Brazilian economy and have a negative impact on our operations” below.

**Government fiscal accounts deterioration may affect us.**

The fiscal accounts deterioration if maintained, could generate a loss of confidence of local and foreign investors Regional governments are facing fiscal concerns likewise, due to their high debt burden, declining revenues and inflexible expenditures. Regional governments are facing fiscal concerns likewise, due to their high debt burden, declining revenues and inflexible expenditures. Less credibility could lead to the downgrading of the Brazilian sovereign debt by credit rating agencies, and negatively impact the local economy, causing the depreciation of the Brazilian real, an increase in inflation and interest rates and a deceleration of economic growth, thus adversely affecting our business, results of operations and financial condition.

**Crises and volatility in the financial markets of countries other than Brazil may affect the global financial markets and the Brazilian economy and have a negative impact on our operations.**

The economic and market conditions of other countries, including the United States, countries of the European Union, and emerging markets, may affect the credit availability and the volume of foreign investments in Brazil, to varying degrees. Crises in these countries may decrease investors’ interest in Brazilian assets, which may materially and adversely affect the market price of our securities, making it more difficult for us to access capital markets and, as a result, to finance our operations in the future.

Banks that operate in countries considered to be emerging markets, including ours, may be particularly susceptible to disruptions and reductions in the availability of credit or increases in financing costs, which may have a material adverse impact on their operations. In particular, the availability of credit to financial institutions operating in emerging markets is significantly influenced by aversion to global risk. In addition, any factor impacting investors’ confidence, such as a downgrade in credit ratings, since the ratings of financial institutions, including ours, tend to be subject to a ceiling based on the sovereign credit rating, or an intervention by a government or monetary authority in one of such markets, may affect the price or availability of resources for financial institutions in any of these markets, which may affect us.

The disruptions and volatility in the global financial markets may also have significant consequences in the countries in which we operate, such as volatility in the prices of equity securities, interest rates and foreign exchange rates. Higher uncertainty and volatility may result in a slowdown in the credit market and the economy, which, in turn, could lead to higher unemployment rates and a reduction in the purchasing power of consumers. In addition, such events may significantly impair our clients’ ability to perform their obligations and increase overdue or non-performing loan operations, resulting in an increase of the risk associated with our lending activity. Thus, global financial crises, in addition to the Brazilian macroeconomic environment, may also affect in a material and adverse way the market price of securities of Brazilian issuers or lead to other negative effects in Brazil and in the countries in which we operate and have a material adverse effect on us.

Please refer to [section Context, item Macroeconomic Context, Global Context](#) and [Brazilian Context](#) for further details about data and economic indicators.

**Ongoing high profile anti-corruption investigations in Brazil may affect the perception of Brazil and domestic growth prospects.**

Certain Brazilian companies in the energy and infrastructure sectors are facing investigations by the CVM, the SEC, the U.S. Department of Justice (DOJ), the Brazilian Federal Police and other Brazilian public entities who are responsible for corruption and cartel investigations, in connection with corruption allegations (so called Lava Jato investigations) and, depending on the outcome of such investigations and the time it takes to conclude them, they may face downgrades from credit rating agencies, experience funding restrictions and have a reduction in revenues, among other negative effects. Such negative effects may hinder the ability of those companies to timely honor their financial obligations bringing loses to us as a number of them are our clients. The companies involved in the Lava Jato investigations, a number of which are our clients, may also be prosecuted by investors on the grounds that they were misled by the information released to them, including their financial statements. Moreover, the current corruption investigations have contributed to reduce the value of the securities of several companies. The investment banks (including Itaú BBA Securities) that acted as underwriters on public distributions of securities of such investigated companies are also parties to certain law suits in the U.S. and may be parties to other legal proceedings yet to be filed. We cannot predict how long the corruption investigations may continue, or how significant the effects of the corruption investigations may be for the Brazilian economy and for the financial sector that may be investigated for the commercial relationships it may have held with companies and persons involved in Lava Jato investigations. Other high profile investigation, besides Lava Jato, ongoing in Brazil is the so called Zelotes operation. If the allegations of such investigations are confirmed it may also effect some of our clients and their credit trustworthiness. After reviewing our control
under the new standards. The changes in the law or regulations applicable to financial institutions in Brazil may affect our ability to grant loans and collect debts in arrears, which may have an adverse effect on us. Our operations could also be adversely affected by other changes, including with respect to restrictions on remittances abroad and other exchange controls as well as by interpretations of the law by courts and agencies in a manner that differs from our legal advisors’ opinions.

In the context of economic or financial crises, the Brazilian government may also decide to implement changes to the legal framework applicable to the operation of Brazilian financial institutions. For example, in response to the global financial crisis which began in late 2007, Brazilian national and intergovernmental regulatory entities, such as the Basel Committee on Banking Supervision, proposed regulatory reforms aiming to prevent the recurrence of similar crises, which included a new requirement to increase the minimum regulatory capital (Basel III). Please refer to section Our Risk Management, item Regulatory Environment, Basel III Framework and Implementation of Basel III in Brazil for further details about regulatory capital requirements. Once the implementation of the Basel III framework is completed for Brazilian banks and its effects fully evaluated, we may need to reassess our funding strategy for regulatory capital should additional regulatory capital be required to support our operations under the new standards.

Moreover, the Brazilian Congress is considering enacting new legislation that, if signed into law as currently drafted, could have an adverse effect on us. For example, a proposed law to amend the Brazilian consumer protection code would allow courts to modify terms and conditions of credit agreements in certain circumstances, imposing certain difficulties for the collection of amounts from final consumers. In addition, local or state legislatures may, from time to time consider bills intending to impose security measures and standards for customer services, such as limits in queues and accessibility requirements, that, if signed into law, could affect our operations. More recently, certain bills have passed (and others were proposed) in certain Brazilian states or municipalities that impose, or aim to impose, restrictions on the ability of creditors to include the information about insolvent debtors in the records of credit protection bureaus, which could also adversely affect our ability to collect credit outstanding.

We also have operations outside of Brazil, including, but not limited to, Argentina, Chile, Colombia, Paraguay, United Kingdom, Uruguay, United States and Switzerland. Changes in the laws or regulations applicable to our business in the countries where we operate, or the adoption of new laws, and related regulations, may have an adverse effect on us.

Changes in applicable law or regulations may have a material adverse effect on our business.

Increases in compulsory deposit requirements may have a material adverse effect on us.

Compulsory deposits are reserves that financial institutions are required to maintain with the Central Bank. Compulsory deposits generally do not provide the same returns as other investments and deposits because a portion of these compulsory deposits does not bear interest; instead, these funds must be held in Brazilian federal government securities and used to finance government programs, including a federal housing program and rural sector subsidies. The Central Bank has periodically changed the minimum level of compulsory deposits. Increases in such level reduce our liquidity to grant loans and make other investments and, as a result, may have a material adverse effect on us.

We are subject to regulation on a consolidated basis and may be subject to liquidation or intervention on a consolidated basis.

We operate in a number of credit and financial services related sectors through entities under our control. For regulation or supervision purposes, the Central Bank treats us and our subsidiaries and affiliates as a single financial institution. While our consolidated capital base provides financial strength and flexibility to our subsidiaries and affiliates, their individual activities could indirectly put our capital base at risk. Any investigation or intervention by the Central Bank, particularly in the activities carried out by any of our subsidiaries and affiliates, could have a material adverse impact on our other subsidiaries and affiliates and, ultimately, on us.

If we or any of our financial subsidiaries becomes insolvent, the Central Bank may carry out an intervention or liquidation process on a consolidated basis rather than conduct such procedures for each individual entity. In the event of an intervention or a liquidation process on a consolidated basis, our creditors would have claims on our assets and the assets of our consolidated financial subsidiaries. In this case, credits of the same nature held against us and our consolidated financial subsidiaries would rank equally in respect of payment. If the Central Bank carries out a liquidation or intervention process with respect to us or any of our financial subsidiaries on an individual basis, our creditors would not have a direct claim on the assets of such financial subsidiaries,
and the creditors of such financial subsidiaries would have priority in relation to our creditors in connection with such financial subsidiaries’ assets. The Central Bank also has the authority to carry out other corporate reorganizations or transfers of control under an intervention or liquidation process.

**Holders of our shares and ADSs may not receive any dividends.**

Corporations in Brazil are legally required to pay their stockholders a minimum mandatory dividend at least on a yearly basis (except in specific cases provided for in applicable law). Our Bylaws determine that we must pay our stockholders at least 25% of our annual net income calculated and adjusted pursuant to Brazilian Corporate Law. Applicable Brazilian legislation also allows corporations to consider the amount of interest on shareholders’ equity distributed to their stockholders for purposes of calculating the minimum mandatory dividends. Notwithstanding, the calculation of net income pursuant to the Brazilian Corporate Law may significantly differ from our net income calculated under IFRS.

Brazilian Corporate Law also allows the suspension of the payment of the mandatory dividends in any particular year if our Board of Directors informs our general shareholders meeting that such payment would be incompatible with our financial condition. Therefore, in the occurrence of such event, the holders of our shares and ADSs may not receive any dividends. If this happens, the dividends that were not paid in the particular fiscal year shall be registered as a special reserve and, if not used to cover any losses of subsequent years, the amounts of unpaid dividends still available under such reserve shall be distributed when the financial condition of the corporation allows for such payment.

Furthermore, pursuant to its regulatory powers provided under Brazilian law and banking regulations, the Central Bank may at its sole discretion reduce or determine that no dividends will be paid by a financial institution if such restriction is necessary to mitigate relevant risks to the Brazilian financial system or the financial institution.

Please refer to section Our profile, item Our Shares,Stockholders’ Payment and section Our Risk Management, item Regulatory Environment, Basel III Framework, Implementation of Basel III in Brazil for further details about CMN’s capital requirements and to the section Performance, item Consolidated Financial Statements (IFRS), Note 2.4w and Note 21, for further details about Dividends and Interest on Capital.

**Tax reforms may adversely affect our operations and profitability.**

The Brazilian government regularly amends tax laws and regulations, including by creating new taxes, which can be temporary, and changing tax rates, the basis on which taxes are assessed or the manner in which taxes are calculated, including in respect of tax rates applicable solely to the banking industry. Tax reforms may reduce the volume of our transactions, increase our costs or limit our profitability.

**Decision on lawsuits due to government monetary stabilization plans may have a material adverse effect on us.**

We are defendants in numerous standardized lawsuits filed by individuals in respect of the monetary stabilization plans, or MSP, from 1986 to 1994, implemented by Brazilian federal government to combat hyper-inflation. We record provisions for such claims upon service of process for a claim.

In addition, we are defendants in class actions, similar to the lawsuits by individuals, filed by either (i) consumer protection associations or (ii) public attorneys’ office (Ministério Público) on behalf of holders of savings accounts. Holders of savings accounts may collect any amount due based on such a decision. We record provisions when individual plaintiffs apply to enforce such decisions, using the same criteria used to determine provisions for individual lawsuits.

The Federal Supreme Court (Supremo Tribunal Federal, or STF) has issued a number of decisions in favor of the holders of savings accounts, but has not issued a final ruling with respect to the constitutionality of the MSPs as applicable to savings accounts. In relation to a similar dispute with respect to the constitutionality of the MSPs as applicable to time deposits and other private agreements, the Federal Supreme Court has decided that the laws were in accordance with the Brazilian federal constitution. In response to this discrepancy, the Confederação Nacional do Sistema Financeiro, or CONSF, an association of Brazilian financial institutions, filed a special proceeding with the Federal Supreme Court (Arguição de Descumprimento de Preceito Fundamental nº 165), in which the Central Bank has filed an amicus brief, arguing that holders of savings accounts did not incur actual damages and that the MSPs as applicable to savings accounts were in accordance with the federal constitution. Accordingly, the STF suspended the ruling of all appeals involving this matter until it hands down a final decision. However, there is no estimate of when the STF will render a judgment in the case, as there has not been a sufficient quorum to decide the issue.

In addition, the Superior Court of Justice (Superior Tribunal de Justiça, or STJ), which is the highest court responsible for deciding cases relating to federal laws, is expected to imminently rule on several aspects that will directly determine the amount due, in case the STF rules against the constitutionality of the MSPs. The most relevant of such decisions will be: (i) the accrual of compensatory interests on the amount due to the plaintiff, in filings that carry no specific claim to such interests; (ii) the initial date of default interests, in regard to class actions; and (iii) the possibility of compensating the negative difference arising in the month of the MSP implementation, between the interests actually paid on saving accounts and the inflation rate of the same period, with
the positive difference arising in the months subsequent to the MSP implementation, between the interests actually paid on saving accounts and the inflation rate of the same period. In relevant trials during 2015, the STJ ruled that: (i) compensatory interest would not be included in judgment awards, unless the ruling in question specifically provides for the award thereof; and (ii) compensatory interest shall not be required to be paid to savings accountholders once the institution in question can prove that the corresponding savings account has been terminated. In addition, such rulings also confirmed that inflationary effects from MSPs that became effective after those that are subject to the judicial action in question may be included in the claim for purposes of determining the amounts due thereunder, even without the express request of the account holder seeking judicial relief.

In addition, the STJ ruled that the term for filing class actions expired 5 years from the date of the MSP implementation. As a consequence, numerous class actions have been extinct by the Judiciary as a result of such ruling.

We are also subject to operational risks associated with the handling and conducting of a large number of lawsuits involving government monetary stabilization in case of loss.

Please refer to section Performance, Item Financial Performance, Liabilities, Litigation for further information.

Tax assessments may adversely affect us.
As part of the normal course of business, we are subject to inspections by federal, municipal and state tax authorities. These inspections, arising from the divergence in the understanding of the application of tax laws may generate tax assessments which, depending on their results, may have an adverse effect on our financial results.

Risks Associated With Our Business
Market Risk Factor
The value of our securities and derivatives is subject to market fluctuations due to changes in Brazilian or international economic conditions and, as a result, may subject us to material losses.

The securities and derivative financial instruments in our portfolio may cause us to record gains and losses, when sold or marked to market (in the case of trading securities), and may fluctuate considerably from period to period due to domestic and international economic conditions. If, for example, we enter into derivative transactions to hedge against decreases in the value of the Brazilian real or in interest rates and the Brazilian real appreciates or interest rates increase, we may incur financial losses and such financial losses could have a material adverse effect on us. In addition, we may incur losses from fluctuations in the market value of positions held, including risks associated with transactions subject to variations in foreign exchange rates, interest rates, price indexes, and equity and commodity prices, along with various indexes on these risk factors.

We cannot predict the amount of realized or unrealized gains or losses for any future period. Gains or losses on our investment portfolio may not contribute to our net revenue in the future or may cease to contribute to our net revenue at levels consistent with more recent periods. We may not successfully realize the appreciation or depreciation now existing in our consolidated investment portfolio or in any assets of such portfolio.

Operational Risk Factor
Failures, deficiency or inadequacy of our internal processes and human error or misconduct may adversely affect us.
Although we have in place information security controls, policies and procedures designed to minimize human error, and make continuous investments in infrastructure, management of crises and operations, the operational systems related to our business may stop working properly for a limited period of time or may be temporarily unavailable due to a number of factors. These factors include events that are totally or partially beyond our control such as power outages, interruption of telecommunication services, and generalized system failures, as well as internal and external events that may affect third parties with which we do business or that are crucial to our business activities (including stock exchanges, clearing houses, financial dealers or service providers) and events resulting from wider political or social issues, such as cyber-attacks or unauthorized disclosures of personal information in our possession.

Operating failures, including those that result from human error or fraud, not only increase our costs and cause losses, but may also give rise to conflicts with our clients, lawsuits, regulatory fines, sanctions, interventions, reimbursements and other indemnity costs, all of which may have a material adverse effect on our business, reputation and results of operations.

Cyberattacks may cause loss of revenue and reputational harm through data security breaches that may disrupt our operations or result in the dissemination of proprietary or confidential information.
We manage and store certain proprietary information and sensitive or confidential data relating to our operations. We may be subject to breaches of the information technology systems we use for these purposes. We are strongly dependent on technology and thus are vulnerable to viruses, worms and other malicious software, including “bugs” and other problems that could unexpectedly interfere with the operation of our systems. We also rely in certain limited capacities on third-party data management providers whose possible security problems and security vulnerabilities may have similar effects on us.
The costs to us to eliminate or address the foregoing security problems and security vulnerabilities before or after a cyber incident could be significant and the lack of remediation may result in interruptions, delays and may affect clients and partners.

**Competition Risk Factor**  
We face risks associated with the increasingly competitive environment and recent consolidations in the Brazilian banking industry.

The Brazilian market for financial and banking services is highly competitive. We face significant competition from other large Brazilian and international banks. Competition has increased as a result of recent consolidations among financial institutions in Brazil and of regulations that increase the ability of clients to switch business between financial institutions. Please refer to section **Our Risk Management**, item **Regulatory Environment**, **Antitrust Regulation** for further information about the competition on the Brazilian Markets. Such increased competition may adversely affect us by, among other things, limiting our ability to retain or increase our current client base and to expand our operations, or by impacting the fees and rates we adopt, which could reduce our profit margins on banking and other services and products we offer.

**Credit Risk Factors**  
Changes in the profile of our business may adversely affect our loan portfolio.

Our historical loan loss experience may not be indicative of our future loan losses. While the quality of our loan portfolio is associated with the default risk in the sectors in which we operate, changes in our business profile may occur due to our organic growth or merger and acquisition activity, changes in local economic conditions and, to a lesser extent, in the international economic environment, in addition to changes in the tax regimes applicable to the sectors in which we operate, among other factors. Any changes affecting any of the sectors to which we have significant lending exposure may adversely affect our loan portfolio. For example, in recent years, Brazilian banks have experienced an increase in loans to consumers, particularly in the automotive sector. However, this increased demand for vehicle financing was followed by a significant rise in the level of consumer indebtedness, which led this portfolio to incur high nonperforming loan rates. As a result, many financial institutions recorded higher loan losses due to an increased volume of provisions and a decrease in loans for vehicle acquisition.

**We may incur losses associated with counterparty exposure risks.**

We may incur losses if any of our counterparties fail to meet their contractual obligations, due to bankruptcy, lack of liquidity, operational failure or other reasons that are exclusively attributable to our counterparties. This counterparty risk may arise, for example, from our entering into reinsurance agreements or credit agreements pursuant to which counterparties have obligations to make payments to us and are unable to do so, or from our carrying out transactions in the foreign currency market (or other markets) that fail to be settled at the specified time due to non-delivery by the counterparty, clearing house or other financial intermediary. We routinely conduct transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds and other institutional clients, and their failure to meet their contractual obligations may adversely affect our financial performance.

**We have significant exposure to Brazilian federal government debt.**

Like most Brazilian banks, we invest in debt securities issued by the Brazilian government. As of December 31, 2015, approximately 13.9% of all our assets and 60.5% of our securities portfolio were comprised of these debt securities. Any failure by the Brazilian government to make timely payments under the terms of these securities, or a significant decrease in their market value could negatively affect our results of operations and financial condition.

**Underwriting Risk Factor**  
*Inadequate pricing methodologies for insurance, pension plan and premium bond products may adversely affect us.*

Our insurance and pension plan subsidiaries establish prices and calculations for our insurance and pension products based on actuarial or statistical estimates. The pricing of our insurance and pension plan products is based on models that include a number of assumptions and projections that may prove to be incorrect, since these assumptions and projections involve the exercise of judgment with respect to the levels and timing of receipt or payment of premiums, contributions, provisions, benefits, claims, expenses, interest, investment results, retirement, mortality, morbidity and persistency. We could suffer losses due to events that are contrary to our expectations directly or indirectly based on incorrect biometric and economic assumptions or faulty actuarial bases used for contribution and provision calculations.

Although the pricing of our insurance and pension plan products and the adequacy of the associated reserves are reassessed on a yearly basis, we cannot accurately determine whether our assets supporting our policy liabilities, together with future premiums and contributions, will be sufficient for the payment of benefits, claims, and expenses. Accordingly, the occurrence of significant deviations from our pricing assumptions could have an adverse effect on the profitability of our insurance and pension products. In addition, if we conclude that our reserves and future premiums are insufficient to cover future policy benefits and claims, we will be required to increase our reserves and record these effects in our financial statements, which may have a material adverse effect on us.
Management Risk Factors
Our policies, procedures and models related to risk control may be ineffective and our results may be adversely affected by unexpected losses.

Our risk management methods, procedures and policies, including our statistical models and tools for risk measurement, such as value at risk (VaR), and default probability estimation models, may not be fully effective in mitigating our risk exposure in all economic environments or against all types of risks, including those that we fail to identify or anticipate. Some of our qualitative tools and metrics for managing risk are based on our observations of the historical market behavior. In addition, due to limitations on information available in Brazil, to assess clients’ creditworthiness, we rely largely on credit information available from our own databases, on certain publicly available consumer credit information and other sources. We apply statistical and other tools to these observations and data to quantify our risk exposure. These tools and metrics may fail to predict all types of future risk exposures. These risk exposures, for example, could arise from factors we did not anticipate or correctly evaluate in our statistical models. This would limit our ability to manage our risks. Our losses, therefore, could be significantly greater than indicated by historical measures. In addition, our quantified modeling may not take all risks into account. Our qualitative approach to managing those risks could prove insufficient, exposing us to material unexpected losses.

Our results of operations and financial position depend on our ability to evaluate losses associated with risks to which we are exposed and on our ability to build these risks into our pricing policies. We recognize an allowance for loan losses aiming at ensuring an allowance level compatible with the expected loss, according to internal models credit risk measurement. The calculation also involves significant judgment on the part of our management. Those judgments may prove to be incorrect or change in the future depending on information as it becomes available. These factors may adversely affect us.

Damages to our reputation could harm our business and outlook.

We are highly dependent on our image and credibility to generate business. A number of factors may tarnish our reputation and generate a negative perception of the institution by our clients, counterparties, stockholders, investors, supervisors, commercial partners and other stakeholders, such as noncompliance with legal obligations, making irregular sales to clients, dealing with suppliers with questionable ethics, clients data leakage, inadequate behaviors by our employees, and third-party failures in risk management, among others. In addition, certain significant actions taken by third parties, such as competitors or other market participants, may indirectly damage our reputation with clients, investors and the market in general. Damages to our reputation could have a material adverse effect on our business and prospects.

Strategy Risk Factors
Our controlling stockholder has the ability to direct our business.

As of January 31, 2016, IUPAR, our controlling stockholder, directly owned 51.00% of our common shares and 25.54% of our total share capital, giving it the power to appoint and remove our directors and officers and determine the outcome of any action requiring stockholder approval, including transactions with related parties, corporate reorganizations and the timing and payment of dividends.

In addition, IUPAR is jointly controlled by Itaúsa, which, in turn, is controlled by the Egydio de Souza Aranha family, and by Cia. E. Johnston, which in turn is controlled by the Moreira Salles family. The interests of IUPAR, Itaúsa and the Egydio de Souza Aranha and Moreira Salles families may be different from the interests of our other stockholders.

In addition, some of our directors are affiliated with IUPAR and circumstances may arise in which the interests of IUPAR and its affiliates conflict with the interests of our other stockholders. To the extent that these and other conflicting interests exist, our stockholders will depend on our directors duly exercising their fiduciary duties as members of our Board of Directors. Notwithstanding, according to Brazilian Corporation Law the controlling stockholders should always vote in the interest of the Company. In addition, they are prohibited to vote in cases of conflict of interest in the matter to be decided.

The integration of acquired or merged businesses involves certain risks that may have a material adverse effect on us.

As part of our growth strategy in the Brazilian and Latin America financial sector, we have engaged in a number of mergers, acquisitions and partnerships with other companies and financial institutions in the past and may pursue further such transactions in the future. Any such transactions involve risks, such as the possible incurrence of unanticipated costs as of result of difficulties in integrating systems, finance, accounting and personnel platforms, fail in diligence or the occurrence of unanticipated contingencies. In addition, we may not achieve the operating and financial synergies and other benefits that we expected from such transactions.

There is also the risk that antitrust and other regulatory authorities may impose restrictions or limitations on the transactions or on the businesses that arise from certain combinations or applying fines or sanction due to the interpretation of the authorities of irregularities on a corporate merger, consolidation or acquisition, even if the institution has done this legally, clearly and transparently, as they and the experts in corporate law understood.

If we are unable to take advantage of business growth opportunities, cost savings and other benefits we anticipate from mergers and acquisitions, or if we incur greater integration costs than we have estimated, then we may be adversely affected.
Financial Reporting Risks

We make estimates and assumptions in connection with the preparation of our consolidated financial statements, and any changes to those estimates and assumptions could have a material adverse effect on our operating results.

In connection with the preparation of our consolidated financial statements, we use certain estimates and assumptions based on historical experience and other factors. While we believe that these estimates and assumptions are reasonable under the circumstances, they are subject to significant uncertainties, some of which are beyond our control. Should any of these estimates and assumptions change or prove to be incorrect, our reported operating results could be materially adversely affected.

As a result of the inherent limitations in our disclosure and accounting controls, misstatements due to error or fraud may occur and not be detected.

Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in reports we file with or submit to the SEC under the Exchange Act is accumulated and communicated to management, recorded, processed summarized and reported within the time periods specified in SEC rules and forms. We believe that any disclosure controls and procedures or internal controls and procedures, including related accounting controls, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. In addition, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by an unauthorized override of the controls.

Any failure by us to maintain effective internal control over financial reporting may adversely affect investor confidence in our company and, as a result, the value of investments in our securities.

We are required under the Sarbanes-Oxley Act of 2002 to furnish a report by our management on the effectiveness of our internal control over financial reporting and to include a report by our independent auditors attesting to such effectiveness. Any failure by us to maintain effective internal control over financial reporting could adversely affect our ability to report accurately our financial condition or results of operations. If we are unable to conclude that our internal control over financial reporting is effective, or if our independent auditors determine that we have a material weakness or significant deficiency in our internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, the market prices of our shares and ADSs could decline, and we could be subject to sanctions or investigations by the SEC or other regulatory authorities. Failure to remedy any material weakness in our internal control over financial reporting, or to implement or maintain other effective control systems required of public companies subject to SEC regulation, also could restrict our future access to the capital markets.

Risk and capital management

We regard risk management as an essential instrument to optimize the use of our resources and to assist us in selecting business opportunities in order to maximize value creation to stockholders.

Our risk management process includes:

- Identification and measurement of existing and potential risks in our operations;
- Approval of risk management and control institutional policies, procedures and methodologies according to the guidelines of the Board of Directors and our corporate strategies; and
- Management of our portfolio seeking optimal risk-return ratios.

The risk identification process purpose is to map internal and external risk threats that may affect the business’ and support units’ strategies, keeping them from achieving their goals, potentially impacting our earnings, capital, liquidity and reputation.

Risk management processes are embedded in the entire institution and are aligned with the guidelines of our Board of Directors and senior management which, through the committees described below determine overall risk management objectives by establishing targets and limits applicable to our business units. The control and capital management units, in turn, support our management by means of monitoring.
procedures and risk and capital analysis. Please refer to section Our Governance, item Management Structure, Board of Directors and Board of Officers for further details about our Board of Directors responsibilities.

In line with CMN and Central Bank regulations, we implemented a capital management structure and the Internal Capital Adequacy Assessment Process (ICAAP).

Our organizational risk management governance is structured in compliance with regulations in Brazil and abroad and in line with market best practices. Control of our credit, market, operational, liquidity and underwriting risks is performed in a centralized manner by an independent unit, led by an executive director reporting to our Chief Executive Officer (CEO) and to the Board of Directors, in order to ensure that such risks are managed pursuant to our risk appetite and our existing policies and procedures. This independent unit is also responsible for centralizing our capital management. Centralized control is intended to provide the Board of Directors and senior management with a global view of our exposures to risks, as well as with a prospective view of our capital adequacy, so as to optimize and expedite appropriate corporate decisions.

We use information technology (IT) systems to comply with the Central Bank’s capital reserve requirements, as well as for risk measurement purposes, following regulations and regulatory models. We also coordinate actions among different units to verify compliance with qualitative and quantitative requirements established by relevant authorities to maintain the minimum required capital and monitor risks.

**Risk and Capital Governance**

We established committees that are responsible for risk and capital management and report directly to the Board of Directors. Committee members are elected by the Board of Directors, the main authority with respect to risk and capital management decisions. At the executive level, risks are managed by corporate committees, which are chaired by our CEO.

The following committees are part of our risk and capital management governance structure:

- **Board of Directors**
- **Risk and Capital Management Committee (CGRC)**: supports the Board of Directors in the performance of its duties related to our risk and capital management by meeting, at least, quarterly and submitting reports and recommendations to assist the Board of Directors in its decision-making with respect to:
  - Decisions regarding our appetite for risk in terms of capital, liquidity, results and franchise (our brand), ensuring these aspects are in alignment with our strategy and including: acceptable levels of capital and liquidity, types of risk to which we could be exposed as well as aggregate limits for each type of risk, tolerance with respect to volatility of results and risk concentrations, general guidelines on tolerance regarding risks that may have an impact on our franchise (or the value of our brand, i.e., image risk);
  - Supervision of our risk management and control activities to ensure our adequacy to the risk levels assumed and the complexity of transactions in which we engage, as well as compliance with regulatory requirements;
  - Review and approval of capital management institutional policies and strategies that establish mechanisms and procedures intended to maintain capital compatible with the risks incurred by us;
  - Determination of our minimum expected return on capital for our entire business, as well as performance monitoring;
  - Supervision of our incentive structures, including compensation, seeking to ensure their alignment with risk control and value creation objectives; and
  - Promotion and improvement of our risk culture.
- **Audit Committee**: we have a single Audit Committee overseeing all entities within the Itaú Unibanco Group that are either authorized to operate by the Central Bank or that are supervised by SUSEP. In accordance with its internal rules, approved by the Board of Directors, the Audit Committee must meet at least quarterly and otherwise when the Chairman of the committee deems necessary. The committee...
is responsible for overseeing the quality and integrity of our financial statements, the compliance with legal and regulatory requirements, the performance, independence and quality of the services provided by our independent auditors and of work performed by our internal auditors, and the quality and effectiveness of the internal control and risk management systems.

Additionally, the Committee will, individually or jointly with the Conglomerate's respective independent audit companies, formally communicate with the Central Bank or SUSEP, as the case may be: (i) noncompliance with the legal and regulatory provisions and internal norms that place the continuity of our companies at risk; (ii) fraud of any value perpetrated by senior management (members of the Board of Directors and Executive Board) of our companies; (iii) significant fraud perpetrated by our employees or by third parties; and (iv) errors resulting in significant inaccuracies in our financial statements of our companies.

Please refer to the section Our Governance, item Management Structure for further details about the responsibilities of these Committees.

Superior Market Risk and Liquidity Committee (CSRML): meets on a monthly basis to set guidelines and governance for investments and market and liquidity risks regarding our consolidated positions and business lines.

The CSRML is responsible for the strategic management and control of risks, and for setting limits for market and liquidity risks, according to the authority delegated by the Risk and Capital Management Committee (CGRC). The CSRML is also responsible for analyzing the levels of our current and future liquidity and taking steps to promote the safe and efficient evolution of our financial flows.

The CSRML is responsible for discussing and establishing (i) additional liquidity and market risks; (ii) guidelines to delegate operations and decision powers to the Market Risk and Liquidity Management Committee (CGRML); (iii) the funding policy and the policy on investments in the domestic and international financial markets; (iv) the criteria and rules on transfer pricing among companies of the conglomerate; (v) the strategies for financing group portfolios; (vi) the guidelines and governance for market risk and liquidity in managing funds from Technical Reserves and from Insurance, Pension and Savings Bonds; and (vii) the guidelines for monitoring the balance between assets and liabilities of Closed Private Pension Entities (Foundations) associated with the conglomerate.

Superior Operational Risk Management Committee (CSRO): meets at least on a quarterly basis. Its chief responsibilities are: understanding the risks of our processes and business, defining guidelines for managing operating risks and assessing the results achieved by our Internal Controls and Compliance System.

Superior Products Committee (CSP): meets on a weekly basis and is the highest authority to approve our products, operations, services and related processes. It is responsible for:

- Evaluating products, operations, services and processes that do not fall under the responsibility of other committees subordinated to it;
- Evaluating products, operations and processes that the Wholesale Bank does not have authority to approve; and
- Evaluating products, operations, services and processes that involve risk to our image.

Superior Retail Credit and Collection Committee (CSCCV): meets on a monthly basis and is responsible for approving credit policies and assessing the performance of Retail Credit and Collection portfolios and strategies.

Superior Wholesale Credit and Collection Committee (CSCCA): meets on a monthly basis and is responsible for approving credit policies and assessing the performance of Wholesale Credit and Collection portfolios and strategies.

Superior Credit Committee (CSC): meets on a weekly basis. It is responsible for:

- Analyzing and deciding on credit proposals that are beyond the authority of the Credit Committees that report to it; and
- Reviewing decisions which were not made due to a lack of consensus at the committee immediately subordinate to it or that were submitted to it for review due to the relevance of the topic or other features.

Risk and Financial Policies Committee (CNRF): meets at least five times a year, to:

- Review and approve, by consensus, the circulars and attachments prepared by the Risk and Finance Control and Management Area (ACGRF);
- Recommend, for final approval by the Board of Directors, the institutional policies prepared by ACGRF; and
- Ratify attachments approved at the appropriate authority levels.

Model Assessment Technical Committee (CTAM):

CTAM – Market: meets every two months or upon request for the approval and assessment of market and pricing risk models based on the opinion of the independent model validation group, suggests and monitors action plans for the validated models and monitors the performance of the market risk model our time goes by, determining new developments, if necessary.

CTAM – Credit: meets monthly or when required. Its purpose is to approve the use of credit risk models from a technical viewpoint. Its responsibilities are: to give technical approval for the use of credit risk models; to issue the technical opinions of the Broad Validation Unit on credit risk models and on other models used in the management and/or quantification of specific risks, according to our needs and priorities; to resolve important management changes to the models in use; and
to decide on conditions for the use of models, recommendations for action plans to eliminate/ minimize risks and suggestions for future models submitted by the Broad Validation Unit.

Risk Management

Credit Risk
Credit risk is the possibility of losses due to the failure by the borrower, issuer or counterparty to perform their respective financial obligations under agreed upon terms, the devaluation of a credit agreement resulting from a deterioration of the risk rating of the borrower, issuer or counterparty, the reduction of earnings or remuneration, and the benefits granted upon renegotiation or the recovery costs.

Our credit risk management and control structure establishes operational limits, risk mitigation mechanisms and processes, and instruments to measure, monitor and control risk that can quantify the credit risk inherent in all products, portfolio concentrations and the impacts of potential changes in the economic environment. Our portfolio, policies and strategies are continuously monitored to ensure compliance with the rules and laws in effect in each country.

Our credit risk management structure is the primary responsibility of all Business Units and aims to keep the quality of our credit portfolio consistent with risk appetite levels for each market segment in which we operate. The Business Units are responsible for:

- Following up and closely monitoring the portfolios of credit under their responsibility;
- Granting credit in accordance with the authority levels, market conditions, macroeconomic prospects, changes in markets and products and the effects of sector and geographic concentrations; and
- Managing credit risk by adopting actions that provide sustainability to its business.

Our institutional policies on credit risk management are approved by our Board of Directors and applicable to all of our companies and subsidiaries in Brazil and abroad.

Our credit policy is based on internal factors, such as borrower ratings criteria, performance and evolution of our portfolio, default levels, return rates, and allocated economic capital; and on external factors related to the economic environment, interest rates, market default indicators, inflation and changes in consumption levels.

We have a structured process to maintain a diversified portfolio considered appropriate by our institution. The concentrations are monitored continuously for economic sectors, and largest debtors, allowing preventive measures to be taken to avoid the violation of the established limits.

Our credit risk management governance is conducted through corporate committees that report to the Board of Directors or to our executive officers and act primarily by assessing competitive market conditions, setting our credit limits, reviewing control practices and policies and approving actions at different authority levels. The risk communication and reporting processes, including the disclosure of institutional policies on credit risk management, are also part of this governance structure.

Our credit risk control is carried out by an independent area within the bank, which is responsible for risk management and which operates separately from business units, as required by current regulations. For the credit risk control process, the main responsibilities of the risk management control area are:

- Monitoring and controlling the performance of the credit portfolios in accordance with the limits approved by senior management;
- Conducting a centralized control of the credit risk area, which is through a unit that is independent from our other business units;
- Managing the process of preparation, review and approval of institutional policies applied to credit risk, as provided for regulatory guidelines; and
- Assessing the credit risk of the operations at the authority levels appointed by the credit commissions.

Our evaluation process, with respect to policies and products, enables us to identify potential risks in order to ensure that credit decisions fall within our acceptable risk parameters, taking into account the economic benefits.

Our centralized process for approving credit policies and validating models ensures the synchronization of credit actions.

The credit rating for our Wholesale transactions is based on information such as the economic and financial condition of the counterparty, its cash-generating capabilities, its relevant affiliated parent and companies and the current and prospective situation of the economic sector in which it operates. Credit proposals are analyzed on a case-by-case basis through our internal approval governance structure.

With respect to our Retail transactions (individuals, small and middle-market companies), rating is assigned based on two statistical models: (i) application (in the early stages of our relationship with a customer) and (ii) behavior (used for customers with whom we already have a relationship). Decisions are made based on scoring under these models and resulting ratings are continuously monitored by our credit risk independent unit. In some cases, an individual analysis of specific cases may be performed, in which case credit approval is submitted to the applicable authority levels.

Additionally, the risk assessment of both the Retail and the Wholesale segments takes into account the client’s level of indebtedness to us as well as other creditors.
Government securities and other debt instruments to be purchased or held in our portfolio are classified by our credit risk independent area or business unit according to our credit quality parameters with the purpose of managing the exposures.

We seek to strictly control our credit exposure to clients and counterparties, taking action to remediate occasional situations in which our actual exposure exceeds targeted levels. In the cases where our actual exposure exceeds targeted levels, we may seek enforcement of contractual provisions such as the right to demand early payment or require additional collateral and/or guarantees.

We count on a specific structure and processes aimed at ensuring that the country risk related to our client is managed and controlled, including: (i) country risk governance; (ii) country ratings; (iii) credit limits for specific countries; (iv) limits monitoring; and (v) actions to limit breaches.

In line with the principles of the CMN regulation, our credit risk management structure and institutional policy are approved by our Board of Directors and are applicable to all companies and subsidiaries in Brazil and abroad.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 36 – Management of Financial Risks for further details about Credit Risk.

Loan Approval Process
Extensions of credit are approved based on policies at the business unit level, determined in accordance with the assumptions of each department and our bank’s risk appetite. The decision to extend credit may be granted by means of a pre-approval process or the traditional approval mechanism, which is applied on a client by client basis. In both cases, the decisions are made based on principles of credit quality such as credit rating supported by statistical models, percentage of income committed by/leveraged of the client and credit restrictions determined by us and the market.

The business units prepare and keep updated the policies and procedures of the credit cycle.

The credit granting process contemplates the use of credit protection services with the purpose of checking whether a client’s credit history includes information that could be considered an obstacle to granting a loan, such as assets blocked by court orders, invalid tax payer identification numbers, prior or pending debt restructuring or renegotiation processes and checks not honored due to insufficient funds.

The policy assessment process allows for the identification of potential risks and is intended to ensure that credit decisions make sense from both an economic and a risk perspective.

Individuals
Our branch network extends nationwide and adopts a client segmentation strategy pursuant to which products and services are developed to meet the specific needs of a diversified client base. Credit products offered at our branch network and through our electronic channels include, among others, overdraft protection, credit cards, personal loans and vehicle financing.

In all cases, an internal credit score is applied and a cut-off threshold is defined for each product line.

In the case of pre-approved credit, if a client's risk profile is within the cut-off threshold and parameters established under our credit policy, the credit is considered pre-approved and is automatically available to the client. In the cases where credit is not pre-approved, credit review is carried out through a traditional process under which proposals are assessed on an individual basis by a credit expert. Under this process, approvals are decided by a credit desk, since commercial managers do not have authority to approve individual applications.

Documentation required at the moment the client decides to open an account with us or when we grant a loan includes an application form with the client’s signature, personal identification and proof of income.

Credit cards
Our credit card business is comprised of Itaucard and Hipercard credit cards as well as credit cards from associations and commercial agreements with significant retailers. Our credit cards are available to account-holding or non-account holding clients, and can be applied for by telephone, internet or points of service at our partner institutions.

The credit granting process for credit cards includes a pre-qualification phase in which internal or market restrictive filters are applied. For eligible clients, the maximum credit amount offered takes into consideration the client’s risk, based on statistical models specifically designed for credit cards (application score) and on the applicants’ income. A fixed interest rate is applied to revolving credit transactions.

Personal loans
Our decision on whether to grant loans to our account holders takes into account the client’s income level and our internal client credit rating, which is based on internally developed statistical models. Through these models, we determine which clients will receive credit offers and in which amounts, the maximum number of installments and the maximum amount for monthly installments, based on fixed interest rates.

Payroll loans
Our payroll loan products are available to account-holding or non-account holding clients. Fixed installments are directly deducted from the borrower’s payroll to the bank’s account without being recorded in the debtor’s account.

The maximum percentage of installments to income is defined by law and is limited to 35% of a payroll loan borrower’s net income, of which 5% should be devoted exclusively to credit cards.
Our strategy in this segment is to focus on loans to the INSS’s beneficiaries, that receive benefits from federal, state or municipal governments, which, combined with our good management practices and credit policies, should allow us to increase this portfolio with low delinquency levels compared to other types of products.

Documentation required to receive a payroll loan includes personal identification, proof of payroll and residence and proof of the bank account where the client receives payroll benefits. If the salary is deposited with us, this documentation is not necessary.

Itaú BMG Consignado is the financial institution controlled by Itaú Unibanco Holding through which we engage in the offering, distribution and sale of payroll loans in Brazil.

Vehicle financing

Vehicle financing proposals are submitted through (i) partner car dealers throughout Brazil for all types of clients (whether account holders or not) or (ii) directly at our branches or through electronic channels for account holders.

A client’s internal credit rating and the terms and conditions of the proposed transaction are taken into account before approving the proposal. If the proposed transaction meets all of our credit policy requirements, which determine maximum installment amounts, loan to value, or LTV, and maturity, and the client’s personal information is validated by credit protection services, the loan is automatically approved.

A fixed interest rate is set based on the credit rating and the characteristics of the transaction. All vehicle financing transactions are secured by the asset itself, and the maximum LTV is defined to support any possible stress periods.

Mortgage loans

In addition to real estate loans provided through our branch network, we have entered into partnerships with large real estate brokers in Brazil, which originate real estate financing, transactions for us on an exclusive basis and in different cities across the country.

The approval of real estate loans is based on assumptions involving the portion of a client’s income to be committed to loan repayments, the client rating according to our internal rating system and the maximum LTV, so that even under a stress scenario LTV is kept at adequate levels. Interest rates are fixed.

The data included in the financing proposal is analyzed, validated and confirmed by supporting documentation provided by the client. The proposal may be rejected if the information provided to us is found to be inconsistent, the proposal fails to meet our current policy requirements or any requested information fails to be provided.

Credit to very small and small companies

We offer products such as working capital financing and discount of trade receivables to very small and small companies.

Credit limits to very small and small companies are assigned according to a client’s revenues and are based on a business risk assessment, as well as on other criteria such as the financial condition of the company’s stockholders or partners, the identification of possible credit restrictions and an evaluation of the economic sector in which the company operates.

Similarly to our procedures for granting of loans to individuals, credit may be granted to very small and small companies pursuant to a pre-approved limit or subject to an individual analysis by a credit desk.

Documentation required includes the company’s governing documents, proof of revenues and information on the partners or stockholders.

Much of the credit we extend to for companies in this segment requires the provision of collateral or guarantees. Transactions to finance the production of goods usually require machinery and equipment as collateral. Working capital financing may be collateralized by trade receivables, checks receivable or credit cards receivable or may be collateralized by the company’s partners or stockholders and/or third parties.

Interest rates can be fixed or variable depending on the product that is chosen by the client.

Corporate Credit

The credit analysis process for middle market and large companies is carried out based on the financial condition of such companies and any corporate groups to which they belong. The credit analysis takes into account the company’s history, financial capacity and adequacy of the requested transaction to the client’s needs. This analysis is based on the company’s financial statements (balance sheet, statement of income, statement of cash flows), on-site meetings with the company, market conditions, analysis of the economic sector in which the company operates and inquiries into credit protection services. An environmental analysis is carried out simultaneously with our credit analysis, and a plan of action may be created as a result of this analysis for the company to comply with the requirements determined by our internal environmental policy, or a recommendation to deny the credit may be issued.

The proposed maximum credit amount extended and the client internal rating, with a defined cut-off, are submitted to the appropriate authorization levels depending on the amount involved, term of the transaction and available security or guarantees, in accordance with our governance policies. Interest rates can be fixed or variable depending on the product that is chosen by the client within the credit limit approved.

International Units

The individual and legal entities of International Units follow procedures similar to those applied to individuals and the corporate segments mentioned above. For the individuals segment, lending is mainly based
on income level and internal credit rating. In the corporate segment, the granting of credit is based on the economic and financial analysis of the client.

Credit granting in our subsidiaries operating outside of Brazil follows the same corporate governance and policies described above. All subsidiaries are subject to a centralized management that monitors the performance of our portfolio, establishes rules for credit granting and is responsible for the corporate governance related to credit granting.

**Risk-Mitigating Instruments**

As part of our credit risk control, we have institutional policies establishing guidelines and duties in connection with the request for provision of collateral and each business unit is responsible for establishing, in its own credit policies, credit risk management rules for the acceptance of such collateral.

Collateral or personal guarantees may be required to mitigate our risk exposure to certain transactions. In order to be considered a risk-mitigating instrument, collateral must meet legal and performance requirements established in our internal policies. All collateral that may impact credit risk, capital allocation and accrual are periodically reviewed by us, ensuring that they are legally enforceable.

**Market Risk**

Market risk is the possibility of losses resulting from fluctuations in the market value of positions held by a financial institution, most typically caused by variations in foreign exchange rates, interest rates, Brazilian inflation indexes, equity and commodity prices, along with various indexes for these risk factors. Market risk management is the process by which our management monitors and controls risk of variations in the value of financial instruments due to market movements, while aiming to optimize the risk-return ratio through an adequate limit and alert structure (described below), effective risk management models and related management tools.

Our policies and general market risk management framework are consistent with the principles contained in CMN regulations and apply our approach to market risk control and management across all business units and legal entities of the Itaú Unibanco Group.

Our market risk management strategy is aimed at balancing corporate business goals, taking into account, among other things:

- Political, economic and market conditions;
- The profile of our portfolio; and
- Expertise within the Itaú Unibanco Group to support operations in specific markets.

Our market risk management framework is subject to the governance and hierarchy of committees and to a structure of limits and alerts, with specific limits assigned to different portfolios and levels (for example, Banking Portfolio, Trading Portfolio, Equities Desk), as well classes of market risk (such as interest rate risk, foreign exchange risk, among others). This structure of limits and alerts ranges from aggregated risk indicators at the portfolio level, to more granular limits at the individual desk level. The market risk limits framework extends to the risk factor level, with specific limits and aims to improve the process of understanding and monitoring risk, as well as preventing risk concentration. Limits and alerts are calibrated based on projections of future balance sheets, stockholders’ equity, liquidity, complexity and market volatility and our risk appetite. Limits are monitored on a daily basis and breaches and potential breaches of limits are reported and discussed in accordance with the following procedure:

- within one business day, for management responsible for the business units and executives in the risk control area and business areas; and
- within one month, for the competent committees.

Daily risk reports, used by the business and control units, are also sent to senior management. In addition, our market risk management and control process is subject to periodic reviews, to ensure it reflects the best market practices, and continues to improve over time.

Our structure of limits and alerts follows the Board of Directors guidelines and is approved by the committees. The process for defining limit levels and reporting violations is subject to our governance institutional policies of approval. The established information flow is intended to provide this information to our various executive levels, including members of the Board of Directors through the committees responsible for risk management.

The key principles underlying our market risk control are as follows:

- Provide visibility and comfort for all senior management levels that market risks assumed must be in line with our risk-return objectives;
- Provide disciplined and informed dialogue of the overall market risk profile and its evolution over time;
- Increase the transparency as to how the business works to optimize results;
- Provide early warning mechanisms to facilitate effective risk management, without obstructing the business objectives; and
- Concentration of risks must be monitored and avoided.

Market risk is controlled by a unit that is independent from our “risk originating” business units and is responsible for performing the daily activities of: (i) risk measurement and assessment; (ii) monitoring of stress scenarios, limits and alerts; (iii) application of stress scenarios, analysis and tests; (iv) reporting of risk to responsible individuals within the relevant business unit, in accordance with our governance requirements; (v) monitoring the necessary actions to readjust positions and/or levels of risk to make them viable; and (vi) supporting the secure launch of new financial products. To this end, we have a structured...
process of communication and information flow that provides information to our committees and monitors compliance with the requirements of Brazilian and relevant foreign regulatory agencies.

We hedge transactions with clients and proprietary positions, including foreign investments, in order to mitigate risks arising from fluctuations in market risk factors and maintain the positions on the breaching limits. We use various financial instruments to manage risks, including exchange or over-the-counter market derivatives, which mainly include: (i) interest and exchange rate futures contracts; (ii) Foreign Exchange Non-Deliverable Forwards; (iii) interest and exchange rate swap contracts; and (iv) options. Operations with derivative financial instruments are classified according to their characteristic, risk management or cash flow hedge. When these transactions are classified as hedges for accounting purposes, specific supporting documentation is reviewed, allowing for an ongoing follow up of the hedge effectiveness (retrospectively and prospectively) and of any changes in the accounting process. The accounting and managerial hedging procedures are governed by our internal institutional polices. Our market risk framework categorizes transactions as part of either the Banking Portfolio or the Trading Portfolio, in accordance with general criteria established by specific regulation.

Our Trading Portfolio is composed of all transactions with financial and commodity instruments (including derivatives) held with the intention of trading, to benefit from arbitrage opportunities, or for use of such transactions to hedge risk within this portfolio, and that have no restriction on trading. Profits are based on changes in actual or expected prices in the short term.

Our Banking Portfolio is predominantly characterized by trades originated from the banking business and related to the management of our balance sheet. As a general rule, this desk's portfolios are held without intention of trading and for a time horizon of medium and long term.

Market risk exposures that are inherent in many financial instruments, including derivatives, are composed of various risk factors that refer to a market parameter whose variation impacts the evaluation of a certain position. The main risk factors measured by us are:

- Interest rates: the risk of losses from transactions that are subject to interest rate variations;
- Other foreign interest rates: the risk of losses from transactions subject to foreign interest rate variations;
- FX rates: the risk of losses from positions subject to foreign exchange rate variation (e.g., foreign currency positions);
- Brazilian inflation indexes: the risk of losses from transactions subject to variations in inflation linked indexes; and
- Equities and commodities: the risk of losses from transactions that are subject to equity and commodity price variations.

The CMN has regulations establishing the segregation of market risk exposure at a minimum into the following categories: interest rates, FX rates, equities and commodities. Brazilian inflation indexes are treated as a group of risk indicators and receive the same treatment as of the other risk indicators, such as interest rates and FX rates and follow the governance and risk limits framework adopted by our management for market risk assessment.

Market risk is analyzed based on the following key metrics:

- Value at Risk (VaR): a statistical metric that quantifies the maximum potential economic losses based on normal market conditions, considering a defined holding period and confidence level;
- Losses in Stress Scenarios (Stress Testing): a simulation technique to evaluate the impact on assets, liabilities and derivatives portfolios of various risk factors in extreme market situations (based on prospective and historic scenarios);
- Stop Loss: a mechanism that triggers a management review of positions, if the accumulated losses in a given period reach specified levels;
- Concentration: cumulative exposure of certain financial instruments or risk factors calculated at market value (MtM – Mark to Market); and
- Stressed VaR: a statistical metric derived from VaR, aimed at capturing the largest risk in simulations of the current portfolio, taking into consideration observable returns in historical scenarios of extreme volatility.

In addition to the risk metrics described above, sensitivity and loss control measures are also analyzed. They include:

- Gap Analysis: accumulated exposure of cash flows by risk factor, which are marked-to-market and positioned by settlement dates;
- Sensitivity (DV01 – Delta Variation Risk): impact on the market value of cash flows when a one annual basis point change is applied to current interest rates or index rates; and
- Sensitivities to Various Risk Factors (Greek): partial derivatives of a portfolio of options in connection with the prices of the underlying assets, implied volatilities, interest rates and time.
Please refer to our Consolidated Financial Statements (IFRS), Note 36 – Management of Financial Risks for further details about Market Risk.

VaR – Consolidated Itaú Unibanco Holding

The methodology for the calculation of our Consolidated VaR uses a “historical simulation” approach, which carries out the full repricing of all positions, using the real historical distribution of assets.

The table below shows the Consolidated Total VaR and provides the analysis of exposure to market risk of our Trading Portfolio, Banking Portfolio and our subsidiaries outside Brazil, namely, Itau BBA International, Banco Itaú Argentina, Banco Itaú Chile, Banco Itaú Uruguay, Banco Itaú Paraguay and Itaú BBA Colombia, showing where there are higher concentrations of market risk. We adhered to our policy of operating within low limits in relation to capital and maintained our conservative management and portfolio diversification approach throughout the period.

**Sensitivity Analyses (Trading and Banking Portfolios)**

As required by Brazilian regulation, we conduct sensitivity analysis for market risk factors considered important. The highest resulting losses are presented below, with impact on result, by risk factor, in each such scenario and are calculated net of tax effects, providing a view of our exposure under different circumstances.

The sensitivity analyses of the Trading Portfolio and Banking Portfolio presented here are based on a static assessment of the portfolio exposure. Therefore, such analyses do not consider the dynamic response capacity of management (e.g., treasury and market risk control unit) to initiate mitigating measures, whenever a situation of high loss or risk is identified, minimizing the possibility of significant losses. In addition, the analysis is intended to assess risk exposure and the respective protective actions, taking into account the fair value of financial instruments, regardless of whether or not financial instruments are accounted for on an accrual basis.

(1) Amounts net of tax effects.

- Scenario I: Addition of one basis point to fixed interest rates, currency coupon, inflation and interest rate indexes and one percentage point to currency and equity prices;
- Scenario II: Shocks of 25 percent in fixed interest rates, currency coupon, inflation, interest rate indexes and currency and share prices, both for growth and fall, considering the largest resulting losses per risk factor; and
- Scenario III: Shocks of 50 percent in fixed interest rates, currency coupon, inflation, interest rate indexes and currency and share prices, both for growth and fall, considering the largest resulting losses per risk factor.
Interest rate sensitivity

Interest rate sensitivity is the relationship between market interest rates and net interest income arising from the maturity or the characteristics of the renegotiation of prices of interest-bearing assets and liabilities.

Our strategy for interest rate sensitivity considers the return rates, the underlying risk level and the liquidity requirements, including our minimum regulatory cash reserves, mandatory liquidity ratios, withdrawals and maturity of deposits, capital costs and additional demand for funds.

The pricing structure is matched when equal amounts of these assets or liabilities mature or are renegotiated. Any mismatch of interest-bearing assets and liabilities is known as a gap position. The interest rate sensitivity may vary in the renegotiation periods presented due to the different renegotiation dates within the period. Also, variations among the different currencies in which the interest rate positions are denominated may arise.

These relationships are material for a particular date, and significant fluctuations may occur on a daily basis as a result of both the market forces and management decisions. Our Superior Market Risk and Liquidity Committee (CSRML) analyzes the Itaú Unibanco Group’s mismatch position on a monthly basis and establishes limits for market risk exposure, interest rate positions and foreign currency positions.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 36 – Management of Financial Risks for further details about the position of our interest-bearing assets and liabilities as of December 31, 2015. Note 36 to our audited interim consolidated financial statements provides a snapshot view, and accordingly, does not reflect the interest rate gaps that may exist at other times, due to changing asset and liability positions, and management’s actions to manage the risk in these changing positions.

Exchange rate sensitivity

Most of our banking operations are denominated in or indexed to Brazilian reais. We also have assets and liabilities denominated in foreign currency, mainly in U.S. dollars, as well as assets and liabilities that, although denominated in Brazilian reais, are indexed to U.S. dollars and, therefore, expose us to exchange rate risk. The Central Bank regulates our foreign currency positions. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 36 – Management of financial risks for further details.

The gap management policy adopted by the Superior Market Risk and Liquidity Committee (CSRML) takes into consideration the tax effects with respect to our foreign exchange positions. Since the gains from the foreign exchange rate variation on investments abroad are not taxed, we set up a hedge (a liability in foreign currency derivative instruments) in an amount sufficient so that our total foreign exchange exposure, net of tax effects, is consistent with our low risk exposure strategy.

Our foreign exchange position on the liability side is composed of various elements, including the issuance of securities in international capital markets, credit from foreign banks used to finance import and export transactions, and dollar-linked on-lendings from government financial institutions. The proceeds of these financial operations are usually invested in loans and in the purchase of dollar-linked securities.
The information set forth below was prepared on a consolidated basis, eliminating transactions between related parties. Our investments abroad, which are eliminated when we consolidate the accounting information, represented R$64.7 billion as of December 31, 2015, under the gap management policy adopted, as mentioned above. Note that we apply either economic hedges or hedge accounting to those net investments abroad.

\(^1\) Predominantly U.S. dollar.

Note that the information presented in the table above is not prepared on the same basis as presented in the Consolidated Financial Statements.
Backtesting
The effectiveness of the VaR model is validated by the use of backtesting techniques that compare hypothetical daily results with the estimated daily VaR. The number of exceptions (i.e. deviations) with respect to the pre-established VaR limits should be consistent, within an acceptable margin, with the hypothesis of 99.0% confidence intervals (i.e., there is a 1.0% probability that the financial losses are higher than the losses estimated by the model), considering a period of 250 business days (ending on December 31, 2015). The backtesting analysis presented below takes into consideration the ranges suggested on the document “Supervisory Framework for the use of backtesting in conjunction with the internal models approach to market risk capital requirements”, published by the Basel Committee.

The ranges are divided into:
- Green (0 to 4 exceptions): corresponds to backtesting results that do not suggest any problems with the quality or accuracy of the models adopted;
- Yellow (5 to 9 exceptions): refers to an intermediate range group, which indicates the need to pay attention and/or monitor and may indicate the need for improvement actions and/or monitoring and may indicate the need of reviewing the model; and
- Red (10 or more exceptions): demonstrates the need for an improvement action.

The exposure graph below illustrates the reliability of risk measures generated by the models we use in the Trading Portfolio (foreign units are not included in the graph below given the immateriality of amounts involved). The graph shows the adequacy level of the market risk models used by us, presenting the risk (absolute value) versus return pairs for the period considered. Since the diagonal line represents the threshold where risk equals return, all the dots below this line indicate exceptions to the estimated risk. For the exposure of the Trading Portfolio, the hypothetical losses exceeded the VaR estimated by the model on 3 days during the 250 day period ended on December 31, 2015.

Operational Risk
Operational risk is defined as the possibility of losses arising from failure, deficiency or inadequacy of internal processes, people or systems or from external events that affect the achievement of strategic, tactical or operational objectives. It includes legal risk associated with inadequacy or deficiency in contracts signed by us, as well as penalties due to noncompliance with laws and punitive damages to third parties arising from the activities undertaken by us.

Internally, we classify the following as first-level operational risks:
- Internal fraud;
- External fraud;
- Labor demands and deficient security in the workplace;
- Inadequate practices related to clients, products and services;
- Damages to our own physical assets or assets in use;
- Interruption of our activities;
- Failures in information technology systems; and
- Failures in the performance, compliance with deadlines and management of our activities.

In line with CMN and Central Bank regulations, we have an operational risk management governance structure and an institutional policy, which are annually approved by the Board of Directors and are applicable to our local and foreign companies and subsidiaries.

Operational risk management is the process composed of operational risk management and control activities, which objective is to support the institution in decision making processes, always searching for the proper identification and assessment of risks, the creation of value for stockholders and the protection of our assets and image.

Our operational risk management structure is supported by a governance process that is structured through discussion forums and committees, which, in turn, report to the Board of Directors, and is based on well-defined roles and responsibilities in order to reinforce the segregation of the business and management and control activities. This structure is intended to ensure independence between our units and, consequently, informed decisions with respect to risks. This independence is reflected in the risk management carried out on a decentralized basis under the responsibility of the business units and in the centralized control carried out by the operational risk and internal control and compliance units by means of methodologies, training and certification of the control environment on an independent basis and providing tools for monitoring them.

Our management structure seeks to identify, prioritize and manage any operational risks, and to monitor and report management activities, for the purpose of ensuring the quality of the control environment in accordance with the internal guidelines and regulation in effect.
The managers of our executive units use corporate methodologies that are built and made available by the internal control, compliance and operational risk departments. Among the methodologies and tools used are the self-evaluation and the map of the organization’s prioritized risks, the approval of processes and products, the monitoring of key risk indicators and the database of operational losses. Therefore, our operational risk management ensures a single framework for the management of processes, systems, projects and new products and services.

Within the governance of our management process, there are specific operational risk, internal control and compliance forums where the consolidated reports on risk monitoring, controls, action plans and operational losses are regularly presented to our business unit executives.

The dissemination of the risk and control culture to the employees by means of training is an important pillar of our operational risk agenda, aimed at providing a better understanding of the matter and playing a relevant role in risk mitigation.

**Cyber Security**

We have structured solutions in an effort to mitigate the main threats posed by cyberattacks at different levels of our organization, through the definition of policies, processes and procedures that support the entire chain of information.

We monitor and address all types of attacks and security incidents. We have a certified IT staff with knowledge of various technologies. We control the access to our systems and digital resources, while constantly updating our registry to maintain a high level of security and avoid breaches and unauthorized access. We employ state-of-the-art technology in seeking to secure our network and data, as well as other barriers such as restricted access to our servers, facilities, and virtual environments, through the use of firewalls, password-protection and encryption.

Our Corporate Security area works together with our business, IT, internal controls and audit teams to keep our systems always up-to-date, seeking to reduce financial losses and reputational damages in Brazil and abroad that could result from cyber attacks.

**Crisis Management and Business Continuity**

The purpose of our Business Continuity Program is to protect our employees, ensure the continuity of the critical functions of our business lines, safeguard revenue and sustain both a stable financial market in which we operate and the trust of our clients and strategic partners in providing our services and products.

Our Business Continuity Program is composed of procedures for relocating and/or recovering operations in response to a variety of interruption levels and can be divided into two key elements:

- **Crisis Management**: centralized communication and response processes to manage business interruption events and any other types of threats to our image and reputation with respect to our employees, clients, strategic partners and regulators. Our crisis management infrastructure has a command center that constantly monitors daily transactions, as well as media channels in which we are mentioned. Our crisis management is handled by our Focal Agent Network, which is composed of representatives appointed by our business units and that work in the monitoring of potential problems, resolution of crises, business continuity, improvement of processes and search for preventive actions; and
- **Business Continuity Plans (PCN)**: document with procedures and information, developed, consolidated and maintained available for use during possible incidents, allowing the resumption of critical activities in acceptable terms and conditions. For the quick and safe resumption of the operations, we have established, in our PCN, corporate wide and customized actions for its line of business by means of:
  - **Disaster Recovery Plan**: focused on the recovery of our primary data center, ensuring the continuity of the processing of critical systems within minimum pre-established periods;
  - **Workplace Contingency Plan**: employees responsible for carrying out critical business functions have alternative facilities from which to perform their activities in the event the buildings in which they usually work become unavailable. There are approximately 2,000 contingency dedicated seats that are fully equipped to meet the needs of critical business units in emergency situations;
  - **Emergency Plan**: procedures aimed at minimizing the effects of emergency situations that may impact our facilities, with a preventive focus; and
  - **Processes Contingency Plan**: alternatives for carrying out the critical processes identified in each of our business units.

In order to keep continuity solutions aligned with applicable requirements with respect to processes, minimum resources and legal requirements, among others, the Business Continuity Program applies the following tools to analyze our organization:

- **Business Impact Analysis (BIA)**: evaluates how critical it is to resume processes that support the delivery of products and services. Through this analysis, we define priorities for resuming activities; and
- **Threats and Vulnerabilities Analysis (AVA)**: identification of threats to the locations where our buildings are located. The efficiency of our controls is evaluated against potential threats in order to identify vulnerabilities so that controls may be adjusted or implemented to enhance the resilience level of our critical facilities.

**Liquidity Risk**

Liquidity risk is defined as the likelihood that an institution will not be able to effectively honor its expected and unexpected current and future obligations, including those from guarantee commitments, without affecting its daily operations and not incurring significant losses.

Our liquidity risk control is carried out by an independent group of our business units and is responsible for determining the composition of our reserves, proposing assumptions for the performance of cash flows in different timeframes, proposing liquidity risk limits in accordance with the group risk appetite, communicating any mismatches, considering liquidity risk on an individual basis in the countries where we operate, simulating the behavior of cash flows in stress conditions, assessing and reporting in advance the risks inherent to new products and operations and reporting the information required by the regulatory agencies. All activities are subject to assessment by our independent validation, internal controls and audit units.

The liquidity risk measurement has to comprise all financial trades of our companies, as well as possible contingent and unexpected exposures, such as derived from settlement services, provision of sureties and guarantees, credit lines contracted and not used.

The liquidity policies of management and associated limits are established based on prospective scenarios, reviewed periodically and based on definitions from senior management.

Pursuant to the requirements of CMN and Central Bank regulations, Itaú Unibanco is required to deliver on a monthly basis its Liquidity Risk Statements (DLR) to the Central Bank. In connection with such analysis, the following items are regularly prepared and submitted to the senior management for monitoring and decision support:

- Different scenarios for liquidity projections;
- Contingency plans for crisis situations;
- Reports and charts to enable monitoring risk positions;
- Assessment of funding costs and alternatives; and
- Tracking the sort of funding sources through a continuous control of funding sources considering counterparty type, maturity and others aspects.

The basic requirement for the effectiveness of the liquidity risk control is the proper measurement of the risk exposure. The liquidity risk measurement process uses corporate systems and own applications that are internally developed.

The structure of liquidity risk management of our institution is considered adequate and in line with the best practices, allowing for the timely control of the risk. In 2015, we made investments to improve and provide more efficiency to our liquidity risk controls.

Please refer to section Performance, item Financial Performance, Results, for further details about liquidity and capital resources.

We have diversified sources of funding, of which a significant portion comes from the retail segment. Our principal sources of funds are deposits, securities sold under repurchase agreements from own issue and funds from acceptances and issuance of securities.

Please refer to section Performance, item Financial Performance, Liabilities, for further details about funding and results and item Consolidated Financial Statements (IFRS), Note 17 – Deposits, Note 19 – Securities Sold under Repurchase Agreements and Interbank and Institutional Market Debts, and Note 36 – Management of Financial Risks for further details.

Please refer to section Our Risk Management, item Regulatory Environment, for further details about the implementation of Basel III in Brazil.

**Social and Environmental Risk**

In managing our business, we continuously take into consideration the risk of potential losses due to exposure to social and environmental events arising from the performance of our activities that impact on the environment or human health.

Our social and environmental risk management is dealt with our Social and Environmental Risk Committee and its main responsibility is to propose institutional policies with respect to our activities and operations' exposure to social and environment risk and formalize them by means of internal regulations and procedures.

In addition to seeking the development of several internal processes aimed at the control and the mitigation of events that may lead to the occurrence of the social and environmental risk, we consistently seek to evolve in the management of the social and environmental risk, taking into account the challenges as to changes in and demands of society. Among other actions, we have assumed and incorporated into our internal processes a number of national and international voluntary commitments and pacts aimed at integrating social, environmental and governance aspects in our business. The main ones are the Principles for Responsible Investment (PRI), the Charter for Human Rights – Ethos, the Equator Principles (EP), the Global Impact, the Carbon Disclosure Project (CDP), the Brazilian GHG Protocol Program, the Pacto Nacional para Erradicação do Trabalho Escravo (National Pact for Eradicating Slave Labor), among others.

**Reputational Risk**

We define reputational risk as the risk arising from internal practices, risk events and external factors that may generate a negative perception of our bank among clients, counterparties, stockholders, investors, supervisors, commercial partners, among others, which could affect
the value of our brand and financial losses, in addition to adversely affecting our capability to maintain our existing commercial relations, enter into new businesses and maintain continued access to financing sources.

Since the reputational risk directly or indirectly permeates all of our operations and processes, we have an infrastructure governance that seeks to ensure that potential reputational risks are identified, analyzed and managed while in the initial phases of its operations and the analysis of new products.

We believe that our reputation is extremely important in order to achieve our long-term goals which is why we seek to align our external communications with ethical and transparent practice and work, which is essential to raise the confidence of our stakeholders. Therefore, in order to maintain our strong reputation and avoid negative impact on the perception of our image by many stakeholders, reputational risks are addressed by many internal processes and initiatives which, in turn, are supported by internal regulations with the main purpose of providing mechanisms for the monitoring, management, control and mitigation of the main reputational risks to which we could become exposed. They include:

- Risk appetite framework;
- Process for the prevention of the use of Itaú Unibanco in unlawful acts;
- Crisis management process and business continuity;
- Processes and guidelines of the governmental and institutional relations;
- Corporate communication process;
- Brand management process;
- Ombudsman offices initiatives and commitment to customer satisfaction; and
- Ethics guidelines and prevention of corruption.

**Regulatory Risk**

The regulatory risk is the risk arising from losses due to fines, sanctions and other penalties applied by regulatory agencies resulting from noncompliance with regulatory requirements. The regulatory risk is managed through a structured process aimed at identifying changes in the regulatory environment, analyzing their impact on our various departments and monitoring the implementation of actions directed at compliance with regulatory requirements.

We have a structured and consistent flow of procedures for addressing compliance with new rules and regulations, covering the stages of identification, distribution, monitoring and compliance, and all of these processes and procedures are applied consistently throughout our organization and established in internal rules. The structure and flow for addressing the regulatory risk are composed of: (i) monitoring of legislative bills, notices and public consultation; (ii) recognition of new rules for determining action plans; (iii) relationship with regulators; (iv) monitoring of action plans; (v) prioritization of risks; and (vi) control of compliance with legal decisions on class actions and with the conduct adjustment instruments to which we are party (Termos de Ajustamento de Conduta, or TACs).

**Model Risk**

Our risk management has proprietary models for the management of risks that are continuously monitored and reviewed when necessary in order to ensure the effectiveness of our strategic and business decisions.

Model risk is defined as the risk that arises when our models do not reflect, on a consistent basis, the relationships of variables of interest, creating results that systematically differ from actual results. This risk may materialize mainly as a result of methodological inadequacies during the development of the model or because the application of such models in situations other than those anticipated in the modeling process.

We use the best market practices to manage the model risk to which we are exposed during the entire lifecycle of a model and the stages of which may be classified into four main stages: development, implementation, validation and use. The best practices we apply to our model risk control include: (i) quality certification of our database, (ii) application of a list of essential steps to be taken during the model’s development, (iii) application of a conservative approach in our decision making, as applied to our models, (iv) use of external benchmarks, (v) approval of results generated in implementation; (vi) independent technical validation; (vii) assessments of use; (viii) assessments of the impact in the use; (ix) monitoring of performance; and (x) monitoring of the distribution of the explanatory variables and final score.

**Country Risk**

Country risk is defined as risks related to our operations outside of Brazil, including losses arising from noncompliance with the financial obligations in the terms agreed-upon by borrowers, issuers, counterparties or guarantors as a result of actions taken by the government of the country where the borrower, issuer, counterparty or guarantor is or as a result of political, economic and social events related to the country.

In order to properly address country risk, we have a specific process structure aimed at ensuring that the risk is managed and controlled. These processes include: (i) country risk governance; (ii) establishment of country ratings; (iii) determination of limits for countries; and (iv) monitoring of limits and treatment of noncompliance.

**Business and Strategy Risk**

We define the business and strategy risk as the risk of a negative impact on our financial results or capital as a consequence of the lack of strategic planning, the making of adverse strategic decisions, our inability to implement the proper strategic plans and/or changes in its business environment.
Since business and strategic risk can directly affect the creation of value and the feasibility of our bank, we have implemented various mechanisms to ensure that both the business and the strategic decision making processes follow proper governance standards, have the active participation of officers and the Board of Directors, are based on market, macroeconomic and risk information and are aimed at optimizing the risk-return ratio.

In order to properly address risk, we utilize the governance standards and processes listed below. These governance standards and processes are utilized by senior management and the risk control and management department of the relevant business and strategic decisions in order to ensure that the risk is managed and that the decisions are sustainable. These governance standards and processes are as follows:

- Governance that has qualified decision-makers who, at the same time, are properly motivated;
- Budgeting process with the active participation of the risk control and management department;
- Process for the assessment of new products before they are sold; and
- Specific structure for the assessment and prospection of mergers and acquisitions.

**Insurance Risk, Pension Plan and Premium Bond Products Risk**

The portfolio of our insurance companies is comprised of life and elementary insurance (for example, credit life and housing), as well as pension plans and premium bond. With respect to such products, insurance risk relates to:

- Underwriting risk is the possibility of losses arising from insurance products, pension plans and premium bond products that go against our expectations and that are directly or indirectly associated with technical and actuarial bases used for calculating premiums, contributions and technical provisions;
- Market risk is the possibility of losses resulting from fluctuations in market value of assets and liabilities that comprise technical actuarial reserves;
- Credit risk is the possibility of noncompliance, by a given debtor, with obligations related to the settlement of operations that involve the trading of financial assets of reinsurance;
- Operational risk is the possibility of the occurrence of losses arising from the failure, deficiency or inadequacy of internal processes, people and systems, or from external events that affect the achievement of the strategic, tactical or operational objectives of the insurance, pension and premium bond operations; and
- Liquidity risk is the possibility of the bank not being able to timely comply with its obligations with insurance policyholders and beneficiaries of pension funds arising from the lack of liquidity of the assets that make up the actuarial technical reserves.

In line with good national and international practices and to ensure that risks arising from insurance products, pension plans and premium bonds are properly identified, measured, evaluated, reported and approved in relevant forums, we have a risk management framework in place, of which the guidelines are established pursuant to our institutional norms are approved by our Board of Directors, that is applicable to companies and subsidiaries at risk from insurance products, pension plans and premium bonds, in Brazil and abroad.

The process of risk management for insurance, pensions and special savings plans is based on defined responsibilities distributed between the control and business areas, ensuring that they are independent of each other and focusing on the special nature of each risk, as per the guidelines established by us.

As part of the risk management process, there is a governance structure where decisions may be taken by committees, thus ensuring compliance with several regulatory and internal requirements, as well as balanced decisions relative to risks.

Our objective is to ensure that assets serving as collateral for long-term products, with guaranteed minimum returns, are managed according to the characteristics of the liabilities, so that they are actuarially balanced and solvent over the long term. Each year, liabilities for long-term products, which result in projected future benefits flows, are mapped using actuarial premises. This mapping enables Asset Liability Management models to be created, and these are used to define the best makeup of the asset portfolio to neutralize the risk of this type of product, taking into account their economic and financial viability over the long term. Portfolios of collateral assets are rebalanced periodically according to changes in market prices, our liquidity requirements and the changes in the characteristics of the liabilities.

**Capital Management**

The Board of Directors is the main authority with respect to capital management and is responsible for approving the capital management institutional policy and guidelines regarding the capitalization level of the conglomerate, approving the ICAAP report and analyzing the results of the independent validation of ICAAP’s models and processes, performed by our internal controls and model validation teams. Additionally, the conclusions of and points of attention raised by auditors on capital management processes are submitted to the Board of Directors.

The ICAAP is intended to assess the adequacy of our capital by identifying material risks; by assessing whether capital is required for such risks and the means of quantifying it; by elaborating a capital plan, both for normal and stress situations; and by preparing a capital contingency plan. In order to independently validate the effectiveness of ICAAP’s processes and models, our internal controls team is responsible for evaluating our governance framework, processes, policies and activities of monitoring and reporting.
The result of the latest ICAAP – which was dated December 2015 – shows that, in addition to the capital required to cover material risks, we have a significant capital surplus, thus ensuring the bank’s soundness.

The methodologies for risk assessment and capital calculation, as well as the capital-related documents and topics are evaluated by the Senior Management Committee before its submission to the Board of Directors.

In the capital management context, we prepare a capital plan consistent with our strategic planning and designed to maintain an adequate and sustainable capital level, taking into account analyses of the economic, competitive and political environment, in addition to other external factors. Our capital plan is also approved by the Board of Directors and comprises the following:

- Our short and long-term capital goals and projections, under normal and stress scenarios, according to the Board of Directors’ guidelines;
- Description of our main sources of capital; and
- Our contingency capital plan, identifying actions to be taken in the event of a potential capital deficiency.

As part of our capital planning, extreme economic and market conditions are simulated, in order to measure our capital position under stress. The stress scenarios are approved by the Board of Directors, and their impacts on capital are considered when devising our strategy and positioning of our businesses and capital.

Complementing the calculation of capital to cover Pillar 1 risks (credit risk, market risk and operational risk), we have been developing mechanisms to identify and analyze the materiality of other risks, in addition to methodologies for assessing and quantifying the need for additional capital to cover such risks.

In order to provide the necessary information for our officers and Board of Directors to make decisions, managerial reports are prepared and presented at committee meetings, where committee members are informed about our capital adequacy, as well as about the projections of future capital levels in normal and stress situations.

Please refer to section Our Risk Management, item Regulatory Environment, for further details about the implementation of Basel III in Brazil.

**Minimum requirements**

Our minimum capital requirements are denominated in the form of ratios between available Regulatory Capital (PR), and risk-weighted assets, or RWA. These minimum capital requirements were established by a set of resolutions and circulars published by the CMN and Central Bank since 2013, which implement in Brazil the global capital requirement standards known as Basel III.

Our available Regulatory Capital (PR) consists of the sum of Tier 1 and Tier 2 Capital, as defined by CMN resolutions. The total RWA is determined as the sum of the risk-weighted asset amounts for credit risk, market risk, and operational risk, which are calculated using the standardized approaches.

The minimum Regulatory Capital requirement corresponded to 11% from October 1, 2013 to December 31, 2015, and will decrease gradually to reach 8 percent in January 1, 2019. CMN and Central Bank standards also require for the Common Equity Tier 1, which corresponds to the sum of the components – ACP_{Conservation} , ACP_{Countercyclical} and ACP_{Systemic} – which, in together with the requirements mentioned in the preceding paragraph, increase capital requirements over time. CMN and Central Bank standards also established requirements to qualify instruments eligible for Tier 1 or Tier 2 Capital. Additionally, these standards establish a gradual reduction of eligibility of capital instruments issued pursuant to the former regulation on Regulatory Capital instruments that are still outstanding.

**Capital Composition**

Pursuant to current regulations our Regulatory Capital (PR), used to monitor our compliance with the capital requirements imposed by the CMN and the Central Bank, is the sum of Tier 1 Capital and Tier 2 Capital, according to which:

- Common Equity Tier 1: sum of share capital, reserves and retained earnings, net from deductions and regulatory adjustments (ajustes prudenciais);
- Additional Tier 1 Capital: comprises of instruments of perpetual nature, which meet eligibility requirements; and
- Tier 2 Capital: debt instruments with defined dates, primarily subordinated debt, which meet eligibility requirements.

In accordance with applicable Brazilian regulations, we must maintain our Regulatory Capital, Tier 1 Capital and Common Equity Tier 1 Capital ratios above the minimum regulatory requirements established at all times. The RWA used for assessing these minimum regulatory requirements can be determined by adding the following portions:

\[
RWA = RWA_{PAD} + RWA_{CAM} + RWA_{JUR} + RWA_{COM} + RWA_{ACS} + RWA_{OPAD}
\]

- \( RWA_{PAD} \) = portion relating to exposures to credit risk;
- \( RWA_{CAM} \) = portion relating to exposures in gold, foreign exchange rate and assets subject to foreign exchange rate variations;
- \( RWA_{JUR} \) = portion relating to exposures subject to variations of interest rates, interest coupons and coupon rates and classified in the Trading Portfolio;
- \( RWA_{COM} \) = portion relating to exposures subject to variations in commodity prices;
- \( RWA_{ACS} \) = portion relating to exposures subject to variations in equities prices and classified in the Trading Portfolio; and

Our available Regulatory Capital (PR) consists of the sum of Tier 1 and Tier 2 Capital, as defined by CMN resolutions. The total RWA is determined as the sum of the risk-weighted asset amounts for credit risk, market risk, and operational risk, which are calculated using the standardized approaches.

The minimum Regulatory Capital requirement corresponded to 11% from October 1, 2013 to December 31, 2015, and will decrease gradually to reach 8 percent in January 1, 2019. CMN and Central Bank standards also require for the Common Equity Tier 1, which corresponds to the sum of the components – ACP_{Conservation} , ACP_{Countercyclical} and ACP_{Systemic} – which, in together with the requirements mentioned in the preceding paragraph, increase capital requirements over time. CMN and Central Bank standards also established requirements to qualify instruments eligible for Tier 1 or Tier 2 Capital. Additionally, these standards establish a gradual reduction of eligibility of capital instruments issued pursuant to the former regulation on Regulatory Capital instruments that are still outstanding.

**Capital Composition**

Pursuant to current regulations our Regulatory Capital (PR), used to monitor our compliance with the capital requirements imposed by the CMN and the Central Bank, is the sum of Tier 1 Capital and Tier 2 Capital, according to which:

- Common Equity Tier 1: sum of share capital, reserves and retained earnings, net from deductions and regulatory adjustments (ajustes prudenciais);
- Additional Tier 1 Capital: comprises of instruments of perpetual nature, which meet eligibility requirements; and
- Tier 2 Capital: debt instruments with defined dates, primarily subordinated debt, which meet eligibility requirements.

In accordance with applicable Brazilian regulations, we must maintain our Regulatory Capital, Tier 1 Capital and Common Equity Tier 1 Capital ratios above the minimum regulatory requirements established at all times. The RWA used for assessing these minimum regulatory requirements can be determined by adding the following portions:
In order to ensure our capital strength and availability of capital to support business growth, we maintain Regulatory Capital levels above the minimum required regulatory capital levels, based on the BIS ratio (as defined below) and on the Common Equity Tier 1 Capital, Additional Tier 1 Capital and Tier 2 Capital ratios (calculated by dividing Common Equity Tier 1 Capital, Additional Tier 1 Capital and Tier 2 Capital by the total risk weighted assets).

On December 31, 2015, our Regulatory Capital at the prudential conglomerate level reached R$128,465 million, a decrease of R$1,325 million when compared to December 31, 2014, at the financial conglomerate, mainly due to the decrease of our Tier 2 Capital.

Our BIS ratio (calculated as the ratio between our Regulatory Capital and the total amount of RWA) at the prudential conglomerate level reached 17.8%, on December 31, 2015, an increase compared to December 31, 2014, at the financial conglomerate, mainly explained due to a decrease in RWA. Our BIS ratio on December 31, 2015 consisted of 14.0% of Common Equity Tier 1 Capital and 3.8% of Tier 2 Capital.

Our Regulatory Capital, Tier 1 Capital and Common Equity Tier 1 Capital ratios were calculated on a consolidated basis, applied to the financial institutions included in our Financial Conglomerate, up to December 31, 2014. From January 1, 2015, instead of calculating ratios for our Financial Conglomerate we calculated at the Prudential Conglomerate level, which is comprised not only of financial institutions but also collective financing plans ("consórcios"), payment entities, factoring companies or companies that directly or indirectly assume credit risk, and investment funds in which our Itaú Unibanco Group retains substantially all risks and rewards.

Please refer to section Our Risk Management, item Regulatory Environment, Basel III Framework, Implementation of Basel III in Brazil.

Money Laundering Prevention

GRI G4-DM Anti-corruption

In order to comply with the corporate policy guidelines, Itaú Unibanco established a program to prevent and fight illicit acts, which includes money laundering, terrorism financing and fraud.

The challenge is to identify and prevent increasingly sophisticated operations that seek to conceal the source, ownership and transfer of goods and assets, derived from illegal activities. Itaú Unibanco established a corporate policy to prevent its involvement in illicit activities, protecting its reputation and image among employees, customers, strategic partners, suppliers, service providers, regulators and the society, through a governance structure focused on transparency, strict compliance with the rules and regulations and cooperation with police and judicial authorities. It also continuously seeks to align itself with the local and international best practices to prevent and fight illicit acts, through investments and training its employees on ongoing basis.

Please refer to section Our Risk Management, item Regulatory Environment, Basel III Framework, Implementation of Basel III in Brazil.

Our risk management
CMN: the highest authority responsible for regulating and supervising our activities in Brazil. Below we describe the main entities that are essential to the structure of our business, and the supervisory activities of these entities are carried out by the Board of Directors, the Audit Committee, the Compliance and Operational Risk Committee, the Internal Operational Risk Committee, and the Anti-Money Laundering Committee.

Politically Exposed Persons
Our commitment to the compliance with applicable law and to the adoption of the best practices for prevention and detection of money laundering activity is also reflected in the identification, assessment and monitoring of politically exposed persons, or PEPs, whether as individuals or entities.

As per our policies related to PEPs, we apply enhanced due diligence with respect to these customers and we require a higher level of approval (at a minimum at the director level), prior to establishing any relationship with such PEPs.

Please refer to section Our Risk Management, item Regulatory Environment for further details about politically exposed persons.

Regulatory environment
We are subject to regulation by, and supervision of, several entities, in accordance with the countries and segments in which we operate. The supervisory activities of these entities are essential to the structure of our business, and they directly impact our growth strategies. Below we describe the main entities that regulate and supervise our activities in Brazil:

- CMN: the highest authority responsible for establishing monetary and financial policies in Brazil, overall supervision of Brazilian monetary, credit, fiscal and public debt policies, for regulating the conditions for organization, operation and inspection of financial institutions, as well as supervising the liquidity and solvency of these institutions. The CMN is also responsible for the general guidelines to be followed in the organization and operation of the securities market and the regulation of foreign investments in Brazil;
- Central Bank: responsible for implementing the policies established by the CMN, authorizing the establishment the financial institutions and supervising financial institutions in Brazil. It establishes minimum capital requirements, limits for permanent assets, credit limits and requirements for compulsory deposits, in accordance with the policies established by the CMN;
- CVM: responsible for regulating, sanctioning and inspecting the Brazilian securities market (which in Brazil includes derivatives) and its participants, as well as overseeing exchange and organized over-the-counter markets;
- CNSP: responsible for establishing the guidelines and directives for insurance and premium bond companies and open private pension entities;
- SUSEP: responsible for regulating and supervising the insurance, open private pension funds and capitalization markets in Brazil and their participants; and
- ANS: responsible for regulating and supervising the health insurance market in Brazil and its participants.

Outside of Brazil, we have main operations subject to oversight by local regulatory authorities in the following jurisdictions: South America, in particular Argentina, Colombia, Chile, Uruguay and Paraguay; Europe, in particular United Kingdom and Switzerland; Central America and the Caribbean, in particular Bahamas and Cayman Islands; and the United States of America.

Financial institutions are subject to a number of regulatory requirements and restrictions, among which the following are noteworthy:

- prohibition of operating in Brazil without the prior approval of the Central Bank;
- prohibition of acquiring real estate that are not for the financial institution's own use, except those received for settlement of loan losses, in which case such real estate must be sold within one year, extendable by the Central Bank;
- prohibition of acquiring interests in companies without the prior approval of the Central Bank, except for ownership interest typical of investment portfolios held by investment banks or universal banks with investment portfolios;
- prohibition of granting loans that represent more than 25% of the financial institution's regulatory capital to only one person or group;
- restrictions on borrowing and lending, as well as granting advances and guarantees, to certain related individuals and legal entities. Please refer to the section Our Risk Management, item Regulatory Environment, item Lending Limits to more information about these individuals and legal entities;
- obligation of depositing a portion of the deposits received from clients with the Central Bank (compulsory deposit); and
- obligation of maintaining sufficient capital reserves to absorb unexpected losses, pursuant to the rules proposed by the Basel Committee and implemented by the Central Bank.
Basel III Framework

The Basel III framework increases minimum capital requirements and creates new conservation and countercyclical buffers, changes risk-based capital measures, and introduces a new leverage limit and new liquidity standards in comparison to the former framework. The new rules will be phased in gradually and each country is expected to adopt such recommendations in laws or regulations applicable to local financial institutions.

The Basel III framework requires banks to maintain minimum capital levels corresponding to the following percentages of risk-weighted assets: (i) a minimum common equity capital ratio of 4.5%, composed of common shares; (ii) a minimum Tier 1 Capital ratio of 6.0%; and (iii) a minimum total capital ratio of 8.0%. In addition to the minimum capital requirements, Basel III requires a “capital conservation buffer” of 2.5% and each national regulator is given discretion to institute a “countercyclical buffer” if it perceives a greater system-wide risk to the banking system as the result of a build-up of excess credit growth in its jurisdiction. Basel III also introduces a new leverage ratio, defined as Tier 1 Capital divided by the bank’s total exposure.

Basel III implemented a liquidity coverage ratio, or LCR, and a net stable funding ratio, or NSFR. The LCR requires affected banks to maintain sufficient high-quality liquid assets to cover the net cash outflows that could occur under a potential liquidity disruption scenario over a thirty-day period. The NFSR establishes a minimum amount of stable sources of funding that banks will be required to maintain based on the liquidity profile of the banks’ assets, as well as the potential for contingent liquidity needs arising from off-balance sheet commitments over a one-year period.

Additional requirements apply to non-common equity Tier 1 Capital or Tier 2 Capital instruments issued by internationally active banks. To be included in Additional Tier 1 Capital or Tier 2 Capital, an instrument must contain a provision that requires that, at the discretion of the relevant authority, such instrument be either written-off or converted into common shares upon a “trigger event.” A “trigger event” is the decision of a competent authority pursuant to which, for a bank to remain a feasible financial institution, it is necessary: (i) to write-off an instrument, or (ii) to inject government funds, or equivalent support, into such bank, whichever occurs first. The requirements are applicable to all instruments issued after January 1, 2013. The instruments qualified as capital issued before that date that do not comply with these requirements will be phased out of banks’ capital over a ten-year period, beginning on January 1, 2013.

Additional regulatory capital requirements apply to systemically important financial institutions, or G-SIFIs. The Basel Committee’s assessment methodology to determine which financial institutions are G-SIFIs is based on indicators that reflect the following aspects of G-SIFIs: (i) size; (ii) interconnectedness; (iii) lack of readily available substitute or financial institution infrastructure for the services provided; (iv) global or cross-jurisdictional activity; and (v) complexity, each of these factors receiving an equal weight of 20.0% in the assessment.

The Basel Committee has also issued a framework for the regulation of domestic systemically important banks, or D-SIBs, which supplements the G-SIFI framework by focusing on the impact that the distress or failure of systemically important banks would have on the domestic economy of each country.

Implementation of Basel III in Brazil

CMN and the Central Bank have issued several rules which detail the implementation of the Basel III framework in Brazil.

Brazilian banks’ minimum total capital ratio is calculated as the sum of the following two components:

- Regulatory Capital (patrimônio de referência); and
- Additional Core Capital (adicional de capital principal).

Brazilian banks’ Regulatory Capital is comprised of Tier 1 Capital and Tier 2 Capital. Tier 1 Capital is further divided into two portions: Common Equity Tier 1 Capital (common equity capital and profit reserves, or capital principal) and Additional Tier 1 Capital (hybrid debt and equity instruments authorized by the Central Bank, or capital complementar).

In order to qualify as Additional Tier 1 Capital or Tier 2 Capital, all instruments issued after October 1, 2013 by a Brazilian bank must contain loss-absorbing provisions, including a requirement that such instruments be automatically written off or converted into equity upon a “trigger event.” A “trigger event” is the earlier of: (i) Common Equity Tier 1 Capital being less than 5.125% of the risk-weighted assets for Additional Tier 1 Capital instruments and 4.5% for Tier 2 Capital instruments; (ii) the execution of a firm irrevocable written agreement for the government to inject capital in the financial institution; (iii) the Central Bank declaring the beginning of a special administration regime (Regime de Administração Especial Temporária, or RAET) or intervention in the financial institution; or (iv) a decision by the Central Bank, according to criteria established by the CMN, that the write-off or conversion of the instrument is necessary to maintain the bank as a viable financial institution and to mitigate relevant risks to the Brazilian financial system. Specific procedures and criteria for the conversion of shares and the write-off of outstanding debt related to funding instruments eligible to qualify as regulatory capital are established by CMN regulation.

Existing hybrid instruments and subordinated debt previously approved by the Central Bank as eligible capital instruments may continue to qualify as Additional Tier 1 Capital or Tier 2 Capital, as
the case may be, provided that they comply with the above requirements and a new authorization from the Central Bank is obtained. Instruments that do not comply with these requirements will be phased out as eligible capital instruments by deducting 10.0% of their book value per year from the amount that qualifies as Additional Tier 1 Capital or Tier 2 Capital. The first deduction occurred on October 1, 2013, and subsequent deductions will take place annually starting January 1, 2014 until January 1, 2022.

The Additional Core Capital requirement is subdivided into three elements: the capital conservation buffer (Adicional de Capital Principal Conservação), the countercyclical capital buffer (Adicional de Capital Principal Contracíclico) and the higher loss absorbency requirement for domestic systemically important banks (Adicional de Capital Principal Sistêmico). The capital conservation buffer is aimed at increasing the loss absorption ability of financial institutions. The countercyclical capital buffer can be imposed within a range by the Central Bank if it judges that credit growth is increasing systematic risk. The higher loss absorbency requirement for domestic systemically important banks seeks to address the impact that the distress or failure of Brazilian banks may have on the local economy. In the event of non-compliance with the Additional Core Capital requirement, certain restrictions will apply, including the inability of the financial institution to: (i) pay officers and directors their share of variable compensation; (ii) distribute dividends and interest on equity to stockholders; and (iii) repurchase its own shares and effect reductions in its share capital.

From October 1, 2015, a minimum LCR in a standardized liquidity stress scenario is required for banks with total assets in excess of R$100 billion, individually or at the consolidated enterprise level (conglomerado prudencial), as the case may be. The calculation of the LCR follows the methodology set forth by the Central Bank which is aligned with the international guidelines. During periods of increased need for liquidity, banks may report a lower LCR than the minimum required ratio, provided that they also report to the Central Bank the causes for not meeting the minimum requirement, the contingent sources of liquidity it has available, and the measures it plans to adopt to be in compliance with the LCR requirement. Banks will also be required to effect public disclosures of their LCR on a quarterly basis after April 1, 2016.

The following table presents the schedule for phased-in implementation by the Central Bank of the capital adequacy and liquidity coverage ratio requirements under Basel III, as applicable to Itaú Unibanco Holding. The figures presented below refer to the percentage of our risk-weighted assets.

(1) According to Circular No. 3.769 of Central Bank, the ACP countercyclical requirement is zero.

The Central Bank has also established the calculation methodology for the leverage ratio. However, it has not yet determined a minimum ratio. Banks are required to prepare public disclosures of their leverage ratios on a quarterly basis after October 1, 2015.

CMN regulation also defines the entities that compose the consolidated enterprise level (conglomerado prudencial) of a Brazilian financial institution, and establishes the requirement that a financial institution prepare and file with the Central Bank monthly consolidated financial statements at the consolidated enterprise level (conglomerado prudencial) pursuant to the parameters defined therein. Such financial statements should also be audited by external auditors on a semi-annual basis. As of January 1, 2015, minimum capital and ratio requirements apply at the consolidated enterprise level (conglomerado prudencial).

In addition to the resolutions and circular letters issued in accordance with the criteria set forth in Basel III, in July, 2013, Law No. 12,838 was issued, allowing the determination of deemed credit based on tax credits arising from temporary differences resulting from allowances for loan losses, which, in practice, exempts financial institutions from deducting this type of credit from its core capital. The law also changes the rules for the issue of financial bills, allowing for the inclusion of clauses for the suspension of the stipulated compensation and the termination of the credit right or its conversion into shares, and conditions stockholders’ remuneration to compliance with the prudential requirements established by the CMN.

Brazilian financial institutions are also required to implement a capital management structure compatible with the nature of its transactions, the complexity of the products and services it offers, as well as with the extent of its exposure to risks. Capital management is defined as a process that includes: (i) monitoring and controlling the financial institution’s capital; (ii) assessing capital needs in light of the risks to which the financial institution is subject; and (iii) setting goals and conducting capital planning in order to meet capital needs due to changes in market conditions. Financial institutions should publish a report describing the structure of their capital management at least on
an annual basis. Disclosure and reporting of risk management matters, risk-weighted asset calculation, and adequate compliance with regulatory capital requirements are regulated by the Central Bank and reflect the so-called “Pilar 3” of regulatory capital recommended under Basel III, aimed at improving governance and disclosure.

G-SIFI assessment in Brazil
The Central Bank has adopted the same indicators set out by the Basel Committee to determine if Brazilian financial institutions qualify as global systemically important financial institutions, or G-SIFIs, which include: (i) size; (ii) interconnectedness; (iii) lack of readily available substitute or financial institution infrastructure for the services provided; (iv) global or cross-jurisdictional activity; and (v) complexity, with each of these factors receiving an equal weight of 20.0% in the assessment. This assessment should be carried out by banks with total exposure – the denominator for the leverage ratio – in excess of R$500 billion, individually or at the consolidated enterprise level (conglomerado prudencial), as the case may be. However, no additional loss absorbency requirements for Brazilian G-SIFIs have been established. We were not included on the latest list of G-SIFIs issued on November 3, 2015. The next update is expected in November 2016.

Foreign Currency
Transactions and Exposure
Transactions involving the sale and purchase of foreign currency in Brazil may only be conducted by institutions authorized to do so by the Central Bank. There are no limits for long or short positions in foreign currency for banks authorized to carry out transactions on the foreign exchange market. The compulsory deposit requirement rate on the foreign currency short position held by financial institutions is currently 0%.

In accordance with CMN regulation, financial institutions in Brazil may raise funds abroad, either through direct loans or through the issuance of debt securities. Funds raised accordingly may be freely invested in Brazil, including but not limited to on-lending to Brazilian companies and financial institutions. Brazilian banks authorized to operate in foreign currency markets which hold regulatory capital higher than R$5 billion may also use these funds to grant loans abroad to Brazilian companies, their offshore subsidiaries and to foreign companies controlled by Brazilians or to acquire securities issued or guaranteed by such companies in the primary market. Cross-border loans, in which one party is in Brazil and the other party is abroad, require previous registration with the Central Bank, which may establish limits on the conditions of such foreign currency loan transactions. Please refer to item Taxation for further details about tax on foreign exchange transactions.

Financial institutions may also grant loans in or indexed to a foreign currency to their clients’ trade-related activities, such as by granting advances on foreign exchange contracts (Adiantamento sobre Contrato de Câmbio), advances on delivered commercial papers (Adiantamento sobre Cambiais Entregues) or export or import prepayment agreements (Pré-Pagamento de Exportação e Financiamento à Importação), all in accordance with Brazilian regulations on foreign exchange markets and international capital flows.

The Central Bank and the Brazilian government frequently change rules and regulations applicable to foreign currency borrowing and loans in accordance with the economic scenario and Brazilian monetary policy.

Beside legislation sets forth that the total exposure in gold and other assets and liabilities indexed or linked to the foreign exchange rate variation undertaken by financial institutions (including their offshore branches), and their direct and indirect subsidiaries, on a consolidated basis, may not exceed 30.0% of their regulatory capital.

Liquidity and Fixed Assets Investment Regime
In accordance with CMN regulation, financial institutions may not hold, on a consolidated basis, permanent assets, including investments in unconsolidated subsidiaries, real estate, equipment and intangible assets, exceeding 50.0% of the adjusted regulatory capital.

Lending Limits
Furthermore, we are legally prevented from granting loans or advances, and guarantees, entering into derivative transactions, underwriting or holding in our investment portfolio securities of any clients or group of affiliated clients that, in the aggregate, give rise to exposure to such client or group of affiliated clients that exceeds 25.0% of our regulatory capital.

Credit Exposure Limits
For the purpose of this limit, the following public sector entities are to be considered as separate customers: (i) the Brazilian government, (ii) an entity controlled directly or indirectly by the Brazilian government which is not financially dependent on another entity controlled directly or indirectly by the Brazilian government, (iii) entities controlled directly or indirectly by the Brazilian government which are financially dependent among themselves, (iv) a State or the Federal District, jointly with all entities directly or indirectly controlled by it, and (v) a municipal district, jointly with all entities directly or indirectly controlled by it.

Risk Weighted Asset Calculation
The calculation of risk exposure is based on several factors set forth by the Central Bank regulations and impacts the capital requirements. The components take into consideration the type of risk and include the parameters and procedures for calculation of the risk weighted asset (RWA) to determine the capital requirements resulting from each...
risk exposure. The Central Bank has been frequently changing and updating the rules and regulations for calculation of RWA.

**Financial Bills**

Law No. 12,838 of July 9, 2013 adapted financial bills (*letras financeiras*) to the Basel III framework and granted the Central Bank power to limit the payment of dividends and interest on capital by financial institutions that do not comply with the CMN capital requirements. With the changes enacted by Law No. 12,838, Brazilian financial institutions will likely issue Basel III-compliant hybrid or subordinated debt instruments under the regulatory framework of financial bills. The main characteristics of financial bills changed by Law No. 12,838 are:

- Possibility of issuance of financial bills convertible into equity. The conversion may not be requested by the investor or the issuer financial institution;
- Suspension of payment of interest in case of non-compliance with capital requirement rules in case the financial bills are part of the regulatory capital of the financial institution. Additionally, in order to preserve the regular functioning of the Brazilian financial system, the Central Bank may determine that financial bills be converted into equity or written-off. These determinations will not be considered a default by the financial institution and will not accelerate the maturity of its other debts; and
- Financial bills may include, as early maturity events, default on the payment of the interest of the financial bill or the dissolution of the financial institution.

**Anti-Corruption Law**

In January 2014, a new Brazilian anti-corruption law came into force which establishes that legal entities will have strict liability (regardless of fault or willful misconduct) if they are involved in any form of bribery. Although known as an anti-corruption law, it also encompasses other injurious acts contrary to the Brazilian or foreign public administration including bid rigging and obstruction of justice. The law provides for heavy penalties, both through administrative and judicial proceedings including determination of dissolution of a company, prohibition to undertake financing with public entities and prohibition to participate in public biddings.

In addition, the law authorizes the public administrative authorities responsible for the investigation to enter into leniency agreements. The self-disclosure of violations and cooperation by legal entities may result in the reduction of fines and other sanctions as determined by the new federal regulation issued in March 2015. Also, on December 2015, the Brazilian government enacted Provisional Measure No. 703 (MP 703) amending the rules applicable to leniency agreements. MP 703 authorizes the federal, state, and local governments, severally or jointly with the Prosecutor’s Office or the General Attorney, to enter into leniency agreements. In addition, MP 703 provides more details as to the procedure to execute such agreements. The definitive conversion into law of MP 703 still needs to be approved by the Brazilian Congress and, subsequently, sanctioned by the President.

The new regulation also provides parameters for the application of the anti-corruption law including with respect to penalties and compliance programs. Please refer to www.itau.com.br/arquivosstaticos/RT/pdf/en/POLITICA_CORPORATIVA_DE_PREVENCAO_A_CORRUPCAO_ENGL.pdf from which you can electronically access further details about our Bribery Prevention Corporate Policy. As of 2014, the workforce’s target segment had attended corruption prevention modules as part of training programs.

**Compensation of Directors and Officers of Financial Institutions**

According to rules set forth by the CMN, Brazilian financial Institutions are required to have a compensation policy. If variable compensation is to be paid to management, at least 50% of the total compensation should be paid in shares or share-based instruments and at least 40% of the total compensation should be deferred for future payment for at least three years. If the institution records a significant decrease in the realized recurring profit or a negative result during the deferral period, the deferred and unpaid portions of the compensation should be reversed proportionally to the decrease in result, in order to minimize the loss incurred by the financial institutions and their stockholders.

Our compensation policy, applicable to directors and officers in Brazil (major part of the management population of the Itaú Unibanco Group), complies with CMN’s regulatory requirements. Our compensation principles and practices worldwide are compliant with each local regulation and seek to increase alignment between the interests of our stockholders and our management.

For further information, see section Our Governance, item Corporate Governance, Directors and Senior Management’s Compensation.

**Antitrust Regulation**

The Brazilian Antitrust Law sets forth that transactions resulting in economic concentration should be previously submitted for approval to CADE, the Brazilian antitrust regulator, provided that they meet the following criteria: (i) the economic group of any of the parties to a transaction recorded, in the fiscal year prior to that of the transaction, minimum gross revenues of R$750 million; and (ii) at least one of the other economic groups involved in the transaction recorded, for the same time period, minimum gross revenues of R$75 million. The closing of a transaction before CADE’s approval subjects the parties to fines ranging from R$60,000 to R$60 million, the annulment of the relevant agreement and potential administrative proceedings.

Financial conglomerates shall submit transactions in various industries to CADE’s approval. Additionally, Circular No. 3,590/2012 of Central Bank
requires submission of concentration acts involving two or more financial institutions to the Central Bank’s approval in the following cases: (i) acquisition of corporate control, (ii) merger, (iii) acquisition or (iv) transfer of the business to another financial institution, and (v) another transactions that lead institutions to increase market share in the market segments which operates.

With respect to the conflict of jurisdiction to review and approve concentration acts involving financial institutions, the matter remains undefined, and the uncertainty around whether the CADE or the Central Bank should review and approve concentration acts involving financial institutions has resulted in financial institutions submitting for approval all concentration acts in the banking sector not only to the Central Bank but also to CADE.

Under IFRS, the allowance for loan losses is based on our internally developed incurred loss models, which calculate the allowance for loan losses by multiplying the probability of default by the clients or counterparty (PD) by the potential for recovery on defaulted credits (LGD) for each transaction, as described in Note 2.4g VIII to our consolidated financial statements under IFRS. The risk levels are categorized as “lower risk”, “satisfactory”, “higher risk”, and “impaired” based on the probability of default, following an internal scaling, as set out in Note 36 to our consolidated financial statements under IFRS.

### Bank insolvency

The insolvency of financial institutions is handled pursuant to applicable laws and regulations by the Central Bank, which initiates and monitors all applicable administrative proceedings. There are three types of special regimes that may be imposed to financial institutions (private or public, but not federal) or similar institutions: (i) temporary special administration regime (RAET), (ii) intervention, and (iii) extrajudicial liquidation. Financial institutions may also be subject to the bankruptcy regime.

In the course of the special regimes described below, the steering committee, the intervenor, and the liquidator may, when authorized by the Central Bank: (i) dispose of assets and rights of the financial institution to third parties and (ii) proceed with corporate restructuring processes in the financial institution or its subsidiaries, among other possible measures of similar effect.

#### RAET

The RAET is a less severe special regime which allows financial institutions to continue to operate. Its main effect is that directors lose their offices and are replaced by a steering committee appointed by the Central Bank with broad management powers. Its duration is limited and its main objective is the adoption of measures aimed at the resumption of the financial institution's regular activities. If resumption is not possible, this regime may be turned into an extrajudicial liquidation.

#### Intervention

Under this regime, the Central Bank appoints an intervenor that takes charge of the financial institution’s management, suspending its regular activities and dismissing the financial institution’s management. In general, the intervention is aimed at preventing the continuation of certain irregularities and the aggravation of the financial situation of the financial institution, which can put assets at risk and harm the financial institution’s creditors. The intervention is also time-limited and may be followed by the resumption of the financial institution’s regular activities or the declaration of extrajudicial liquidation or bankruptcy.

The intervention suspends all actions related to payment obligations of the financial institution, prevents the early settlement or maturity of its obligations and freezes pre-existing deposits.

#### Extrajudicial Liquidation

Extrajudicial liquidation generally corresponds to the process of dissolution of the company in cases of unrecoverable insolvency or severe violations of the rules that regulate a financial institution’s...
activities. The extrajudicial liquidation aims at promoting the liquidation of the existing assets for the payment of creditors, with the return of any amounts left to stockholders. Controlling stockholders may be held responsible for remaining liabilities.

The extrajudicial liquidation (i) suspends actions and executions related to the financial institution, (ii) accelerates the maturity of the financial institution's obligations; and (iii) interrupts the statute of limitations of the financial institution's obligations. In addition, the debt of the estate under liquidation will no longer accrue interest until all obligations to third parties are settled.

**Deposit Insurance**

In the event of intervention, extrajudicial liquidation or liquidation of a financial institution in a bankruptcy proceeding, the Credit Insurance Fund, or FGC, a deposit insurance system, guarantees the maximum amount of R$250,000 for certain deposits and credit instruments held by an individual, a company or another legal entity with a financial institution (or financial institutions of the same economic group). The resources of the FGC come primarily from mandatory contributions from all Brazilian financial institutions that receive deposits from clients, currently at a monthly rate of 0.0125% of the amount of the balances of accounts corresponding to the financial instruments that are the subject matter of the ordinary guarantee, even if the related credits are not fully covered by FGC, and certain special contributions. Deposits and funds raised abroad are not guaranteed by the FGC. As from February 2016, credits of financial institutions and other institutions authorized to operate by the Brazilian Central Bank, complementary welfare entities, insurance companies, capitalization companies, investment clubs and investment funds, as well as those representing any interest in or financial instrument held by such entities, are not protected by the ordinary guarantee of FGC.

**Payment of Creditors in Liquidation**

In the event of extrajudicial liquidation of a financial institution or liquidation of a financial institution in a bankruptcy proceeding, the salaries of employees and the related labor claims up to a certain amount, secured credits and tax charges have priority in any claims against the entity in liquidation. The payment of unsecured credits, including deposits from regular retail clients that are not guaranteed by the FGC, is subject to the prior payment of preferred credits. Additionally, upon the payment of the deposits guaranteed by the FGC, the FGC becomes an unsecured creditor of the estate in liquidation.

**Insurance Regulation**

With governmental approval, insurance companies in Brazil may offer all types of insurance, except for workers' compensation insurance, directly to clients or through qualified brokers.

Insurance companies must set aside reserves to be invested in specific types of securities. As a result, insurance companies are among the main investors in the Brazilian securities market and subject to CMN regulations regarding the investment of technical reserves.

In the event an insurance company is declared bankrupt, the insurance company will be subject to a special procedure administered by SUSEP or by ANS. If an insurance company is declared bankrupt and (i) its assets are not sufficient to guarantee at least half of the unsecured credits or (ii) procedures relating to acts that may be considered bankruptcy-related crimes are in place, the insurance company will be subject to ordinary bankruptcy procedures.

There is currently no restriction on foreign investments in insurance companies in Brazil.

Brazilian legislation establishes that insurance companies must buy reinsurance to the extent their liabilities exceed their technical limits under the rules of the regulatory body (CNSP and SUSEP), and reinsurance contracts may be entered into through a direct negotiation between the insurance and reinsurance companies or through a reinsurance broker authorized to operate in Brazil.

Insurance companies, until December 31, 2016, when transferring their risks in reinsurance, must transfer 40.0% of each facultative or automatic contract to local reinsurers (companies domiciled in Brazil). From January 1, 2017, this percentage will reduce annually until it reaches 15% in January 1, 2020.

In addition, until December 31, 2016, risk assignment between insurers and reinsurers belonging to the same economic group is limited to 20.0% of the premiums pertaining to each facultative or automatic contract.

**Anti-Money Laundering Regulation**

The Brazilian anti-money laundering law establishes the basic framework to prevent and punish money laundering as a crime. It prohibits the concealment or dissimulation of origin, location, availability, handling or ownership of assets, rights or financial resources directly or indirectly originated from crimes, subjecting the agents of these illegal practices to imprisonment, temporary disqualification from managing enterprises up to ten years and monetary fines.

The Brazilian anti-money laundering law also created the Financial Activities Control Council, or COAF, which is the Brazilian financial intelligence unit that operates under the jurisdiction of the Ministry of Finance. COAF performs a key role in the Brazilian anti-money laundering and counter-terrorism financing system, and its legal responsibility is to coordinate the mechanisms for international cooperation and information exchange.
In compliance with the Brazilian anti-money laundering law and related regulations enacted by the Central Bank, including the rules applicable to procedures that must be adopted by financial institutions to prevent and combat money laundering and terrorism financing, as well as in response to the recommendation of the Financial Action Task Force – FATF and United Nations Security Council, financial institutions in Brazil must establish internal control and procedures aiming at:

- identifying and knowing their clients, which includes determining if they are PEPs, and also identifying the ultimate beneficial owners (UBO) of the transactions. These records should be kept up-to-date;
- checking the compatibility between the movement of funds of a client and such client’s economic and financial capacity;
- checking the origin of funds;
- carrying out a prior analysis of new products and services, under the perspective of money laundering prevention;
- keeping records of all transactions carried out or financial services provided on behalf of a certain client or for that client;
- reporting to COAF, within one business day, any transaction deemed to be suspicious by the financial institution, as well as all transactions in cash equivalent to or higher than R$100,000, without informing the involved person or any third party;
- applying special attention to (i) unusual transactions or proposed transactions with no apparent economic or legal bases; (ii) transactions involving PEPs, (iii) indication of evading client identification and transaction registering procedures; (iv) client and transactions for which the UBO cannot be identified; (v) transactions originated from or destined to countries that do not fully comply with the recommendations of the Financial Action Task Force (FATF); and (vi) situations in which it is not possible to keep the clients’ identification records duly updated;
- determining criteria for hiring personnel and offering anti-money laundering training for employees;
- establishing procedures to be complied with by all branches and subsidiaries of a Brazilian financial institutions located abroad with respect to anti-money laundering;
- establishing that, any institutions authorized to operate in the Brazilian foreign exchange market with financial institutions located abroad must verify whether the foreign financial institution is physically located in the jurisdiction where it was organized and licensed, and that it is subject to effective supervision;
- monitoring transactions and situations which could be considered suspicious for anti-money laundering purposes;
- reporting to COAF the occurrence of suspicious transactions, as required under applicable regulations, and also, at least once a year, whether or not suspicious transactions are verified, in order to certify the non-occurrence of transactions subject to reporting to COAF (negative report);
- requiring clients to inform the financial institution, at least one business day in advance, of their intention to withdraw amounts equal to or exceeding R$100,000;
- ensuring that policies, procedures and internal controls are commensurate with the size and volume of transactions; and
- unavailability of goods, values and rights of possession or ownership and all other rights, real or personal, owned, directly or indirectly, of natural or legal persons subject to sanctions by the Council resolutions of the United Nations Security United.

Non-compliance with any of the obligations above subjects the financial institution and its officers to penalties ranging from: (i) formal notice, (ii) fines (from 1.0% to 200.0% of the amount of the transaction, 200.0% of the profit generated thereby, or a fine of up to R$20,000,000), (iii) rendering executive officers ineligible for holding any management position in financial institutions, to (iv) the cancellation of the financial institution’s license to operate.

In August 2013, the Brazilian Association of Banks (Federação Brasileira de Bancos, or FEBRABAN) enacted an anti-money laundering and terrorism financing self-regulation. The purpose of the document is to improve the contribution of the Brazilian financial system to the prevention of money laundering and make consistent the practices adopted by all banks, encouraging them to reinforce their preventive procedures.

**Politically Exposed Persons (PEPs)**

PEPs are public agents who hold or have held a relevant public position, as well as their representatives, family members or other close associates, over the past five years, in Brazil or other countries, territories and foreign jurisdictions. It also includes their legal entities. Financial institutions must develop and implement internal procedures to identify PEPs and obtain special approval from a more senior staff member, such as an officer, than otherwise would be required to approve relationships prior to establishing any relationship with those individuals. They should also adopt reinforced and continuous surveillance actions regarding transactions with PEPs and report all suspicious transactions to COAF.

**Portability of Credit Transactions**

The portability of credit transactions is regulated by the Central Bank since 2013. It consists of the transfer of a credit transaction from the original creditor to another institution, at the request of the debtor, maintaining the same outstanding balance and payment conditions. The regulation establishes standard procedures and deadlines for the exchange of information and the mandatory use of an electronic system authorized by the Central Bank for the transfer of funds between financial institutions, prohibiting the use of any alternative procedure to produce the same effects of the portability, including so-called "debt purchases".
Rules Governing the Charge of Fees on Banking and Credit Card Operations

Banking fees and credit card operations are extensively regulated by the CMN and the Central Bank. According to Brazilian legislation, we must classify the services we provide to individuals under pre-determined categories and are subject to limitations on the collection of fees for such services.

Brazilian financial institutions are generally not authorized to charge fees from individuals for providing services classified as “essential” with respect to checking and saving accounts, such as supplying debit cards, check books, withdrawals, statements and transfers, among others.

Brazilian legislation also authorizes financial institutions to charge fees related to “priority services”, a standard set of services defined by Central Bank regulation. Financial institutions must offer to their individual clients “standard packages” of priority services. Clients may also choose between these or other packages offered by the financial institution, or to use and pay for services individually instead of selecting a package.

Current rules also authorize financial institutions to charge fees for specific services called “additional services” (serviços diferenciados), provided that the account holder or user is informed of the use and payment conditions relating to such services, or that fees and collection methods are defined in the contract.

The CMN also establishes rules applicable to credit cards, determining the events that allow for the collection of fees by issuers, as well as the information that must be disclosed in credit card statements and in the credit card agreement. There is also a list of priority services. The rules define two types of credit cards: (i) basic credit cards, with simpler services, without rewards programs and (ii) “special credit cards”, with benefits and reward programs. A minimum of 15% of the total outstanding credit card balance must be paid monthly by credit card holders.

A minimum 30-day prior notice to the public must precede the creation or increase of a fee, whereas fees related to priority services may only be increased 180 days after the date of a previous increase (while the reduction of a fee can take place at any time). With respect to credit cards, a 45-day prior notice to the public is required for any increase or creation of fees, and such fees may only be increased 365 days after a previous increase. The period of 365 days is also subject to changes in the rules applicable to benefit or reward programs.

Payroll Deduction of Credit Card

In 2015, the Brazilian government increased the total payroll deduction limit from 30% to 35% of an individual’s monthly income and authorized the use of payroll deduction to pay credit card bills. 5% of such limit is required to be used exclusively for the payment of credit card bills. This measure results from the conversion of Provisional Measure No. 681 into Law No. 13,172 of October 21, 2015.

Leasing regulation

Although leasing transactions are not classified as credit transactions under Brazilian legislation, the Central Bank regulates and oversees leasing transactions. The parties involved in a leasing transaction are the “lessor” (the bank) and “lessee” (our client). The leased asset, owned by the lessor, is delivered to be used by the lessee until the end of the contract, when the lessee may opt to either acquire or return it to the lessor or renew the contract for a new period.

Brazilian legislation establishes a specific methodology to account for the profits or losses in leasing transactions and all information that should be included in a lease agreement. The guaranteed residual amount paid by a lessee should correspond to a minimum return required for the transaction to be viable for the lessor, whether the purchase option is exercised or not. The laws and regulations applicable to financial institutions, such as those related to reporting requirements, capital adequacy and leverage, assets composition limits and allowance for losses, are also generally applicable to leasing companies.

Correspondent agents

We may engage other entities to provide certain services to our clients, including customer service. These entities are generally called correspondents, and our relationship with correspondents is regulated by the Central Bank. Among other requirements, the Central Bank establishes that employees of all correspondent agents must hold a technical certification authorizing them to serve customers involved in credit and leasing operations.

Banking secrecy

Brazilian financial institutions must maintain the secrecy of banking transactions and services provided to their clients. The only circumstances in which information about clients, services or transactions by Brazilian financial institutions or credit card companies may be disclosed to third parties are the following:

- the disclosure of information with the express consent of the interested parties;
- the exchange of information between financial institutions for record purposes;
- the disclosure of information to credit reference agencies based on data from the records of subscribers of checks drawn on accounts without sufficient funds and defaulting debtors;
- the disclosure of information to the competent authorities relating to the actual or suspected occurrence of criminal acts or administrative wrongdoings, including the disclosure of information on transactions
Disclosure Requirements
Under CVM rules, publicly traded companies are subject to disclosure requirements and rules governing the use of material information. Any decision that may reasonably influence the price of the securities issued by a publicly-held company or the decision of investors to buy, sell, or hold these securities, is considered material.

The CVM improved the quality of the information that must be presented in periodic filings by securities issuers by requiring such issuers to file a ”Reference Form” with the CVM. This form was modeled after IOSCO’s shelf registration system in gathering all of the issuer’s information in a single document.

Asset Management Regulation
The Brazilian asset management regulation requires asset managers to obtain previous registration with the CVM to perform the services of portfolio management and fund administration.

Itaú Unibanco Group provides several services in the capital markets and, in particular, performs activities related to fund administration and portfolio management under CVM registration, according to CVM regulation.

By providing these services, our entities engaged in the asset management business can be held civil and administratively liable for losses arising from either intentional acts or negligence in conducting our activities.

The CVM has regulatory powers to oversee these activities, including to impose fines and other sanctions on registered asset managers.

Funds of foreign investors
In March 2015, a new regulatory framework issued by the CMN and the CVM became effective regarding (i) foreign investment in the Brazilian financial and capital markets and (ii) depositary receipts.

The most significant changes in the rules applicable to foreign investment in the Brazilian financial and capital markets introduced by the new regulation are: (i) a requirement that only financial institutions authorized to operate in Brazil may act as legal representatives of non-resident investors in Brazil for purposes of any investments made within the purview of such rule; (ii) clarification of requirements regarding simultaneous foreign exchange transactions (without the effective transfer of money) related to foreign investments; and (iii) clarification about the types of investments that can be made through a foreign investor account (conta de domiciliado no exterior) maintained at a bank in Brazil.

The new regulation also amended the rules applicable to depositary receipts, by allowing the issuance of depositary receipts based on (i) any security issued by Brazilian companies registered with the CVM (companhias abertas), in contrast to the previous rules which limited the issuance of depositary receipts to equity securities, and (ii) credit instruments issued by financial institutions and other types of institutions registered with the CVM and authorized by the Central Bank, and eligible to be included in the financial institution’s regulatory capital (Patrimônio de Referência).

Some of the changes implemented by the CVM rules on registry, operations and disclosure of information related to foreign investment in the Brazilian financial and capital markets were made to detail the
activities of legal representatives, to enlarge the scope of non-resident investor’s private transactions and to determine the exceptions of transfer between non-resident investors prohibited by the CMN.

**Internet and E-Commerce Regulation**

On April 10, 2014, a new law (Federal Law No. 12,965/2014) establishing the regulatory framework for Internet services was enacted in Brazil. This law sets forth principles and rules to be observed by internet providers and users, including the protection of privacy and personal data and the preservation and safeguard of net neutrality. Also, certain aspects of electronic commerce are regulated, including the validity of electronic documents in Brazil and electronic commerce transactions from the consumer protection standpoint. Current regulation on electronic commerce is intended to: (i) clearly identify the supplier and the product sold on the Internet; (ii) provide an electronic service channel to clients; and (iii) guarantee cancellation and return of Internet orders. In addition, computer hacking offenses were criminalized in Brazil in 2012.

In light of the increased use of electronic channels in the Brazilian banking industry, the CMN has enacted a number of resolutions over the past few years in order to provide or establish:

- that Brazilian residents may open deposit bank accounts by electronic means, which includes the Internet, ATMs, telephone and other communication channels, provided that transfers of amounts from such accounts are allowed only between accounts of the same account holder or in the event of liquidation of investment products and funds of an account, of the same account holders who own the investment products or funds;
- the requirements related to the verification of a client’s identity;
- that all financial institutions that offer products and services through electronic means must guarantee the security, secrecy and reliability of all electronic transactions and disclose, in clear and precise terms, the risks and responsibilities involving the product or service acquired through these channels; and
- the opening of deposit bank and savings accounts that can be used exclusively through electronic means.

On April 10, 2014 FEBRABAN, Brazilian Federation of Banks issued a regulation on hiring credit through remote channels (such as ATM’s, call center and Internet Banking), setting forth minimum guidelines and procedures to ensure reliability, quality, transparency and efficiency.

**Regulation on Payment Agents and Payment Arrangements**

A Brazilian law enacted in October 2013 established the legal framework for “payment arrangements” (i.e. the set of rules governing a payment scheme, such as a credit or debit card transaction), and “payment agents” (i.e., any agent that issues a payment instrument or acquires a merchant for payment acceptance), which became part of the Brazilian Payments System and subject to oversight by the Central Bank. Payment agents, in spite of being regulated by the Central Bank, are not deemed to be financial institutions and are prohibited from engaging in activities that are exclusive of financial institutions.

In November 2013, the CMN and the Central Bank published a set of rules referring to payment arrangements and payment agents, which became effective in May 2014. This regulation establishes: (i) consumer protection and anti-money laundering compliance and loss prevention rules that should be followed by all entities supervised by the Central Bank when acting as payment agents and payment arrangers; (ii) the procedures for the incorporation, organization, authorization and operation of payment agents, as well for the transfer of control, subject to the Central Bank’s prior approval; (iii) capital requirements; (iv) definition of arrangements excluded from the Brazilian Payments System; (v) payment accounts, which are divided into prepaid and post-paid accounts; and (vi) a liquidity requirement for prepaid accounts that demands the allocation of their balance to a special account at the Central Bank or to be invested in government bonds, starting at 20% in 2014 and raising gradually up to the totality of the total account balance in 2019; among other matters.

In October 2015, a new regulation was published by the Central Bank complementing the previous ones and bringing new rules and concepts, among them: limitations on closed payment arrangements, the concept of domicile institution, obligation of centralized clearing and settlement for the payment arrangements, transparency of the interoperability rules intra-arrangement and between arrangements.

**Credit Performance Information**

Brazilian law establishes rules for the organization and consultation of databases compiling positive credit history information of individuals and legal entities. The Central Bank regulates the provision of positive credit history information by financial institutions to such databases and the sharing of such information, such provision and sharing being subject to the express request or authorization of the client.

**Consumer Protection Code**

The Brazilian Consumer Protection Code, or CDC, sets forth consumer defense and protection rules applicable to clients’ relationships with suppliers of products or services. Brazilian higher courts understand that the CDC is also applicable to financial institutions.

The basic consumer rights dealing with financial institutions are as follows:

- reverse burden of proof in court;
- financial institutions must ensure that proper and clear information
is provided with respect to the different products and services offered, with accurate specifications for quantity, characteristics, composition, quality, and price, as well as on any risks such products pose;
- financial institutions are prohibited from releasing misleading or abusive publicity or information about their contracts or services, as well as promoting overbearing or disloyal commercial practices;
- financial institutions are liable for any damages caused to their clients by misrepresentations in their publicity or information provided;
- interest charged in connection with personal credit and consumer directed credit transactions must be proportionally reduced in case of early payment of debts;
- collection of credits cannot expose the client to embarrassment or be performed in a threatening manner; and
- amounts charged improperly may in limited circumstances have to be returned in an amount equal to twice what was paid in excess of due amounts. Such rule does not apply to cases of justifiable mistake, such as systemic failure or operational error.

Moreover, the Brazilian Congress is considering enacting new legislation that, if signed into law as currently drafted, could have an adverse effect on us. For example, a proposed law to amend the Brazilian consumer protection code would allow courts to modify terms and conditions of credit agreements in certain circumstances, imposing certain difficulties for the collection of amounts from final consumers. In addition, local or state legislatures may, from time to time consider bills intending to impose security measures and standards for customer services, such as limits in queues and accessibility requirements, that, if signed into law, could affect our operations. More recently, certain bills have passed (and others were proposed) in certain Brazilian states or municipalities that impose, or aim to impose, restrictions on the ability of creditors to include the information about insolvent debtors in the records of credit protection bureaus, which could also adversely affect our ability to collect credit outstanding.

Regulation of Independent Auditors
In accordance with CMN regulation establishing the rules that govern external audit services provided to financial institutions, the financial statements and financial information of financial institutions must be audited by independent auditors who are (i) duly registered with the CVM; (ii) qualified as specialists in audit of banks by the CFC and the IBRACON; and (iii) meet the requirements that ensure auditor independence.

After issuing audit reports for five consecutive fiscal years, the responsible audit partner and audit team members with management responsibilities must rotate-off and cannot be part of the audit team of such institution for three consecutive fiscal years.

CMN regulation also prohibits the engagement and maintenance of independent auditors by financial institutions in the event that: (i) any of the circumstances of impediment or incompatibility for the provision of audit services provided for in the rules and regulations of the CVM, CFC or IBRACON arise; (ii) ownership of shares of or entering into financial transactions (either asset or liability) with the audited financial institution by the audit firm or members of the audit team involved in the audit work of the financial institution; and (iii) fees payable by the institution represent 25% or more of the total annual fees of the audit firm. Additionally, the audited financial institution is prohibited from hiring partners and members of the audit team with managerial responsibilities who were involved in the audit work at the financial institution during the preceding 12 months.

In addition to the audit report, the independent auditor must prepare the following reports, as required by CMN regulation.

- An assessment of the internal controls and risk management procedures of the financial institution, including its electronic data processing system;
- A description of non-compliance with legal and regulatory provisions that have, or may have, a significant impact on the audited financial statements or operations of the audited financial institution; and
- Others reports required by Central Bank.

These reports, as well as working papers, correspondence, service agreements and other documents related to the audit work must retained and made available to the Central Bank for at least five years.

Under Brazilian law, our financial statements must be prepared in accordance with the accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank. We also prepare financial statements in accordance with the International Financial Reporting Standards (IFRS). Please refer to Context, item Context of this Report, About our financial information for further details. Financial institutions must have their financial statements audited every six months. Quarterly financial statements filed with the CVM must be reviewed by independent auditors of the financial institutions. CVM rules require publicly-held companies, including financial institutions, to disclose information related to non-audit services provided by independent auditors when they represent more than 5% of the fees for audit services. Such information should include the type of service, the amount paid and the percentage that they represent of the fees for audit of financial statements. Please refer to Our Governance, item Audit Committee, for further details about Fees and Services of the Main Auditors.
Taxation

We summarize below the main taxes levied on the transactions entered into by entities in the Itaú Unibanco Group in Brazil. This description does not represent a comprehensive analysis of all tax considerations applicable to the Itaú Unibanco Group. For a more in-depth analysis, we recommend that potential investors consult their own tax advisors. The main taxes we are subject to, with respective rates, are as follows:

<table>
<thead>
<tr>
<th>Tax</th>
<th>Rate</th>

Corporate Income Tax and Social Contribution on Net Income

In accordance with applicable legislation, corporate income tax (Imposto de Renda da Pessoa Jurídica, or IRPJ), and social contribution on profits (Contribuição Social Sobre o Lucro Líquido, or CSLL) are determined by the taxable income regime. Under this regime, our taxable income, on which IRPJ and CSLL will be levied, must be adjusted by additions, deductions, and exclusions, such as nondeductible expenses, operating costs and equity accounting, respectively.

The IRPJ is levied at a basic 15.0% rate, and a 10.0% surtax is applicable when the total amount of profit for the fiscal period exceeds R$20,000 per month or R$240,000 per year. In other words, any portion of our profit exceeding this limit is taxed at an effective 25.0% rate.

CSLL is currently levied on our taxable income at a 20.0% rate, which is specific for financial institutions, insurance and similar companies. Note that this tax is generally levied at a 9.0% for non-financial legal entities. Nonetheless, the Federal Government increased such a rate initially to 15.0%, and then to 20.0%. Despite such increase, some Brazilian financial institutions, including us, are disputing the constitutionality of this higher CSLL tax rate. The amounts in dispute are accounted for as a tax liability provision in our balance sheet. In regard to this matter, it is worth mentioning that on the same rule that increased CSLL from 15.0% to 20.0% (Law 13,169), the Federal Government also determined that, as from January 1, 2019, the CSLL rate will be reduced to 15.0%.

As other Brazilian legal entities, our companies may offset the historical nominal amount of tax losses determined in prior years against results of subsequent years at any time (i.e., with no limitations with respect to time periods), provided that such offsetting does not exceed 30.0% of the annual taxable income of such future year. For purposes of IRPJ and CSLL taxation, companies should consider their income abroad as well rather than income solely from Brazilian operations. Therefore, profits, capital gains and other income earned abroad by Itaú Unibanco Group entities in Brazil, their branches, representations, affiliates or subsidiaries, will also be computed for determination of the entities net income. However, Brazilian legislation provides for our deducting the amounts paid as corporate income tax abroad against the IRPJ due in Brazil and CSLL, provided certain limits are observed.

Income Tax for Individuals and Foreign Investors

On September 22, 2015, the President of Brazil enacted Provisional Measure No. 692, or MP 692, converted into Law No. 13,259 of March 16, 2016, which aimed at increasing the flat 15% rate of the income tax levied on capital gains derived by individuals, certain corporations and foreign investors (individuals and corporations) as a result of the disposal of assets and rights in general exceeding R$5 million, by adopting a system of progressive rates that may reach a 22.5% tax rate (for positive results exceeding R$30 million). Since capital gains arising from transactions executed through a securities exchange are subject to specific tax rules, which are not included under the scope of Law No. 13,259, it is possible to sustain the position that the provisions of this rule should not apply to such transactions. If the stockholder is a resident of or domiciled in a tax haven jurisdiction or a privileged tax regime, the capital gains are subject to withholding income tax at a 25% rate.

In order to become effective in 2016, MP 692 had to be mandatorily converted into law before the end of 2015. Since it did not occur prior to the end of 2015, such rule will not have any legal effect in 2016. If the conversion into law occurs in 2016, the effective date of MP 692 would be postponed to January 1, 2017. If MP 692 is not converted into law within 120 days from its date of enactment, which will occur on February 29, 2016, it will not produce any legal effects. During the process of converting MP 692 into law, the provisions thereof may still be subject to changes.
Interest on Stockholders’ Equity

On September 30, 2015, the Brazilian government enacted Provisional Measure No. 694, or MP 694, which amended the income tax regulations concerning distributions of interest on stockholders’ equity by Brazilian companies. Under MP 694, the calculation of interest on stockholders’ equity will be limited to the (i) daily variation of the long term interest rate (Taxa de Juros de Longo Prazo, or TJLP), multiplied by the value of certain equity accounts of the Brazilian company or (ii) an annual 5% flat rate, whichever is lower. Moreover, MP 694 increases from 15% to 18% the withholding income tax rate levied on interest on stockholders’ equity payments made by Brazilian companies to non-Brazilian residents not domiciled in tax-haven jurisdictions, as defined by the Brazilian tax authorities. Because MP 694 was not converted into law during the effective period for such conversion, these amendments to the income tax regulations are no longer effective.

If the stockholder is a resident of or domiciled in a tax haven jurisdiction, the payment of interest on capital is subject to withholding income tax at a rate of 25%.

Contribution on Social Integration Program and Social Security Financing Contribution

In addition to IRPJ and CSLL, Brazilian legal entities are subject to the following taxes on revenue: contribution on social integration program (Contribuição Para o Programa da Integração Social, or PIS) and social security financing contribution (Contribuição Social Para o Financiamento da Seguridade Social, or COFINS).

In accordance with applicable legislation, financial institutions are subject to the cumulative regime for calculation of these taxes. Under the cumulative regime, financial institutions are required to pay PIS at a 0.65% rate and COFINS at a 4.0% rate. The cumulative regime provides for rates lower than those levied under the non-cumulative regime, which is explained below, but it prevents the use of tax credits.

Some additional deductions are legally permitted to financial institutions, and therefore the calculation basis is similar to the profit margin. Some of our subsidiaries claim that the PIS and COFINS should be levied only on their revenue from the sale of products and services, rather than on the revenues from financial and other activities. The amounts in dispute are accounted for as tax contingencies in the balance sheets of these companies.

Most non-financial companies, on the other hand, are authorized to pay PIS and COFINS contributions according to the non-cumulative regime. Under the non-cumulative regime, PIS is levied at a 1.65% rate and COFINS is levied at a 7.6% rate. The calculation basis of these taxes is the gross revenue earned by the entity; however, the taxpayer may offset credits calculated through the application of the same rates on the value paid on the purchase of certain inputs used in the entity’s production process. Currently, under such non-cumulative regime, the financial income (except for income from interest on capital) of non-financial companies is not subject to PIS and COFINS.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 37 – Supplementary Information and Note 32 – Provisions, contingencies and other commitments, e – Program for Cash or Installment Payment of Federal Taxes, for information regarding Law No. 12,973/2014.

Service Tax

The tax on services (Imposto Sobre Serviços de Qualquer Natureza, or ISS) is generally levied on the price of services rendered (e.g., banking services) and is charged by the municipality where our branch or office rendering the service is located. The tax rates vary from 2.0% up to the maximum rate of 5.0%, depending on the municipality in which the service is provided and its respective nature.

Tax on Financial Transactions

The tax on financial transactions is levied at specific rates according to the transaction in question, and may be changed by a decree from the Executive Branch (which may become effective as of its publication date), rather than by a law enacted by the Brazilian Congress.

Our risk management

A-109
The table below summarizes the main IOF rates levied on our transactions. Notwithstanding, we note that IOF is a very comprehensive tax. Therefore, for a more in-depth analysis, we recommend that tax advisors be consulted accordingly.

<table>
<thead>
<tr>
<th>Type of transaction</th>
<th>Applicable Rates (Rates may be changed by a decree enacted by the Brazilian government up to a maximum rate, as described below, which may become effective as of its publication date)</th>
</tr>
</thead>
</table>
| Foreign exchange transactions | IOF/FX: zero to 6.38% (depending on the transaction)  
Maximum rate: 25% |
| Insurance transactions | IOF/Insurance: zero to 7.38%  
Maximum rate: 25% |
| Loans and credit transactions | IOF/Credit: 0.0082% (individual) or 0.0041% (legal entities) per day, until it reaches 365 days, plus a flat 0.38% rate  
Maximum rate: 1.5% per day (plus 0.38%) |
| Securities | IOF/Securities: zero to 1.5% as a general rule (possible to be higher)  
Maximum rate: 1.5% per day |
| Securities – Derivatives | IOF/Securities – Derivatives: zero  
Maximum rate: 25% |

U.S. Foreign Account Tax Compliance Act (FATCA)

FATCA attempts to minimize tax avoidance by U.S. persons investing in foreign assets both through their own accounts and through their investments in foreign entities. FATCA requires U.S. withholding agents such as Itaú to provide information to the U.S. Internal Revenue Service (IRS) regarding their U.S. account holders including substantial U.S. owners of certain non-financial foreign entities (NFFEs) and specified U.S. persons having an interest in certain professionally managed investment vehicles and trusts known as owner-documented foreign financial institutions (FFIs).

To the extent a U.S. withholding agent is not able to properly document an account, it generally will be required to deduct 30% FATCA withholding on certain payments of U.S. source income. Gross proceeds from the sale of property that would yield U.S. source dividends or interest are subject to withholding beginning January 1, 2019.

U.S. tax law has detailed rules for determining the source of income. Different rules apply for each type of income. Interest and dividends, two of the most common types of income for investors, are generally sourced by reference to the residence of the obligor. Specifically, dividends are generally treated as U.S. source income when paid by a U.S. corporation with respect to its stock, and interest is generally treated as U.S. source income when paid by a U.S. borrower of money.

The United States collaborated with other governments to develop Intergovernmental Agreements (IGAs) to implement FATCA. IGAs with partner jurisdictions facilitate the effective and efficient implementation of FATCA. The purpose of these agreements is essentially to remove domestic legal impediments to compliance with FATCA and sharing of information and to reduce burdens on FFIs located in partner jurisdictions.

More than 70 jurisdictions have signed an IGA, including Brazil, the Cayman Islands, Switzerland, United Kingdom. In addition, approximately 30 other jurisdictions are deemed as having an IGA in effect. Some countries signed a reciprocal agreement, meaning that the country (such as Brazil) and the U.S. will automatically exchange annually, on a reciprocal basis, specific account holder information.

There are two types of IGAs – Model 1 IGA, where local FFIs are required to implement account opening and due diligence procedures to identify U.S. accounts and report them to the local tax authority for exchange with the IRS (examples of Model 1 IGA countries are Brazil, Cayman Islands, The Bahamas, Peru and Colombia), and Model 2 IGA, where local FFIs are required to implement account opening and due diligence procedures to identify U.S. accounts, but report such information directly to the IRS (examples of Model 2 IGA countries are Switzerland, Chile, Paraguay and Japan).

Under the IGA-BR, Brazilian financial institutions and other entities subject to FATCA disclosure requirements are generally required to provide certain information on their U.S. account holders to the Brazilian tax authorities, which will share this information with the U.S. Internal Revenue Service.

Pursuant to FATCA, the issuer, any other financial institution or other entities subject to FATCA disclosure requirements to or through which any payment with respect to the preferred shares or ADSs is made may be required, pursuant to the IGA-BR or under applicable law, to (i) request certain information from holders or beneficial owners of our preferred shares or ADSs, which information may be provided to the U.S. Internal Revenue Service; and (ii) withhold U.S. federal tax at a 30.0% rate on some portion or all of the payments considered “pass-thru payments” made after December 31, 2018, with respect to the preferred shares or ADSs if such information is not duly provided by such a holder or beneficial owner (referred to under FATCA as a “recalcitrant account holder”). If the issuer or any other person is required to withhold
amounts under or in connection with FATCA from any payments made in respect of the preferred shares or ADSs, holders and beneficial owners of the preferred shares or ADSs will not be entitled to receive any gross up or other additional amounts to compensate them for such withholding.

The above description is based on guidance issued to date by the U.S. Treasury Department, including the final U.S. Treasury regulations and IGA-BR. Future guidance may affect the application of FATCA to the preferred shares or ADSs.

**Exchange controls**

Individuals or legal entities domiciled outside Brazil may own our stock through ADSs negotiated in a U.S. Exchange or through direct investments in the Brazilian Market. However, the right to convert dividend payments and proceeds from the sale of our shares, in the Brazilian Market, into foreign currency and to remit such amounts abroad is subject to restrictions under foreign investment and foreign currency legislation which generally requires, among other things, the documentary evidence that provides the validity and proves the economic legitimacy of the exchange operation and that the relevant investment be registered with the Central Bank and the CVM, as applicable.

In case the investment in our stock is made through ADS, the ADS holders benefit from the electronic certificate of foreign capital registration obtained in Brazil by the custodian of preferred shares underlying the ADSs, which permits the depositary bank to convert dividends and other distributions with respect to the preferred shares underlying the ADSs into foreign currency and remit the proceeds abroad.

In case the investment in our stock is made directly in the Brazilian Market, such investment needs to be registered with the Central Bank either as (i) a foreign direct investment, the Electronic Declaratory Registration of Foreign Direct Investment (RDE-IED), or (ii) a portfolio investment, the Electronic Declaratory Registration of Portfolio (RDE – Portfolio).

The foreign direct investment (RDE-IED) enables non-resident investors to hold stock of companies in Brazil. On the other hand, the portfolio investment (RDE – Portfolio) entitles certain foreign investors to invest not only in stocks, but also in almost all financial assets and securities, and to engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements of the regulation are fulfilled.

Registration under RDE – Portfolio affords favorable tax treatment to non-resident investors who are not residents or domiciled in tax haven jurisdictions, as defined by Brazilian tax laws.

Message from the Chief Financial Officer

Dear reader,

At Itaú Unibanco, we are strongly committed to transparency and relationship with capital market agents. Our wish and mission is to be close to our shareholders, investors and investment analysts, explaining them on a clear and timely basis the decisions made by our management, the performance of the organization and the risks inherent in our business.

A number of initiatives make up this communication and transparency effort. In 2015, for example, we held 22 public meetings about our results and strategies, distributed through cities of all regions of Brazil, by means of the APIMEC (Association of Capital Markets Analysts and Investment Professionals), and we participated in 30 conferences and 9 road shows, in Brazil and abroad. We frequently review our documents and financial statements, aiming at providing information that meet the market agents' needs for assessment and understanding of our operation.

This report supplements these initiatives and shows our commitment to constantly evolve in our disclosure practices. In 2013, we unified our annual report, 20-F form and debt prospects into the Annual Consolidated Report. Since then, we have searched for more objectivity and better alignment of that document with information required by other regulatory forms. In 2015, we were acknowledged in three categories in the IR Magazine Awards Brazil 2015, including the Best Annual Report.

In this document, we comment on the organization’s profile, including its history, strategies, main shareholders, business and presence in Brazil and abroad. We also describe our structure and corporate governance practices that comprise, among other information items, the resumes of our management. In the section about risk management, we detail the structure and practices of control and mitigation inherent in the banking activity. In the same chapter, we reassessed the description of risk factors, which represent the main events that could significantly impact our business. Lastly, we detail the financial performance of Itau Unibanco in 2015, in accordance with the International Financial Reporting Standards (IFRS).

We continue seeking excellence in serving our stakeholders, making available different communication channels to the market, among which we point out the Investor Relations website: www.itau.com.br/investor-relations and our pages on Facebook and Twitter. We will be honored to receive your suggestions by email: investor.relations@itau-unibanco.com.br.

I wish you all a good reading.

Cordially,

Eduardo Vassimon – CFO & CRO
Financial Performance

Significant Accounting Policies

General Information
The preparation of the consolidated financial statements included in this annual report involves some assumptions that are based on our historical experience and other factors that we deem reasonable and material. Although we review these estimates and assumptions in the ordinary course of business, the presentation of our financial condition and results of operations often requires our management to make judgments regarding the effects on our financial condition and results of operations of matters that are uncertain by nature. The comments below describe those aspects that require significant judgment or involve a higher degree of complexity in the application of the accounting policies that currently affect our financial condition and results of operations. Actual results may differ from those estimated under different variables, assumptions or conditions.

Use of Estimates and Assumptions
The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements, as well as the reported amounts of revenue, expenses and gains and losses during the reporting period because the actual results may differ from those determined based on such estimates and assumptions.

All estimates and assumptions made by management are in accordance with IFRS and represent our best estimates made in conformity with applicable standards. Estimates and judgments are evaluated on an ongoing basis, based on past experience and other factors.

Allowance for Loan and Lease Losses
The allowance for loan and lease losses represents our estimate of the probable losses inherent to our loan portfolio at the end of each reporting period. In order to determine the amount of the allowance for loan and lease losses, a portfolio is classified into two categories with respect to which specific methodologies are used to estimate losses. Loans and leases are analyzed on an individual or portfolio basis.

- Loans and leases analyzed on an individual basis (corresponding to our corporate portfolio) are individually analyzed for impairment. For those considered to be impaired, we determine the amount of the allowance based on the expected cash flows of the company that will receive the loan. The loans that are not impaired are rated based on risk factors, and the inherent losses for each rating are estimated based on our historical experience, which involves judgments related to identifying risk factors and assigning a rating.
- Loans analyzed on a portfolio basis (corresponding to the following portfolios: (i) Individuals, (ii) Very Small, Small and Medium Business and (iii) Foreign Units – Latin America) are further segregated into classes, when appropriate, based on their underlying risks and characteristics. The allowance for loan and lease losses is determined by portfolio based on historical experience, which also involves judgments and assumptions.

Many factors affect the estimate of losses in each of the categories for which we estimate the allowance on a portfolio basis, such as the methodology used to measure historical delinquency and the historical period to be used. Additionally, factors affecting the specific amount of the allowances to be recorded are subjective and include economic and political conditions, credit quality trends and volume and growth observed in each portfolio. We present information on our allowance for loan and lease losses in the table below:

</table>
During the year ended December 31, 2015, we wrote off a total amount of R$20,065 million from our loan portfolio and our ratio of the allowance for loan and lease losses to total loans and leases was 5.7%. The increase in loans written off is due to the worsening macroeconomic scenario, mainly in Brazil.

During the year ended December 31, 2014, we wrote off a total amount of R$18,675 million from our loan portfolio and our ratio of the allowance for loan and lease losses to total loans and leases was 4.9%. The decrease in loans written off is a result of the adoption of a policy of stricter selectivity in origination, which gave rise to lower default levels compared to the previous year.

During the year ended December 31, 2013, we wrote off a total amount of R$21,769 million from our loan portfolio and our ratio of the allowance for loan and lease losses to total loans and leases was 5.4%. The decrease in loans written off is a result of the adoption of a policy of stricter selectivity in origination, which gave rise to lower default levels compared to the previous year.

During the year ended December 31, 2012, we wrote off a total amount of R$22,142 million from our loan portfolio and our ratio of the allowance for loan and lease losses to total loans and leases was 7.0%. The increase in loans written off is due to the increase in defaults in 2011 and beginning of 2012, associated with the increase in the volume of our portfolio of credit card, personal loans, small and medium businesses.

During the year ended December 31, 2011, we wrote off a total amount of R$16,159 million from our loan portfolio and our ratio of the allowance for loan and lease losses to total loans and leases was 6.9%. Our ratio of allowance for loan and lease losses to total loans increased by 10 basis points when compared to the previous year, since the volume of loans and leases written off was maintained at the same level in 2011. This level was maintained as a result of the increase in default rates in 2009 and 2010, together with a strong growth of the loan and lease portfolio in 2011.

**Fair Value of Financial Instruments**

Financial instruments recorded at fair value on our balance sheet include mainly securities classified as held-for-trading and available-for-sale as well as other trading assets, including derivatives. Securities classified as held-to-maturity are recorded at amortized historical cost on our balance sheet, and their corresponding fair values are shown in the notes to our consolidated financial statements. We present information on the fair value of our financial instruments in the table below as of December 31, 2015, 2014 and 2013.

We determine the fair value of our financial instruments based on International Financial Reporting Standard 13 (IFRS 13), which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

According to IFRS 13, there are different levels of inputs that may be used to measure the fair value of financial instruments classified as levels 1, 2 and 3.

- **Level 1:** observable inputs reflect the quoted prices (unadjusted) of identical assets or liabilities in active markets;
- **Level 2:** observable inputs reflect the information on assets and liabilities that are either directly (such as prices) or indirectly (derived from prices) observable, except for the quoted prices included in Level 1; and
- **Level 3:** information on assets and liabilities that are not based on observable market data due to little market activity on the measurement date. We present information on our level 3 financial instruments in the table below as of December 31, 2015, 2014, and 2013.

Significant Changes in Accounting Standards

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 2.2 – New accounting standards and new accounting standards changes and interpretations for further details about information on significant changes in accounting standards.

Accounting Practices Adopted in Brazil

Our books and records are maintained in Brazilian reais, the official currency in Brazil, and our consolidated financial statements, for statutory and regulatory purposes, are prepared in accordance with accounting practices adopted in Brazil, or Brazilian GAAP, which are applicable to institutions authorized to operate by the Central Bank. The accounting principles and standards generally applicable under Brazilian GAAP include those established under Brazilian Corporate Law, by the Accounting Pronouncements Committee, or CPC, which started issuing standards in 2007, and by the Federal Accounting Council. In the case of companies subject to regulation by the Central Bank, such as Itaú Unibanco Holding, the effectiveness of the accounting pronouncements issued by entities such as the CPC depends on approval of the pronouncement by the CMN, which also establishes the date of effectiveness of any pronouncements with respect to financial institutions. Additionally, the CVM and other regulatory bodies, such as SUSEP and the Central Bank, provide additional industry-specific guidelines.
Regulation Applicable to the Presentation of the Financial Statements

Brazilian regulations establish specific rules for the consolidation of financial statements by financial institutions. Under current Central Bank regulations, financial institutions, except for credit cooperatives, are required to prepare consolidated financial statements including investments directly or indirectly held in other companies, individually or jointly controlled, and with respect to which such financial institutions have (i) the right to appoint or designate the majority of the company’s board of directors; (ii) the right to appoint or remove the majority of the company’s executives and directors; and/or (iii) operational or shareholding control. These regulations apply to the entire group to which a financial institution belongs.

Assets
Portfolio of Securities and Derivative Financial Instruments

General information
We present below our portfolio of held-for-trading financial assets, available-for-sale financial assets, held-to-maturity financial assets and derivative financial instruments as of December 31, 2015, 2014 and 2013.

The amounts exclude our investments in securities of unconsolidated companies. For further information on our investments in unconsolidated companies, see section Performance, item consolidated financial statement (IFRS), Note 13 – Investments in associates and joint ventures. Held-for-trading and available-for-sale financial assets are stated at fair value and held-to-maturity financial assets are stated at amortized cost. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 2 – Significant Accounting Policies for further details.

As of December 31, 2015, we held securities issued by the Brazilian federal government classified as “Government Securities – Domestic” with an aggregate book value and an aggregate market value of R$181,574 million and R$177,101 million, respectively, which represented 155.27% of our consolidated stockholders’ equity as of that date. As of December 31, 2015, we did not hold securities of any other issuer the book value of which in the aggregate represented more than 10.0% of our consolidated stockholders’ equity. This is due to our conservative assets and liabilities management and our liquidity in local currency maintained in securities issued by the Brazilian federal government. Additionally, securities issued by the Brazilian federal government are accepted as deposits in our operations in the market on BM&FBovespa.

Held-for-trading
Listed below are the assets acquired and accrued mainly for the purpose of selling in the short term or when they are part of a portfolio of financial instruments that are managed as a whole and for which there is a recent history of sales in the short term. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 7 – Financial Assets Held for Trading and Designated at Fair Value Through Profit or Loss, for further details.

### Financial performance

#### Annual Report 2015

Annual Report 2015

---

1. Average yields are not shown for these securities, as such yields are not meaningful because future yields are not quantifiable. These securities have been excluded from the calculation of the total yield.

---
For the purpose of analyzing the exposure of variations in foreign exchange rates, the table below presents the composition of our derivative financial instruments on December 31, 2015 in reais and in foreign currency, including the instruments denominated in foreign currencies. For the fair value of derivative financial instruments, please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 7 – Financial Assets Held for Trading and Designated at Fair Value Through Profit or Loss and Note 36 – Management of Financial Risks.

**Exposure to GIIPS**

Our gross exposure to the sovereign bonds of the GIIPS (Greece, Ireland, Italy, Portugal and Spain) countries as well as to corporate clients and financial institutions domiciled in those countries as of December 31, 2015, is set forth in the table below:
The total gross exposure presented above, primarily related to our exposure to corporate credits that amounted R$1,725 million as of December 31, 2015, and with co-obligations in the amount of R$567 million. The exposure presented above has been calculated based on our estimated realizable value, which is updated depending on its nature (such as pledged amounts in current accounts used to collect customer receivables, financial investments, real estate, machinery and equipment or others), except for guarantees provided by third parties, in which case the amount corresponds to the outstanding debt. Our derivatives related to GIIPS countries amounted to R$13 million as of December 31, 2015.

Required Reserve Deposits with the Central Bank

The Central Bank requires reserves for deposits from Brazilian financial institutions. The reserve requirements are tools utilized by the Central Bank to control the liquidity of the Brazilian financial system, for both monetary policy and risk mitigation purposes. These requirements are applied to balances on demand deposits, saving account deposits and time deposits. See below the required reserve for each type of deposit:

<table>

(1) Most recent regulation on the matter.
(2) This is a compulsory investment of resources that is made in eligible transactions, that is, the funds are granted to other economic entities.
(3) Remuneration on funds in savings deposits.

In 2015, the Central Bank enacted a set of rules changing the reserve requirements that Brazilian financial institutions are required to deposit with the Central Bank, as a mechanism to control the liquidity of the Brazilian financial system.

The regulations that govern the compulsory deposit rates are frequently changed by the Central Bank in accordance with the economic scenario and its monetary policy goals.

The compulsory reserve requirements imposed on time deposits (currently applicable to us at the general rate of 25.0%), demand deposits (currently at the general rate of 45.0%), and saving accounts (currently at the general rate of 24.5%, and 15.5% for rural savings deposits) represent almost the entirety of the amount that must be deposited at the Central Bank. Nonetheless, the Central Bank also determines an additional reserve requirement on deposits raised by full service banks, investment banks, commercial banks, development banks, finance, credit and investment companies, real estate credit companies and savings and loan associations, based on specific criteria.

On December 31, 2015, we recorded an amount of R$66,556 million in compulsory deposits in cash compared to R$63,106 million on December 31, 2014 and R$62,766 million in interest-bearing deposits compared to R$59,714 million on December 2014, as indicated in the table below. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 5 – Central Bank Compulsory Deposits for further details.

Annual Report 2015
Loan and lease operations

Substantially all of our loans are granted to clients domiciled in Brazil and are denominated in Brazilian reais. Additionally, 53.4% of our credit portfolio consists of transactions with fixed interest rates and 46.6% of transactions with variable interest rates.

Indexation

Most of our portfolio is denominated in Brazilian reais. However, a portion of our portfolio is indexed to foreign currencies, primarily the U.S. dollar. The foreign currency portion of our portfolio consists of loans and financing for foreign trade and onlending operations. Our loans abroad represented 27.1%, 24.7% and 28.7% of our loan portfolio as of December 31, 2015, 2014 and 2013, respectively, see section Performance, item Consolidated Financial Statements (IFRS), Note 36 – Management of financial risks – 5. Credit risk exposure.

Loan and lease operations by type

The following table sets out the distribution of our credit portfolio according to the type of loan and lease operations, as follows:

- The Individuals portfolio consists primarily of credit cards, personal loans (primarily including consumer finance and overdrafts), vehicle financing and residential mortgage loans;
- The Corporate portfolio consists primarily of loans made to large corporate clients;
- The Small and Medium Businesses portfolio consists primarily of loans to small and medium-sized companies; and
- The Foreign Loans – Latin America portfolio consists primarily of loans granted primarily to individuals by our operations in Argentina, Chile, Paraguay and Uruguay.

(1) We classify all loans and leases more than 60 days overdue as non-accrual loans and we discontinue accruing financial income related to them. The contractual amount of non-accrual loans were R$19,458 million, R$16,514 million and R$18,065 million as of December 31, 2015, 2014 and 2013, respectively. The total of renegotiated loans in the balance of non-accrual loans reflected herein was R$3,417, R$3,346 million, and R$4,627 million as of December 31, 2015, 2014 and 2013, respectively. Non-accrual loans are presented herein in the appropriate category of loan and lease operations. The interest income foregone on our non-accrual loans net of allowance for loan losses for 2015, 2014 and 2013 was R$1,882 million, R$1,623 million and R$1,681 million, respectively.
### Loan and lease operations by maturity

</tbody>
</table>

(1) The operations classified as Loans Overdue Not Impaired are past due between 1 day and 90 days and the balance is the total of outstanding principal amount (Overdue and Non-Overdue).

We consider loans as impaired when (i) corporate transactions have a probability of default higher than 31.84%; (ii) transactions are overdue for more than 90 days; or (iii) renegotiated transactions are overdue for more than 60 days.

Non-accrual Loans
We consider all loans overdue for 60 days or more as non-accrual loans and, accordingly, cease the accrual of financial charges on such loans.

Write-offs
Loans and leases are written off against the allowance for loan and lease losses when the loan is not collected or is considered permanently...
impaired. We typically write off loans when they are overdue for 360 days, except for loans having an original maturity in excess of 36 months, which are written off when they are overdue for 540 days. However, write-offs may be recognized earlier than 360 days if we conclude that the loan is not recoverable.

Please refer to section Performance, item Assets – Loan and Lease Operations – Renegotiated Loans for further details.

</table>

Assessment

We first assess whether there is objective evidence of loss individually allocated to individually significant loans or collectively allocated to loans that are not individually significant.

To determine the amount of the allowance for individually significant loans with objective evidence of impairment, we use methodologies that consider both the client quality and the nature of the financing, including its collateral, to estimate the cash flow expected from these loans.

If there is no objective evidence of loss for an individually assessed loan, whether significant or not, the loan is included in a group of loans with similar credit risk characteristics which are then collectively tested for impairment. Individually assessed loans for which an impairment loss is recognized are not included in the collective assessment. The amount of loss is measured as the difference between the carrying amount of the asset and the present value of the estimated future cash flows (excluding future loan losses that have not been incurred), discounted at the financial asset’s effective interest rate.

For collectively assessed loans, the calculation of the present value of the estimated future cash flows, for which collateral is received, reflects the historical performance and recovery of the fair value, considering the cash flows that may arise from the performances less costs for obtaining and selling that collateral.

For the purpose of collectively assessing impairment, loans are aggregated based on similar credit risk characteristics. These characteristics are relevant to estimate the future cash flows of these loans since they may be an indicator of the difficulty of the debtor in paying the amounts due, in accordance with the contractual conditions of the loan that is being assessed. The future cash flows of a group of loans that are collectively assessed in order to identify the need for recognizing an impairment are estimated based on the contractual cash flows of the group of loans and the historical experience of loss for loans with similar credit risk characteristics. The historical loss experience is adjusted, based on current observable data, to reflect the effects of current conditions that have not impacted the period on which the historical loss experience is based and to exclude the effects of conditions in the historical period that are not currently in place.

For individually significant loans with no objective evidence of impairment, such loans are classified into certain credit ratings based on several qualitative and quantitative factors applied to internally developed models. Considering the size and the different risk characteristics of each credit agreement, the ratings determined under internal models may be reviewed and modified by our Credit Committee, the members of which are executives and experts in corporate credit risk. We estimate the losses inherent in every rating, using the approach internally developed to low-default portfolios, which uses our historical experience to design internal models that are used to estimate the probability of default and the potential for recovery of non-performing loans.

To determine the amount of the allowance for items that are not individually significant, loans are segregated into classes based on the underlying risks and the characteristics of each group. The allowance for loan and lease losses is determined for each of these classes through a process that considers the historical delinquency and the loan loss experience in the last years.
Allocation of the Allowance for Loan and Lease Losses

The table below presents the details, by segment and class, as defined in the segmentation of our portfolio, of the allowance for loan and lease losses, of this allowance as a percentage of the total loan and lease losses for the corresponding segment or class, and the percentage of the total loan and leases in each segment and class in relation to the total loans and leases.

(In millions of R$, except percentages)

</table>

(1) Includes debt consolidation, deferral or any other arrangement that modifies the periods or conditions of operations originally overdue. Renegotiated loans overdue over 30 days.

Renegotiated loans include both loans for which the credit agreement’s original terms were amended (agreements) and new loans originated in order to settle contracts or transactions with the same client (restructured loans), which were originally past due. Amendments and restructured loans usually reflect changes in contract terms, rates or payment conditions.

In almost all cases for loan products, renegotiated loans require that at least one payment be made under the renegotiated terms in order for it to be removed from non-performing and non-accrual status. Renegotiated loans return to non-performing and non-accrual status when they reach 60 days past due under the renegotiated terms, which typically corresponds to the borrower missing two or more payments.

The fact that a loan or lease has been renegotiated is also taken into consideration when determining the allowance for loan and lease losses after the renegotiation. The past performance and the payment history of the client and the transaction, including the probability of another default for renegotiated transactions, are considered in our risk models in order to determine the probability of default. This probability of default is generally higher than the probability assigned to similar transactions that have never been renegotiated. Another factor considered in determining the appropriate level of the allowance for loan and lease losses is the additional collateral to be offered by the debtor. The resulting allowance levels are compatible with the risk profile of each transaction.
Our renegotiated loan portfolio increased to 3.1% of our total loan portfolio as of December 31, 2015, compared to 2.6% as of December 31, 2014. At the end of 2015, the ratio of the renegotiated portfolio to the allowance for loan and lease losses was 46.8% compared to 47.2% as of December 31, 2014. This portfolio increased in 2015 due to the worsening macroeconomic scenario, mainly in Brazil, specifically in the segment corporate, as shown below in the table “Renegotiated loan and lease operations” where a breakdown by segment is presented.

Our renegotiated loan portfolio decreased to 2.6% of our total loan portfolio as of December 31, 2014, compared to 3.1% as of December 31, 2013. At the end of 2014, the ratio of the renegotiated portfolio to the allowance for loan and lease losses was 47.2% compared to 48.8% as of December 31, 2013. Throughout 2014, the allowance for loan and lease losses followed the evolution of the “mix” of portfolio credit risk in the renegotiated loan portfolio.

Our renegotiated loan portfolio decreased to 3.1% of our total loan portfolio as of December 31, 2013, compared to 4.0% as of December 31, 2012. At the end of 2013, the ratio of the renegotiated portfolio to the allowance for loan and lease losses was 48.8% compared to 46.6% as of December 31, 2012. Throughout the year 2013, the allowance for loan and lease losses followed the evolution of the “mix” of portfolio credit risk in the renegotiated loan portfolio.

Our renegotiated loan portfolio increased to 4.0% of our total loan portfolio as of December 31, 2012, compared to 3.4% as of December 31, 2011. At the end of 2012, the ratio of the renegotiated portfolio to the allowance for loan and lease losses was 46.6% compared to 45.2% as of December 31, 2011. This ratio increased in 2012 mainly because of an increase in the redefaulted renegotiated loans to total renegotiated loans ratio, from 29.8% as of December 31, 2011 compared to 35.4% as of December 31, 2012.

Since 2013, we maintained our policy for the recovery of overdue loans, including loans already written off as losses, and to reduce losses, we enhanced our collection and recovery initiatives. However, we still require that at least one installment is paid to consider the renegotiation to be valid and to treat it as a renegotiated agreement. We also adopted a policy of stricter selectivity in origination of loans, which led to lower levels of delinquency and a decreased volume of renegotiated loans.

During 2012, the Brazilian economy experienced an increase in the default levels for individuals, mainly with respect to vehicle financing and personal loan portfolios. As one of the largest banks in Brazil, our loan portfolio was impacted by this increase in defaults. In order to increase the recovery of overdue loans, including loans already written off as losses, and to reduce losses, we enhanced our collection and recovery initiatives. However, we require that at least one installment is paid to consider the renegotiation to be valid and to treat it as a renegotiated agreement.

The total amount of each type of renegotiated loan as of December 31, 2015, 2014 and 2013 is shown in the tables below.

</table>

(1) Increase in interbank deposits is largely explained by the U.S. dollar exposure on a dollar denominated deposit at the Nassau entity.

(2) On February 1, 2013, Banco Itaú BBA International S.A., headquartered in Portugal, was merged into Itaú BBA International Limited, headquartered in the United Kingdom. On May 17, 2013, the entity was registered as a public limited company under the trade name Itaú BBA International plc. The purpose of this restructuring process is to allow Itaú BBA International to improve its performance and sources of funding, expand its client base, strengthen its position as an international platform for Itaú Unibanco Group, achieve greater diversification of risk and increase profitability indicator. 2013 data reflects non-British pound sterling cross-border outstanding.

**Short-term borrowings**

Short-term borrowings are included in our balance sheet under the “Securities sold under repurchase agreement” line item. The main category for short-term borrowings is “Deposits Received under Securities Repurchase Agreements with Own and Third-Party Financial Assets”. The table below shows our short-term borrowings as of December 31, 2015, 2014 and 2013:

<table>
<thead>

**Liabilities**

**Funding**

**Main sources**

Our current funding strategy is to continue to use all of our sources of funds in accordance with their costs and availability and our general asset and liability management strategy. In order to fund our operations, we intensified the use of the liquidity generated by savings deposits, interbank deposits, debt in the interbank market and debt in the institutional market during 2015, 2014 and 2013.

We also used Brazilian debentures subject to repurchase as a source of funding, reported as deposits received under securities repurchase agreements and offered to institutional clients as well as private banking, corporate banking and retail clients. This funding is designed to provide increased profitability through higher spreads in our savings deposits and higher fees earned on market funds.

Our ability to obtain funding depends on several factors, including credit ratings, general economic conditions and investors’ perception of emerging markets in general and of Brazil (particularly, current political and economic conditions in Brazil and government regulations for foreign currency funding).

Part of our long-term debt provides for the advance payment of the outstanding principal balance upon the occurrence of certain facts, as is customary for long-term financing agreements. As of December 31, 2014, none of these events, including default events and non-compliance with any financial covenant, had occurred, and we have no reason to believe that any of these events are likely to occur in 2015.

Our main sources of funding are our deposits, which are split into demand deposits, savings deposits, time deposits and interbank deposits. As of December 31, 2015, total deposits were R$292,610 million, which represented 33.2% of total funding. As of December 31, 2014, total deposits amounted to R$294,773 million, representing 37.8% of total funding. As of December 31, 2013, total deposits amounted to R$274,383 million, representing 37.9% of our total funding. Our time deposits represent one of our major sources of funding which, as of December 31, 2015, 2014 and 2013 accounted for 12.0%, 13.9% and 16.2% of total funding, respectively.
The table below shows the breakdown of our main sources of funds as of December 31, 2015, 2014 and 2013:

Other sources
We also act as a financial agent in borrowing funds from BNDES and FINAME, and lending such funds at a spread determined by the Brazilian government to targeted sectors of the economy. We obtain U.S. dollar-denominated lines of credit from our affiliates, including Itaú Unibanco Holding – Grand Cayman branch, Banco Itaú Chile and Itaú BBA S.A. – Nassau branch to provide trade finance funding for Brazilian companies. For further details on on Lending domestic and import and export financing, please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 19 – Securities Sold under Repurchase Agreements and Interbank and Institutional Market Debts.

Litigation
Overview
We are not defendants in any significant administrative proceeding before the CVM, SUSEP, the Central Bank or any municipalities. As part of the ordinary course of our business, we are subject to, and we are party to various legal and administrative proceedings (including consumer complaints) filed against us with SUSEP or the Central Bank.

Our financial statements only include reserves for probable losses that can be reasonably estimated and expenses that we may incur in connection with pending litigation or administrative proceedings, or as otherwise required by Brazilian law. Our management believes that our provisions, including interest, for legal proceedings in which we are defendants are sufficient to cover probable losses that can be reasonably estimated in the event of unfavorable court decisions. It is currently not possible to estimate the amount of all potential costs that we may incur or penalties that may be imposed on us other than those amounts for which we have reserves. We believe that any potential liabilities related to these lawsuits and administrative proceedings will not have a material adverse effect on our business, financial condition or results. There are no material proceedings in which any of our directors, any member of our senior management or any of our affiliates is either a party adverse to us or to our subsidiaries or has a material interest adverse to us or our subsidiaries.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 32 – Provisions, Contingencies and Other Commitments, for further information and details about the changes in the provisions and respective escrow deposits for tax and social security lawsuits and main types of tax disputes. The following table sets forth our provisions for such contingencies as of December 31, 2015, 2014 and 2013:

No class actions alleging unfair competition, trust or monopoly practices were brought against us in 2015.

Civil Litigation
Litigation Arising from Government Monetary Stabilization Plans
From 1986 to 1994, the Brazilian federal government implemented several consecutive monetary stabilization plans, or MSP, to combat hyper-inflation. In order to implement these plans, the Brazilian federal government enacted several laws based on its power to regulate the monetary and financial systems as granted by the Brazilian federal constitution.

Holders of savings accounts during the periods when the MSPs were implemented have challenged the constitutionality of the laws that implemented those plans, claiming from the banks where they held their savings accounts additional amounts of interest based on the inflation rates applied to savings accounts under the MSPs.

We are defendants in numerous standardized lawsuits filed by individuals in respect of the MSPs. We record provisions for such claims upon service of process for a claim.
In addition, we are defendants in class actions, similar to the lawsuits by individuals, filed by either (i) consumer protection associations or (ii) public attorneys’ offices (Ministério Público) on behalf of holders of savings accounts. Holders of savings accounts may collect any amount owing on account of a final decision. We record provisions when individual plaintiffs apply to enforce any such decisions, using the same criteria used to determine provisions for individual lawsuits.

The Federal Supreme Court (Supremo Tribunal Federal, or STF) has issued a number of decisions in favor of the holders of savings accounts, but has not issued a final ruling with respect to the constitutionality of the MSPs as applicable to savings accounts. In relation to a similar dispute with respect to the constitutionality of the MSPs as applicable to time deposits and other private agreements, the Federal Supreme Court has decided that the laws were in accordance with the Brazilian federal constitution. In response to this discrepancy, the Confederação Nacional do Sistema Financeiro, or CONSIF, an association of Brazilian financial institutions, filed a special proceeding with the Federal Supreme Court (Arguição de Descumprimento de Preceito Fundamental nº 165), in which the Central Bank has filed an amicus brief, arguing that holders of savings accounts did not incur actual damages and that the MSPs as applicable to savings accounts were in accordance with the federal constitution. Accordingly, the STF suspended the ruling of all appeals involving this matter until it hands down a final decision. However, there is no estimate of when the STF will render a judgment in the case, as there has not been a sufficient quorum to decide the issue.

In addition, the STJ, which is the highest court responsible for deciding on federal laws, is about to rule on several aspects that will directly determine the amount due, in case the STF rules against the constitutionality of the MSPs. The most relevant of such decisions will be: (i) the accrual of compensatory interests on the amount due to the plaintiff, in filings that carry no specific claim to such interests; (ii) the initial date of default interests, in regard to class actions; and (iii) the possibility of compensating the negative difference arising in the month of the MSP implementation, between interest actually paid on savings accounts and the inflation rate of the same period. In relevant trials during 2015, the STJ ruled that: (i) compensatory interest would not be included in judgment awards, unless the ruling in question specifically provides for the award thereof; and (ii) compensatory interest shall not be required to be paid to savings account holders once the institution in question can prove that the corresponding savings account has been terminated. In addition, such rulings also confirmed that inflationary effects from MSPs that became effective after those that are subject to the judicial action in question may be included in the claim for purposes of determining the amounts due thereunder, even without the express request of the account holder seeking judicial relief.

In addition, the STJ ruled that the term for filing class actions expired five years from the date of the MSP implementation. As a consequence, numerous class actions have been extinct by the Judiciary since such ruling.

Other Civil Litigation

In addition to litigation arising from government monetary stabilization plans, we are defendants in numerous civil lawsuits arising from the normal course of our business. We are not able to currently predict the total amounts involved in these claims, due to the nature of the matters disputed. However, we believe that any potential liabilities related to these lawsuits will not have a material adverse effect on our financial condition or results.

Labor Litigation

GRI G4-LA16 | G4-DMA Labor Practices Grievance Mechanisms

In 2015, we and our subsidiaries were not exposed to any labor liabilities or labor contingencies which significantly impacted our results. The pool of labor claims for our subsidiaries in such period comprises labor claims filed by employees, former employees and outsourced service providers.

Labor unions and former employees have filed labor claims against us, seeking compensation for alleged breaches of employment agreements or rights under the applicable labor laws. As of December 31, 2015, there were 66,841 labor claims filed against us.

The main requests in the labor claims filed by our current and former employees include:

- Salary differences arising from the application of the 30 working hours per week limit, provided for in art. 224 of the Brazilian Labor Laws Consolidation (CLT), which is applicable to bank employees whose function does not require special trust from the employer;
- Salary differences arising from overtime not duly registered in the internal systems;
- Claims with respect to the method to establish the overtime work pay; and
- Salary parity.

Labor class actions filed against us mainly relate to the continuation of health care plans, safety rules and strikes. We are also defendants in connection with labor claims filed by the labor prosecution office regarding union classification, outsourcing, occupational diseases, health and safety and compliance with the minimum quotas for disabled personnel. In the fiscal year ended December 31, 2015, we paid approximately R$1,711 million in direct labor expenses, mainly in settlements and convictions involving former employees, in accordance to the agreements signed and to the rulings imposed by labor courts.

GRI G4-DMA Occupational Health and Safety
Regarding labor claims filed by outsourced service providers, they generally involve allegations of subsidiary liability of the companies within our group.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 32 – Provisions, Contingencies and Other Commitments, for further information about labor claims.

**Tax Litigation** GRI G4-DMA Occupational Health and Safety

We have certain tax disputes that arise from our ordinary business activities, mainly relating to the constitutionality or legality of certain taxes imposed on us. Contingent liabilities arising from tax disputes are recorded according to the principal amount of taxes in dispute, subject to tax assessment notices, plus interest and, if applicable, penalties and other administrative charges.

A provision for such contingent liability is established if it involves a legal tax obligation, regardless of the probability of winning or losing the dispute. A legal tax obligation exists if the gain or loss of the related litigation depends directly on the determination of whether a currently enforceable law is constitutional or unconstitutional. In any other situation, a provision is recognized if a loss is probable (prevailing in the litigation is less likely than a loss).

We participated in a program (Programa de Pagamento ou Parcelamento de Tributos Federais) for the payment of federal taxes through installments, as established by Law No. 13,043 of November, 2014 and Law No. 13,097 of January, 2015 which discharges taxpayer debts in litigation with certain discounts as to penalties and interest. In addition, we took advantage of a program (Programa de Pagamento ou Parcelamento de Tributos Municipais), established by Law No. 16,097 of December 29, 2014 for the payment of municipal tax debts with certain discounts as to penalties and interest. In both cases (federal and municipal) we settled the contested tax liabilities in question with respect to which we had the lowest chances of success, according to our tax advisors.

On June 25, 2013, we received a notice of deficiency from the Brazilian tax authorities alleging that Itaú Unibanco Holding failed to pay approximately R$11,844.7 million of IRPJ, plus accrued penalties and interest, and approximately R$6,867.0 million of CSLL, plus accrued penalties and interest, in fiscal year 2008, as a result of the corporate transaction that led to the association of Itaú Holding and Unibanco Holdings S.A. The Brazilian tax authorities allege that corporate transactions of a different kind should have been used. However, the transaction suggested by the Brazilian tax authorities is not supported in the applicable rules to financial institutions. On January 30, 2014, we were advised that the Brazilian tax authorities confirmed the notifications in a non-unanimous ruling. On February 28, 2014 we appealed the decision at the Administrative Tax Appeals Tribunal. We continue to defend that the transactions conducted were appropriate and legitimate, having been approved by the involved companies’ management bodies and their respective stockholders, and subsequently sanctioned as well by the relevant regulatory authorities, including the CVM, the Central Bank and the CADE. We and our external counsel assess the risk of loss in this tax proceeding as remote. Currently, we are awaiting Administrative Tax Appeals Tribunal’s decision on the appeal.

Additionally, we received in November 14, 2013, still about the same operation, notice of tax assessment issued on behalf of Itaú Unibanco S.A., charging R$ 1.439, 9 million of Income Tax (IRPJ) and R$ 502,56 million of (CSLL), plus accrued penalties and interest. This case is also assess the risk of loss as remote by our lawyers. The proceeding is pending of judgment in the administrative court.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 32 – Provisions, Contingencies and Other Commitments, for further details about the changes in the provisions and respective escrow deposits for tax and social security lawsuits and main types of tax disputes.

**Derivative Instruments that Qualify for Hedge Accounting**

Hedging transactions may be classified into three categories: hedge of fair value, cash flows and net investment of foreign operations.

- **Fair value hedge:** is aimed at protecting us against changes in market risk due to changes in the fair value of interest subject to variable rates.
- **Cash flow hedge:** is aimed at protecting us against future cash flows of payments of interest.
- **Hedge of net investment of foreign operations:** it is aimed at protecting us against changes in future cash flows of foreign exchange variations in net investments of foreign operations.

Please refer to section Our Risk Management item Risk and capital management, Market risk for further details about hedge.

Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 9 – Hedge Accounting, for further details. With respect to the hedge accounting policy, please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 2.4 g, III – Summary of Main Accounting Practices.

(1) Includes mortgage notes, real estate credit bills, agribusiness credit bills, financial credit bills, import and export financing and on-lending – domestic.

(2) Includes subordinated debt, debentures and foreign borrowings through securities.

(3) Includes total estimated interest payments (including for derivatives). These estimated interest payments were calculated substantially based on the interbank forward rates at the specific periods.

Our strategy to manage interest rate risk on our long-term debt does not include fixed interest rate swaps or similar derivatives. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 19 – Deposits Received Under Securities Repurchase Agreements and Funds from Interbank and Institutional Markets for further details.

**Purchases of Shares by the Issuer and Affiliated Purchasers**

In conformity with best corporate governance practices, on November 18, 2004, we started to voluntarily disclose our Policy for Trading Itaú Unibanco Holding S.A. Securities. Please refer to www.itau.com.br/ arquivosstaticos/RI/pdfs/TreasuryStock.pdf for further details. We disclose to the market the transactions carried out with our own shares by our Treasury through an “Announcement to the Market” on a monthly basis, as well as the other disclosure requirements imposed by the Brazilian securities regulation.

The repurchase program initially effective in 2015 was approved by our Board of Directors on November 27, 2014 with limits of 50.0 million preferred shares and 10.0 million common shares.

On July 30, 2015 our Board of Directors approved the renewal of our share repurchase program through August 4, 2016, authorizing the purchase of up to 11.0 million common shares and 55.0 million preferred shares. On August 27, 2015, our Board of Directors approved the renewal of our share repurchase program through August 26, 2016, authorizing the purchase, in aggregate, of up to 11.0 million common shares and 50.0 million preferred shares.

On February 1, 2016 our Board of Directors once again renewed our share repurchase program through August 2, 2017, authorizing the purchase, in aggregate with respect to all shares purchased under the program, of up to 10.0 million common shares and 50.0 million preferred shares issued by us, without reducing our capital stock. The share acquisition process has the following potential objectives: (i) to maximize the allocation of capital through the efficient application of available funds; (ii) to provide for the delivery of shares to the employees and management of the Company and those of its subsidiaries within the scope of the compensation models and the long term incentive plans; and (iii) to use the acquired shares in the event of business opportunities arising in the future. All purchases shall be open market purchases made through stock exchanges.
Capital Expenditures

In accordance with our practice in the last few years, our capital expenditures in the twelve-month period ended December 31, 2015 were funded with internal resources. We cannot provide assurance that we will make capital expenditures in the future and, if made, that the amounts will correspond to the current estimates. The table below show our capital expenditures as of December 31, 2015, 2014 and 2013:

</table>

(1) On November 30, 2014 our Board of Directors approved the purchase of up to 10,000,000 common shares and 50,000,000 preferred shares, ending on December 31, 2015, or until such shares are purchased or programs are in process of being renewed. Our share repurchase program, with the limits of 11,000,000 common shares and 50,000,000 preferred shares, ending on August 4, 2014, and on August 27, 2015, for the second time our Board of Directors approved the renewal of our share repurchase program through August 26, 2016, authorizing the purchase of up to 11,000,000 common shares and 50,000,000 preferred shares, and on February 1, 2016 our Board of Directors once again renewed our share repurchase program through August 2, 2017, authorizing the purchase, in the aggregate with respect to all shares purchased under the program, of up to 10.0 million common shares and 50.0 million preferred shares.

(2) All amounts were not adjusted at the 10% bonus for our shares. Considering the 10% bonus for our shares, occurred in July 2015, we acquired (a) 115.4 million preferred shares of our own issue, in the total amount of R$3.3 billion, at the average price of R$28.80 per share.

(3) Includes brokerage costs.

As of December 31, 2015, we completed our IT investments planned for the period from 2012 to 2015, which we funded from internal resources. These investments were made in data processing systems, purchase of software, system development and in our new Data Center built in the State of São Paulo, which opened in March 2015. This technology center will provide an increase in the processing and storage capacity of our operations by 25 times, in addition to providing a 43% reduction in the use of energy, as compared to our current consumption. The new data center will support our growth up to 2050, ensuring the high performance and availability of our operations.

We also lease a portion of our administrative offices and the majority of our branches at competitive market prices from third parties and under renewable leases with terms ending from the first half of 2016 (which are in the process of being renewed under similar terms) to the fourth quarter of 2036.

As of December 31, 2015, we owned approximately 19% of our administrative offices and branches (including electronic service points, banking sites and parking lots) and leased approximately 81%.
Capitalization
The table below presents our capitalization as of December 31, 2015. The information described is derived from our consolidated financial statements as of and for the year ended December 31, 2015. As of the date of this Annual Report, there has been no material change in our capitalization since December 31, 2015.

You should read the table below in conjunction with the information included in section Our profile, item In numbers, Selected Financial Data – IFRS, section Performance and section Attachments, item Selected Statistical Information for further details.

(In millions of R$, except percentages)

(1) Convenience translation at 3.9048 reais per U.S. dollar, the exchange rate in effect on December 31, 2015.
(2) Itaú Unibanco Holding’s authorized and outstanding share capital consists of 3,047,040,198 common shares and 3,036,875,751 preferred shares, all of which are fully paid. For more information regarding our share capital see Note 21 to our consolidated financial statements as of and for the period ended December 31, 2015.
(3) Total capitalization corresponds to the sum of total current liabilities, long-term liabilities, deferred income, minority interest in subsidiaries and stockholders’ equity.
(4) Calculated by dividing total regulatory capital by risk-weighted assets.

Off-Balance Sheet Arrangements
We do not have any off-balance sheet arrangements, other than the guarantees that we granted that are described in Note 36 – Management of Financial Risks, item 3 – Collateral and policies for mitigating credit risk and item 5 – Credit risk exposure of our consolidated financial statements and derivative financial instruments discussed above. Please refer to section Our Risk Management, item Risk and Capital Management, Exchange Rate Sensitivity for further details.

Results

Highlights
The highlights for the years ended December 31, 2015, December 31, 2014 and December 31, 2013 are presented below:

Net income (attributable to the owners of the parent company): ▲ increased 19.4% in 2015 compared to 2014 and increased 31.2% in 2014 compared to 2013.

For 2015, our net income attributable to the owners of the parent company was R$25,740 million and increased 19.4% compared to 2014, when our net income reached R$21,555 million. For the year ended December 31, 2014, our net income attributable to the owners of the parent company increased 31.2% when compared to the year ended December 31, 2013, when our net income attributable to the owners of the parent company was R$16,424 million.

Our performance ratio, ROAE (return on average equity), calculated by dividing net income attributable to owners of the parent company by the quarterly average stockholders’ equity attributed to the owners of the parent company excluding quarterly average proposed dividends recorded, reached 24.8% in 2015, an increase of 50 basis points compared to 2014 when our performance ratio reached 24.3%, an increase of 320 basis points when compared to 2013 when our ROAE reached 21.1%.

Stockholders’ equity (attributable to the owners of the parent company): ▲ increased 13.1% in 2015 compared to 2014 and increased 19.3% in 2014 compared to 2013.

As of December 31, 2015 our total stockholders’ equity increased 13.1% compared to December 31, 2014, and reached R$112,252 million. As of December 31, 2014, our total stockholders’ equity amounted to
Loans and leases to corporate clients increased compared to 2014, totaling R$78,576 million. Decreased 1.7% as of December 31, 2015 and leases to small and medium businesses 1.3%, compared to December 31, 2014. Loans and leases to companies totaled R$218,565 million, representing an increase of R$2,725 million, or 1.3%, compared to December 31, 2013.

**Loans and lease to individuals:**

As of December 31, 2015 loans to individuals totaled R$187,220 million, an increase of 0.7% compared to December 31, 2014. The increase is primarily a result of the increases of (i) 19.5% in mortgage loans to R$34,790 million, mainly due to our focus on portfolios with lower delinquency rates, and (ii) 12.1% in payroll loans to R$45,434 million, due to a continued growth in our retail branch payroll loan operations and to the association agreement with BMG, aimed at the offering, distribution and sale of payroll loans through the incorporation of a new financial institution, Itaú BMG Consignado. This association supplemented our payroll loan distribution strategy and improved the risk profile of our loan portfolio. Vehicle financing decreased 30.9% as of December 31, 2015 compared to December 31, 2014, totaling R$20,058 million, as a result of our continued application of stricter requirements for granting such loans, which has led to higher down payment requirements and shorter financing terms.

As of December 31, 2014 loans to individuals totaled R$185,953 million, an increase of 11.1% compared to December 31, 2013. The increase is primarily a result of the increases of (i) 11.6% in credit card loans to R$59,321 million, (ii) 18.8% in mortgage loans to R$29,107 million, mainly due to our focus on portfolios with lower delinquency rates, and (iii) 79.5% in payroll loans to R$40,525 million, due to a continued growth in our retail branch payroll loan operations. Vehicle financing decreased 28.4% as of December 31, 2014 compared to December 31, 2013, totaling R$29,047 million.

**Loans and lease to companies:**

As of December 31, 2015 loans and leases to companies totaled R$218,565 million, representing an increase of R$2,725 million, or 1.3%, compared to December 31, 2014. Loans and leases to small and medium businesses decreased 1.7% as of December 31, 2015 compared to 2014, totaling R$78,576 million. Loans and leases to corporate clients increased 3.0% as of December 31, 2015 when compared to 2014, totaling R$139,989 million as of December 31, 2015.

As of December 31, 2014 loans and leases to companies totaled R$215,840 million, representing an increase of R$13,097 million, or 6.5%, compared to December 31, 2013 when loans and leases to companies totaled R$202,743 million. Loans and leases to small and medium businesses as of December 31, 2014 totaled R$79,912 million, representing a decreased of 2.0% compared to 2013. Loans and leases to corporate clients as of December 31, 2014 totaled R$135,928, representing an increase of 12.2% when compared to 2013.

In addition, the depreciation of the real against other currencies, especially the U.S. dollar, also contributed to the growth of our medium to large companies’ portfolio since a portion of our loans are denominated or originated in such currencies.

**Foreign loans and leases – Latin America:**

The balance of our foreign loans and leases from our operations in Latin America outside Brazil (Argentina, Chile, Colombia, Paraguay and Uruguay) totaled R$68,463 million as of December 31, 2015, an increase of 35.2% compared to December 31, 2014 when the balance was R$50,638 million, mostly as a result of the growth of operations in the countries where we operate.

As of December 31, 2014 the balance of loans and leases from our operations in Latin America outside Brazil (Argentina, Chile, Colombia, Paraguay and Uruguay) totaled R$50,638 million, representing an increase of 21.9% compared to December 31, 2013, when such balance was R$41,528 million.

**Credit quality (90-day NPL ratio):**

As of December 31, 2015 compared to December 31, 2014 and improved 60 basis points as of December 31, 2014 compared to December 31, 2013.

The 90-day’s non-performing loans ratio (90-day NPL ratio), is calculated by dividing 90-day’s non-performing loans by our loan portfolio.

As of December 31, 2015, our 90-day NPL ratio reached 3.5%, an increase due to increases in the 90-day NPL ratios for both individuals and companies. The ratio for individuals increased by 70 basis points compared to December 31, 2014. As of December 31, 2014, our 90-day NPL ratio reached 3.1%, an improvement due to decreases in the 90-day NPL ratios for individuals and companies compared to December 31, 2013.

The coverage ratio, calculated by dividing the provisions for allowance for loan and lease losses by 90-day’s non-performing loans, reflects the mechanics of our provisioning model and reached 164% as of December 31, 2015 compared to a ratio of 160% as of December 31, 2014. As of December 31, 2013 the coverage ratio was 147%.

**Interest Income:**

Interest on loan and lease operations: increased 14.6% for the year ended December 31, 2015 compared to the same period in 2014 and increased 16.3% for the year ended December 31, 2014 compared to the same period in 2013.

Interest and similar expenses: increased 2.9% for the year ended December 31, 2015 compared to the same period in 2014 and increased 57.4% for the year ended December 31, 2014 compared to the same period in 2013.
Banking service fees: ▲ increased 11.8% for the year ended December 31, 2015 compared to the same period in 2014 and increased 16.0% for the year ended December 31, 2014 compared to the same period in 2013.

Income from insurance, private pension plan and capitalization operations (premium bonds) before claim and selling expenses: ▼ decreased 3.1% for the year ended December 31, 2015 compared to the same period in 2014 and increased 3.8% for the year ended December 31, 2014 compared to the same period in 2013.

General and administrative expenses: ▲ increased 11.9% for the year ended December 31, 2015 compared to the same period in 2014 and increased 6.6% for the year ended December 31, 2014 compared to the same period in 2013.

Expenses for allowance for loan and lease losses: ▲ increased 30.2% for the year ended December 31, 2015 compared to the same period in 2014 and increased 5.5% for the year ended December 31, 2014 compared to the same period in 2013.

Impaired loans: ▲ increased from R$17,206 million as of December 31, 2014 to R$27,157 million as of December 31, 2015, an increase mainly with respect to impaired loans in our corporate portfolio due to a more challenging economic environment in Brazil and increased from R$16,305 million as of December 31, 2013 to R$17,206 million as of December 31, 2014. (For further details, refer to section Performance, item Consolidated Financial Statements (IFRS), Note 36.6 – Credit Quality of Financial Assets).

Loans under renegotiation: ▲ credit transactions under renegotiation, including extended, modified and deferred repayments, increased 29.0% as of December 31, 2015, compared to December 31, 2014 due to (i) an increase in our portfolio of renegotiated corporate loans and also (ii) the effect of the exchange rate variation in 2015. As of December 31, 2015, loans under renegotiation represented 3.1% of the total portfolio. As of December 31, 2014, credit transactions under renegotiation, including extended, modified and deferred repayments decreased 10.2% compared to December 31, 2013.

When the real depreciates, we incur losses on our liabilities denominated in or indexed to foreign currencies, such as our U.S. dollar-denominated long-term debt and short-term borrowings, because the cost in reais of the related interest expense increases. At the same time, we realize gains on monetary assets denominated in or indexed to foreign currencies, such as our dollar-indexed trading securities and loans, due to increased interest income from such assets when translated to reais. When the real appreciates, the effects are the opposite of those described above. Consequently, the management of the gap in foreign currencies can have material effects on our net income. Unless otherwise indicated, the discussion in this section relates to our average interest rates and yields. Interest rates cited are measured in reais and include the effect of the variation of the real against foreign currencies. Please refer to section Our Risk Management, item Risk Factors, Instability of foreign exchange rates may negatively affect us and item Market Risk for further details.

**Net income**

The following table shows the main components of our net income for the years ended December 31, 2015, December 31, 2014 and December 31, 2013:

**Banking Product (Operating Revenues)**

Banking product (operating revenues) is the sum of our operating revenues, net of funding costs, as detailed in the table above. Please refer to section Performance, item Consolidated Financial Statements (IFRS), Note 23 – Interest and Similar Income and Expense and Net Gain (Loss) from Investment Securities and Derivatives, Note 24 – Banking Service Fees and Note 25 – Other Income for further details.

The following table shows the main components of our interest and similar income for the years ended December 31, 2015, December 31, 2014 and December 31, 2013:

</table>
In 2015, the 23.0% increase in interest and similar income compared to 2014 was mainly due to increases in interest on loans and leases, in interest on securities purchased under agreements to resell and in interest on financial assets held for trading. The increase of 14.6% in interest on loans and leases is mainly due to the 35.2% growth in our Latin America loan portfolio when compared to the previous year. The increase in interest for trading is related to increases in the cumulative SELIC rate to 13.8% in 2015 from 10.9% in 2014.

In 2014, the 27.6% increase in interest and similar income compared to 2013 was mainly due to increases in interest on loans and leases, in interest on held for trading, available-for-sale and held-to-maturity financial assets, and in interest on compulsory Central Bank deposits. The increases in interest for trading, available-for-sale and held-to-maturity financial assets and on Central Bank compulsory deposits are related to increases in the cumulative SELIC rate to 10.9% in 2014 from 8.3% in 2013. The increase in 2014 of 16.3% in interest on loans and leases compared to 2013 is mainly due to the 9.9% growth in our loan portfolio combined with the growth short-term duration products such as overdrafts and credit cards.

The following table shows the composition of the carrying amount of loan and lease transactions by type which primarily account for the variation between our total loan and lease transactions as of December 31, 2015, December 31, 2014 and December 31, 2013:

</tr>
</tbody>
</table>

As of December 31, 2015, our total loan portfolio reached R$474,248 million, a 4.8% increase from the previous year, influenced by the increase in the average volumes of loan and lease transactions, mainly due to the increase in the volume of payroll loans, mortgage loans and loans to corporate clients. As of December 31, 2014, our loan portfolio reached R$452,431 million, a 9.9% increase from December 31, 2013.

Since 2011, we have focused on reducing the credit risk of our loan portfolio. As a result, our mortgage, payroll, corporate and Latin America (ex-Brazil) loan portfolios have grown more rapidly, while our vehicle and small companies’ portfolios have decreased. Our mortgage loan portfolio has grown in line with the market and we maintained a conservative approach regarding collateral. The LTV quarterly average (Loan-to-Value: ratio between the loans and the underlying collateral) reached 55.3% in the fourth quarter of 2015. Our payroll loan portfolio has grown more than our personal loan portfolio not only due to the emphasis we have given to it within our branch network but also because of our association with Banco BMG for payroll loan origination. In Latin America, excluding Brazil (i.e., Argentina, Chile, Colombia, Paraguay and Uruguay) our loan portfolio grew 35.2% when compared to December 31, 2014 and 21.9% in December 31, 2014 compared to December 31, 2013, both due to organic growth and the depreciation of the real against the currencies of those countries. For further details please refer to the table above of loan and lease operations by type.

The changes in the SELIC rate also affected our total interest expenses. In 2015, the cumulative SELIC rate increased to 13.8% as of December 31, 2015 compared to 10.9% as of December 31, 2014. As of December 31, 2013, the cumulative SELIC rate was 8.3%.

In 2015 and 2014, the increase in the SELIC rate increased our interest expenses for securities sold under repurchase agreements and reserves for insurance and private pension and liabilities for capitalization plans (premium bonds). Please refer to section Performance, item Financial Performance, Liabilities, Funding for further information.

Dividend income totaled R$98 million for the year ended December 31, 2015, compared to R$215 million for the year ended December 31, 2014. This decrease was due to lower income from dividends on investments. For the year ended December 31, 2013, dividend income totaled R$205 million.

Net gain (loss) from investment securities and derivatives totaled a loss of R$11,862 million for the year ended December 31, 2015 compared to a loss of R$724 million in the same period in 2014. For the year ended December 31, 2013, net gain (loss) from investment securities and derivatives totaled a loss of R$5,924 million. These results were mainly due to our risk management strategies, particularly those associated with derivative instruments used to hedge our investments abroad and due to the depreciation of the real against the U.S. dollar during 2015 and 2014.

Foreign exchange results and exchange variation on transactions totaled a loss of R$6,353 million for the year ended December 31, 2015 compared to a gain of R$9,644 million for the year ended December 31, 2014 and a gain of R$6,594 million for the year ended December 31, 2013. The changes were due mainly to the effect from derivative financial instruments used to hedge the impact of exchange rate variation on our investments in subsidiaries abroad.

<tr>
<td>Total non-interest income</td>
<td>37,403</td>
<td>35,384</td>
<td>30,746</td>
</tr>
</tbody>
</table>

In 2015, our non-interest income amounted to R$37,403 million, representing a growth of 5.7% from the same period in the previous year, mainly due to the growth of 11.8% in banking service fees. In 2014, our non-interest income amounted to R$35,384 million, representing a growth of 15.1% from the same period in the previous year, due to the growth in banking service fees.

Banking service fees refer to the sum of fees from current account services, asset management, collection, credit card services, guarantees issued and credit lines, brokerage commission and other fees. In 2015, the increase in banking service fee revenues was mainly due to: (i) income from fees from credit card services, influenced by higher revenues from interchange, MDR (Merchant Discount Rate) and annual fees, and by the increase in the number of POS equipment rented in the period, and (ii) income from current account services, influenced mainly due to the offering of differentiated products and services. These products include differentiated current account service packages for individuals and the convenience and versatility of products offered to companies. The growth in banking service fees and other fees income is in line with our strategy to diversify our income, mainly to make it less dependent on changes in interest rates. In 2014, the increase in banking service fee revenues was mainly due to: (i) income from fees from credit card services, influenced by the increased revenues from credit card annual fees, increases in sales and an increase in the number of equipment (POS) rented during the period, as well as the acquisition of Credicard, and (ii) income from current account services, influenced by the expansion of our account holder base and the increase in the offering of differentiated products and services.

In 2015, income from insurance, private pension and capitalization operations (premium bonds) before claim and selling expenses decreased R$216 million compared to 2014. The decrease was influenced by the
decrease of R$1,024 million in reserves for insurance and private pension plans, partially offset by the increase in reinsurance premiums of R$942 million due to the sale of our large risk insurance operations in 2014 and by the increase of R$29 million in revenues from capitalization plans.

In 2014, income from insurance, private pension and capitalization operations (premium bonds) before claim and selling expenses increased R$249 million compared to 2013. The increase was influenced by (i) the lower reinsurance premium of R$492 million due to the sale of our large risk insurance operations in 2014, (ii) the decrease of R$192 million in changes in reserves for insurance and private pension and (iii) by the increase of R$95 million in revenue from capitalization plans. These variations were partially offset by the decrease in income from insurance and private pension, mainly due to the decrease income in VGBL, mandatory insurance for personal injury caused by motor vehicles (DPVAT) and large risk products.

In 2015, other income decreased R$875 million compared to 2014, due primarily to a decrease in gains on the sale of assets held for sale, fixed assets and investments in associates and joint ventures where revenues received in the amount of R$1,151 million from the sale of assets held by Itaú Seguros Soluções Corporativas S.A. (ISSC) were reflected in 2014.

In 2014, other income increased R$759 million compared to 2013, due primarily to revenues received from the sale of assets held by ISSC in the amount of R$1,151 during 2014.

Below is the composition of our losses on loans and claims for the years ended December 31, 2015, December 31, 2014 and December 31, 2013:

Evolution of the expenses for allowance for loan and lease losses

The chart below shows the changes in the components making up our expenses for allowance for loan and lease losses which primarily account for the variation between expenses for allowance for loan and lease losses for the years ended December 31, 2015, December 31, 2014 and December 31, 2013:
For the year ended December 31, 2015, our expenses for allowance for loan and lease losses increased 30.2% compared to the same period in 2014. The growth is mainly due to a more challenging economic environment. Please refer to section Macroeconomic context – item Brazilian context for further details.

For the year ended December 31, 2014, our expenses for allowance for loan and lease losses increased 5.5% compared to the same period in 2013 despite an increase of 9.9% in our loan portfolio in this period. This was the result of our continued application of stricter requirements for granting loans, which has led to higher down payment requirements and shorter financing terms and due to the acquisition of Credicard, which increased our loan portfolio by R$8.2 billion in December 2013.

As of December 31, 2015, the NPL ratio for operations overdue from 15 to 90 days (NPL 15-90) reached 2.6% and NPL ratio for operations overdue from 90 days (NPL 90) reached 3.5%. The chart below shows the changes in the NPL ratios.

</tbody>
</table>

In the year ended December 31, 2015, the recovery of loans written off as losses reached R$4,779 million, representing a decrease of 5.4% compared to the year ended December 31, 2014. In the year ended December 31, 2014, the recovery of loans written off as losses remained relatively stable compared to the year ended December 31, 2013 and reached R$5,054 million, representing a 0.1% decrease.

In 2015, expenses for claims decreased by R$819 million when compared to 2014, mainly due to a decrease in claims of large risk insurance operations due to the sale of the large risk portfolio, in addition to decreasing claims in mandatory insurance for personal injury caused by motor vehicles (Seguro Obrigatório de Danos Pessoais Causados por Veículos Automotores de Via Terrestre, or DPVAT). In the year ended December 31, 2014, expenses for claims decreased by R$725 million, mainly due to a decrease in claims of corporate insurance risks, individual and group accident insurance segments for the year ended December 31, 2014 compared to the year ended December 31, 2013.

Recovery of claims under reinsurance decreased by R$393 million in 2015 from R$407 million for the year ended December 31, 2014 to R$14 million in the year ended December 31, 2015, mainly due to a decrease in the recovery of claims in our segment of large risk insurance products. In the year ended December 31, 2014, recovery of claims under reinsurance decreased R$673 million compared to the year ended December 31, 2013, also mainly due to a decrease in the recovery of claims in our segment of large risk insurance products.

</tr>
</tbody>
</table>

We kept a tight control on costs and have partially offset the potential rise in costs (brought by the growth of operations, the rise in salaries and benefits due to collective labor agreements and the impact of inflation on our administrative costs) with efficiency gains. Between December 31, 2014, and December 31, 2015, our number of employees decreased 3.1% to 90,320 mainly as a result of our natural turn-over. Between December 31, 2013, and December 31, 2014, our number of employees decreased 2.6% to 93,175. Part of this decrease was due to the sale of our large risk operation in October 2014.

General and administrative expenses increased R$5,077 million, or 11.9%, in 2015 compared to 2014. In 2014, these expenses increased 6.6% compared to 2013.

In 2015, the increase of R$2,503 million in personnel expenses was mainly a result of the increase in expenses related to compensation, defined contribution plan and provision for labor claims. The annual collective labor agreement reached in October 2015, increased compensation by 10.0% starting from September 2015, and impacted the year ended December 31, 2015 compared to the same period of 2014. In 2014, the increase of R$1,211 million in personnel expenses was mainly a result of the increase in expenses related to compensation,
payroll taxes, benefits and profit sharing. The annual collective labor agreement reached in October 2014, increased compensation by 8.5% starting from September 2014, and impacted the year ended December 31, 2014 compared to the same period of 2013.

In 2015, administrative expenses increased R$787 million, or 5.5%, mainly because of increases in costs related to data processing and telecommunications, advertising, promotions and publications and other expenses. The increase in these expenses was due to the organic growth of our operations and, the effect of inflation on most contracts and costs in the year ended December 31, 2015. In 2014, the administrative expenses increased R$1,068 million, or 8.1%, mainly because of increases in third-party services, data processing and telecommunications, rent, security and financial services.

In 2015, other expenses grew R$1,733 million, or 23.2%, mainly due to the increases of R$724 million in selling expenses related to credit cards, R$390 million in provisions for tax and social security lawsuits and R$361 million in provisions for civil lawsuits. In 2014, other expenses increased R$152 million, or 2.1%, mainly due to the growth in selling expenses related to credit cards which represented R$817 million, partially offset by lower provisions in connection with civil lawsuits, which provisions represented R$566 million in the year ended December 31, 2014.

In the year ended December 31, 2015, tax expenses (ISS, PIS, Cofins and other tax expenses) amounted to R$5,405 million, an increase of R$342 million compared to the year ended December 31, 2014, and growth of R$722 million for the year ended December 31, 2014 compared to the year ended December 31, 2013.

The impacts associated to capital allocation are included in the financial information. Accordingly, adjustments were made to the financial statements, based on a proprietary model. The Allocated Economic Capital (AEC) model was adopted for the financial statements by segments, and as from 2015, we changed the calculation methodology. The AEC considers, in addition to Tier I Capital, the effects of the calculation of expected loan losses, supplementary to the requirements of the Central Bank of Brazil, pursuant to CMN Circular No. 2,682/99. Accordingly, the Allocated Capital comprises the following components: Credit risk (including expected loss), operational risk, market risk and insurance underwriting risk. Based on the portion of Tier 1 Capital, we calculated the Return on Economic Allocated Capital, which corresponds to an operational performance indicator consistently adjusted to the capital required to support the risk associated to asset and liability positions assumed, in conformity with our risk appetite.

The Efficiency Ratio and Risk Adjusted Efficiency Ratio are calculated based on managerial information, as presented below:

\[
\text{Efficiency Ratio} = \frac{\text{Non-Interest Expenses}}{\text{Banking Product} - \text{Tax Expenses for ISS, PIS, Cofins and Other Taxes}}
\]

\[
\text{Risk Adjusted Efficiency Ratio} = \frac{\text{Non-Interest Expenses} + \text{Result from Loan Losses}}{\text{Banking Product} - \text{Tax Expenses for ISS, PIS, Cofins and Other Taxes}}
\]
The Efficiency Ratio and Risk Efficiency Ratio are non-GAAP measures and we disclose them herein as we consider them to be an important measure to understand how we manage our overhead costs. We disclose this measure to the market on a quarterly basis.

Low efficiency ratios indicate a better performance, since this ratio measures the proportion of expenses over revenues. The risk-adjusted efficiency ratio includes the risk portions associated with banking transactions (result of the allowance for loan and lease losses and recovery of loans written off as losses).

As from the first quarter of 2015, we changed the presentation of our segments in order to reflect the bank’s current organizational structure. We applied the same changes to 2014 and 2013 in order to allow comparability. Information is reported with respect to the following segments: (i) Retail Banking, (ii) Wholesale Banking and (iii) Activities with the Market and Corporation. The Retail Banking segment now covers the former segments Commercial Banking – Retail and Consumer Credit – Retail, with the transfer of operations from the Private Banking and Latin America (excluding Brazil) units, which were previously allocated to the Commercial Banking – Retail segment, to the Wholesale Banking segment. These changes are reflected in the presentation of information set out below with respect to periods that were previously reported using the prior business segment categories.

It is important to note that the change in the segments is not reflected in the annual report as of and for the year ended December 31, 2014 or any prior periods.

The current operational and reporting segments are described below:

- **Retail Banking**: The result of the Retail Banking segment derives from the offer of banking products and services to a diversified client base of account holders and non-account holders, individuals and companies. The segment includes retail clients, high net worth clients (Itaú Uniclass and Personnalité), and very small and small companies. This segment comprises financing and lending activities carried out in units other than the branch network, and offering of credit cards, in addition to operations with Itaú BMG Consignado.

- **Wholesale Banking**: The result of the Wholesale Banking segment derives from the products and services offered to middle-market companies, private banking clients, from the activities of Latin America units (excluding Brazil), and the activities of Itaú BBA, the unit in charge of commercial operations with large companies as well as performing as an investment banking unit.

- **Activities with the Market and Corporation**: This segment records the results derived from capital surplus, subordinated debt surplus and the net balance of tax credits and debits. It also shows the financial margin with the market, the Treasury operating cost, the equity in earnings of companies not associated to each segment and the interest in Porto Seguro.

We present below a summary of the results from our operating segments for 2015. Similar information for 2014 and 2013 is included in the audited consolidated financial statements, in Note 34 regarding segment information in section Performance, items Consolidated Financial Statements (IFRS). The following discussion should be read in conjunction with our audited consolidated financial statements, especially Note 34 regarding segment information in section Performance, item Consolidated Financial Statements (IFRS). The adjustments column shown in the Note 34 presents effects of the differences between the segmented results (substantially in line with the accounting practices adopted in Brazil) and those calculated according to the principles adopted in our consolidated financial statements in IFRS.

(1) Includes net interest and similar income and expenses of R$72,725, dividend income of R$98, net gain (loss) on investment securities and derivatives of R$(11,862) and results from foreign exchange results and exchange variation of transactions abroad of R$(6,353).

(2) Refers to general and administrative expenses including depreciation expenses of R$1,688, amortization expenses of R$910 and insurance acquisition expenses of R$1,138.
Revenues from Operations in Brazil and Abroad

We conduct most of our business activities in Brazil, but we do not break down our revenues by geographic markets within Brazil. Our interest income from loans and leases, banking service fees and income from insurance, private pension and premium bonds transactions are divided between revenues earned in Brazil and abroad. The following information is presented in IFRS, after eliminations on consolidation.

The following table sets forth the consolidated statement of income with respect to our revenues from operations in Brazil and abroad for the years ended December 31, 2015, 2014 and 2013:

</table>
Net income for the Retail Banking segment increased 5.3% in the year ended December 31, 2015 from the same period of 2014, mainly due to the positive impact of R$3,117 million increase in interest margin and of R$1,925 million increase in banking service fees with higher revenues from current account services and credit cards.

On the other hand, with a negative impact on the net income, losses on loans and claims increased 17.3% from the same period of 2014, mainly due to higher expenses for allowance for loan and lease losses for individuals and small and very small companies due to a more challenging economic environment. Non-interest expenses increased 4.3%, with an increase in personnel expenses, which were affected by the collective labor agreements reached in 2014 and 2015.

Net income for the Retail Banking segment increased 47.2% in the year ended December 31, 2014 from the same period of 2013, mainly due to the positive impact of a 15.0% increase in interest margin and a 17.0% increase in banking service fees with higher revenues from current account services, credit card, consortia and collection services. These impacts are mainly influenced by the migration of the middle market companies from the Wholesale Banking segment. Furthermore, losses on loans and claims decreased R$1,631 million or 12.1% from 2013, despite the 10.0% growth on loan, lease and other credit transactions balance mainly due to the change in the credit profile of our portfolio during 2014.

On the other hand, with a negative impact on net income, non-interest expenses increased 9.2%. This increase was also a consequence of the above-mentioned reclassification along with a higher volume of transactions (as a result of a growth in our banking operations), and an increase in personnel expenses, which were affected by the collective labor agreements reached in 2013 and 2014.

**Wholesale Banking**

**Performance measures**

- Efficiency ratio: 40.4% (2015), 42.1% (2014), 48.5%
- Risk adjusted efficiency ratio: 64.4% (2015), 58.4% (2014), 59.6%

**Balance sheet information**

- Loan, lease and other credit transactions: 251,056, 221,950, 201,688
- Total assets: 547,236, 436,872, 355,632
In 2015, net income for our Wholesale Banking segment increased 10.2% from the previous year. Our banking product increased 26.3% as the interest margin and the banking service fees were 31.9% and 15.2% higher than in 2014. The increase in our corporate loan portfolio during 2015 contributed to the improvement in the interest margin for the period when compared to the interest margin for 2014.

Losses on loans and claims increased 85.2%, mainly due to the increase in expenses for allowance for loan losses for companies of the corporate segment in 2015. The increase of 117.0% in recovery of loans written-off as losses compared to 2014 was mainly driven by the restructuring with respect to amounts owed by a specific client of the corporate segment. Also, the non-interest expenses increased 21.1%, having a negative impact on net income.

In 2014, net income for our Wholesale Banking segment increased 26.8% from the previous year, mainly due to higher interest margin, which increased 23.3% from 2013. Banking services fees increased 15.0% from 2013 on higher revenues from Merger and Acquisitions and Fixed Income operations.

Our expenses for allowance for loan and lease losses increased R$1,557 million in 2014 compared to 2013. Non-interest expenses increased 4.1% in 2014 compared to 2013, less than the Brazilian Inflation rate (IPCA) which was 6.41% in 2014.

**Activities with the Market and Corporation**

**Performance measures**
- Efficiency ratio: 21.0% (2015), 29.5% (2014), 21.0%
- Risk adjusted efficiency ratio: 19.7% (2015), 29.5% (2014), 19.7%

**Balance sheet information**
- Loan, lease and other credit transactions: 3,572 (2015), 4,966 (2014)
- Total assets: 127,716 (2015), 107,174 (2014), 116,625
Activities with the Market and Corporation segment includes the result from the investment of our excess capital, costs from our excess subordinated debt and the net balance of tax assets and liabilities. It also includes the financial margin on market transactions, costs of treasury operations, equity in the earnings of companies that are not linked to any segments, as well as adjustments related to minority shareholdings in subsidiaries and our interest in Porto Seguro S.A.

In 2015, net income from Activities with the Market and Corporation increased 72.6% from the previous year. With positive effects on our net income, interest margin increased R$3,923 million or 109.3% (mainly due to higher results on our treasury transactions undertaken for purposes of asset and liability management and proprietary portfolio management). Non-interest expenses increased 28.8% in 2015 when compared to 2014.

In 2014, net income from Activities with the Market and Corporation decreased 11.3% from the previous year. Having a negative effect on net income, non-interest expenses increased 162.7% in 2014 when compared to 2013, mainly due to pre-operational costs of our new data center. Banking Product decreased R$24 million or 0.6%, mainly due to lower results with respect to our treasury transactions undertaken for purposes of asset and liability management and proprietary portfolio management.

Changes in Cash Flows
The following table sets forth the main variations in our cash flows for the years ended December 31, 2015, December 31, 2014 and December 31, 2013:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Net cash provided (used in) by operating activities</td>
<td>(34,459)</td>
<td>89,726</td>
<td>32,530</td>
</tr>
<tr>
<td>Net cash provided (used in) by investing activities</td>
<td>(361)</td>
<td>2,676</td>
<td>(14,500)</td>
</tr>
<tr>
<td>Net cash (used in) financing activities</td>
<td>(8,529)</td>
<td>(21,688)</td>
<td>(10,606)</td>
</tr>
<tr>
<td>Net increase (decrease) in cash and cash equivalents</td>
<td>(43,350)</td>
<td>70,714</td>
<td>7,425</td>
</tr>
</tbody>
</table>

In 2015, our net decrease of R$43,350 million in cash and cash equivalents was attributed to the use of R$34,459 million in net cash provided by operating activities, by R$361 million in investing activities and by R$8,529 million in financing activities.

Operating Activities
In 2015, net cash used in operating activities was R$34,459 million due to increases in financial assets held for trading, loan operations (as a result of the credit portfolio increases) and securities purchased under agreements to resell. In 2014, the changes in cash flows from operating activities resulted from a decrease in financial assets held for trading and an increase in deposits received under securities repurchase agreements, partially offset by increases in loan operations. In 2013, the changes in cash flows from operating activities resulted primarily from an increase in funds from interbank markets offset by our loan operations. Management believes cash flows from operations, available cash balances and funds from interbank markets will be sufficient to fund our operating liquidity needs.

Investing Activities
The investing activities include available-for-sale assets, held to maturity assets, other receivables and investment securities. In 2015, the purchase of available-for-sale assets and purchase of held-to-maturity financial assets were the main cause for the outflows in our cash flow from investing activities. In 2014, the sale of large risk insurance operations and the sale of available-for-sale assets was the main cause for the inflows in our cash flow from investing activities, offset by cash paid for the purchase of available-for-sale assets. In 2013, the Credicard acquisition and the increase in purchase of available-for-sale assets were the main reason for the outflows in our cash flow from investing activities, offset by cash received from sale of available-for-sale assets.

Financing Activities
In 2015, 2014 and 2013, the changes in cash flows from financing activities were primarily a result of an increase in redemptions of our subordinated debt in institutional markets. Furthermore, we paid dividends and interest on capital paid in the amount of R$7,008 million, R$6,319 million and R$5,369 million in 2015, 2014 and 2013, respectively. In 2015, we purchased an amount of R$3,324 million in treasury shares, which generated a cash outflow of the same amount.

Liquidity and Capital Resources
Our board of directors determines our policy regarding liquidity risk management, and establishes broad quantitative liquidity risk management limits in line with our risk appetite. CSRML, composed of members of senior management, is responsible for strategic liquidity risk management in line with the board-approved liquidity risk framework and risk appetite. In establishing our guidelines, CSRML considers the liquidity implications of each market segment and product. The institutional treasury unit of Itaú Unibanco Holding is responsible for day-to-day management of the Itaú Unibanco Group’s liquidity profile, within the parameters set by the Board of Directors and the CSRML. This includes an oversight responsibility with respect to all business units operating outside of Brazil.
We maintain separate liquidity pools at our Brazilian operations and at each of our subsidiaries in Latin America and Europe. Our Brazilian operations include the financial institutions in Brazil and the entities used by the Brazilian operations for funding and serving their clients abroad. Each subsidiary in Latin America (e.g., in Chile, Argentina, Uruguay, Colombia and Paraguay) and in Europe has its own treasury function with appropriate autonomy to manage liquidity according to local needs and regulations, while remaining in compliance with the liquidity limits established by Itaú Unibanco Holding senior management. In general, there are rarely liquidity transfers between subsidiaries or between the head office and a subsidiary, except under very specific circumstances (e.g., targeted capital increases). Brazil, Argentina, United Kingdom and Colombia are the only countries in which we operate where local regulators have established minimum liquidity levels.

CMN regulations also establish capital conservation and countercyclical buffers for Brazilian financial institutions, and determines their minimum percentages as well as which sanctions and limitations will apply in case of non-compliance with such additional requirements.

We define our consolidated group operational liquidity reserve as the total amount of assets that can be rapidly turned into cash, based on local market practices and legal restrictions. The operational liquidity reserve generally includes: cash and deposits on demand, funded positions of securities purchased under agreements to resell and unencumbered government securities.

The following table presents our operational liquidity reserve as of December 31, 2015, 2014 and 2013:

<table>

(1) Average calculated based on interim financial statements.
(2) Net of R$9,461 (R$5,945 at 12/31/2014 and R$3,333 at 12/31/2013), which securities are restricted to guarantee transactions at BM&FBovespa and the Central Bank.

Management controls our liquidity reserves by projecting the resources that will be available for investment by our treasury department. The technique we employ involves the statistical projection of scenarios for our assets and liabilities, considering the liquidity profiles of our counterparties.

Short-term minimum liquidity limits are defined according to guidelines set by the CSRML. These limits aim to ensure that the Itaú Unibanco Group always has sufficient liquidity available, sufficient to cover unforeseen market events. These limits are revised periodically, based on the projection of cash needs in atypical market situations (i.e., stress scenarios).

Management of liquidity makes it possible for us to simultaneously meet our operating requirements, protect our capital and exploit market opportunities. Our strategy is to maintain adequate liquidity to meet our present and future financial obligations and to capitalize on business opportunities as they arise.

We are exposed to effects of the disruptions and volatility in the global financial markets and the economies in those countries where we do business, especially Brazil. However, due to our stable sources of funding, which include a large deposit base, the large number of correspondent banks with which we have long-standing relationships, as well as facilities in place which enable us to access further funding when required, we have not historically experienced liquidity challenges, even during periods of disruption in the international financial markets.
The following table sets forth our average deposits and borrowings for the years ended December 31, 2015, 2014 and 2013:

Our principal sources of funding are interest-bearing deposits, deposits received under repurchase agreements, on-lending from government financial institutions, lines of credit with foreign banks and the issuance of securities abroad. Please refer to section Performance, item Consolidated Financial Statements, Note 17 – Deposits for further details about funding.

We may from time to time seek to retire or purchase our outstanding debt, including our subordinated notes (subject to the approval of the Central Bank), and senior notes, through cash purchases in open market purchases, privately negotiated transactions or otherwise. Such repurchases, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. Notes repurchased may be held, cancelled or resold and any resale thereof will only be in compliance with applicable requirements or exemptions under the relevant securities laws.

Some of our long-term debt provides for acceleration of the outstanding principal balance upon the occurrence of specified events, which are events ordinarily found in long-term financing agreements. Up to December 31, 2015, none of these events, including any events of default or failure to satisfy financial covenants, have occurred.

Under Brazilian law, cash dividends may only be paid if the subsidiary paying such dividends has reported a profit in its financial statements. In addition, subsidiaries that are financial institutions are prohibited from making loans to Itaú Unibanco Holding, but they are allowed to make deposits in Itaú Unibanco Holding, which represent interbank certificates of deposit (Certificado de Depósito Interbancário). These restrictions have not had, and are not expected to have, a material impact on our ability to meet our cash obligations.

**Seasonality**

Generally our retail banking and our credit card businesses have some seasonality, with increased levels of retail and credit card transactions during the Christmas season and a subsequent decrease of these levels at the beginning of the year. In addition, there is a certain seasonality at the end of the year in our pension plan business, when the thirteenth salary are paid. We also have some seasonality in our banking service fees related to collection services at the beginning of the year, which is when taxes and other fiscal contributions are generally paid.

**Information on trends**

We expect many factors to affect our future results of operations, liquidity and capital resources, including:

- the Brazilian economic environment (please refer to section Context, item Macroeconomic Context, Brazilian Context and section Our Risk Management, item Risk Factors, Macroeconomic Risks for further details);
- legal and regulatory developments (please refer to section Context, item Macroeconomic Context, Brazilian Context and section Our Risk Management, item Risk Factors, Legal and Regulatory Risks for further details);
• the effects of any ongoing international financial turmoil, including on the liquidity and capital required (please refer to section Context, item Macroeconomic Context, Global Context and section Our Risk Management, item Risk Factors, Macroeconomic Risks for further details);

• the inflation effects on the result of our operations (please refer to section Context, item Macroeconomic Context, Brazilian Context and section Our Risk Management, item Risk Factors, Macroeconomic Risks, Inflation and fluctuations in interest rates may have a material adverse effect on us for further details); and

• any acquisitions we may make in the future (please refer to section Our Risk Management, item Risk Factors, The integration of acquired or merged businesses involves certain risks that may have a material adverse effect on us).

As part of our strategy, we continue to review growth opportunities, both in Brazil and outside of Brazil. Additionally, please refer to section Our Risk Management, item Risk Factors for comments on the risks faced in our operations and that could affect our business, results of operations or financial condition.

Management’s Report on Internal Control over Financial Reporting

The management of Itaú Unibanco Holding S.A is responsible for establishing and maintaining adequate internal control over financial reporting for the company.

The company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB). The company’s internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposals of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to allow for the preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those controls determined to be effective may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions, or a decline in the level of compliance with policies or procedures may occur.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2015. In making this assessment, our management used the criteria set forth in “Internal Control – Integrated Framework (2013)” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on its evaluation and those criteria, our management has concluded that our internal control over financial reporting was effective as of December 31, 2015.

In connection with the evaluation required by the Exchange Act Rule 13a-15(d), our management, concluded that the changes that occurred during the year ended December 31, 2015 have not materially affected, or are not reasonably likely to materially affect, our internal control over financial reporting.

The effectiveness of the Company’s internal control over financial reporting as of December 31, 2015, has been audited by PricewaterhouseCoopers Auditores Independentes, an independent registered public accounting firm, as stated in their report which appears herein.

Roberto Egydio Setubal
Chief Executive Officer

Eduardo Mazzilli de Vassimon
Chief Financial Officer

A signed original copy of this report has been provided to the registrant and will be retained by the registrant and furnished to the Securities and Exchange Commission or its staff upon request.

Date: April 29, 2016
Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Itaú Unibanco Holding S.A.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, comprehensive income, changes in stockholders’ equity and cash flows present fairly, in all material respects, the financial position of Itaú Unibanco Holding S.A. and its subsidiaries (“Itaú Unibanco Holding”) at December 31, 2015 and December 31, 2014 and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board. Also in our opinion, Itaú Unibanco Holding maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Itaú Unibanco Holding's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying “Management's Report on Internal Control over Financial Reporting”. Our responsibility is to express opinions on these financial statements and on the Itaú Unibanco Holding's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) and International Standards on Auditing. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.
Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Note 1 - Overview

ITAÚ UNIBANCO HOLDING S.A. (ITAÚ UNIBANCO HOLDING) is a publicly-held company, organized and existing under the Laws of Brazil. The head office of ITAÚ UNIBANCO HOLDING is located at Praça Alfredo Egydio de Souza Aranha, n° 100, in the city of São Paulo, Brazil.

ITAÚ UNIBANCO HOLDING provides a wide range of financial products and services to individual and corporate clients in Brazil and abroad, as to whether these clients have Brazilian links or not through its international branches, subsidiaries and affiliates. In Brazil we serve retail clients through the branch network of Itaú Unibanco S.A. (“Itaú Unibanco”) and to wholesale clients through Banco Itaú BBA S.A. (“Itaú BBA”), and overseas through branches in New York, Grand Cayman, Tokyo, and Nassau, and through subsidiaries mainly in Argentina, Chile, the US (New York and Miami), and Europe (Lisbon, London, Luxembourg and Switzerland), Cayman Islands, Paraguay, Uruguay and Colombia.

ITAÚ UNIBANCO HOLDING is a holding company controlled by Itaú Unibanco Participações S.A. (“IUPAR”), a holding company which owns 51% of our common shares, and which is jointly controlled by (i) Itaúsa Investimentos Itaú S.A., (“Itaúsa”), a holding company controlled by members of the Egydio de Souza Aranha family, and (ii) Companhia E. Johnston de Participações (“E. Johnston”), a holding company controlled by the Moreira Salles family. Itaúsa also directly holds 38.7% of ITAÚ UNIBANCO HOLDING common shares.

As described in Note 34, the operations of ITAÚ UNIBANCO HOLDING are divided into three operating and reportable segments: (1) Retail Banking, which comprises the retail and high net worth clients (Itaú Uniclass and Personnalité) and the corporate segment (very small and small companies); (2) Wholesale Banking, which covers the wholesale products and services for middle-market and large companies, as well as the investment banking, in addition to the activities of the Latin America unit and (3) Activities with the Market + Corporation, which mainly manages the financial results associated with capital surplus, subordinated debt, and net debt of tax credits and debits of ITAÚ UNIBANCO HOLDING.

These consolidated financial statements were approved by the Executive Board on February 01, 2016.
Note 2 – Significant accounting policies

2.1. Basis of Preparation

These Consolidated Financial Statements of ITAÚ UNIBANCO HOLDING were prepared taking into account the requirements and guidelines set out by the National Monetary Council ("CMN"), which established that as from December 31, 2010 annual Consolidated Financial Statements shall be prepared in accordance with the International Financial Reporting Standards ("IFRS"), as approved by the International Accounting Standards Board ("IASB").

In the preparation of these consolidated financial statements, ITAÚ UNIBANCO HOLDING adopted the criteria for recognition, measurement and disclosure established in the IFRS and the interpretations of the International Financial Reporting Interpretation Committee (IFRIC).

The Consolidated Statement of Cash Flows shows the changes in cash and cash equivalents during the period, arising from operating, investing, and financing activities, and include highly-liquid investments (Note 2.4c).

Cash flows from operating activities are presented under the indirect method. Consolidated net income is adjusted for non-monetary items, such as measurement gains and losses, changes in provisions and in receivables and liabilities balances. All income and expense arising from non-monetary transactions, attributable to investing and financing activities, are eliminated. Interest received or paid are classified as operating cash flows.

2.2. New accounting standards and new accounting standards changes and interpretations

a) Accounting standards applicable for period ended December 31, 2015

- IAS 19 – “Employee Benefits” – the entity should take into account the contributions by employees and third parties in the recording of defined benefit plans. There are no impacts from this change, since ITAÚ UNIBANCO HOLDING has already considered these procedures.

b) Accounting standards recently issued and applicable in future periods

The following pronouncements will become applicable for periods after the date of these consolidated financial statements and were not early adopted:

- IFRS 16 – “Leases” – The pronouncement replaces IAS 17 - Leases, and related interpretations (IFRIC 4, SIC 15 and SIC 27). It eliminates the accounting for operating lease agreements for the lessee, presenting only one lease model, that consists of: (a) recognizing leases which terms exceed 12 months and with substantial amounts; (b) initially recognizing lease in assets and liabilities at present value; and (c) recognizing depreciation and interest from lease separately in the result. For the lessor, accounting will continue to be segregated between operating and financial lease. Effective for annual periods beginning on January 1, 2019. Possible impacts arising from the adoption of this standard are being assessed and will be completed by the date this standard is effective.

- Amendment to IAS 12 – “Income Taxes” – The amendment includes clarification about the recognition of deferred taxes for unrealized losses in debt instruments measured at fair value. Applicable to the years beginning on January 1, 2017. Possible impacts arising from the adoption of this change are being analyzed and will be completed until its effective date.

- IFRS 9 – “Financial instruments” – The purpose of the pronouncement is to replace IAS 39 - “Financial instruments: recognition and measurement”. IFRS 9 includes: (a) a logical classification and measurement model; (b) a single impairment model for financial instruments, which offers a response to expected losses; (c) the removal of volatility in income arising from own credit risk; and (d) a new hedge accounting approach. Effective for annual periods beginning on January 1, 2018. Any possible impacts arising from adopting these changes are being assessed and will be completed up to the date this standard is effective.

- IFRS 15 – “Revenue from Contracts with Customers” – The purpose of the pronouncement is to replace IAS 18 and IAS 11, as well as interpretations related thereto (IFRICs 13, 15 and 18). It requires that revenue is recognized in a way that shows the transfer of assets or services to the client for an amount that reflects the company’s expectation of having in consideration the rights to these assets or services. Effective for annual periods beginning on January 1, 2018. Possible
impacts arising from this change are being analyzed and will be completed by the date the standard is effective.

- Amendment to IFRS 11 – “Joint Arrangement” – The change establishes criteria for recognition of acquisition of joint operations, which activity constitutes one business, according to the methodology established in IFRS 3 – Business Combinations. Effective for the years beginning on January 1, 2016 and early adoption is permitted by IASB. Impacts of this change will occur only if there is an acquisition of a joint operation that constitutes a business.

- Amendment to IAS 16 – “Property, Plant and Equipment” and IAS 38 “Intangible Assets” – The amendment clarifies the base principle for depreciation and amortization as being the expected standard of consumption of future economic benefits embodied in the asset. Effective for annual periods beginning on January 1, 2016, with early adoption permitted by IASB. No material impacts arising from this amendment were identified for the consolidated financial statements of ITAÚ UNIBANCO HOLDING.

- Amendment to IFRS 10 – “Consolidated Financial Statements” and IAS 28 – “Investments in Associates and Joint Ventures” - Changes refer to an inconsistency between the requirements of IFRS 10 and IAS 28, when addressing the sale or contribution of assets between investor and its associate or joint venture. The effective date has not been defined by IASB yet. No material impacts arising from this change on the consolidated financial statements of ITAÚ UNIBANCO HOLDING were identified.

- Amendment to IFRS 10 – “Consolidated Financial Statements” and IAS 28 – “Investments in Associates and Joint Ventures” - Changes refer to an inconsistency between the requirements of IFRS 10 and IAS 28, when addressing the sale or contribution of assets between investor and its associate or joint venture. The effective date has not been defined by IASB yet. No material impacts arising from this change on the consolidated financial statements of ITAÚ UNIBANCO HOLDING were identified.

- IASB Annual Improvement Cycle (2012-2014) – Annually IASB makes minor amendments to a series of pronouncements to clarify the standards and avoid double interpretation. In this cycle IFRS 5 – “Non-Current Assets Held for Sale and Discontinued Operations”, IFRS 7 – “Financial Instruments: Disclosures”, IAS 19 – “Employee Benefits”, and IAS 34 – “Interim Financial Reporting” were reviewed. Effective for annual periods beginning on January 1, 2016. No material impacts arising from this change on the consolidated financial statements of ITAÚ UNIBANCO HOLDING were identified.

- Amendment to IAS 1 – “Presentation of Financial Statements” – The amendments are aimed at encouraging companies to identify which information is sufficiently material to be disclosed in the financial statements. It also clarifies that materiality is applicable to the full set of financial statements, including the notes to the financial statements, and it is applicable to any and all disclosure requirements of the IFRS standards. Effective for periods beginning on January 1, 2016. Main effects identified are related to the disclosure of accounting policies and judgment of materiality in the notes to the financial statements.

- Amendments to IAS 28, IFRS 10 and IFRS 12: “Investment Entities: Applying Consolidation Exception”: This document comprises guidance for applying the Investment Entities concept. Effective for annual periods beginning on January 1, 2016. No material impacts arising from this change on the consolidated financial statements of ITAÚ UNIBANCO HOLDING were identified.

2.3. Critical accounting estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and contingent assets and liabilities at the date of the consolidated financial statements, as well as the reported amounts of revenue, expenses, gains, and losses over the reporting and subsequent periods, because actual results may differ from those determined in accordance with such estimates and assumptions.

2.3.1 Critical accounting estimates

All estimates and assumptions made by Management are in accordance with IFRS and represent the current best estimates made in compliance with the applicable standards. Estimates are evaluated continuously, considering past experience and other factors.

The Consolidated Financial Statements reflect a variety of estimates and assumptions. The critical accounting estimates and assumptions that have the most significant impact on the carrying amounts of assets and liabilities are described below:
a) Allowance for loan and lease losses

ITAÚ UNIBANCO HOLDING periodically reviews its portfolio of loans and receivables to evaluate the existence of impairment.

In order to determine the amount of the allowance for loan and lease losses in the Consolidated Statements of Income with respect to certain receivables or group of receivables, ITAÚ UNIBANCO HOLDING exercises its judgment to determine whether objective evidence indicates that an event of loss has occurred. This evidence may include observable data that indicates that an adverse change has occurred in relation to the expected cash inflows from the counterparty or the existence of a change in local or international economic conditions that correlates with impairment. Management uses estimates based on the history of loss experience in loan operations with similar characteristics and with similar objective evidence of impairment. The methodology and assumptions used for estimating future cash flows are regularly reviewed by Management, considering the adequacy of models and sufficiency of provision volumes in view of the experience of incurred loss.

ITAÚ UNIBANCO HOLDING uses statistical models to calculate the Allowance for Loan and Lease Losses in the homogeneous loan portfolio. ITAÚ UNIBANCO HOLDING periodically carries out procedures to improve these estimates by aligning the required provisions to the levels of losses observed by the historical behavior (as described in Note 2.4g VIII). This alignment aims at ensuring that the volume of allowances reflects the current economic conditions, the composition of the loan portfolios, the quality of guarantees obtained and the profile of our clients. In 2015 and in 2014, there were no such improvements of model assumptions.

Methodology and assumptions used by Management are detailed in Note 2.4g VIII. Allowance for loan losses is detailed in Note 12b.

b) Deferred income tax and social contribution

As explained in Note 2.4n, Deferred tax assets are recognized only in relation to temporary differences and tax assets and loss for offset to the extent it is probable that ITAÚ UNIBANCO HOLDING will generate future taxable profit for its use. The expected realization of deferred tax assets is based on the projection of future taxable profits and technical studies, as disclosed in Note 27.

c) Fair value of financial instruments, including derivatives

The fair value of financial instruments is measured recurrently, in conformity with the requirements of IAS 39 – Financial Instruments: Recognition and Measurement. The Fair value of financial instruments, including derivatives that are not traded in active markets, is determined by using valuation techniques. This calculation is based on assumptions that take into consideration Management’s judgment based on market information and conditions in place at the balance sheet date.

ITAÚ UNIBANCO HOLDING ranks fair value measurements using a fair value hierarchy that reflects the significance of inputs used in the measurement process.

The fair value of financial instruments, including Derivatives, as well as the fair value hierarchy, are detailed in Note 31.

The team in charge of the pricing of assets, in accordance with the governance defined by the committee and regulatory circulars, carries out critical analyses of the information extracted from the market and from time to time reassesses the long term of indexes. At the end of the monthly closings, the areas meet for a new round of analyses for the maintenance of the classification in connection with the fair value hierarchy. ITAÚ UNIBANCO HOLDING believes that all methodologies adopted are appropriate and consistent with market participants. Regardless of this fact, the adoption of other methodologies or use of different assumptions to estimate fair values may result in different fair value estimates.

The methodologies used to estimate the fair value of certain financial instruments are described in Note 31.
d) Defined benefit pension plan

The current amount of pension plan obligations is obtained from actuarial calculations that use a set of assumptions. Among the assumptions used for estimating the net cost (income) of these plans is the discount rate. Any changes in these assumptions will affect the carrying amount of pension plan assets and liabilities.

ITAÚ UNIBANCO HOLDING determines the appropriate discount rate at the end of each year, which is used for determining the present value of estimated future cash outflows necessary for settling the pension plan liabilities. In order to determine the appropriate discount rate, ITAÚ UNIBANCO HOLDING considers the interest rates of the Brazilian federal government bonds that are denominated in Brazilian Reais, the currency in which the benefits will be paid, and that have maturity terms approximating the terms of the related liabilities.

The main assumptions on Pension plan obligations are based on, in part, current market conditions. Additional information is disclosed in Note 29.

e) Provisions, contingencies and other commitments

ITAÚ UNIBANCO HOLDING periodically reviews its contingencies. These contingencies are evaluated based on Management’s best estimates, taking into account the opinion of legal counsel when there is a likelihood that financial resources will be required to settle the obligations and the amounts may be reasonably estimated.

Contingencies classified as probable losses are recognized in the Balance Sheet under Provisions.

Contingent amounts are measured using appropriate models and criteria, despite the uncertainty surrounding the ultimate timing and amounts, as detailed in Note 32.

Provisions, contingencies and other commitments are detailed in Note 32.

f) Technical provisions for insurance and pension plan

Technical provisions are liabilities arising from obligations of ITAÚ UNIBANCO HOLDING to its policyholders and participants. These obligations may be short term liabilities (property and casualty insurance) or medium and long term liabilities (life insurance and pension plans).

The determination of the actuarial liability is subject to several uncertainties inherent in the coverage of insurance and pension contracts, such as assumptions of persistence, mortality, disability, life expectancy, morbidity, expenses, frequency and severity of claims, conversion of benefits into annuities, redemptions and return on assets.

The estimates for these assumptions are based on the historical experience of ITAÚ UNIBANCO HOLDING, benchmarks and experience of the actuary, in order to comply with best market practices and the continuous review of the actuarial liability. The adjustments resulting from these continuous improvements, when necessary, are recognized in the statement of income for the corresponding period.

Additional information is described in Note 30.

2.3.2 Critical judgments in accounting policies

a) Goodwill

The impairment test for goodwill involves estimates and significant judgments, including the identification of cash generation units and the allocation of goodwill to such units based on the expectations of which ones will benefit from the acquisition. Determining the expected cash flows and a risk-adjusted interest rate for each unit requires that management exercises judgment and estimates. Annually submitted to the impairment test and, at December 31, 2015 and 2014, ITAÚ UNIBANCO HOLDING did not identify goodwill impairment losses.
2.4. Summary of main accounting practices

a) Consolidation

I. Subsidiaries

In accordance with IFRS 10, subsidiaries are all entities in which ITAÚ UNIBANCO HOLDING holds control. ITAÚ UNIBANCO HOLDING controls an entity when it is exposed to, or is entitled to, its variable returns derived from its involvement with such entity, and has the capacity to impact such returns.

Subsidiaries are fully consolidated as from the date in which ITAÚ UNIBANCO HOLDING obtains control and are no longer consolidated as from the date such control is lost.

On January 1, 2013, ITAÚ UNIBANCO HOLDING assessed its investments to determine whether the conclusions of consolidation in accordance with IFRS 10 were different from those in accordance with IAS 27 and SIC 12. The application of the standard did not have significant impacts.
The following table shows the main consolidated companies, which together represent over 95% of total consolidated assets, as well as the interests of ITAÚ UNIBANCO HOLDING in their voting capital at 12/31/2015 and 12/31/2014.

(*) Company merged in 01/31/2015 by Itaú Unibanco S.A. and Itaú BBA Participações S.A.

ITAÚ UNIBANCO HOLDING is committed to maintaining the minimum capital required by all these joint ventures, noteworthy is that for all FIC - Financeira Itaú CBD S.A Crédito. Financiamento e Investimento the minimum capital percentage is 25% higher than that required by the Central Bank of Brazil (Note 33).
II. Business combinations

Accounting for business combinations under IFRS 3 is only applicable when a business is acquired. Under IFRS 3, a business is defined as an integrated set of activities and assets that is conducted and managed for the purpose of providing a return to investors, or cost reduction or other economic benefits. In general, a business consists of inputs, processes applied to those inputs and outputs that are, or will be, used to generate income. If there is goodwill in a set of activities or transferred assets, this is presumed to be a business. For acquisitions that meet the definition of business, accounting under the purchase method is required.

The acquisition cost is measured at the fair value of the assets transferred, equity instruments issued and liabilities incurred or assumed at the exchange date, plus costs directly attributable to the acquisition. Acquired assets and assumed liabilities and contingent liabilities identifiable in a business combination are initially measured at fair value at the date of acquisition, regardless of the existence of non-controlling interests. The excess of the acquisition cost, plus non-controlling interests, if any, over the fair value of identifiable net assets acquired, is accounted for as goodwill.

The treatment of goodwill is described in Note 2.4k. If the cost of acquisition, plus non-controlling interests, if any, is lower than the fair value of identifiable net assets acquired, the difference is directly recognized in income.

For each business combination, the purchaser should measure any non-controlling interest in the acquired company at the fair value or amount proportional to its interest in net assets of the acquired company.

III. Transactions with non-controlling stockholders

IFRS 10 – “Consolidated financial statements” establishes that, changes in an ownership interest in a subsidiary, which do not result in a loss of control, are accounted for as capital transactions and any difference between the amount paid and the carrying amount of non-controlling stockholders is recognized directly in consolidated stockholders’ equity.

b) Foreign currency translation

I. Functional and presentation currency

The consolidated financial statements of ITAÚ UNIBANCO HOLDING are presented in Reais, which is its functional and presentation currency. For each subsidiary and investment in associates and joint ventures, ITAÚ UNIBANCO HOLDING defined the functional currency, as set forth in IAS 21.

The assets and liabilities of subsidiaries with a functional currency other than the Brazilian real are translated as follows:

- assets and liabilities are translated at the closing rate at the balance sheet date.
- income and expenses are translated at monthly average exchange rates.
- exchange differences arising from currency translation are recorded in other comprehensive income.

II. Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of income as part of foreign exchange results and exchange variations on transactions.

In the case of monetary assets classified as available-for-sale, the exchange differences resulting from a change in the amortized cost of the instrument are recognized in the income statement, while those resulting from other changes in the carrying amount, except impairment losses, are recognized in other comprehensive income until derecognition or impairment.
c) Cash and cash equivalents

ITAÚ UNIBANCO HOLDING defines cash and cash equivalents as cash and current accounts in banks (included in the heading cash and deposits on demand on the consolidated balance sheet), interbank deposits and securities purchased under agreements to resell that have original maturities of up to 90 days or less, as shown in Note 4.

d) Central Bank Compulsory deposits

The Central Banks of the countries in which ITAÚ UNIBANCO HOLDING operates currently impose a number of compulsory deposit requirements on financial institutions. Such requirements are applied to a wide range of banking activities and operations, such as demand, savings, and time deposits.

Compulsory deposits are initially recognized at fair value and subsequently at amortized cost, using the effective interest rate method as detailed in Note 2.4g VI.

e) Interbank deposits

ITAÚ UNIBANCO HOLDING recognizes its interbank deposits in the balance sheet initially at fair value and subsequently at the amortized cost using the effective interest method as detailed in Note 2.4g VI.

f) Securities purchased under agreements to resell and sold under repurchase agreements

ITAÚ UNIBANCO HOLDING has purchased securities with resale agreement (resale agreements), and sold securities with repurchase agreement (repurchase agreement) of financial assets. Resale and repurchase agreements are accounted for under Securities purchased under agreements to resell and Securities sold under repurchase agreements, respectively.

The amounts invested in resale agreement transactions and borrowed in repurchase agreement transactions are initially recognized in the balance sheet at the amount advanced or raised, and subsequently measured at amortized cost. The difference between the sale and repurchase prices is treated as interest and recognized over the life of the agreements using the effective interest rate method. Interest earned in resale agreement transactions and incurred in repurchase agreement transactions is recognized in Interest and similar income and Interest and similar expense, respectively.

The financial assets accepted as collateral in our resale agreements can be used by us, if provided for in the agreements, as collateral for our repurchase agreements or can be sold.

In Brazil, control over custody of financial assets is centralized and the ownership of investments under resale and repurchase agreements is temporarily transferred to the buyer. ITAÚ UNIBANCO HOLDING strictly monitors the fair value of financial assets received as collateral under our resale agreements and adjusts the collateral amount when appropriate.

Financial assets pledged as collateral to counterparties are also recognized in the consolidated financial statements. When the counterparty has the right to sell or re-pledge such instruments, they are presented in the balance sheet under the appropriate class of financial assets.

g) Financial assets and liabilities

In accordance with IAS 39, all financial assets and liabilities, including derivative financial instruments, shall be recognized in the balance sheet and measured based on the category in which the instrument is classified.

Financial assets and liabilities can be classified into the following categories:
• Financial assets and liabilities at fair value through profit or loss – held for trading
• Financial assets and liabilities at fair value through profit or loss – designated at fair value
• Available-for-sale financial assets
• Held-to-maturity financial assets
• Loans and receivables
• Financial liabilities at amortized cost

Classification of financial assets and liabilities depend on the purpose for which financial assets were acquired or financial liabilities were assumed. Management determines the classification of financial instruments at initial recognition.

ITAÚ UNIBANCO HOLDING classifies as loans and receivables the following classes of balance sheet headings: Cash and deposits on demand, Central Bank compulsory deposits (Note 2.4d), Interbank deposits (Note 2.4e), Securities purchased under agreement to resell (Note 2.4f), Loan operations (Note 2.4g VI) and Other financial assets (Note 2.4g IX).

Regular purchases and sales of financial assets are recognized and derecognized, respectively, on the trade date.

Financial assets are derecognized when rights to receive cash flows expire or when ITAÚ UNIBANCO HOLDING transfers substantially all risks and rewards of ownership, and such transfer qualifies for write-off in accordance with IAS 39 requirements. Otherwise, control should be assessed to determine whether the continuous involvement related to any retained control does not prevent write-off. Financial liabilities are derecognized when settled or extinguished. Financial liabilities are derecognized when discharged or extinguished.

Financial assets and liabilities are offset against each other and the net amount is reported in the balance sheet solely when there is a legally enforceable right to offset the recognized amounts and there is intention to settle them on a net basis, or simultaneously realize the asset and settle the liability.

I- Financial assets and liabilities at fair value through profit or loss - held for trading

These are financial assets and liabilities acquired or incurred principally for the purpose of selling them in the short term or when they are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent history of trading transactions.

Financial assets and liabilities included in this category are initially and subsequently recognized at fair value. Transaction costs are directly recognized in the Consolidated Statement of Income. Gains and losses arising from changes in fair value are directly included in “Net gain (loss) from investments in securities and derivatives”. Interest and similar income and expense are recognized in Interest and similar income and Interest and similar expense, respectively.

II- Financial assets and liabilities at fair value through profit or loss – designated at fair value

These are assets and liabilities designated at fair value through profit or loss upon initial recognition (fair value option). In accordance with IAS 39, the fair value option can only be applied if it reduces or eliminates accounting mismatches in income or when the financial instruments are part of a portfolio for which risk is managed and reported to Management based on its fair value or when these instruments consist of debt instruments and embedded derivatives that should otherwise be separated.

Assets and liabilities of this category are granted the same accounting treatment as those recorded in Financial assets and liabilities held for trading.

III- Derivatives

Derivatives are initially recognized on the date derivative contracts are entered into, and subsequently recorded at fair value. All derivatives are recognized as assets when the fair value is positive, and as liabilities when negative.
Certain derivatives embedded in other financial instruments are treated as separate derivatives, when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not recognized at fair value through profit or loss. These embedded derivatives are accounted for separately at fair value, with changes in fair value recognized in the consolidated statement of income in Net gain (loss) on investment securities and derivatives.

Derivatives can be designated as hedging instruments under hedge accounting and in the event they qualify, depending upon the nature of the hedged item, the method for recognizing gains or losses from changes in fair value will be different. These derivatives, which are used to hedge exposures to risk or modify the characteristics of financial assets and liabilities, and that meet IAS 39 criteria, are recognized as hedge accounting.

In accordance with IAS 39, to qualify for hedge accounting, all of the following conditions are met:

- at the inception of the hedge there is formal designation and documentation of the hedging relationship and the entity’s risk management objective and strategy for undertaking the hedge.
- the hedge is expected to be highly effective in offsetting changes in fair value or cash flows attributable to the hedged risk, consistent with the originally documented risk management strategy for that particular hedging relationship.
- for a cash flow hedge, a forecast transaction that is the subject of the hedge must be highly probable and must present an exposure to variations in cash flows that could ultimately affect profit or loss.
- the effectiveness of the hedge can be reliably measured, i.e. the fair value or cash flows of the hedged item that are attributable to the hedged risk and the fair value of the hedging instrument can be reliably measured.
- the hedge is assessed on an ongoing basis and it is determined that the hedge has in fact been highly effective throughout the periods for which the hedge was designated.

IAS 39 presents three hedge accounting categories: fair value hedge, cash flow hedge, and hedge of net investments in a foreign operation.

ITAÚ UNIBANCO HOLDING uses derivatives as hedging instruments under cash flow hedge strategies, fair value hedge and hedge of net investments, as detailed in Note 9.

**Fair value hedge**

For derivatives that are designated and qualify as fair value hedges, the following practices are adopted:

a) The gain or loss arising from the new measurement of the hedge instrument at fair value should be recognized in income; and

b) The gain or loss arising from the hedged item, attributable to the effective portion of the hedged risk, should adjust the book value of the hedged item and also be recognized in income.

When the derivative expires or is sold or the hedge no longer meets the accounting hedge criteria or the entity revokes the designation, the entity should prospectively discontinue the accounting hedge. In addition, any adjustment in the book value of the hedged item should be amortized in income.

**Cash flow hedge**

For derivatives that are designated and qualify as a cash flow hedge, the effective portion of derivative gains or losses are recognized in Other comprehensive income – Cash flow hedge, and reclassified to Income in the same period or periods in which the hedged transaction affects income. The portion of gain or loss on derivatives that represents the ineffective portion or the hedge components excluded from the assessment of effectiveness is recognized immediately in income. Amounts originally recorded in Other comprehensive income and subsequently reclassified to Income are recorded in the corresponding income or expense lines in which the related hedged item is reported.
When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting and also when ITAU UNIBANCO HOLDING redesignates a hedge, any cumulative gain or loss existing in Other comprehensive income is frozen and is recognized in income when the hedged item is ultimately recognized in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss recognized in Other Comprehensive Income is immediately transferred to the statement of income.

**Hedge of net investments in foreign operations**

A hedge of a net investment in a foreign operation, including hedge of a monetary item that is accounted for as part of the net investment, is accounted for in a manner similar to a cash flow hedge:

a) the portion of gain or loss on the hedge instrument determined as effective is recognized in other comprehensive income.

b) the ineffective portion is recognized in income.

Gains or losses on the hedging instrument related to the effective portion of the hedge which is recognized in comprehensive income are reclassified to the income statement upon the disposal of the investment in the foreign operation.

**IV - Available-for-sale financial assets**

In accordance with IAS 39, financial assets are classified as available-for-sale when in the Management's judgment they can be sold in response to or in anticipation of changes in market conditions, and that were not classified into the categories of financial assets at fair value through profit or loss, loans and receivables or held to maturity.

Available-for-sale financial assets are initially and subsequently recognized in the consolidated balance sheet at fair value, plus transaction costs. Unrealized gains and losses (except losses for impairment, foreign exchange differences, dividends and interest income) are recognized, net of applicable taxes, in Other comprehensive income. Interest, including the amortization of premiums and discounts, is recognized in the consolidated statement of income under Interest and similar income. The average cost is used to determine the realized Gains and losses on Disposal of available-for-sale financial assets, which are recorded in the consolidated statement of income under Net gain (loss) on financial assets and liabilities – Available-for-sale financial assets. Dividends on available-for-sale assets are recognized in the consolidated statement of income as Dividend income when ITAÚ UNIBANCO HOLDING is entitled to receive such dividends and inflow of economic benefits is probable.

At the balance sheet date, ITAÚ UNIBANCO HOLDING assesses whether there is evidence that a financial asset or a group of similar financial assets is impaired and, for equity instruments, a significant or prolonged decline in the fair value of the security below its cost is evidence of an impairment, resulting in the recognition of an impairment loss. If any impairment evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between acquisition cost and current fair value, less any impairment loss on that financial asset previously recognized in income, is recognized in the Consolidated statement of income as a reclassification adjustment from Other comprehensive income.

Both impairment of available-for-sale financial assets and reversal of this loss are recorded in the Consolidated statement of income.

**V- Held-to-maturity financial assets**

In accordance with IAS 39, the financial assets classified into the held-to-maturity category are non-derivative financial assets for which ITAÚ UNIBANCO HOLDING has the positive intention and ability to hold to maturity.
These assets are initially recognized at fair value, plus transaction costs, and subsequently measured at amortized cost, using the effective interest rate method. Interest income, including the amortization of premiums and discounts, is recognized in the consolidated statement of income under Interest and similar income.

Both impairment of held-to-maturity financial assets and reversal of this loss are recorded in the Consolidated statement of income.

VI- Loan operations

Loan operations are initially recognized at fair value, plus transaction costs and are subsequently measured at amortized cost using the effective interest rate method.

When calculating the effective interest rate, ITAÚ UNIBANCO HOLDING estimates cash flows considering all contractual terms of the financial instrument, but does not consider future credit losses. The calculation includes all commissions paid or received between parties to the contract, transaction costs, and all other premiums or discounts.

ITAÚ UNIBANCO HOLDING classifies a loan operation as on non-accrual status if the payment of the principal or interest has been in default for 60 days or more. In this case, accrual of interest is no longer recognized.

When a financial asset or group of similar financial assets is impaired and its carrying amount is reduced through an allowance for loan losses, the subsequent interest income is recognized on the reduced carrying amount using the interest rate used to discount the future cash flows for purposes of measuring the allowance for loan losses.

Both the credit risk and the finance areas are responsible for defining the methodologies used to measure the allowance for loan losses and for assessing changes in the provision amounts on a recurring basis.

These areas monitor the trends observed in allowance for loan losses by segment level, in addition to establishing an initial understanding of the variables that may trigger changes in the allowance for loan losses, the probability of default or the loss given default.

Once the trends have been identified and an initial assessment of the variables has been made at the corporate level, the business areas are responsible for further analyzing these observed trends at a detailed level and for each portfolio, in order to understand the underlying reasons for the trends observed and for deciding whether changes are required in our credit policies.

VII - Lease operations (as lessor)

When assets are subject to a finance lease, the present value of lease payments is recognized as a receivable in the consolidated balance sheet under Loan operations and Lease Operations.

Initial direct costs when incurred by ITAÚ UNIBANCO HOLDING are included in the initial measurement of the lease receivable, reducing the amount of income to be recognized over the lease period. Such initial costs usually include commissions and legal fees.

The recognition of interest income reflects a constant rate of return on the net investment of ITAÚ UNIBANCO HOLDING and is recognized in the consolidated statement of income under Interest and similar income.
VIII- Allowance for loan and lease losses

General

ITAÚ UNIBANCO HOLDING periodically assesses whether there is any objective evidence that a receivable or group of receivables is impaired. A receivable or group of receivables is impaired and there is a need for recognizing an impairment loss if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event (or events) has an impact on the estimated future cash flows that can be reliably estimated.

The allowance for loan and lease losses is recognized as probable losses inherent in the portfolio at the balance sheet date. The determination of the level of the allowance rests upon various judgments and assumptions, including current economic conditions, loan portfolio composition, prior loan and lease loss experience and evaluation of credit risk related to individual loans. Our process for determining the allowance for loan and lease losses includes Management's judgment and the use of estimates. The adequacy of the allowance is regularly analyzed by Management.

The criteria adopted by ITAÚ UNIBANCO HOLDING for determining whether there is objective evidence of impairment include the following:

- default in principal or interest payment.
- financial difficulties of the debtor and other objective evidence that results in the deterioration of the financial position of the debtor (for example, debt-to-equity ratio, percentage of net sales or other indicators obtained through processes adopted to monitor credit, particularly for retail portfolios).
- breach of loan clauses or terms.
- entering into bankruptcy.
- loss of competitive position of the debtor.

The estimated period between the loss event and its identification is defined by Management for each portfolio of similar receivables. Considering the representativeness of several homogeneous groups, management chose to use a twelve month period as being the most representative. For portfolios of loans that are individually evaluated for impairment this period is at most 12 months, considering the review cycle for each loan operation.

Assessment

ITAÚ UNIBANCO HOLDING first assesses whether objective evidence of impairment exists for receivables that are individually significant, and individually or collectively for receivables that are not individually significant.

To determine the amount of the allowance for individually significant receivables with objective evidence of impairment, methodologies are used that consider both the quality of the client and the nature of the transaction, including its collateral, to estimate the cash flows expected from these loans.

If no objective evidence of impairment exists for an individually assessed receivable, whether significant or not, the asset is included in a group of receivables with similar credit risk characteristics and collectively assessed for impairment. Receivables that are individually assessed for impairment and for which an impairment loss is recognized are not included in the collective assessment. The amount of loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset’s original effective interest rate.

For collectively assessed loans, the calculation of the present value of the estimated future cash flows for which there is collateral reflects the historical performance of the foreclosure and
recovery of fair value, considering the cash flows that may arise from foreclosure less costs for obtaining and selling that collateral.

For the purpose of a collective evaluation of impairment, receivables are grouped on the basis of similar credit risk characteristics. The characteristics are relevant to the estimation of future cash flows for such receivables by being indicative of the debtors’ ability to pay all amounts due, according to the contractual terms of the receivables being evaluated. Future cash flows in a group of receivables that are collectively evaluated for purposes of identifying the need for recognizing impairment are estimated on the basis of the contractual cash flows of the group of receivables and historical loss experience for receivables with similar credit risk characteristics. The historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

For individually significant receivables with no objective evidence of impairment, ITAÚ UNIBANCO HOLDING classifies these loans into certain rating categories based on several qualitative and quantitative factors applied through internally developed models. Considering the size and the different risk characteristics of each contract, the rating category determined according to internal models can be reviewed and modified by our Corporate Credit Committee, the members of which are executives and officers in corporate credit risk. ITAÚ UNIBANCO HOLDING estimates inherent losses for each rating category considering an internally developed approach for low-default portfolios, that uses our historical experience for building internal models, that are used both to estimate the PD (probability of default) and to estimate the LGD (loss given default.)

To determine the amount of the allowance for individually insignificant items loans are segregated into classes considering the underlying risks and characteristics of each group. The allowance for loan and lease losses is determined for each of those classes through a process that considers historical delinquency and loan loss experience over the most recent years.

Measurement

The methodology used to measure the allowance for loan and lease losses was developed internally by the credit risk and finance areas at the corporate level. In those areas and considering the different characteristics of the portfolios, different areas are responsible for defining the methodology to measure the allowance for each: Corporate (including loan operations with objective evidence of impairment and individually significant loan operations but with no objective evidence of impairment), Individuals, Small and Medium Businesses, and Foreign Units Latin America. Each of the four portfolio areas responsible for defining the methodology to measure the allowance for loan and lease losses is further divided into groups, including groups that develop the methodology and groups that validate the methodology. A centralized group in the credit risk area is responsible for measuring the allowance on a recurring basis following the methodologies developed and approved for each of the four areas.

The methodology is based on two components to determine the amount of the allowance: The probability of default by the client or counterparty (PD), and the potential economic loss that may occur in the event of default, being the debt that cannot be recovered (LGD) which are applied to the outstanding balance of the loan. Measurement and assessment of these risk components is part of the process for granting credit and for managing the portfolio. The estimated amounts of PD and LGD are measured based on statistical models that consider a significant number of variables which are different for each class and include, among others, income, equity, past loan experiences, level of indebtedness, economic sectors that affect collectability and other attributes of each counterparty and of the economic environment. These models are regularly updated for changes in economic and business conditions.

A model updating process is started when the modeling area identifies that it is not capturing significant effects of the changes of economic conditions, in the performance of the portfolio or when a change is made in the methodology for calculating the allowance for loan and lease losses. When a change in the model is made, the model is validated through back-testing and statistical methods are used to measure its performance through detailed analysis of its documentation, by describing step-by-step how the process is carried out. The models are validated by an area independent from the one developing it, by issuing a technical report on the assumptions used (integrity, consistency, and replicability of the bases) and on the mathematical
methodology used. The technical report is subsequently submitted to CTAM (Model assessment technical committee), which is the highest level of approval of model reviews.
Considering the different characteristics of the loans at each of the four portfolio areas (Corporate (with no objective evidence of impairment), Individuals, Small and Medium Businesses, and Foreign Units Latin America), different areas within the corporate credit risk area are responsible for developing and approving the methodologies for loans in each of those four portfolio areas. Management believes that the fact that different areas focus on each of the four portfolios results in increased knowledge, specialization and awareness of the teams as to the factors that are more relevant for each portfolio area in measuring the loan losses. Also considering such different characteristics and other factors, different inputs and information are used to estimate the PD and LGD as further detailed below:

- **Corporate (with no evidence of impairment)** - factors considered and inputs used are mainly the history of the customer relationship with us, the results of analysis of the customer’s accounting statements and the information obtained through frequent contacts with its officers, aiming at understanding the strategy and the quality of its management. Additionally, industry and macroeconomic factors are also included in the analysis. All those factors (which are quantitative and qualitative) are used as inputs to the internal model developed to determine the corresponding rating category. This approach is also applied to the corporate credit portfolio outside Brazil.

- **Individuals** – factors considered and inputs used are mainly the history of the customer relationship with us, and information available through credit bureaus (negative information).

- **Small / Medium Businesses** – factors considered and inputs used include, in addition to the history of the customer relationship and credit bureau information about the customer’s revenues, industry expertise, and information about its shareholders and officers, among others.

- **Foreign Units – Latin America** – considering the relative smaller size of this portfolio and its more recent nature, the models are simpler and use the past due status and an internal rating of the customer as main factors.

**Reversal, write-off, and renegotiation**

If, in a subsequent period, the amount of the impairment loss decreases and the decrease is objectively related to an event occurring after the impairment was recognized (such as an improvement in the debtor’s credit rating), the previously recognized impairment is reversed. The amount of reversal is recognized in the consolidated statement of Income under Expense for allowance for loan and lease losses.

When a loan is uncollectible, it is written-off in the balance sheet under allowance for loan and lease losses. Write-off as losses occur after 360 days of credits have matured or after 540 days for loans with maturities over 36 months.

In almost all cases for loan products, renegotiated loans require at least one payment to be made under the renegotiated terms in order for it to be removed from nonperforming and nonaccrual status. Renegotiated loans return to nonperforming and nonaccrual status when they reach 60 days past due under the renegotiated terms, which typically corresponds to the borrower missing two or more payments.
IX- Other financial assets

They are initially recognized at fair value and subsequently at amortized cost, using the effective interest rate method. The composition is presented in Note 20a.

Interest income is recognized in the consolidated statement of income under Interest and similar income.

X- Financial liabilities at amortized cost

They are initially recognized at fair value and subsequently at amortized cost, using the effective interest rate method. Interest expense is presented in the Consolidated Statement of Income under Interest and similar expense.

The following financial liabilities are presented in the consolidated balance sheet and recognized at amortized cost:

- Deposits (See Note 17).
- Securities sold under repurchase agreements (Note 2.4f).
- Funds from interbank markets (Note 19a).
- Funds from institutional markets (Note 19b).
- Liabilities for capitalization plans.
- Other financial liabilities (Note 20b).
h) Investments in associates and joint ventures

I – Associates

In conformity with IAS 28 - Investments in Associates and Joint Ventures, associates are companies in which the investor has a significant influence but does not hold control. Investments in these companies are initially recognized at cost of acquisition and subsequently accounted for using the equity method. Investments in associates and joint ventures include the goodwill identified upon acquisition, net of any cumulative impairment loss.

II – Joint arrangements

Before January 1, 2013, ITAÚ UNIBANCO HOLDING proportionally consolidated its interest held in joint ventures, as required by IAS 31 – Interests in Joint Ventures. From that date on, it adopted IFRS 11 – Joint arrangements, changing its accounting policy from interest in joint arrangements to the equity method.

ITAÚ UNIBANCO HOLDING has assessed the nature of its joint business and concluded that it has both joint operations and joint ventures. There was no change in the accounting treatment for joint operations. For joint ventures, ITAÚ UNIBANCO HOLDING adopted the new policy on interest in joint ventures, in accordance with the IFRS 11 transition provisions.

The effects arising from adopting IFRS 11, which gave rise to a change in the accounting policy, have not had significant impacts on the Consolidated financial statements of ITAÚ UNIBANCO HOLDING.

ITAÚ UNIBANCO HOLDING's share in profits or losses of its associates and joint ventures after acquisition is recognized in the consolidated statement of income. Its share of the changes in the reserves of corresponding stockholders’ equity of its associates and joint ventures is recognized in its own reserves of stockholders’ equity. The cumulative changes after acquisition are adjusted against the carrying amount of the investment. When the ITAÚ UNIBANCO HOLDING share of losses of an associates and joint ventures is equal or above its interest in the associates and joint ventures, including any other receivables, ITAÚ UNIBANCO HOLDING does not recognize additional losses, unless it has incurred any obligations or made payments on behalf of the associates and joint ventures.

Unrealized profits on transactions between ITAÚ UNIBANCO HOLDING and its associates and joint ventures are eliminated to the extent of the interest of ITAÚ UNIBANCO HOLDING. Unrealized losses are also eliminated, unless the transaction provides evidence of impairment of the transferred asset. The accounting policies on associates and joint ventures are consistent with the policies adopted by ITAÚ UNIBANCO HOLDING.

If the interest in the associates and joint ventures decreases, but ITAÚ UNIBANCO HOLDING retains significant influence or joint control, only the proportional amount of the previously recognized amounts in Other comprehensive income is reclassified in Income, when appropriate.

Gains and losses from dilution arising from investments in associates and joint ventures are recognized in the consolidated statement of income.

i) Lease commitments (as lessee)

As a lessee, ITAÚ UNIBANCO HOLDING has finance and operating lease agreements.
ITAÚ UNIBANCO HOLDING leases certain fixed assets, and those substantially holding the risks and benefits incidental to the ownership are classified as finance leases.

Each lease installment paid is allocated part to liabilities and part to financial charges, so that a constant rate is obtained for the outstanding debt balance. Corresponding obligations, net of future financial charges, are included in Other financial liabilities. Interest expenses are recognized in the Consolidated Statement of Income over the lease term, to produce a constant periodic interest rate on the remaining liabilities balance for each period.

Expenses related to operating leases are recognized in the consolidated statement of income, on a straight-line basis, over the period of lease.

When an operating lease is terminated before the end of the lease term, any payment to be made to the lessor as a penalty is recognized as an expense in the period the termination occurs.

j) Fixed assets

In accordance with IAS 16 – Property, plant and equipment, fixed assets are recognized at cost of acquisition less accumulated depreciation, which is calculated using the straight-line method and rates based on the estimated useful lives of these assets. These rates and additional details are presented in Note 15.

The residual values and useful lives of assets are reviewed and adjusted, if appropriate, at the end of each year.

ITAÚ UNIBANCO HOLDING reviews its assets in order to identify whether any indications of impairment exist. If such indications are identified, fixed assets are tested for impairment. In accordance with IAS 36 – Impairment of assets, impairment losses are recognized for the difference between the carrying and recoverable amount of an asset (or group of assets), in the consolidated statement of income. The recoverable amount of an asset is defined as the higher of its fair value less costs to sell and its value in use. For purposes of assessing impairment, assets are grouped at the lowest level for which independent cash flows can be identified (cash-generating units). The assessment may be made at an individual asset level when the fair value less the cost to sell may be reliably determined.

Gains and losses on disposals of fixed assets are recognized in the consolidated statement of income under Other income or General and administrative expenses.

k) Goodwill

In accordance with IFRS 3 (R) – “Business combinations”, goodwill may arise on an acquisition and represents the excess of the consideration transferred plus non-controlling interest over the net fair value of the net identifiable assets and contingent liabilities of the acquiree. Goodwill is not amortized, but its recoverable amount is tested for impairment annually or when there is any indication of impairment, using an approach that involves the identification of cash-generating units and estimates of fair value less cost to sell and/or value in use.

As defined in IAS 36, a cash-generating unit is the lowest identifiable group of assets that generates cash inflows that are independent of the cash inflows from other assets or groups of assets. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units that are expected to benefit from the business combination.

IAS 36 determines that an impairment loss shall be recognized for a cash-generating unit if the recoverable amount of the cash-generating unit is less than its carrying amount. The loss shall be allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit, and then to the other assets of the unit on a pro rata basis applied to the carrying amount of each asset. The loss cannot reduce the carrying amount of an asset below the higher of its fair value less costs to sell and its value in use. The impairment loss of goodwill cannot be reversed.
Goodwill arising from the acquisition of subsidiaries is presented in the Consolidated Balance Sheet under the line Goodwill.

Goodwill of associates and joint ventures is reported as part of investment in the consolidated balance sheet under Investments in associates and joint ventures, and the impairment test is carried out in relation to the total balance of the investments (including goodwill).

l) Intangible assets

Intangible assets are non-physical assets, including software and other assets, and are initially recognized at cost. Intangible assets are recognized when they arise from legal or contractual rights, their costs can be reliably measured, and in the case of intangible assets not arising from separate acquisitions or business combinations, it is probable that future economic benefits may arise from their use. The balance of intangible assets refers to acquired assets or those internally generated.

Intangible assets may have finite or indefinite useful lives. Intangible assets with finite useful lives are amortized using the straight-line method over their estimated useful lives. Intangible assets with indefinite useful lives are not amortized, but periodically tested in order to identify any impairment.

ITAÚ UNIBANCO HOLDING semi-annually assesses its intangible assets in order to identify whether any indications of impairment exist, as well as possible reversal of previous impairment losses. If such indications are found, intangible assets are tested for impairment. In accordance with IAS 36, impairment losses are recognized as the difference between the carrying and the recoverable amount of an asset (or group of assets), and recognized in the consolidated statement of income. The recoverable amount of an asset is defined as the higher of its fair value less costs to sell and its value in use. For purposes of assessing an impairment, assets are grouped into the minimum level for which cash flows can be identified. The assessment can be made at an individual asset level when the fair value less its cost to sell can be determined reliably.

As set forth in IAS 38, ITAÚ UNIBANCO HOLDING elected the cost model to measure its intangible assets after its initial recognition.

The breakdown of intangible assets is described in Note 16.

m) Assets held for sale

Assets held for sale are recognized in the balance sheet when they are actually repossessed or there is intention to sell. These assets are initially recorded at the lower of: (i) the fair value of the asset less the estimated selling expenses, or (ii) the carrying amount of the related asset held for sale.

n) Income tax and social contribution

There are two components of the provision for income tax and social contribution: current and deferred.

Current income tax expense approximates taxes to be paid or recovered for the applicable period. Current assets and liabilities are recorded in the balance sheet under Tax assets – income tax and social contribution - current and tax liabilities – income tax and Social contribution - current, respectively.

Deferred income tax and social contribution represented by deferred tax assets and liabilities are obtained based on the differences between the tax bases of assets and liabilities and the amounts reported in the financial statements at each year end. The tax benefit of tax loss carryforwards is recognized as an asset. Deferred tax assets are only recognized when it is probable that future taxable income will be available for offsetting. Deferred tax assets and liabilities are recognized in the balance sheet under Tax assets – Income tax and social contribution – Deferred and Tax liabilities – Income tax and social contribution - Deferred, respectively.

Income tax and social contribution expense is recognized in the consolidated statement of income under Income tax and social contribution, except when it refers to items directly recognized in Other comprehensive income, such as: deferred tax on fair value measurement of available-for-sale financial assets, and tax on cash flow hedges. Deferred taxes of such items are initially recognized in Other comprehensive income and subsequently recognized in Income together with the recognition of the gain / loss originally deferred.
Changes in tax legislation and rates are recognized in the consolidated statement of income under Income tax and social contribution in the period in which they are enacted. Interest and fines are recognized in the consolidated statement of income under General and administrative expenses. Income tax and social contribution are calculated at the rates shown below, considering the respective taxable bases, based on the current legislation related to each tax, which in the case of the operations in Brazil are for all the reporting periods as follows:

<table>
<thead>
<tr>
<th></th>

</tr>
</tbody>
</table>

(*) On October 06, 2015, Law No. 13,169, a conversion of Provisional Measure No. 675, which increased the Social Contribution tax rate from 15.00% to 20.00% until December 31, 2018, for financial institutions, insurance companies and credit card management companies, was introduced. For the other companies, the tax rate remains at 9.00%.

On May 14, 2014, Law No. 12,973 was enacted to change the federal tax legislation about IRPJ, CSLL, PIS and COFINS, which effects started on 01/01/2015, since ITAÚ UNIBANCO HOLDING did not exercise the option of advancing the effects pursuant to articles 75 and 96. Among other matters, said Law provides for:

- the revocation of the Transition Tax Regime – RTT, established by Law No. 11,638/07, amended by Law No. 11,941/09;
- taxation of legal entities domiciled in Brazil, in connection with the equity increase arising from the interest in profit earned abroad by subsidiaries and affiliates and profit earned by individuals resident in Brazil by means of a legal entity controlled abroad.

Said law has not had significant accounting effects on the consolidated financial statements of ITAÚ UNIBANCO HOLDING.

To determine the proper level of provisions for taxes to be maintained for uncertain tax positions, a two-phased approach was applied, according to which a tax benefit is recognized if it is more probable than not that a position can be sustained. The benefit amount is then measured to be the highest tax benefit which probability of realization is over 50%.

o) Insurance contracts and private pension

IFRS 4 – “Insurance contracts” defines insurance contracts as contracts under which the issuer accepts a significant insurance risk of the counterparty, by agreeing to compensate it if a specified uncertain future event adversely affects it.

At the time of the first-time adoption of IFRS, ITAÚ UNIBANCO HOLDING decided not to change its accounting policies for insurance contracts, which follow the accounting practices generally accepted in Brazil (“BRGAAP”).

Although investment agreements with discretionary participation characteristics are financial instruments, they are treated as insurance contracts, as established by IFRS 4, as well as those transferring a significant financial risk.

These agreements may be reclassified as insurance contracts after their initial classification should the insurance risk become significant.

Once the contract is classified as an insurance contract, it remains as such until the end of its life, even if the insurance risk is significantly reduced during such period, unless all rights and obligations are extinguished or expired.

Note 30 presents a detailed description of all products classified as insurance contracts.

Private pension plans

In accordance with IFRS 4, an insurance contract is one that exposes its issuer to a significant insurance risk. An insurance risk is significant only if the insurance event could cause an issuer to pay significant additional benefits in any scenario, except for those that do not have commercial substance.
Additional benefits refer to amounts that exceed those that would be payable if no insured event occurred.

Contracts that contemplate retirement benefits after an accumulation period (known as PGBL, VGBL and FGB) assure, at the commencement date of the contract, the basis for calculating the retirement benefit (mortality table and minimum interest). The contracts specify the annuity fees and, therefore, the contract transfers the insurance risk to the issuer at the commencement date, and they are classified as insurance contracts.

### Insurance premiums

Insurance premiums are recognized by issuing an insurance policy or over the period of the contracts in proportion to the amount of the insurance coverage. Insurance premiums are recognized as income in the consolidated statement of income.

If there is evidence of impairment losses with respect to receivables for insurance premiums, ITAÚ UNIBANCO HOLDING recognizes a provision, sufficient to cover this loss, based on the risk analysis of realization of insurance premiums receivable with installments overdue for over 60 days.

### Reinsurance

Reinsurance premiums are recognized over the same period in which the related insurance premiums are recognized in the consolidated statement of income.

In the ordinary course of business, ITAÚ UNIBANCO HOLDING reinsures a portion of the risks underwritten, particularly property and casualty risks that exceed the maximum limits of responsibility that we determine to be appropriate for each segment and product (after a study which considers size, experience, specificities, and the necessary capital to support these limits). These reinsurance agreements allow the recovery of a portion of the losses from the reinsurer, although they do not release the insurer from the main obligation as direct insurer of the risks contemplated in the reinsurance.

### Acquisition costs

Acquisition costs include direct and indirect costs related to the origination of insurance. These costs, except for the commissions paid to brokers and others, are expensed directly in income as incurred. Commissions, on the other hand, are deferred and expensed in proportion to the recognition of the premium revenue, i.e. over the period of the corresponding insurance contract.

### Liabilities

Reserves for claims are established based on historical experience, claims in process of payment, estimated amounts of claims incurred but not yet reported, and other factors relevant to the required reserve levels. A liability for premium deficiencies is recognized if the estimated amount of premium deficiencies exceeds deferred acquisition costs. Expenses related to recognition of liabilities for insurance contracts are recognized in the consolidated statement of income under Change in reserves for insurance and private pension.

### Embedded derivatives

We have not identified any embedded derivatives in our insurance contracts, which may be separated or measured at fair value in accordance with IFRS 4 requirements.

### Liability adequacy test

IFRS 4 requires that the insurance companies analyze the adequacy of their insurance liabilities in each reporting period through a minimum adequacy test. The liability adequacy test for IFRS was conducted by adopting the current actuarial assumptions for future cash flows of all insurance contracts in force on the balance sheet date.

Should the analysis show insufficiency, any deficiency identified will be immediately accounted for in income for the period.

The assumptions used to conduct the liability adequacy test are detailed in Note 30.
p) Capitalization plans

For regulatory purposes in Brazil they are regulated by the insurance regulator, these plans do not meet the definition of an insurance contract under IFRS 4, and therefore they are classified as a financial liability at amortized cost under IAS 39.

Revenue from capitalization plans is recognized during the period of the contract and measured as the difference between the amount deposited by the client and the amount that ITAÚ UNIBANCO HOLDING has to reimburse.
q) **Post-employments benefits**

ITAÚ UNIBANCO HOLDING is required to make contributions to government social security and labor indemnity plans, in Brazil and in other countries where it operates, which are expensed in the consolidated statement of income as an integral part of general and administrative expenses, when incurred.

Additionally, ITAÚ UNIBANCO HOLDING also sponsors Defined Benefit Plans and Defined Contribution Plans, accounted for in accordance with IAS 19 (R1) – “Employee benefits”.

**Pension plans - Defined benefit plans**

The liability (or asset, as the case may be) recognized in the Consolidated Balance Sheet with respect to the defined benefit plan corresponds to the present value of defined benefit obligations at the balance sheet date less the fair value of plan assets. The present value of defined benefit obligations is determined by discounting the estimated amount of future cash flows of benefit payments based on Brazilian government securities denominated in Reais and with maturity periods similar to the term of the pension plan liabilities. They are recognized in the Consolidated statement of income:

- current service cost – defined as the increase in the present value of obligations resulting from employee service in the current period.
- interest on the net amount of assets (liabilities) of defined benefit plans is the change, during the period, in the net amount recognized in assets and liabilities, due to the time elapsed, which comprises the interest income on plan assets, interest expense on the obligations of the defined benefit plan and interest on the asset ceiling effects.

Actuarial gains and losses arising from the non-adoption of the assumptions established in the latest evaluation, as compared to those effectively carried out or changes in such assumptions, are fully recognized in Other comprehensive income.

**Pension plans - defined contribution**

For defined contribution plans, contributions to plans made by ITAÚ UNIBANCO HOLDING, through pension plan funds, are recognized as an expense when due.

**Other post-employment benefit obligations**

Certain companies that merged into ITAÚ UNIBANCO HOLDING over the past few years were sponsors of post-employment healthcare benefit plans and ITAÚ UNIBANCO HOLDING is contractual committed to maintain such benefits over specific periods, as well as in relation to the benefits granted due to a judicial ruling.

These obligations are assessed annually by independent and qualified actuaries, and costs expected from these benefits are accumulated during the employment period and gains and losses arising from adjustments of practices and changes in actuarial assumptions are recognized in Stockholders’ equity, under Other comprehensive income, in the period they occurred.

r) **Share-based payment**

Share-based payment is accounted for in accordance with IFRS 2 - “Share-based payment” which requires the entity to measure the value of equity instruments granted, based on their fair value at the option grant date. This cost is recognized during the vesting period of the right to exercise the instruments.
The total amount to be expensed is determined by reference to the fair value of the options granted excluding the impact of any service and non-market performance vesting conditions (notably remaining an employee of the entity over a specified time period). The fulfillment of on-market vesting conditions is included in the assumptions about the number of options that are expected to be exercised. At the end of each period, ITAÚ UNIBANCO HOLDING revises its estimates of the number of options that are expected to be exercised based on non-market vesting conditions. It recognizes the impact of the revision of the original estimates, if any, in the consolidated statement of income, with a corresponding adjustment to stockholders’ equity.

When the options are exercised, the ITAÚ UNIBANCO HOLDING treasury shares are generally delivered to the beneficiaries.

The fair value of stock options is estimated by using option pricing models that take into account the exercise price of the option, the current stock price, the risk-free interest rate, the expected volatility of the stock price and the life of the option.

All stock based compensation plans established by ITAÚ UNIBANCO HOLDING correspond to plans that can be settled exclusively through the delivery of shares.

s) Financial guarantees

ITAÚ UNIBANCO HOLDING recognizes the fair value of the guarantees issued in the consolidated balance sheet under Other liabilities. Fair value is generally represented by the fee charged to client for issuing the guarantee. This amount at the issuance date is amortized over the life of the guarantee issued and recognized in the consolidated statement of income under Banking service fees.

After issuance, if based on the best estimate ITAÚ UNIBANCO HOLDING concludes that the occurrence of a loss regarding a guarantee issued is probable, and if the loss amount is higher than the initial fair value less cumulative amortization of the guarantee, a provision is recognized for such amount.

t) Provisions, contingent assets and contingent liabilities

These are assessed, recognized and disclosed in accordance with IAS 37. Contingent assets and contingent liabilities are rights and obligations arising from past events for which materialization depends on future events.

Contingent assets are not recognized in the consolidated financial statements, except when the Management of ITAÚ UNIBANCO HOLDING understands that realization is virtually certain which, generally corresponds to lawsuits with favorable rulings, in final and unappealable judgments, withdrawal from lawsuits as a result of a payment in settlement or as a result of an agreement to offset against an existing liability.

Contingent liabilities mainly arise from administrative proceedings and lawsuits, inherent in the ordinary course of business, filed by third parties, former employees and governmental bodies, in connection with civil, labor, and tax and social security claims.

These contingencies are evaluated based on Management’s best estimates, and are classified as:

- **Probable**: in which liabilities are recognized in the consolidated balance sheet under Provisions.
- **Possible**: which are disclosed in the Consolidated Financial Statements, but no provision is recorded.
- **Remote**: which require neither a provision nor disclosure.

Contingent liabilities recorded under Provisions and those disclosed as possible are measured using best estimates through the use of models and criteria which allow their appropriate measurement even if there is uncertainty as to their ultimate timing and amount, and the criteria are detailed in Note 32.
The amount of court escrow deposits is adjusted in accordance with current legislation.

Contingent liabilities guaranteed by indemnity clauses provided by third parties, such as in business combinations carried out before the transition date to IFRS, are recognized when a claim is asserted, and a receivable is recognized simultaneously subject to its collectability. For business combinations carried out after the transition date, indemnification assets are recognized at the same time and measured on the same basis as the indemnified item, subject to collectability or contractual limitations on the indemnified amount.

u) Capital

Common and preferred shares, which are equivalent to common shares but without voting rights are classified in Stockholders' equity. The additional costs directly attributable to the issue of new shares are included in Stockholders' equity as a deduction from the proceeds, net of taxes.

v) Treasury shares

Common and preferred shares repurchased are recorded in Stockholders' equity under Treasury shares at their average purchase price.

Shares that are subsequently sold, such as those sold to grantees under our share-based payment, are recorded as a reduction in treasury shares, measured at the average price of treasury stock held at such date.

The difference between the sale price and the average price of the treasury shares is recorded as a reduction or increase in Additional paid-in capital. The cancellation of treasury shares is recorded as a reduction in Treasury shares against Appropriated reserves, at the average price of treasury shares at the cancellation date.

w) Dividends and interest on capital

Minimum dividend amounts established in the bylaws are recorded as liabilities at the end of each year. Any other amount above the mandatory minimum dividend is accounted for as a liability when approved by stockholders at a Stockholders’ Meeting.

Interest on capital is treated for accounting purposes as a dividend, and it is presented as a reduction of stockholders' equity in the consolidated financial statements. The related tax benefit is recorded in the consolidated statement of income.

Dividends have been and continue to be calculated and paid based on the financial statements prepared under Brazilian accounting standards and regulations for financial institutions and not based on these consolidated financial statements prepared under IFRS.

Dividends and interest on capital are presented in Note 21.

x) Earnings per share

Earnings per share are computed by dividing net income attributable to the owners of ITAÚ UNIBANCO HOLDING by the weighted average number of common and preferred shares outstanding for each reporting year. Weighted average shares are computed based on the periods for which the shares were outstanding.

ITAÚ UNIBANCO HOLDING grants stock-based compensation whose dilutive effect is reflected in diluted earnings per share, with the application of the “treasury stock method”. Under the treasury stock method, earnings per share are calculated as if shares under stock-based compensation plans had been issued and as if the assumed proceeds were used to purchase shares of ITAÚ UNIBANCO HOLDING.

Earnings per share are presented in Note 28.
y) **Revenue from services**

Services related to current accounts are offered to clients either in formal packages or individually, and their income is recognized when these services are provided.

Revenue from certain services, such as fees from funds management, performance, collection for retail clients and custody, is recognized over the life of the related contracts on a straight-line basis.

The breakdown of the banking service fees is detailed in Note 24.

z) **Segment information**

Segment information is disclosed consistently with the internal report prepared for the Executive Committee, which makes the operational decisions of ITAÚ UNIBANCO HOLDING.

ITAÚ UNIBANCO HOLDING has three reportable segments: (i) Retail Banking (ii) Wholesale Banking and (iii) Activities with the Market + Corporation.

Segment information is presented in Note 34.
Note 3 – Business development

a) Acquisitions

Recovery do Brasil Consultoria S.A.

At December 31, 2015, ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A., entered into an agreement for purchase and sale and other covenants with Banco BTG Pactual S.A. (BTG) for acquisition of 81.94% interest in the capital of Recovery do Brasil Consultoria S.A. (Recovery), corresponding to BTG’s total interest in Recovery, for the amount of R$ 640.

In the same transaction, ITAÚ UNIBANCO HOLDING agreed on the acquisition of approximately 70% of the portfolio of R$ 38 billion in credit rights related to the recovery of portfolios held by BTG, for the amount of R$ 570.

Established in 2000 in Argentina and present in Brazil since 2006, Recovery is the market leader in the management of overdue receivables portfolio. Recovery’s activities consist in prospecting and assessing portfolios, structuring and managing operations, acting in all segments, from individual to corporate loans, with financial and non-financial institutions, and offering a competitive advantage to its clients.

Effective acquisitions and financial settlements will occur after the fulfillment of certain contractual conditions and obtainment of regulatory and government authorizations required.

The transaction will not have significant accounting effect on the results of ITAÚ UNIBANCO HOLDING.

ConectCar Soluções de Mobilidade Eletrônica S.A.

On October 21, 2015, ITAÚ UNIBANCO HOLDING, through its subsidiary Redecard S.A. (Rede), entered into a share purchase and sale commitment with Odebrecht Transport S.A. for the acquisition of 50% of capital stock of ConectCar Soluções de Mobilidade Eletrônica S.A. (ConectCar) for the amount of R$ 170.

ConectCar is an institution engaged in own payment arrangements and a provider of intermediation services for automatic payment of tolls, fuels and parking lots, ranked as the second largest company in the sector, currently operating in 12 States and in the Federal District. It was organized in 2012 as the result of a partnership between Odebrecht Transport S.A. and Ipiranga Produtos de Petróleo S.A., a company controlled by Ultrapar Participações S.A., which currently holds the remaining 50% of ConectCar’s capital stock.

The operation was approved by BACEN on December 23, 2015.

Governance will be shared with the Ultra group, and the effective acquisition and financial settlement will occur after the fulfillment of certain contractual conditions.

The transaction will not have significant accounting effect on the results of ITAÚ UNIBANCO HOLDING.

Itaú CorpBanca

On January 29, 2014, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaú Chile S.A. (BIC) entered into a Transaction Agreement with CorpBanca and its controlling shareholders (Corp Group) establishing the terms and conditions for the unification of operations of BIC and CorpBanca in Chile and the other jurisdictions in which CorpBanca operates.

The operation will be consummated through:

i. Capital increase in BIC in the amount of US$ 652 million to be made by ITAÚ UNIBANCO HOLDING or one of its subsidiaries.

ii. Merger of BIC into CorpBanca, with cancellation of BIC’s shares and issue of new shares by CorpBanca, at the estimated rate of 85,420.07 shares of CorpBanca for each 1 share of BIC, to be approved in the shareholders meeting of CorpBanca so that the interests in the bank resulting from the merger, which will be called Itaú CorpBanca, will be 33.58% for ITAÚ UNIBANCO HOLDING and 33.13% for Corp Group, and

iii. Subsequent integration of Itaú BBA Colômbia S.A. into the operations of Itaú CorpBanca or its subsidiaries.
Itaú CorpBanca will be controlled by ITAÚ UNIBANCO HOLDING, which will enter into a shareholders’ agreement with Corp Group when the operation is consummated. This agreement will entitle ITAÚ UNIBANCO HOLDING and Corp Group to appoint members for the Board of Directors of Itaú CorpBanca in accordance to their interests in capital stock, and this group of shareholders will have the privilege of electing the majority of members of the Board of Directors, and ITAÚ UNIBANCO HOLDING will be entitled to elect the majority of these members. The chairmen of the Boards of Directors of Itaú CorpBanca and its subsidiaries will be appointed by Corp Group, and their vice-chairmen by ITAÚ UNIBANCO HOLDING. The executives of Itaú CorpBanca and its subsidiaries will be proposed by ITAÚ UNIBANCO HOLDING and ratified by the Board of Directors of Itaú CorpBanca. The shareholders agreement will also set forth that Corp Group will be entitled to approve, together with ITAÚ UNIBANCO HOLDING, certain strategic matters of Itaú CorpBanca and it will include provisions on the transfer of shares between ITAÚ UNIBANCO HOLDING and Corp Group, and third parties.

Approvals for the merger were obtained from CorpBanca and BIC shareholders, and from all proper regulatory authorities in Chile, Brazil, Colombia and Panamá. However, as set forth in the amendment to the Transaction Agreement, celebrated on June 2, 2015, the parties agreed that the operation will be closed by May 2, 2016, when they will be fully prepared for the corporate reorganization process.

It is estimated that said transaction will not have significant accounting effects on the results of ITAÚ UNIBANCO HOLDING, which will consolidate Itaú CorpBanca after the closing of the operation.

MasterCard Brasil Soluções de Pagamento Ltda.

On March 13, 2015, o ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A., entered into an agreement with MasterCard Brasil Soluções de Pagamento Ltda. to create an alliance in the payment solutions market in Brazil.

The purposes of the operation are (a) to focus on the expansion of its issue and acquisition business, particularly related to the new payment solutions network, (b) to have access to new payment solutions technologies, (c) to obtain significant scale and efficiency gains, and (d) to benefit from MasterCard’s expertise in the management of payment solution brands.

The effectiveness of the alliance is subject to the satisfaction of certain conditions precedent and approval by proper regulatory authorities.

MaxiPago

On September 3, 2014, ITAÚ UNIBANCO HOLDING, through its subsidiary Redecard S.A. (Rede) entered into a share purchase agreement with the controlling shareholders of MaxiPago Serviços de Internet S.A., a gateway company – network interconnection for mobile electronic payments.

On the same date, subscription and payment of 13,336 shares (33.33%) and acquisition of 24,174 shares (41.67%) were carried out, so that Rede became the holder of 43,510 common shares, representing 75% of total voting capital of MaxiPago.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the operation was closed on January 8, 2015.

The difference between the amount paid and net assets at fair value resulted in the recognition of goodwill due to expected future profitability.

Tecnologia Bancária S.A. (TECBAN) – New Shareholders’ Agreement

On July 17, 2014, ITAÚ UNIBANCO HOLDING, together with other financial institutions, signed the New Shareholders’ Agreement, which came into effect as from the operation closing date.
In line with the global trend towards best practices, the agreement establishes that, approximately within 4 years, the Parties should replace part of their external ATM networks by Banco24Horas network, generating increased efficiency, greater quality and capillarity of customer service. In addition to the Parties, approximately 40 other banks are clients of TECBAN.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the operation was closed on November 14, 2014.

**MCC Securities e MCC Corredora de Bolsa**

On July 20, 2011, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaú Chile S.A. (BIC), entered into a share purchase agreement with MCC Inversiones Globales (MCC Inversiones) and MCC Beneficial Owners (Chilean individuals), for phased acquisition of total shares of MCC Securities.

On August 1, 2011, the parties entered into an agreement for phased acquisition of total shares of MCC Corredora de Bolsa.

On August 18, 2014, they entered into a new agreement for acquiring in advance the remaining shares of MCC Securities and MCC Corredora de Bolsa.

**BMG Seguradora S.A.**

On June 25, 2013, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaú BMG Consignado S.A., entered into a share purchase agreement with the controlling shareholders of Banco BMG S.A., for the acquisition of 99.996% of the shares of BMG Seguradora S.A., represented by 35,292,627 shares for the amount of R$ 88 thousand.

BMG Seguradora S.A. entered into an exclusivity agreement with Banco BMG S.A. and Itaú BMG Consignado for the distribution of insurance products to be linked to the products sold by these banks. The purpose of the acquisition is to expand the insurance activities of ITAÚ UNIBANCO HOLDING.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the transaction was closed on January 27, 2014.

The difference between the amount paid and net assets at fair value resulted in the recognition of goodwill due to expected future profitability.
### Citibank N.A. Uruguay Branch

On July 28, 2013, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaú Uruguay S.A. (BIU), entered into an agreement with Citibank N.A. Uruguay Branch, with rules for the acquisition of retail transactions in Uruguay.

As a result of this operation, BIU assumed a client portfolio related to retail transactions (current account, savings accounts and time deposits). The assets acquired involved mainly credit card transactions that Citibank developed in the country under Visa, Mastercard and Diners brands.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the operation was closed on December 31, 2013.

The difference between the amount paid and net assets at fair value resulted in the recognition of goodwill due to expected future profitability and intangible assets.

| Purchase price | 88 |
| (-) Fair value of identified assets and liabilities | (65) |
| (=) Goodwill | 23 |

### Credicard

On May 14, 2013, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaucard S.A., entered into a share and quota purchase agreement with Banco Citibank, for the acquisition of Banco Citicard S.A. and Citifinancial Promotora de Vendas Ltda., including the “Credicard” brand, for R$ 2,948. These entities were responsible for the offer and distribution of financial products and services of the “Credicard” brand, particularly personal loans and credit cards.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the operation was closed on December 20, 2013.

Due to this operation, ITAÚ UNIBANCO HOLDING fully consolidated Banco Citicard and Citifinancial Promotora de Vendas in its financial statements as from December 2013. On August 31, 2014, Banco Citicard was merged into Banco Itaucard S.A.

The difference between the amount paid and net assets at fair value resulted in the recognition of goodwill due to expected future profitability and intangible assets.

| Purchase price | 2,948 |
| (-) Fair value of identified assets and liabilities | (1,069) |
| (-) Brand | (27) |
| (+) Deferred Tax Liability | 11 |
| (=) Goodwill | 1,863 |
b) Partnerships and Associations

Association with Banco BMG S.A.

On July 9, 2012, ITAÚ UNIBANCO HOLDING entered into an Association Agreement with Banco BMG S.A. (BMG) aiming at the offering, distribution and sale of payroll loans through the organization of the financial institution Banco Itaú BMG Consignado S.A., in which ITAÚ UNIBANCO HOLDING held control with a 70% interest in total voting capital, and BMG held the remaining 30%. The capital subscribed by shareholders was R$ 1,000, proportionally to each interest.

ITAÚ UNIBANCO HOLDING contributed with its economic and financial capacity, administrative experience and controls, and BMG contributed with its commercial and operating competence, in addition to the technological platform required for the development of activities.

After the compliance with the conditions precedent and approval by proper regulatory authorities, the transaction was closed on January 7, 2013.

On April 29, 2014, the agreement establishing the unification of payroll loans business, concentrating the transactions at Itaú BMG Consignado, was entered into. Starting July 25, 2014 and during the term of the association, Itaú BMG Consignado is BMG’s exclusive channel for the offer of payroll loans in the Brazilian territory, subject to certain exceptions.

In consideration for the business unification, on July 25, 2014 BMG increased the capital of Itaú BMG Consignado by R$ 181 and, therefore, ITAÚ UNIBANCO HOLDING started to hold a 60% interest in the total voting capital and BMG started to hold the remaining 40%. The possibility of this unification had already been initially considered.

This transaction had no significant accounting effects on the results and ITAÚ UNIBANCO HOLDING continued to consolidate Itaú BMG Consignado in its financial statements.

Fiat Group Automobiles S.p.A. and Fiat Automóveis S.A.

On August 20, 2013, ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A., renewed the commercial cooperation agreement maintained with Fiat Group Automobiles S.p.A. and Fiat Automóveis S.A. This agreement sets forth exclusivity for the offer of financing in promotional campaigns of car maker Fiat for the sale of new cars and exclusive use of Fiat brand in activities related to vehicle financing.

The operation did not have significant accounting effects on the financial statements of ITAÚ UNIBANCO HOLDING.
c) Disposals

Major Risk Insurance Operation

On July 4, 2014, ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A., entered into a share purchase agreement with ACE Ina International Holdings Ltd. (ACE), through which the former undertook to sell 100% of its interest in Itaú Seguros Soluções Corporativas S.A. (ISSC).

ISSC held the major risks operations of ITAÚ UNIBANCO HOLDING, which clients were middle-market and large companies with policies with high amounts insured.

After the compliance with the conditions precedent and approval by proper regulatory authorities, ACE paid R$ 1.5 billion to ITAÚ UNIBANCO HOLDING and its subsidiaries, through ISSC. On October 31, 2014, ISSC transferred the shares upon financial settlement by ACE, updating the price of operation considering the shareholders equity position on the operation closing date, in the amount of R$ 379.

This transaction is linked with ITAÚ UNIBANCO HOLDING’s strategy of selling retail personal and property insurance, typically related to retail banking.

Major risks operations of ITAÚ UNIBANCO HOLDING were classified in the “Retail Banking” segment in the financial statements.

Via Varejo

On October 1, 2014, ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Seguros S.A., received from Via Varejo the amount of R$ 584 due to the early termination of operating agreements related to the offer of extended warranty insurance in Ponto Frio and Casas Bahia stores. The amount received refers substantially to the refund of amounts disbursed under contractual terms, duly restated.

The operation had no relevant accounting effects on the financial statements of ITAÚ UNIBANCO HOLDING.
Note 4 - Cash and cash equivalents

For purposes of consolidated statements of cash flows, Cash and cash equivalents in this note comprises the following items:

</tbody>
</table>

Financial assets held for trading include assets with a fair value of R$ 117,128 (R$ 97,184 at 12/31/2014) that belong to investment funds wholly owned by Itaú Vida e Previdência S.A. The return of those assets (positive or negative) is fully transferred to customers of our PGBL and VGBL private pension plans whose premiums (less fees charged by us) are used by our subsidiary to purchase quotas of those investment funds.

b) Financial assets designated at fair value through profit or loss are presented in the following table:

Note 8 – Derivatives

ITÁU UNIBANCO HOLDING enters into derivative financial instruments with various counterparties to manage its overall exposures and to assist its customers in managing their own exposures.

**Futures** – Interest rate and foreign currency futures contracts are commitments to buy or sell a financial instrument at a future date, at a contracted price or yield and may be settled in cash or through delivery. The notional amount represents the face value of the underlying instrument. Commodity futures contracts or financial instruments are commitments to buy or sell commodities (mainly gold, coffee and orange juice), at a future date, at a contracted price, which are settled in cash. The notional amount represents the quantity of such commodities multiplied by the future price at the contract date. Daily cash settlements of price movements are made for all instruments.

**Forwards** – Interest forward contracts are agreements to exchange payments on a specified future date, based on a market change in interest rates from trade date to contract settlement date. Foreign exchange forward contracts represent agreements to exchange the currency of one country for the currency of another country at an agreed price, at an agreed settlement date. Financial instrument forward contracts are commitments to buy or sell a financial instrument on a future date at a contracted price and are settled in cash.

**Swaps** – Interest rate and foreign exchange swap contracts are commitments to settle in cash at a future date or dates, based on differentials between specified financial indices (either two different interest rates in a single currency or two different rates each in a different currency), as applied to a notional principal amount. Swap contracts presented in Other in the table below correspond substantially to inflation rate swap contracts.

**Options** – Option contracts give the purchaser, for a fee, the right, but not the obligation, to buy or sell within a limited time a financial instrument including a flow of interest, foreign currencies, commodities, or financial instruments at a contracted price that may also be settled in cash, based on differentials between specific indices.

**Credit Derivatives** – Credit derivatives are financial instruments with value relating to the credit risk associated to the debt issued by a third party (the reference entity), which permits that one party (the purchaser of the hedge) transfers the risk to the counterparty (the seller of the hedge). The seller of the hedge should make payments as set forth in the contract when the reference entity undergoes a credit event, such as bankruptcy, default or debt restructuring. The seller of the hedge receives a premium for the hedge, but, on the other hand, assumes the risk that the underlying asset referenced in the contract undergoes a credit event, and the seller would have to make the payment to the purchaser of the hedge, which could be the notional amount of the credit derivative.

The total value of margins pledged in guarantee by ITÁU UNIBANCO HOLDING was R$ 7,757 (R$ 3,826 at 12/31/2014) and was basically comprised of government securities.

a) Information on credit derivatives

ITAÚ UNIBANCO HOLDING buys and sells credit protection mainly related to securities of Brazilian listed companies in order to meet the needs of its customers. When ITAÚ UNIBANCO HOLDING sells contracts for credit protection, the exposure for a given reference entity may be partially or totally offset by a credit protection purchase contract of another counterparty for the same reference entity or similar entity. The credit derivatives for which ITAÚ UNIBANCO HOLDING is protection seller are credit default swaps, total return swaps and credit-linked notes.

Credit Default Swaps – CDS

CDS are credit derivatives in which, upon a credit event related to the reference entity pursuant to the terms of the contract, the protection buyer is entitled to receive, from the protection seller, the amount equivalent to the difference between the face value of the CDS contract and the fair value of the liability on the date the contract was settled, also known as the recovered amount. The protection buyer does not need to hold the debt instrument of the reference entity for it to receive the amounts due pursuant to the CDS contract terms when a credit event occurs.

Total Return Swap – TRS

TRS is a transaction in which a party swaps the total return of a reference entity or of a basket of assets for regular cash flows, usually interest and a guarantee against capital loss. In a TRS contract, the parties do not transfer the ownership of the assets.

The table below presents the portfolio of credit derivatives in which ITAÚ UNIBANCO HOLDING sells protection to third parties, by maturity, and the maximum potential of future payments, gross of any guarantees, as well as its classification by instrument, risk and reference entity.

ITAÚ UNIBANCO HOLDING assesses the risk of a credit derivative based on the credit ratings attributed to the reference entity by independent credit rating agencies. Investment grade are those entities for which credit risk is rated as Baa3 or higher, as rated by Moody's, and BBB- or higher, according to the ratings of Standard & Poor's and Fitch Ratings. The maximum potential loss that may be incurred with the credit derivative is based on the notional amount of the derivative. ITAÚ UNIBANCO HOLDING believes, based on its historical experience, that the amount of the maximum potential loss does not represent the actual level of loss. This is so because, should there be an event of loss, the amount of maximum potential loss should be reduced from the notional amount by the recoverable amount.
The credit derivatives sold are not covered by guarantees, and during this period, ITAÚ UNIBANCO HOLDING has not incurred any loss related to credit derivative contracts.

The following table presents the notional amount of purchased credit derivatives whose underlying amounts are identical to those for which ITAÚ UNIBANCO HOLDING operates as seller of the credit protection.

<table>
<thead>
<tr>

b) Financial instruments subject to offsetting, enforceable master netting arrangements and similar agreements

The following tables set forth the financial assets and liabilities that are subject to offsetting, enforceable master netting arrangements, as well as how these financial assets and liabilities have been presented in ITAÚ UNIBANCO HOLDING’s financial statements. These tables also reflect the amounts of collateral pledged or received in relation to financial assets and liabilities subject to enforceable arrangements that have not been presented on a net basis in accordance with IAS 32.

Financial assets subject to offsetting, enforceable master netting arrangements and similar agreements:

<table>
<thead>
<tr>
<th>12/31/2015</th>
<th>Gross amount of recognized financial assets (1)</th>
<th>Gross amount offset in the statement of financial position</th>
<th>Net amount of financial assets presented in the statement of financial position</th>
<th>Related amounts not offset in the statement of financial position (2)</th>
<th>Net amount</th>
</tr>
</thead>
<tbody>
<tr>

<td>-</td>
<td>336,643</td>
<td>(22,158)</td>
<td>-</td>
</tr>
<tr>
<td>Derivatives</td>
<td>31,071</td>
<td>-</td>
<td>31,071</td>
<td>(8,150)</td>
<td>(24)</td>
</tr>
</tbody>
</table>

(1) Includes amounts of master offset agreements and other such agreements, both enforceable and unenforceable.
(2) Limited to amounts subject to enforceable master offset agreements and other such agreements.
(3) Includes amounts subject to enforceable master offset agreements and other such agreements, and guarantees in financial instruments.

Financial assets and financial liabilities are offset in the balance sheet only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derivatives and repurchase agreements not set off in the balance sheet relate to transactions in which there are enforceable master netting agreements or similar agreements, but the offset criteria have not been met in accordance with paragraph 42 of IAS 32 mainly because ITAÚ UNIBANCO HOLDING has no intention to settle on a net basis, or realize the asset and settle the liability simultaneously.
Note 9 – Hedge accounting

There are three types of hedge relations: Fair value hedge, Cash flow hedge, and Hedge of net investment in foreign operations.

Cash flow hedge

To hedge the variation of future cash flows of interest payment and receipts and exposure to futures interest rate, ITAÚ UNIBANCO HOLDING uses futures contracts traded at BM&FBOVESPA and Chicago Stock Exchange, related to certain fixed assets and liabilities, denominated in Reais and Dollars, futures Euro-Dollar and interest rate swaps, related to redeemable preferred shares, denominated in Dollars, issued by one of our subsidiaries, DDI Futures contracts, traded on BM&FBOVESPA, related to highly probable forecast transactions denominated in Dollars and NDF (Non Deliverable Forward) contracts traded in the over-the-counter market, related to highly probable forecast transactions not accounted for.

Under a DI Futures contract, a net payment (receipt) is made for the difference between an amount multiplied by the CDI rate and an amount computed and multiplied by a fixed rate. Under an interest rate swap and futures Euro-Dollar, a net payment (receipt) is made for the difference between an amount computed multiplied by the LIBOR rate and the an amount computed and multiplied by a fixed rate. In DDI Future contracts, NDF and Forwards, the gain (loss) on exchange variation is computed as the difference between two periods of market quotation between the US Dollar and the contracted currency.

The cash flow hedge strategies of ITAÚ UNIBANCO HOLDING consist of a hedge of exposure to variations in cash flows, payment of interest and exposure to interest rate, which are attributable to changes in interest rates related to assets and liabilities recognized and changes in interest rates of unrecognized assets and liabilities.

ITAÚ UNIBANCO HOLDING has applied cash flow hedge strategies as follows:

- Hedge of time deposits and repurchase agreements: hedge of the variability in cash flows of interest payments resulting from changes in the CDI interest rate.
- Hedge of redeemable preferred shares: hedge of the variability in cash flows of interest payments resulting from changes in the LIBOR interest rate.
- Hedge of subordinated certificates of deposit (CDB): hedge of the variability in the cash flows of interest payments resulting from changes in the CDI interest rate.
- Hedge of highly probable forecast transactions: Protecting the risk associated to variation in the amount of commitments, when measured in Reais (parent company’s functional currency) arising from variations in foreign exchange rates.
- Hedge of Syndicated Loan: hedge the variability in cash flow of interest payments resulting from changes in the LIBOR interest rate.
- Hedge of asset transactions: to hedge the variations in cash flows of interest receipts resulting from changes in the CDI rate.

To evaluate the effectiveness and to measure the ineffectiveness of such strategies, ITAÚ UNIBANCO HOLDING uses the hypothetical derivative method. The hypothetical derivative method is based on a comparison of the change in the fair value of a hypothetical derivative with terms identical to the critical terms of the variable-rate liability, and this change in the fair value of a hypothetical derivative is considered a proxy of the present value of the cumulative change in the future cash flow expected for the hedged liability.

All hedge relationships were designated between 2008 and 2015. Periods in which expected cash flows should be paid and affect the income statement are as follows:

- Hedge of time deposits and agreements to resell: interest paid/received daily.
- Hedge of redeemable preferred shares: interest paid/received every half year.
- Hedge of highly probable forecast transactions: foreign exchange amount paid / received on future dates.
- Hedge of Syndicated Loan: interest paid/received daily.
- Hedge of asset transactions: interest paid/received monthly.

Hedge of net investment in foreign operations

ITAÚ UNIBANCO HOLDING strategies of net investments in foreign operations consist of a hedge of the exposure in foreign currency arising from the functional currency of the foreign operation, with respect to the functional currency of the head office.
To hedge the changes of future cash flows of exchange variation of net investments in foreign operations, ITAÚ UNIBANCO HOLDING uses DDI Futures contracts traded at BM&FBOVESPA, Financial Assets and Forward contracts or NDF contracts entered into by our subsidiaries abroad.

In DDI Future contracts, the gain (loss) on exchange variation is computed as the difference between two periods of market quotation between the US Dollar and Real. In the Forward or NDF contracts and Financial Assets, the gain (loss) on exchange variation is computed as the difference between two periods of market quotation between the functional currency and the US Dollar.

ITAÚ UNIBANCO HOLDING applies the hedge of net investment in foreign operations as follows:

- To hedge the risk of variation in the investment amount, when measured in Brazilian Reais (the head office’s functional currency), arising from changes in exchange rates between the functional currency of the investment abroad and the Brazilian Real.

To evaluate the effectiveness and to measure the ineffectiveness of such strategies, ITAÚ UNIBANCO HOLDING uses the Dollar Offset Method. The Dollar Offset Method is based on a comparison of the change in fair value (cash flow) of the hedge instrument, attributable to changes in exchange rate and gain (loss) arising from the variation in exchange rates, on the amount of investment abroad designated as a hedged item.

Hedge relationships were designated in 2011 and 2012 and the hedge instruments will mature on the sale of investments abroad, which will be in the period when the cash flows of exchange variation are expected to occur and affect the statement of income.

**Fair value hedge**

The fair value hedge strategy of ITAÚ UNIBANCO HOLDING consists in hedging the exposure to variation in fair value, in the receipt and payment of interest related to recognized assets and liabilities.

To hedge the market risk variation in the receipt and payment of interest, ITAÚ UNIBANCO HOLDING uses interest rate swap contracts related to prefixed assets and liabilities expressed in UF (Chilean Unit of Accounts - CLF), and Euros and US Dollars, issued by subsidiaries in Chile and London, respectively.

Under an interest rate swap contract, net receipt (payment) is made for the difference between the amount computed and multiplied by variable rate and an amount computed and multiplied by a fixed rate.

ITAÚ UNIBANCO HOLDING has applied fair value hedge as follows:

- To protect the risk of variation in the fair value of receipt of interest resulting from variations in the fair value of variable rates involved.
- To hedge the variations in cash flows of interest receipts resulting from changes in the CDI rate.

To evaluate the effectiveness and to measure the ineffectiveness of such strategy, ITAÚ UNIBANCO HOLDING uses the percentage approach and dollar offset method:

- The percentage approach is based on the calculation of change in the fair value of the reviewed estimate for the hedged position (hedge item) attributable to the protected risk versus the change in the fair value of the hedged derivative instrument.
- The dollar offset method is calculated based on the difference between the variation of the fair value of the hedging instrument and the variation in the fair value of the hedged item attributed to changes in the interest rate.

Hedge relationships were designated between 2012 and 2014, and maturities of related swaps will occur between 2016 and 2030. Receipts (payments) of interest flows are expected to occur on a monthly basis, and they will affect the statement of income.
Following we present gains (or losses) of the effective and ineffective portions of the strategies of cash flow hedge, hedge of net investment in foreign operations and fair value hedge.

a) Cash flow hedge

<table>

</tbody>
</table>

The effective portion is recognized in the stockholders’ equity, under other comprehensive income and the ineffective portion is recognized in the statement of income under net gain (loss) on investment securities and derivatives.

To hedge future cash flows of highly probable forecast transactions, arising from futures contracts in foreign currency, against the exposure to future interest rate, ITAÚ UNIBANCO HOLDING negotiated DDI Futures contracts on BM&FBovespa and NDF (Non Deliverable Forward) contracts traded in the over-the-counter market. During the second quarter of 2015, part of the flow of these agreements was realized, and, accordingly, Asset Valuation Adjustment was reclassified and included in the deemed cost of assets related to Hedge of Highly Probable Forecast Transaction.

At 12/31/2015, the gain (loss) on cash flow hedge expected to be reclassified from Comprehensive Income to Income in the following 12 months is R$ 452 (R$ (213) at 12/31/2014 and R$ (117) at 12/31/2013).

b) Hedge of a net investment in foreign operations

</tbody>
</table>

The effective portion is recognized in the stockholders’ equity, under other comprehensive income and the ineffective portion is recognized in the statement of income under net gain (loss) on investment securities and derivatives.

DDI Futures is a futures contract in which participants may trade a clean coupon for any period between the first maturity of the futures contract of foreign currency coupon (DDI) and a later maturity.

NDF (Non Deliverable Forward), or Forward Contract of Currency without Physical Delivery is a derivative traded on over-the-counter market, which has the foreign exchange rate of a given currency as its subject.

c) Fair value hedge

The breakdown of the Loan and Lease Operations Portfolio by debtor’s industry is evidenced in Note 36 item 5.1. Maximum exposure of Financial Assets segregated by business sector.

The accretion of the net present value of impaired loan operations and lease operations and the respective allowance for loan and lease losses are not presented using their gross amounts in the statement of income but on a net basis within interest and similar income. If they were presented at gross amounts, there would be an increase of R$ 1,882, R$ 1,623 and R$ 1,681 in interest and similar income as of 12/31/2015, 12/31/2014 and 12/31/2013, respectively, with the same impact on the allowance for loan and lease losses expenses.
b) Allowance for loan and lease losses

The changes in the allowance for loan and lease losses are shown in the table below:

(*) As detailed in Note 2.4.g.VIII, corporate loans are first evaluated on an individual basis. In the event there is no objective indication of impairment, these are subsequently evaluated on an aggregate basis in accordance with the characteristics of the operation. As a result, an allowance for loan and lease losses for corporate loans is recognized, both in the individual and the aggregate evaluation.
c) Present value of lease operations

Below is the analysis of the present value of minimum future payments receivable from finance leases by maturity basically composed of individual operations - vehicles:

(a) For purposes of recording the participation in earnings, at 12/31/2015 the position at 11/30/2015 was used and at 12/31/2014 the position at 11/30/2014 was used, in accordance with IAS 27.
(b) For purposes of market value, the quoted share price of Porto Seguro S.A. was taken into account. The investment included the amounts of R$ 776 at 12/31/2015 and R$ 791 at 12/31/2014 that correspond to the difference between the interest in the net assets at fair value of Porto Seguro Itaú Unibanco Participações S.A. and the investment book value.
(c) In May 2012, Itaú Unibanco S.A. acquired 137,004,000 common shares of BSF Holding S.A. (parent company of Banco Carrefour) for R$ 816 which corresponds to 49% of interest in its capital. The investment amount includes R$ 583 at 12/31/2015 which correspond to goodwill.
(d) Previously accounted for as a financial instrument. As from the 4th quarter of 2013, after completing the privatization process, ITAÚ UNIBANCO HOLDING started to exercise a significant influence over IRB. Accordingly, as from this date, the investment has been accounted for under the equity method.
(e) At 12/31/2015, includes interest in total capital and voting capital of the following companies: Compañía Uruguaya de Medios de Procesamiento S.A. (38.39% total and voting capital), Rias Redbanc S.A. (25% total and voting capital; 20% at 12/31/2014), Tecnología Bancaria S.A. (24.91% total and voting capital), Latosol Empreendimentos e Participações Ltda (32.11% total and voting capital) company settled in 12/30/2014.
(f) At 12/31/2015, includes interest in total capital and voting capital of the following companies: Olimpia Promoção e Serviços S.A. (50% total and voting capital) and includes income not arising from profit subsidiaries.
(g) Disclosed only for public companies.
(h) The total investment was purchased in August 2014. – Note 3a.

At 12/31/2015, ITAÚ UNIBANCO HOLDING receives / recognizes dividends and interest on capital of the unconsolidated companies being the main Porto Seguro Itaú Unibanco Participações S.A. in the amount of R$ 240 (R$ 336 at 12/31/2014 and R$ 175 at 12/31/2013); IRB - Brasil Resseguros S.A. in the amount of R$ 73 (R$ 46 at 12/31/2014) and BSF Holding S.A. in the amount of R$ 98.
Note 14 – Lease commitments as lessee

a) Finance lease

ITAÚ UNIBANCO HOLDING is the lessee in finance lease contracts of data processing equipment, with the option of purchase or extension, without contingent rental payments or imposed restrictions. The net carrying amount of these assets is R$ 517 (R$ 804 at 12/31/2014).

The table below shows the total future minimum payments:

<table>
<thead>
<tr>
<th></th>
<th>12/31/2015</th>
<th>12/31/2014</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Total future minimum payments</td>
<td>517</td>
<td>804</td>
</tr>
</tbody>
</table>

The investees do not have contingent liabilities to which ITAÚ UNIBANCO HOLDING is significantly exposed.

b) Operating leases

ITAÚ UNIBANCO HOLDING leases many properties, for use in its operations, under standard real estate leases that normally can be cancelled at its option and include renewal options and escalations clauses. No lease agreement imposes any restriction on our ability to pay dividends, enter into further lease agreements or engage in debt or equity financing transactions, and there is no contingent payments related to the agreements.

The expenses related to operating lease agreements recognized under General and Administrative Expenses total R$ 1,102 from 01/01 to 12/31/2015 (R$ 1,018 from 01/01 to 12/31/2014 and R$ 933 from 01/01 to 12/31/2013).

ITAÚ UNIBANCO HOLDING has no relevant sublease contracts.

Minimum payments of initiated and remaining lease agreements with non-cancelable clauses are as follows:

<table>

<td>447</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total</td>
<td>412</td>
<td>520</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The effect of the changes in credit risk of these instruments is not significant at 12/31/2015 and 12/31/2014.

For shares, in view of the characteristics of the instrument, there is no definite value to be paid at the maturity date. For debt securities, the amount to be paid at maturity comprises several exchange rates and indices, and there is no contractual amount for settlement.

The fair value of financial liabilities held for trading by maturity is as follows:

<table>
<thead>
<tr>
<th></th>
<th>12/31/2015</th>
<th></th>
<th>12/31/2014</th>
<th></th>
</tr>
</thead>
<tbody>

</tbody>
</table>

(*) It includes R$ 152,215 (R$ 139,910 at 12/31/2014) related to Debentures of own issue.

Funding for import and export financing represents credit facilities available for financing of imports and exports of Brazilian companies, in general denominated in foreign currency. The interest rate for each one of the operations (p.a.) is presented in the table below:

<table>
<thead>
<tr>
<th>Brazil</th>
<th>Foreign</th>
</tr>
</thead>
<tbody>
<tr>
<td>Securities sold under repurchase agreements</td>
<td>49% of CDI to 17.36%</td>
</tr>
<tr>
<td>Mortgage notes</td>
<td>-</td>
</tr>
<tr>
<td>Real estate credit bills</td>
<td>81% to 100% of CDI</td>
</tr>
<tr>

<tr>
<td>On-lending - domestic</td>
<td>2.5% to 14.5%</td>
</tr>
<tr>
<td>Liabilities from transactions related to credit assignments</td>
<td>6.38% to 13.17%</td>
</tr>
</tbody>
</table>

In “Securities sold under repurchase agreements”, we present the liabilities in transactions in which ITAÚ UNIBANCO HOLDING sells to customers in exchange for cash debt securities issued by its consolidated subsidiaries previously held in treasury, and where it undertakes to repurchase them at any time after the sale up to a repurchase deadline, at which time they must be repurchased by ITAÚ UNIBANCO HOLDING. The repurchase price is computed as the price paid on the sale date plus interest at rates ranging from 49% CDI to 17.36%. The deadline for repurchase expires in January 2027.

b) Institutional market debt

The table below presents the breakdown of funds obtained in Institutional markets:

<table>
<thead>
<tr>
<th>12/31/2015</th>
<th>12/31/2014</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total</strong></td>

(1) There were no impairment losses for other financial assets in these periods.

(2) The Salary Variation Compensation Fund – FCVS was established through Resolution No. 25, of June 16, 1967, of the Board of the former BNH (National Housing Bank), and its purpose is to settle balances remaining after the end of real estate financing contracted up to March 1990, relating to agreements financed under the SFH (National Housing System), and provided that they are covered by FCVS.

Note 21 – Stockholders’ equity

a) Capital

The Extraordinary Stockholders’ Meeting held on April 29, 2015 approved an increase of subscribed and paid-up capital by R$ 10,148, with the capitalization of the amounts recorded in Revenue Reserve – Statutory Reserve, with a 10% bonus share. Bonus shares started being traded on 07/17/2015 and the process was approved by the Central Bank on 06/25/2015. Accordingly, capital stock was increased by 553,083,268 shares.

Capital comprises 6,083,915,949 book-entry shares with no par value, of which 3,047,040,198 are common and 3,036,875,751 are preferred shares without voting rights; preferred shares have tag-along rights, in the event of a possible change in control, at a price equal to 80% of the amount per share paid for the controlling common shares. Capital stock amounts to R$ 85,148 (R$ 75,000 at 12/31/2014), of which R$ 58,283 (R$ 51,563 at 12/31/2014) refers to stockholders resident in Brazil and R$ 26,864 (R$ 23,437 at 12/31/2014) refers to stockholders resident abroad.

The table below shows the breakdown of and change in shares of paid-in capital and the reconciliation of balances at the beginning and end of the period:

b) Dividends

Stockholders are entitled to an annual mandatory dividend of not less than 25% of adjusted profit, pursuant to the provisions of the Brazilian Corporate Law. Both common and preferred shares participate equally, after common shares have received dividends equal to the annual minimum priority dividend of R$ 0.022 per share non-cumulative to be paid to preferred shares.

The calculation of the monthly advance of the mandatory minimum dividend is based on the share position on the last day of the prior month, with payment being made on the first business day of the subsequent month, amounting to R$ 0.015 per share.

Below is a statement from dividends and interest on equity and the calculation of the minimum mandatory dividend:

</table>

(1) Refers to amounts received by Itaú Unibanco Holding that were not included in the statement of income, since they do not refer to compensation for the provision of goods or services.

(2) Legal reserve - may be used to increase capital or to absorb losses, but it cannot be distributed as dividends.

(3) Reserve for dividends equalization - its purpose is to reserve funds for the payment or advances on dividends, including interest on capital, to maintain the flow of the stockholders' compensation.

(4) Reserve for working capital - its purpose is to guarantee funds for operations.

(5) Reserve for increase in capital of investees - its purpose is to guarantee the preemptive right in the capital increases of investees.

(6) Refers to interest on capital declared after December 31 of each period.

### e) Unappropriated reserves

Refers to balance of profit remaining after the distribution of dividends and appropriations to statutory reserves in the statutory accounts of ITAÚ UNIBANCO HOLDING.
Note 22 – Share-based payment

ITAÚ UNIBANCO HOLDING and its subsidiaries have share-based payment programs aimed at involving its management members and employees in the medium and long term corporate development process.

These payments are only made in years where there are sufficient profits to enable the distribution of mandatory dividends, in order to limit the maximum dilutive effect to which stockholders are subject, and at a quantity that does not exceed the limit of 0.5% of the total shares held by the controlling and minority stockholders at the balance sheet date.

These programs are settled through the delivery of ITUB4 treasury shares to stockholders.

From 01/01 to 12/31/2015, the accounting effect of the share-based payment in income was R$ (734) (R$ (441) from 01/01 to 12/31/2014 and R$ (322) from 01/01 to 12/31/2013).

I – Stock Option Plan (Simple Options)

ITAÚ UNIBANCO HOLDING has a Stock Option Plan (“Simple Options”) aimed at involving management members and employees in the medium and long term corporate development program of ITAÚ UNIBANCO HOLDING and its subsidiaries, offering them the opportunity benefit from the appreciation that their work and dedication bring to the shares.

In addition to the grants provided under the Plan, ITAÚ UNIBANCO HOLDING also maintains control over the rights and obligations in connection with the options granted under the plans approved at the Extraordinary Stockholders’ Meetings held on April 24, 2009 and April 19, 2013 related to the Unibanco – União de Bancos Brasileiros S.A. and to Unibanco Holdings S.A., and to Redecard S.A. (“Rede”) stock option plans, respectively. Accordingly, the exchange of shares for ITUB4 did not have a relevant financial impact.

Simple options have the following characteristics:

a) Exercise price: calculated based on the average prices of shares in the three months of the year prior to the grant date. The prices determined will be restated to the last business day of the month prior to the option exercise date based on IGP-M or, in its absence, on an index to be determined internally, and should be paid within the period in force for the settlement of operations on BM&FBOVESPA.

b) Vesting period: determined upon issue, from one to seven years, counted from the grant date. The vesting period is normally determined at five years.

c) Fair value and economic assumptions for cost recognition: the fair value of Simple Options is calculated on the grant date based on the Binominal model. Economic assumptions used are as follows:

   (i) Exercise price: exercise price previously agreed upon the option issue, adjusted by the IGP-M variation;

   (ii) Price of the underlying asset (ITUB4 shares): closing price on BM&FBOVESPA on the calculation base date.

   (iii) Expected dividends: the average annual return rate for the last three years of dividends paid plus interest on capital of the ITUB4 share;

   (iv) Risk-free interest rate: IGP-M coupon rate at the expiration date of the Simple Option;

   (v) Expected volatility: calculated based on the standard deviation from the history of the last 84 monthly returns of the ITUB4 share closing prices, disclosed by BM&FBOVESPA, adjusted by the IGP-M variation.

II – Partner Plan

The employees and management members of ITAÚ UNIBANCO HOLDING and its subsidiaries may be selected to participate in the program investing a percentage of their bonus to acquire ITUB4 shares and share-based instruments. Accordingly, the ownership of these shares should be held by the beneficiaries for a period from three to five years, counted from the initial investment, and are thus subject to market price variations. After complying with the suspensive conditions set forth in the program, beneficiaries will be entitled to receive ITUB4 as consideration, in accordance with the numbers of shares provided for in the program regulations.

The acquisition prices of own shares and Share-Based Instruments are established every six months and is equivalent to the average of the ITUB4 quotation in the 30 days prior to the determination of the acquisition price.

The fair value of the ITUB4 as consideration is the market price at the grant date, less expected dividends.

The weighted average of the fair value of the ITUB4 shares as consideration was estimated at R$ 29.22 per share at 12/31/2015 (R$ 29.65 per share at 12/31/2014 and R$ 28.20 per share at 12/31/2013).

Law No. 12,973/14, which adjusted the tax legislation to the international accounting standards and terminated the Transitional Tax Regime (RTT), set up a new legal framework for payments made in shares. We made changes to the Partner Plan, and adjusted its tax effects, to conform to this new legislation.

III- **Variable compensation**

The policy established in compliance with CMN Resolution No. 3.921/10 sets forth that fifty percent (50%) of the management’s variable compensation should be paid in cash and fifty percent (50%) should be paid in shares for a period of three years. Shares are delivered on a deferred basis, of which one-third (1/3) per year, will be contingent upon the executive’s remaining with the institution. The deferred unpaid portions may be reversed proportionally to the significant reduction of the recurring income realized or the negative income for the period.

The fair value of the ITUB4 share is the market price at its grant date.

The weighted average of the fair value of ITUB4 shares was estimated at R$ 31.24 per share at 12/31/2015 (R$ 25.33 per share at 12/31/2014 and R$ 25.91 per share at 12/31/2013).

</table>

(1) Deferred income tax and social contribution assets and liabilities are recorded in the balance sheet offset by a taxable entity and total R$ 47,453 and R$ 370.

(2) The accounting records of deferred tax assets on income tax losses and/or social contribution loss carryforwards, as well as those arising from temporary differences, are based on technical feasibility studies which consider the expected generation of future taxable income, considering the history of profitability for each subsidiary individually, and for the consolidated taken as a whole. For the subsidiaries, Itaú Unibanco S.A. and Banco Itaucard S.A., a petition has been sent to Central Bank of Brazil, in compliance with paragraph 7 of article 1 of Resolution No. 4,441/15 and pursuant to Circular 3,776/15.

(*) The average funding rate, net of tax effects, was used to determine the present value.

The projections of future taxable income include estimates related to macroeconomic variables, exchange rates, interest rates, volume of financial operations and services fees and others, which can vary in relation to actual data and amounts.

Net income in the financial statements is not directly related to the taxable income, due to differences between the accounting criteria and tax legislation, in addition to corporate aspects. Accordingly, it is recommended that the trends for the realization of deferred tax assets arising from temporary differences, and tax loss carry forwards should not be used as an indication of future net income.

Considering the temporary effects of Law 13,169/15, which increases the Social Contribution tax rate to 20% until December 31, 2018, tax credits were accounted for based on their expected realization. The effect on the consolidated statement of income was R$ 3,921. There are no unrecorded deferred tax assets at 12/31/2015 and 12/31/2014.
Note 28 – Earnings per share

Basic and diluted earnings per share were computed as shown in the table below for the periods indicated. Basic earnings per share are computed by dividing the net income attributable to the stockholder of ITAÚ UNIBANCO HOLDING by the average number of shares for the period, and by excluding the number of shares purchased and held as treasury shares by the company. Diluted earnings per share are computed on a similar way, but with the adjustment made in the denominator when assuming the conversion of all shares that may be diluted.

a) Retirement plans

ITAÚ UNIBANCO HOLDING and some of its subsidiaries sponsor defined benefit plans, including variable contribution plans, whose basic purpose of which is to provide benefits that, in general, represent a life annuity benefit, and may be converted into survivorship annuities, according to the plan’s regulations. They also sponsor defined contribution plans, the benefit of which is calculated based on the accumulated balance of individual accounts at the eligibility date, according to the plan’s regulations, which does not require actuarial calculation, except as described in Note 29c.

Employees hired prior to July 31, 2002, for those who came from Itaú, and prior to February 27, 2009 for those who came from Unibanco, are beneficiaries of the above-mentioned plans. As regards the new employees hired after these dates, they have the option to voluntarily participate in a variable contribution plan (PGBL), managed by Itaú Vida e Previdência S.A.

Retirement plans are managed by closed-end private pension entities (EFPC), with independent legal structures, as detailed below:

<table>

</table>

(1) Defined benefit plan;
(2) Variable contribution plan;
(3) Defined contribution plan.

b) Governance

The closed-end private pension entities (EFPC) and the benefit plans they manage are regulated in conformity with the related specific legislation. The EFPC are managed by the Executive Board, Advisory Council and Fiscal Council, with some members appointed by the sponsors and others appointed as representatives of active and other participants, pursuant to the respective Entity’s by laws. The main purpose of the EFPC is to pay benefits to eligible participants, pursuant to the Plan Regulations, maintaining the plans assets invested separately and independently from ITAÚ UNIBANCO HOLDING.
c) Defined benefit plans

I - Main assumptions used in actuarial valuation of retirement plans

<table>
<thead>
<tr>
<th></th>
<th>12/31/2015</th>

<tr>
<td>Actuarial method</td>
<td>Projected Unit Credit</td>
<td>Projected Unit Credit</td>
<td>Projected Unit Credit</td>
</tr>
</tbody>
</table>

(1) The adoption of this assumption is based on interest rates obtained from the actual interest curve in IPCA, for medium term liabilities of retirement plans sponsored by ITAÚ UNIBANCO HOLDING. At 12/31/2015 assumptions were adopted consistently with the economic scenario at the balance sheet date rate, considering the volatility of the interest markets and the models adopted.

(2) The mortality tables adopted correspond to those disclosed by Society of Actuaries (SOA), the North-American entity which corresponds to Brazilian Institute of Actuarial Science (IBA), which reflects a 10% increase in the probabilities of survival compared to the respective basic tables. The life expectancy in years per the AT-2000 mortality table for participants aged 55 years is 27 and 31 years for men and women, respectively.

(3) The turnover assumption is based on the effective experience of active participants linked to ITAÚ UNIBANCO HOLDING, resulting in the average of 2.4% p.a. based on the 2008/2010 experience.

(4) Using the Projected Unit Credit method, the mathematical reserve is determined based on the current projected benefit amount multiplied by the ratio between the length of service at the assessment date and the length of service that will be reached at the date when the benefit is granted. The cost is determined taking into account the current projected benefit amount distributed over the years that each participant is employed.

Biometric/demographic assumptions adopted are consistent with the group of participants of each benefit plan, pursuant to the studies carried out by an independent external actuarial consulting company.

II- Risk Exposure - Through its defined benefit plans, ITAÚ UNIBANCO HOLDING is exposed to a number of risks, the most significant ones are:

- **Volatility of Assets** - The actuarial liability is calculated by adopting a discount rate defined on the income related to securities issued by the Brazilian treasury (government securities). If the actual income related to plan assets is lower than expected, this may give rise to a deficit. The plans have a significant percentage of fixed-income securities pegged to the plan commitments, aimed at minimizing volatility and short and medium term risk.

- **Changes in Investment Income** - A decrease in income related to public securities will imply a decrease in the discount rate and, therefore, will increase the plan’s actuarial liability. The effect will be partially offset by the recognition of these securities at market value.

- **Inflation Risk** - Most of the employee benefit plans are pegged to the inflation rates, and a higher inflation will lead to higher obligations. The effect will also be partially offset because a significant portion of the plan assets is pegged to government securities restated at the inflation rate.

- **Life Expectancy** - Most of the plan obligations are to provide life benefits, and therefore an increase in life expectancy will result in increased plan liabilities.

III - Management of defined benefit plan assets

The general purpose of managing EFPs funds is to search for a long term balance between assets and obligations to pay retirement benefits, by exceeding the actuarial targets (discount rate plus benefit adjustment index, established in the plan regulations).

Regarding the assets guaranteeing the actuarial liability reserves, management should ensure the payment capacity of retirement benefits in the long term by avoiding the risk of mismatching assets and liabilities in each pension plan.
The allocation of plan assets and the allocation target by type of asset are as follows:

<table>
<thead>
<tr>

<td>12,512</td>
<td>100.00%</td>
<td>100.00%</td>
<td>100.00%</td>
<td>100.00%</td>
</tr>
</tbody>
</table>

The defined benefit plan assets include shares of ITAÚ UNIBANCO HOLDING, its main parent company (ITAÚSA) and of subsidiaries of the latter, with a fair value of R$ 452 (R$ 554 at 12/31/2014 and R$ 596 at 12/31/2013), and real estate rented to Group companies, with a fair value of R$ 606 (R$ 455 at 12/31/2014 and R$ 474 at 12/31/2013).

**Fair Value**

The fair value of the plan assets is adjusted up to the Balance Sheet date, as follows:

- **Fixed-Income Securities and Structured Investments** – accounted for at market value, considering the average trading price on the calculation date, net realizable value obtained upon the technical addition of pricing, considering, at least, the payment terms and maturity, credit risk and the indexing unit.

- **Variable income securities** – accounted for at market value, taken to be the share average quotation at the last day of the month or at the closest date on the stock exchange on which the share has posted the highest liquidity rate.

- **Real Estate** – stated at acquisition or construction cost, adjusted to market value based on reappraisals made in 2015, supported by technical appraisal reports. Depreciation is calculated under the straight line method, considering the useful life of the real estate.

- **Loans to participants** – adjusted up to the report date, in compliance with the respective agreements.

**Fund Allocation Target**

The fund allocation target is based on Investment Policies that are currently revised and approved by the Advisory Council of each EFPC, considering a five-year period, which establishes guidelines for investing funds guaranteeing Actuarial Liability and for classifying securities.

**IV- Net amount recognized in the balance sheet**

Following is the calculation of the net amount recognized in the balance sheet, corresponding to the defined benefit plan:

<table>
<thead>
<tr>
<th>Description</th>
<th>12/31/2015</th>
<th>12/31/2014</th>
<th>12/31/2013</th>
</tr>
</thead>
<tbody>

(1) Corresponds to the amount calculated on 01/01/2015 based on the beginning amount (Net Assets, Actuarial Liabilities and Asset ceiling), taking into account the estimated amount of payments/ receipts of benefits/ contributions, multiplied by the discount rate of 10.24% p.a. (At 01/01/2014 used by the discount rate of 9.72% p.a.)

(2) Remeasurements recorded in net assets and asset ceiling correspond to the income earned above/below the expected return rate.

(3) The actual return on assets amounted to R$ 1,028 (R$ 1,611 at 12/31/2014 and R$ (1,905) at 12/31/2013).
During the period, the contributions made totaled R$ 60 (R$ 81 from 01/01 to 12/31/2014 and R$ 68 from 01/01 to 12/31/2013). The contribution rate increases based on the beneficiary’s salary.

In 2016, contribution to the retirement plans sponsored by ITAÚ UNIBANCO HOLDING is expected to amount to R$ 55.

The estimate for payment of benefits for the next 10 years is as follows:

<table>
<thead>
<tr>
<th>Period</th>
<th>Payment estimate</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016</td>
<td>949</td>

<td>(520) (4.51%)</td>
<td>201</td>
</tr>
</tbody>
</table>

(*) Net of effects of asset ceiling
d) Defined contribution plans

The defined contribution plans have assets relating to sponsors' contributions not yet included in the participant's account balance due to loss of eligibility to a plan benefit, as well as resources from the migration from the defined benefit plans. The fund will be used for future contributions to the individual participants' accounts, according to the rules of the respective benefit plan regulation.

e) Other post-employment benefits

ITAÚ UNIBANCO HOLDING and its subsidiaries do not offer other post-employment benefits, except in those cases arising from obligations under acquisition agreements signed by ITAÚ UNIBANCO HOLDING, as well as in relation to the benefits granted due to a judicial sentence, in accordance with the terms and conditions established, in which health plans are totally or partially sponsored for specific groups of former workers and beneficiaries.

Based on the report prepared by an independent actuary, the changes in obligations for these other projected benefits and the amounts recognized in the balance sheet, under liabilities, of ITAÚ UNIBANCO HOLDING are as follows:

I- Change in the net amount recognized in the balance sheet:

<table>
<thead>
<tr>
<th></th>

</tbody>
</table>

II- Assumptions and sensitivity - medical care cost

For calculation of projected benefits obligations in addition to the assumptions used for the defined benefit plans (Note 29c I), an 8.16% p.a. increase in medical costs assumption is assumed.

Assumptions about medical care cost trends have a significant impact on the amounts recognized in income. A change of one percentage point in the medical care cost rates would have the following effects:

<table>
<thead>
<tr>
<th>Recognition</th>
<th>1% increase</th>
<th>1% decrease</th>

</table>
Note 30 – Insurance contracts

a) Insurance contracts

ITAÚ UNIBANCO HOLDING, through its subsidiaries, offers to the market insurance and private pension products, with the purpose of assuming risks and restoring the economic balance of the assets of the policyholder if damaged. Products are offered through insurance brokers (third parties operating in the market and its own brokers), Itaú Unibanco branches and electronic channels, according to their characteristics and regulatory requirements.

b) Main products

I - Insurance

The contract entered into between the parties aims at guaranteeing the protection of the client’s assets. Upon payment of a premium, the policyholder is protected through previously-agreed replacement or indemnification clauses for damages. ITAÚ UNIBANCO HOLDING insurance companies then recognize technical reserves administered by themselves, through specialized areas within the conglomerate, with the objective of indemnifying the policyholder’s loss in the event of claims of insured risks.

The insurance risks sold by insurance companies of ITAÚ UNIBANCO HOLDING are divided into property and casualty, that covers losses, damages or liabilities for assets or persons, and life insurance, that includes coverage for death and personal accidents.

II - Private pension

Developed as a solution to ensure the maintenance of the quality of life of participants, as a supplement to the government plans, through long term investments, private pension products are divided into three major groups:

- **PGBL - Plan Generator of Benefits:** The main objective of this plan is the accumulation of financial resources, but it can be purchased with additional risk coverage. Recommended for clients that file the full version of income tax return (rather than the simplified version), because they can deduct contributions paid for tax purposes up to 12% of the annual taxable gross income.

- **VGBL - Redeemable Life Insurance:** This is an insurance structured as a pension plan. Its taxation differs from the PGBL; in this case, the tax basis is the earned income.

- **FGB - Fund Generator of Benefits:** This is a pension plan with minimum income guarantee, and possibility of receiving earnings from asset performance. Once recognized the distribution of earnings at a certain percentage, as established by the FGB policy, it is not at management’s discretion, but instead represents an obligation to ITAÚ UNIBANCO HOLDING. Although there are plans still in existence, they are no longer sold.
### III – Income related to insurance and private pension

The revenue from the main insurance and private pension products is as follows:

<table>

c) Technical reserves for insurance and private pension

The technical provisions of insurance and pension plan are recognized according to the technical notes approved by SUSEP and criteria established by current legislation.

I - Insurance and private pension:

- **Provision for unearned premiums** – this provision is recognized, based on insurance premiums, for the coverage of amounts payable related to claims and expenses to be incurred, throughout their terms maturity, in connection with the risks assumed at the calculation base date. The calculation is performed on the level of policies or endorsement of agreements in force, on a pro rata-die basis. The provision includes an estimate for effective and not issued risks (PPNG-RVNE).

- **Provision for unsettled claims** – this provision is recognized for the coverage of amounts payable related to lump-sum payments and income overdue from claims reported up to the calculation base date, but not yet paid. The provision covers administrative and legal claims, gross of accepted coinsurance operations and reinsurance operations and net of ceded coinsurance operations. The provision should include, whenever required, IBNER (claims incurred but not sufficiently reported) for the aggregate development of claims reported but not paid, which amounts may be changed throughout the process up to final settlement.

- **Provision for claims incurred and not reported - IBNR** – this provision is recognized for the coverage of expected unsettled amounts related to claims incurred but not reported up to the calculation base date, gross of accepted coinsurance operations and reinsurance operations, and net of ceded coinsurance operations.

- **Mathematical provisions for benefits to be granted** - recognized for the coverage of commitments assumed to participants or policyholders, based on the assumptions set forth in the contract, while the event that gave rise to the benefit and/or indemnity has not occurred. The provision is calculated in accordance with the methodology approved in the actuarial technical note to the product.

- **Mathematical provisions for granted benefits** - recognized after the event triggering the benefit occurs, for the coverage of the commitments assumed to the participants or insured parties, based on the assumptions established in the agreement. The provision is calculated in accordance with the methodologies approved in the technical actuarial note on the product.

- **Provision for financial surplus** – it is recognized to ensure the amounts intended for distribution of financial surplus, if the event is stated in the agreement. Corresponds to the financial income exceeding the minimum return guaranteed in the product.

- **Other technical provisions** – it is recognized when insufficiency of premiums or contributions are identified related to payments of benefits and indemnities.

- **Provision for redemptions and other amounts to regularize** – it comprises the amounts related to redemptions to regularize, returns of premiums or funds, portability requested but, for any reason, not yet transferred to the insurance company or open private pension entity beneficiary, and premiums received but not quoted.

- **Provision for related expenses** - It is recognized for the coverage of expected amounts related to expenses with benefits and indemnities, due to events incurred and to be incurred.

II - Change in reserves for insurance and private pension

The details about the changes in balances of reserves for insurance and private pension operations are as follows:

(1) The provision for unsettled claims is detailed in Note 30e.
(2) This table covers the amendments established by Susep Circular No. 517, de 07/30/2015, also for comparison purposes.
d) Deferred selling expenses

Deferred acquisition costs of insurance are direct and indirect costs incurred to sell, underwrite and originate a new insurance contract.

Direct costs are basically commissions paid for brokerage services, agency and prospecting efforts and are deferred for amortization in proportion to the recognition of revenue from earned premiums, that is, over the coverage period, for the term of effectiveness of contracts, according to the calculation rules in force.

Balances are recorded under gross reinsurance assets and changes are shown in the table below:

<table>
<thead>
<tr>

</tbody>
</table>

The amounts of deferred selling expenses from reinsurance are stated in Note 30I.
### Table of loss development

Changes in the amount of obligations of the ITAÚ UNIBANCO HOLDING may occur at the end of each annual reporting period. The table below shows the development by the claims incurred method. The first part of the table shows how the final loss estimate changes through time. The second part of the table reconciles the amounts pending payment and the liability disclosed in the balance sheet.

In the breakdown of the table on change of claims, historic claims were excluded from major risk insurance operations, as informed in Note 3c.

The breakdown of the table development of claims between administrative and legal evidences the reallocation of claims up to a certain base date and that become legal ones afterwards, which may give the wrong impression of need for adjusting the provisions in each breakdown.
f) Liability adequacy test

As established in IFRS 4 – “Insurance contracts”, an insurance company must carry out the Liability Adequacy Test, comparing the amount recognized for its technical reserves with the current estimate of cash flow of its future obligations. The estimate should consider all cash flows related to the business, which is the minimum requirement for carrying out the adequacy test.

The Liability adequacy test did not show any deficiency for periods ended 2015, 2014 and 2013.

The assumptions used in the test are periodically reviewed and are based on the best practices and the analysis of subsidiaries’ experience, therefore representing the best estimates for cash flow projections.

Methodology and Test Grouping
The methodology for testing all products is based on the projection of cash flows. Specifically for insurance products, cash flows were projected using the method known as run-off triangle of quarterly frequency. Cash flows for the deferral and the assignment phases are tested on a separate basis for social security products.

The risk grouping criterion considers groups subject to similar risks that are jointly managed as a single portfolio.

Biometric Tables
Biometric tables are instruments to measure the biometric risk represented by the probability of death, survival or disability of a participant.

For death and survival estimates biometric tables broken down by gender are used, adjusted according to life expectancy development (improvement), and the Álvaro Vindas table is adopted to estimate benefit requests for disability.

Risk-free Interest Rate
The relevant risk-free forward interest-rate structure is an indicator of the pure time value of money used to price the set of projected cash flows.

The relevant structure of risk-free interest rate was obtained from the curve of securities deemed to be credit risk free, available in the Brazilian financial market and determined pursuant to an internal policy of ITAU UNIBANCO HOLDING, considering the addition of spread, which took into account the impact of the market result of held-to-maturity securities of the guarantee assets portfolio.

Income conversion rate
The income conversion rate represents the expected conversion of balances accumulated by participants in retirement benefits. The decision of conversion into income by participants is influenced by behavioral, economic and tax factors.

Other Assumptions
Related expenses, cancellations and partial redemptions, future increases and contributions, among others, are assumptions that affect the estimate of projected cash flows since they represent expenses and income arising from insurance agreements assumed.
g) Insurance risk – effect of changes on actuarial assumptions

Property insurance is a short-lived insurance, and the main actuarial assumptions involved in the management and pricing of the associated risks are claims frequency and severity. Volatility above the expected number of claims and/or amount of claim indemnities may result in unexpected losses.

Life insurance and pension plans are, in general, medium or long-lived products and the main risks involved in the business may be classified as biometric risk, financial risk and behavioral risk.

Biometric risk relates to: i) more than expected increase in life expectancies for products with survivorship coverage (mostly pension plans); ii) more than expected decrease in mortality rates for products with survivorship coverage (mostly life insurance).

Products offering financial guarantee predetermined under contract involve financial risk inherent in the underwriting risk, with such risk being considered insurance risk.

Behavioral risk relates to a more than expected increase in the rates of conversion into annuity income, resulting in increased payments of retirement benefits.

The estimated actuarial assumptions are based on the historical evaluation of ITAÚ UNIBANCO HOLDING, on benchmarks and the experience of the actuaries.

To measure the effects of changes in the key actuarial assumptions, sensitivity tests were conducted in the amounts of current estimates of future liability cash flows. The sensitivity analysis considers a vision of the impacts caused by changes in assumptions, which could affect the income for the period and stockholders’ equity at the balance sheet date. This type of analysis is usually conducted under the ceteris paribus condition, in which the sensitivity of a system is measured when one variable of interest is changed and all the others remain unchanged. The results obtained are shown in the table below:
The sensitivity analysis considers a vision of the impacts caused by changes in assumptions, which could affect the income for the period and stockholders’ equity at the balance sheet date. Results were as follows:

h) Risks of insurance and private pension

ITAÚ UNIBANCO HOLDING has specific committees to define the management of funds from the technical reserves for insurance and private pension, issue guidelines for managing these funds with the objective of achieving long term return, and define evaluation models, risk limits and strategies on allocation of funds to defined financial assets. Such committees are comprised not only of executives and those directly responsible for the business management process, but also for an equal number of professionals that head up or coordinate the commercial and financial areas.

Large risks products are distributed by brokers. In the case of the extended warranty product, this is marketed by the retail company that sells the product to consumer. The DPVAT production results from the participation that the insurance companies of ITAÚ UNIBANCO HOLDING have in the Leading Insurance Company of the DPVAT consortium.
i) Insurance, pension plan and capitalization management structure

The products that make up the portfolios of ITAÚ UNIBANCO HOLDING’s insurance companies are related to the life insurance and elementary, pension plan and capitalization lines. Therefore, we understand that the major risks inherent in these products are as follows:

- Subscription risk is the possibility of losses arising from operations of insurance, pension plan and capitalization that go against the organization’s expectations, directly or indirectly associated with the technical and actuarial bases adopted to calculate premiums, contributions and provisions.
- Market risk is the possibility of incurring losses due to fluctuations in the market values of assets and liabilities comprising the actuarial technical reserves.
- Credit risk is the possibility of a certain debtor failing to meet any obligations in connection with the settlement of operations involving the trade of financial assets or reinsurance.
- Operational risk is the possibility of incurring losses arising from the failure, deficiency or inadequacy or internal processes, personnel and systems, or external events impacting the achievement of strategic, tactical or operational purposes of the insurance, pension plan and capitalization operations.
- Liquidity risk in insurance operations is the possibility of the institution being unable to honor its obligations on a timely basis before policyholders and beneficiaries due to lack of liquidity of assets that make up their actuarial technical reserves.

j) Duties and responsibilities

In line with good national and international practices and to ensure that the risks arising from insurance, pension plan and capitalization products are properly identified, measured, assessed, reported and approved in proper bodies, the ITAÚ UNIBANCO HOLDING has a risk management structure which guidelines are established in an internal policy, approved by its Board of Directors, applicable to the companies and subsidiaries exposed to insurance, pension plan and capitalization risks in Brazil and abroad.

The management process of insurance, pension plan and capitalization risks is based on responsibilities established and distributed between the control and business areas, assuring independence among them and focusing on the specificities of each risk, in accordance with the guidelines established by ITAÚ UNIBANCO HOLDING.

Also, as part of the risk management process, there is a governance structure where decisions may be escalated to panels, ensuring compliance with a number of internal and regulatory requirements, as well as balanced decisions regarding risks.

The purpose of ITAÚ UNIBANCO HOLDING is to ensure that assets backing long-term products, with guaranteed minimum returns, are managed according to the characteristics of the liabilities aiming at actuarial balance and long-term solvency.
Considering actuarial assumptions, a detailed mapping of the liabilities of long-term products that result in payment flows of projected future benefits is performed annually. Based on this mapping, Asset Liability Management models are used to find the best asset portfolio composition that enables the neutralize the risks entailed in this type of product, considering its long-term economic and financial feasibility. The portfolios of backing assets are periodically rebalanced based on the fluctuations in market prices of assets, the company’s liquidity needs, and changes in characteristics of liabilities.

k) Market, credit and liquidity risk

Market risk

Market risk is analyzed, in relation to insurance operations, based on the following metrics and sensitivity and loss control measures: Value at Risk (VaR), Losses in Stress Scenarios (Stress Test), Sensitivity (DV01- Delta Variation) and Concentration. For a detailed description of metrics, see Note 36 – Market risk. In the table, the sensitivity analysis (DV01 – Delta Variation) is presented in relation to insurance operations that demonstrate the impact on the cash flows market value when submitted to a 1 annual basis point increase in the current interest rates or index rate and 1 percentage point in the share price and currency.

## Liquidity Risk

Liquidity risk is the risk that ITAÚ UNIBANCO HOLDING may have insufficient net funds available to honor its current obligations at a given moment. The liquidity risk is managed, for insurance operations, continuously based on the monitoring of payment flows related to its liabilities vis-à-vis the inflows generated by its operations and financial assets portfolio.

Financial assets are managed in order to optimize the risk-return ratio of investments, considering, on a careful basis, the characteristics of their liabilities. The risk integrated control considers the concentration limits by issuer and credit risk, sensitivities and market risk limits and control over asset liquidity risk. Thus, investments are concentrated in government and private securities with good credit quality in active and liquid markets, keeping a considerable amount invested in short-term assets, available on demand, to cover regular needs and any liquidity contingencies. Additionally, ITAÚ UNIBANCO HOLDING constantly monitors the solvency conditions of its insurance operations.

Credit Risk

I - Reinsurers – Breakdown

The division of risks assigned to reinsurance companies and their rating according the Standard & Poor’s is presented below:

- **Insurance Operations**: reinsurance premiums operations are basically represented by: IRB Brasil Resseguros with 86.70% (38.57% at 12/31/2014) and Munich Re do Brasil with 13.23% (5.34% at 12/31/2014). Only at 12/31/2014, Lloyd’s (A+) with 17.48%, Mapfre Re, Cia de Reaseguros,S.A. (A) with 4.21% and American Home Assurance Company (A) with 4.01%.

- **Social Security Operations**: social security operations related to reinsurance premiums are entirely represented by General Reinsurance AG with 50% (50% at 12/31/2014) and Munich Re do Brasil with 50% (50% at 12/31/2014). For insurance operations, transfers of reinsurance premiums are deployed between Munich Re do Brasil with 60.26% (55.46% at 12/31/2014) and IRB Brasil Resseguros with 39.74% (44.54% at 12/31/2014).
II - Risk level of financial assets

</table>

(*) Internal risk level ratings, with due associated probability of default, are detailed in Note 36.
I) **Reinsurance**

Expenses and revenues from reinsurance premiums ceded are recognized in the period when they occur, according to the accrual basis, with no offset of assets and liabilities related to reinsurance except in the event there is a contractual provision for the offset of accounts between the parties. Analyses of reinsurance required are made to meet the current needs of ITAÚ UNIBANCO HOLDING, maintaining the necessary flexibility to comply with changes in management strategy in response to the various scenarios to which it may exposed.

**Reinsurance assets**

Reinsurance assets are valued according to consistent basis of risk assignment contracts, and in the event of losses effectively paid, as from December 2015; they are revalued after 180 days have elapsed in relation to the possibility of non-recovery. For previous periods, revaluation term is 365 days. This amendment was for compliance with the SUSEP Circular in force. In case of doubt, these assets are reduced based on the provision recognized for credit risk associated to reinsurance.

**Reinsurance transferred**

ITAÚ UNIBANCO HOLDING transfers, in the normal course of its businesses, reinsurance premiums to cover losses on underwriting risks to its policy holders and is in compliance with the operational limits established by the regulating authority. In addition to proportional contracts, non-proportional contracts are also entered into in order to transfer a portion of the responsibility to the reinsurance company for losses that exceed a certain level of losses in the portfolio. Non-proportional reinsurance premiums are included in Other assets - prepaid expenses and amortized to Other operating expenses over the effectiveness period of the contract on a daily accrual basis.

m) Regulatory authorities

Insurance and private pension operations are regulated by the National Council of Private Insurance (CNSP) and the Superintendence of Private Insurance (SUSEP). These authorities are responsible for regulating the market, and consequently for assisting in the mitigation of risks inherent in the business.

The CNSP is the regulatory authority of insurance activities in Brazil, created by Decree-Law N° 73, of November 21, 1966. The main attribution of CNSP, at the time of its creation, was to set out the guidelines and rules of government policy on private insurance segments, and with the enactment of Law N° 6,435, of July 15, 1977, its attributions included private pension of public companies.

The Superintendence of Private Insurance (SUSEP) is the authority responsible for controlling and overseeing the insurance, and reinsurance markets. An agency of the Ministry of Finance, it was created by the Decree-Law N° 73, of November 21, 1966, which also created the National System of Private Insurance, comprising the National Council of Private Insurance (CNSP), IRB Brasil Resseguros S.A. – IRB Brasil Re, the companies authorized to have plans and the open-ended private pension companies.
Note 31 – Fair value of financial instruments

In cases where market prices are not available, fair values are based on estimates using discounted cash flows or other valuation techniques. These techniques are significantly affected by the assumptions adopted, including the discount rate and estimate of future cash flows. The estimated fair value achieved through these techniques cannot be substantiated by comparison with independent markets and, in many cases, it cannot be realized in the immediate settlement of the instrument.

The following table summarizes the carrying and estimated fair values for financial instruments:

<table>

</tr>
</tbody>
</table>

The methods and assumptions adopted to estimate the fair value are defined below:

a) Cash and deposits on demand, Central Bank compulsory deposits, Securities purchased under agreements to resell, Securities sold under repurchase agreements and liabilities for capitalization plans – The carrying amounts for these instruments approximate their fair values.

b) Interbank deposits, deposits, Interbank market debt and Institutional market debt – ITAU UNIBANCO HOLDING estimates the fair values by discounting the estimated cash flows and adopting the market interest rates.

c) Financial assets held for trading, including Derivatives (assets and liabilities), Financial assets designated at fair value through profit or loss, Available-for-sale financial assets, Held-to-maturity financial assets and Financial liabilities held for trading – Under normal conditions, market prices are the best indicators of the fair values of financial instruments. However, not all instruments have liquidity or quoted market prices and, in such cases, the adoption of present value estimates and other pricing techniques are required. In the absence of quoted prices from National Association of Financial Market Institutions (ANBIMA), the fair values of bonds are calculated based on the interest rates provided by others on the market (brokers). The fair values of corporate debt securities are computed by adopting criteria similar to those applied to interbank deposits, as described above. The fair values of shares are computed based on their prices quoted in the market. The fair values of derivative financial instruments were determined as follows:

- **Swaps**: The cash flows are discounted to present value based on yield curves that reflect the appropriate risk factors. These yield curves may be drawn mainly based on the exchange price of derivatives at BM&FBOVESPA, of Brazilian government securities in the secondary market or derivatives and securities traded abroad. These yield curves may be used to obtain the fair value of currency swaps, interest rate swaps and swaps based on other risk factors (commodities, stock exchange indices, etc.).
• **Futures and forwards**: Quotations on exchanges or criteria identical to those applied to swaps.

• **Options**: The fair values are determined based on mathematical models (such as Black&Scholes) that are fed with implicit volatility data, interest rate yield curve and fair value of the underlying asset. Current market prices of options are used to compute the implicit volatilities. All these data are obtained from different sources (usually Bloomberg).

• **Credit**: Inversely related to the probability of default (PD) in a financial instrument subject to credit risk. The process of adjusting the market price of these spreads is based on the differences between the yield curves with no risk and the yield curves adjusted for credit risk.

d) **Loan operations and lease operations** – Fair value is estimated based on groups of loans with similar financial and risk characteristics, using valuation models. The fair value of fixed-rate loans was determined by discounting estimated cash flows, applying current interest rates for similar loans. For the majority of loans at floating rate, the carrying amount was considered close to their fair value. The fair value of loan and lease operations not overdue was calculated by discounting the expected payments of principal and interest through maturity, at the aforementioned rates. The fair value of overdue loan and lease transactions was based on the discount of estimated cash flows, using a rate proportional to the risk associated with the estimated cash flows, or on the underlying collateral. The assumptions related to cash flows and discount rates are determined using information available in the market and the borrower’s specific information of the debtor.

e) **Deposits** – The fair value of fixed-rate loans with maturity dates was determined by discounting estimated cash flows, applying current interest rates for similar funding operations. Cash deposits are not considered in the fair value estimate. The assumptions related to cash flows and discount rates are determined based on information available in the market and information specific for each operation.

f) **Other financial assets / liabilities** – primarily composed of receivables from credit card issuers, deposits in guarantee for contingent liabilities and trading and intermediation of securities. The carrying amounts for these assets/liabilities substantially approximate their fair values, since they principally represent amounts to be received in the short term from credit card holders and to be paid to credit card acquirers, judicially required deposits (indexed to market rates) made by ITAÚ UNIBANCO HOLDING as guarantees for lawsuits or very short-term receivables (generally with a maturity of approximately 5 (five) business days). All of these items represent assets / liabilities without significant associated market, credit and liquidity risks.

In accordance with IFRS, ITAÚ UNIBANCO HOLDING classifies fair value measurements in a fair value hierarchy that reflects the significance of inputs adopted in the measurement process.

**Level 1**: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets. An active market is a market in which transactions for the asset or liability being measured occur often enough and with sufficient volume to provide pricing information on an ongoing basis.

**Level 2**: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. Level 2 generally includes: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or quoted prices vary substantially either over time or among market makers, or in which little information is released publicly; (iii) inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, etc.); (iv) inputs that are mainly derived from or corroborated by observable market data through correlation or by other means.

**Level 3**: Inputs are unobservable for the asset or liability. Unobservable information shall be used to measure fair value to the extent that observable information is not available, thus allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.
Financial assets for trading, Available for sale, and Designated at fair value through profit or loss:

**Level 1:** Highly-liquid securities with prices available in an active market are classified in Level 1 of the fair value hierarchy. This classification level includes most of the Brazilian Government Securities, securities of foreign governments, shares and debentures traded on stock exchanges and other securities traded in an active market.

**Level 2:** When the pricing information is not available for a specific security, the assessment is usually based on prices quoted in the market for similar instruments, pricing information obtained for pricing services, such as Bloomberg, Reuters and brokers (only when the prices represent actual transactions) or discounted cash flows, which use information for assets actively traded in an active market. These securities are classified into Level 2 of the fair value hierarchy and are comprised of certain Brazilian government securities, debentures, some government securities quoted in a less-liquid market in relation to those classified into Level 1, and some share prices in investment funds. ITAÚ UNIBANCO HOLDING does not hold positions in alternative investment funds or private equity funds.

**Level 3:** When no pricing information in an active market, ITAÚ UNIBANCO HOLDING uses internally developed models, from curves generated according to the proprietary model. The Level 3 classification includes some Brazilian government and private securities falling due after 2025 and securities that are not usually traded in an active market.

**Derivatives:**

**Level 1:** Derivatives traded on stock exchanges are classified in Level 1 of the hierarchy.

**Level 2:** For derivatives not traded on stock exchanges, ITAÚ UNIBANCO HOLDING estimates the fair value by adopting a variety of techniques, such as Black&Scholes, Garman & Kohlhagen, Monte Carlo or even the discounted cash flow models usually adopted in the financial market. Derivatives included in Level 2 are credit default swaps, cross currency swaps, interest rate swaps, plain vanilla options, certain forwards and generally all swaps. All models adopted by ITAÚ UNIBANCO HOLDING are widely accepted in the financial services industry and reflect all derivative contractual terms. Considering that many of these models do not require a high level of subjectivity, since the methodologies adopted in the models do not require major decisions and information for the model are readily observed in the actively quotation markets, these products were classified in Level 2 of the measurement hierarchy.

**Level 3:** The derivatives with fair values based on non-observable information in an active market were classified into Level 3 of the fair value hierarchy, and are comprised of non-standard options, certain swaps indexed to non-observable information, and swaps with other products, such as swap with option and USD Check, credit derivatives and futures of certain commodities. These operations have their pricing derived from a range of volatility using the basis of historical volatility.

All aforementioned valuation methodologies may result in a fair value that may not be indicative of the net realizable value or future fair values. However, ITAÚ UNIBANCO HOLDING believes that all methodologies used are appropriate and consistent with the other market participants. However, the adoption of other methodologies or assumptions different than those used to estimate fair value may result in different fair value estimates at the balance sheet date.
**Distribution by level**

The following table presents the breakdown of risk levels at 12/31/2015 and 12/31/2014 for financial assets held for trading and available-for-sale financial assets.

There were no significant transfer between Level 1 and Level 2 during the period from December 31, 2015 and December 31, 2014. Transfers to and from Level 3 are presented in movements of Level 3.
Measurement of fair value Level 2 based on pricing services and brokers

When pricing information is not available for securities classified as Level 2, pricing services, such as Bloomberg or brokers, are used to value such instruments.

In all cases, to assure that the fair value of these instruments is properly classified as Level 2, internal analysis of the information received are conducted, so as to understand the nature of the input used in the establishment of such values by the service provider.

Prices provided by pricing services that meet the following requirements are considered Level 2: input is immediately available, regularly distributed, provided by sources actively involved in significant markets and it is not proprietary.

Of the total of R$ 89,650 million in financial instruments classified as Level 2, at December 31, 2015, pricing service or brokers were used to evaluate securities at the fair value of R$ 41,561 million, substantially represented by:

- **Debentures**: When available, we use price information for transactions recorded in the Brazilian Debenture System (SND), an electronic platform operated by CETIP, which provides multiple services for transactions involving debentures in the secondary market. Alternatively, prices of debentures provided by ANBIMA are used. Its methodology includes obtaining, on a daily basis, illustration and non-binding prices from a group of market players deemed to be significant. Such information is subject to statistical filters established in the methodology, with the purpose of eliminating outliers.

- **Global and corporate securities**: The pricing process for these securities consists in capturing from 2 to 8 quotes from Bloomberg, depending on the asset. The methodology consists in comparing the highest purchase prices and the lowest sale prices of trades provided by Bloomberg for the last day of the month. Such prices are compared with information from purchase orders that the Institutional Treasury of ITAÚ UNIBANCO HOLDING provides for Bloomberg. Should the difference between them be lower than 0.5%, the average price of Bloomberg is used. Should it be higher than 0.5% or if the Institutional Treasury does not provide information on this specific security, the average price gathered directly from other banks is used. The price of the Institutional Treasury is used as a reference only and never in the computation of the final price.

Level 3 recurring fair value measurements

The departments in charge of defining and applying the pricing models are segregated from the business areas. The models are documented, submitted to validation by an independent area and approved by a specific committee. The daily process of price capture, calculation and disclosure are periodically checked according to formally defined testing and criteria and the information is stored in a single and corporate history data base.

The most recurring cases of assets classified as Level 3 are justified by the discount factors used. Factors such as the fixed interest curve in Reais and the TR coupon curve – and, as a result, its related factors – have inputs with terms shorter than the maturities of these fixed-income assets. For swaps, the analysis is carried out by index for both parties. There are some cases in which the inputs periods are shorter than the maturity of the derivative.
Level 3 recurring fair value changes

The tables below show the changes in balance sheet for financial instruments classified by ITAÚ UNIBANCO HOLDING in Level 3 of the fair value hierarchy. Derivative financial instruments classified in Level 3 mainly correspond to other derivatives linked to shares.

Sensitivity analyses operations of Level 3

The fair value of financial instruments classified in Level 3 (in which prices negotiated are not easily noticeable in active markets) is measured through assessment techniques based on correlations and associated products traded in active markets, internal estimates and internal models.

Significant unverifiable inputs used for measurement of the fair value of instruments classified in Level 3 are: interest rates, underlying asset prices and volatility. Significant variations in any of these inputs separately may give rise to significant changes in the fair value.

The table below shows the sensitivity of these fair values in scenarios of changes of interest rates, asset prices, or in scenarios vary in prices with shocks and the volatility for non-linear assets:

<table>

</tr>
</tbody>
</table>

The following scenarios are used to measure the sensitivity:

**Interest rate**

Shocks at 1, 25 and 50 basis points (scenarios I, II and III respectively) in the interest curves, both for increase and decrease, considering the largest losses resulting in each scenario.

**Currencies, commodities and ratios**

Shocks at 5 and 10 percentage points (scenarios I and II respectively) in prices of currencies, commodities and ratios, both for increase and decrease, considering the largest losses resulting in each scenario.

**Non linear**

**Scenario I**: Shocks at 5 percentage points in prices and 25 percentage points the level in volatility, both for increase and decrease, considering the largest losses resulting in each scenario.

**Scenario II**: Shocks at 10 percentage points in prices and 25 percentage points the level in volatility, both for increase and decrease, considering the largest losses resulting in each scenario.
In the ordinary course of its businesses, ITAÚ UNIBANCO HOLDING is subject to contingencies that may be classified as follows:

a) Contingent assets: there are no contingent assets recorded.

b) Provisions and contingencies: the criteria to quantify contingencies are appropriate to the specific characteristics of civil, labor and tax litigation, as well as other risks.

- Civil lawsuits

Collective lawsuits (related to claims of a similar nature and with individual amounts not considered significant): contingencies are determined on a monthly basis and the expected amount of losses is accrued based on statistical models that take into account the type of lawsuit and the characteristics of the court (Small Claims Court or Regular Court).

Individual lawsuits (related to claims with unusual characteristics or involving significant amounts): calculation is carried out on a periodic basis, from the calculation of the claimed amount which, in turn, is estimated based on the *de jure* or *de facto* characteristics related to that lawsuit. The amounts considered as representing probable losses are recorded as provisions.

In general, contingencies arise from revisions of contracts and compensation for damages and pain and suffering. ITAÚ UNIBANCO HOLDING is also a party to specific lawsuits related to the collection of understated inflation adjustments to savings accounts resulting from economic plans.

From 1986 to 1994, the Brazilian federal government implemented several consecutive monetary stabilization plans (MSPs) to combat hyperinflation. In order to implement these plans, the Brazilian federal government enacted several laws based on its power to regulate the monetary and financial systems, as granted by the Brazilian federal constitution.

Savings account holders at the time when these MSPs were implemented challenged the constitutionality of the laws in connection with such plans, claiming, from the banks in which they held savings accounts, additional interest based on the inflation rates applied to the deposit accounts based on the MSPs.

ITAÚ UNIBANCO HOLDING is defendant in numerous standardized lawsuits filed by individuals in respect of the MSP, and records provisions for such claims upon service of a process for a claim. In addition, ITAÚ UNIBANCO HOLDING is defendant in class actions, similar to the lawsuits brought by individuals, filed by either: (i) consumer protection associations, or (ii) the Public Prosecution Office on behalf of savings account holders. Holders of savings accounts may claim any amount due based on such a decision. ITAÚ UNIBANCO HOLDING records provisions when individual plaintiffs apply to enforce such decisions, using the same criteria adopted to determine provisions for individual lawsuits.

The Federal Supreme Court (STF) has issued some decisions favorable to savings account holders, but has not issued a final ruling with respect to the constitutionality of the MSPs as applicable to savings accounts. In relation to a similar dispute with respect to the constitutionality of the MSPs as applicable to time deposits and other private agreements, the STF has determined that the bills were constitutional. As a response to this discrepancy, the National Confederation of the Financial System (CONSIF) an association of Brazilian financial institutions, filed a special proceeding with the STF (Action against the violation of a constitutional fundamental right No. 165 - “ADPF” No. 165), in which the Central Bank filed an amicus brief, arguing that savings account holders did not incur actual damages and that the MSPs as applicable to savings accounts
were in accordance with the federal constitution. Accordingly, the STF suspended the rulings on all appeals involving this matter until it pronounces a final decision. However, there is no estimate when the judgment by STF will occur, since, due to the disqualification of certain ministers, there is no sufficient quorum at this time to resolve on the issue.

The most important rulings will address the following issues: (i) the accrual of compensatory interest on the amount due to the plaintiff, on filings that carry no specific claim to such interest; (ii) the initial date of default interest, for class actions; and (iii) the possibility of compensating the negative difference arising in the month of the MSP implementation, between the interests actually paid on savings accounts and the inflation rate for the same period, with the positive difference arising in the months subsequent to the MSP implementation, between the interests actually paid on savings accounts and the inflation rate of the same period. In relevant sentences in 2015, the STJ decided that: (i) the inclusion of interest in the calculation of execution is not applicable if there is no express sentence for this; and (ii) there shall be no payment of interest to holders of savings accounts after the proven closing date of those accounts. The thesis that understated inflation of plans subsequent to those challenged in the lawsuit can be included as full monetary correction of the debt, even with no express claim by the holder of savings account, has been reaffirmed. Additionally, STJ reaffirmed that the term for filing collection lawsuits expired within five years counted from the implementation date of the monetary stabilization plan (MSP). Accordingly, various collective lawsuits continue being extinguished by the Judiciary Branch as a result of this decision.

No amount is recorded as a provision in relation to civil lawsuits which represent possible losses and which have a total estimated risk of R$ 2,460 (R$ 1,800 at 12/31/2014), these refer to claims for compensation or collection, the individual amounts of which are not significant and in this total there are no values resulting from interests in joint ventures.

- Labor claims

Collective lawsuits (related to claims of a similar nature and with individual amounts not considered significant): the expected loss amount is determined and accrued monthly based on the statistical share pricing model and is reassessed taking into account court rulings. These are adjusted to reflect the amounts deposited as guarantee for their execution when realized.

Individual lawsuits (related to claims with unusual characteristics or involving significant amounts): determined periodically, based on the amount claimed and the likelihood of loss, which, in turn, is estimated according to the factual and legal characteristics related to such lawsuit. The amounts considered as probable losses are recorded as provisions.

Contingencies are related to lawsuits in which alleged labor rights based on labor legislation, such as overtime, salary equalization, reinstatement, transfer allowances, pension plan supplements and other matters are claimed.

No amount is recorded as a provision for labor claims for which the likelihood of loss is considered possible, and for which the total estimated risk is R$ 829 (R$ 416 12/31/2014).

- Other risks

These are quantified and recorded as provisions mainly based on the evaluation of agribusiness credit transactions with joint obligation and FCVS (Salary Variations Compensation Fund) credits transferred to Banco Nacional.
The table below shows the changes in the balances of provisions for civil, labor and other provision and the respective escrow deposit balances:

(*) Civil provisions include the provision for economic plans amounting to R$ 247.

- **Tax and social security lawsuits**

Contingencies are equivalent to the principal amount of taxes involved in administrative or judicial disputes, subject to tax assessment notices, plus interest and, when applicable, fines and charges. The amount is recorded as a provision when it involves a legal liability, regardless of the likelihood of loss, that is, a favorable outcome for the institution is dependent upon the recognition of the unconstitutionality of the applicable laws in force. In other cases, a provision is set up whenever the loss is considered probable.
The table below shows the changes in the balances of provisions and respective balance of escrow deposits for tax and social security lawsuits:

Main discussions related to the provisions recognized for Tax and Social Securities Lawsuits are described as follows:

- **CSLL – Isonomy – R$ 1,098**: as the law increased the CSLL rate for financial and insurance companies to 15%, we argue that there is no constitutional support for this measure and, due to the principle of isonomy, we believe we should only pay the regular rate of 9%. The corresponding escrow deposit balance totals R$ 1,084;

- **INSS – Prevention Accident Factor (FAP) – R$ 834**: it challenges the legality of FAP and inconsistent procedures applied by the INSS upon its calculation. The corresponding escrow deposit balance totals R$ 98;

- **PIS and COFINS – Calculation basis – R$ 613**: we are claiming that those contributions on revenue should be applied only to the revenue from sales of assets and services. The corresponding escrow deposit balance totals R$ 540;

- **IRPJ and CSLL – Taxation of profits earned abroad – R$ 559**: we are challenging the calculation basis for these taxes on profits earned abroad and argue that Regulatory Instruction SRF No. 213-02 is not applicable since it goes beyond the text of the law. The corresponding escrow deposit balance totals R$ 215.

**Off-balance sheet contingencies** – The estimated amounts at risk in the main tax and social security lawsuits with a likelihood of loss deemed possible, which total R$ 16,165, are described below:

- **INSS – Non-compensatory amounts – R$ 4,429**: we defend the non-taxation of these amounts, mainly profit sharing, stock options plan, transportation vouchers and sole bonuses;

- **IRPJ and CSLL – Goodwill – Deductibility – R$ 2,867**: the deductibility of goodwill on acquisition of investments with future expected profitability, and R$ 612 of this amount is guaranteed in company purchase agreements;

- **IRPJ, CSLL, PIS and COFINS – Requests for offsetting dismissed - R$ 1,365**: cases in which the liquidity and the ability of offset credits are discussed;

- **IRPJ and CSLL - Interest on capital - R$ 1,301**: the company is defending the deductibility of interest on capital declared to stockholders based on the Brazilian long term interest rate applied to stockholders’ equity for the year and prior years;

- **ISS – Banking Institutions – R$ 960**: these are banking operations, the revenue from which may not be interpreted as prices for services rendered, and/or which arises from activities not listed in a Supplementary Law.

c) **Receivables - Reimbursement of contingencies**

The Receivables balance arising from reimbursements of contingencies totals R$ 1,093 (R$ 676 at 12/31/2014) (Note 20a), basically represented by the guarantee received for the Banco Banerj S.A. privatization process which occurred 1997, where the State of Rio de Janeiro created a fund to guarantee civil, labor and tax contingencies.

d) **Assets pledged as collateral for contingencies**

Assets pledged as collateral for lawsuits involving contingent liabilities are restricted or deposited as shown below:

Escrow deposits are generally required to be made with the court in connection with lawsuits in Brazil, and they are held by the respective court until a decision is made. In case of a decision against ITAÚ UNIBANCO HOLDING, the deposited amount is released from escrow and transferred to the counterparty to the lawsuit. In the case of a decision in favor of ITAÚ UNIBANCO HOLDING, the deposited amount is released at the full deposited and updated amount.

In general, provisions related to lawsuits of ITAÚ UNIBANCO HOLDING are long term, considering the time required for the termination of these lawsuits in the Brazilian judicial system, which is the reason why no estimate of the specific year in which these lawsuits will be terminated has been disclosed.

In the opinion of the legal advisors, ITAÚ UNIBANCO HOLDING and its subsidiaries are not parties to any other administrative proceedings or legal lawsuits that could significantly impact the results of their operations.

e) Program for Cash or Installment Payment of Federal Taxes – Law No. 12,865 of October 9, 2013, as amended by Provisional Measure No. 627 of November 11, 2013.

ITAÚ UNIBANCO HOLDING and subsidiaries adhered to the Program for Cash or Installment Payment of Federal Taxes, enacted by Law No. 12,865 of October 9, 2013. The program included the debits administered by the Federal Reserve Service of Brazil and the General Attorney’s Office of the National Treasury past due, and is defined in accordance with the Articles below:

- **REFIS – PIS and COFINS (Article 39 of Law No. 12,865)**
  The debits with the National Treasury related to PIS (social integration program) and COFINS (tax for social security financing), addressed by Chapter I of Law No. 9,718 of November 27, 1998 (legal entities governed by private law), due by financial institutions and insurance companies, past due up to December 31, 2012;

- **REFIS – Profits Abroad (Article 40 of Law No. 12,865)**
  The debits with the National Treasury related to IRPJ (corporate income tax) and CSLL (social contribution on net income), arising from profits earned by subsidiaries or affiliates abroad (Article 74 of Provisional Measure No. 2,158-35, of August 24, 2001), past due up to December 31, 2012;

- **REFIS – crisis event (Article 17 of Law No. 12,865)**
  This program refers to the renegotiation of federal debits administered by the Federal Reserve Service of Brazil and the General Attorney’s Office of the National Treasury past due, either registered or not as overdue tax liabilities, even when a tax foreclosure has been filed.

The net effect in income amounted to R$ 508, recorded under tax expenses, other income and income tax and social contribution.

f) Program for Cash or Installment Payment of Taxes

ITAÚ UNIBANCO HOLDING and its subsidiaries adhered to the Program for Cash or Installment Payment of Taxes, substantially related to the Federal area, established by Law No. 13,097, of January 19, 2015 and Law No. 13,043/2014. The program included debits managed by the Federal Reserve Service of Brazil and was established in accordance with the main article as follows:

- **Refis of Capital Gain Earned in the Merger of Shares from Nova Bolsa**
  Law 13,097/15 article 145 – Arising from capital gain earned until December 31, 2008 due to the sale of shares resulting from the conversion of equity securities from nonprofit associations.

The net effect of the program in the results was R$ 27, and is reflected in Other Operating Income, Income Tax and Social Contribution.
g) Programs for Cash or Installment Payment of Municipal Taxes

ITAÚ UNIBANCO HOLDING and its subsidiaries adhered to the Programs for Incentivized Installment Payment substantially related to the municipal level, established by Laws: São Paulo (Law No. 16,097, of 12/29/2014); (Law No. 55,828, of 01/07/2015); Rio de Janeiro (Law No. 5,854, of 04/27/2015). The programs included debts managed by said municipalities and can be defined as follows:

- **PPI – Incentivized Installment Payment** – the programs promote the regularization of debts mentioned in these laws, arising from tax and non-tax credits, either recognized or not, including those that are part of the Enforceable Debt, either filed or to be filed in court.

The net effect of the programs in result was R$ 9, and it is recorded in Other Operating Income, Income Tax and Social Contribution.
Note 33 – Regulatory capital

ITAÚ UNIBANCO HOLDING is subject to regulation by the Central Bank of Brazil which issues rules and instructions regarding currency and credit policies for financial institutions operating in Brazil. The Central Bank also determines minimum capital requirements, fixed assets limits, lending limits, accounting practices and compulsory deposit requirements, and requires banks to comply with regulation based on the Basel Accord as regards to capital adequacy. Furthermore, the National Council of Private Insurance and SUSEP issue regulations on capital requirements which affect our insurance, private pension and capitalization operations.

The Basel Accord requires banks to have a ratio of regulatory capital to risk exposure assets of a minimum of 8%. The regulatory capital is basically composed of two tiers:

- Tier I: sum of Principal Capital, determined in general by capital, certain reserves and retained earnings, less deductions and prudential adjustments, and Supplementary Capital.

- Tier II: includes eligible instruments, primarily subordinated debt, subject to prudential limitations.

However, the Basel Accord allows the regulatory authorities of each country to establish their own parameters for regulatory capital composition and to determine the portions exposed to risk. Among the main differences arising from the adoption of own parameter pursuant to the Brazilian legislation are the following: (i) the requirement of a ratio of regulatory capital to risk-weighted assets at a minimum of 11%; with timeline to achieve 8% in 2019; (ii) certain risk-weighted factors attributed to certain assets and other exposures. In addition, in accordance with Central Bank rules, banks can calculate compliance with the minimum requirement based on the consolidation of all financial subsidiaries supervised by the Central Bank, including branches and investments abroad.

Management manages capital with the intention to meet the minimum capital required by the Central Bank of Brazil. During the period ITAÚ UNIBANCO HOLDING complied with all externally imposed capital requirements to which we are subject.

The following table summarizes the composition of regulatory capital, the minimum capital required and the Basel ratio computed in accordance with the Central Bank of Brazil, on a financial institution consolidation basis.

(*) Consolidated financial statements including financial companies and the like: As from the base date January 2015, in accordance with Circular 4,278, this is the basis for the consolidation calculation.
The funds obtained through the issuance of subordinated debt securities are considered Tier II capital for the purpose of capital to risk-weighted assets ratio, as follows. According to current legislation, the accounting balance of subordinated debt as of December 2012 was used for the calculation of reference equity as of December, 2015, considering instruments approved after the closing date to compose Tier II, totaling R$ 51,134.

Note 34 – Segment Information

ITAÚ UNIBANCO HOLDING is a banking institution that offers its customers a wide range of financial products and services.

As from the first quarter of 2015 and the comparison with 2014, the way of presenting the segments was changed in order to adjust it to the bank’s current organizational structure. The following segments will be reported: Retail Banking, Wholesale Banking, and Activities with the Market + Corporation. The Retail Banking now covers the former segments Commercial Banking, – Retail and Consumer Credit – Retail, with the transfer of operations from Private Banking and Latam to the Wholesale Banking and these are the main changes of this presentation.

The current operational and reporting segments of ITAÚ UNIBANCO HOLDING are described below:

- **Retail Banking**

  The result of the Retail Banking segment arises from the offer of banking products and services to a diversified client base of account holders and non-account holders, individuals and companies. The segment includes retail clients, high net worth clients (Itaú Uniclass and Personnalité), and the corporate segment (very small and small companies). This segment comprises financing and lending activities carried out in units other than the branch network, and offering of credit cards, in addition to operations with Itaú BMG Consignado.

- **Wholesale Banking**

  The result of the Wholesale Banking segment arises from the products and services offered to middle-market companies, private banking clients, from the activities of Latin America units, and the activities of Itaú BBA, the unit in charge of commercial operations with large companies and performing as an investment banking unit.

- **Activities with the Market + Corporation**

  This segment records the result arising from capital surplus, subordinated debt surplus and the net balance of tax credits and debits. It also shows the financial margin with the market, the Treasury operating cost, the equity in earnings of companies not associated to each segment and the interest in Porto Seguro.

**Basis of presentation of segment information**

Segment information is prepared based on the reports used by top management (Executive Committee) to assess the performance and to make decisions regarding the allocation of funds for investment and other purposes.

The top management (Executive Committee) of ITAÚ UNIBANCO HOLDING uses a variety of information for such purposes including financial and non-financial information that is measured on different bases as well as information prepared based on accounting practices adopted in Brazil. The main index used to monitor the business performance is the Recurring Net Income and the Economic Capital allocated to each segment.

The segment information has been prepared following accounting practices adopted in Brazil modified for the adjustments described below:

- **Allocated capital and income tax rate**

  Based on the managerial income statement, the segment information considers the application of the following criteria:

  **Allocated capital:** The impacts associated to capital allocation are included in the financial information. Accordingly, adjustments were made to the financial statements, based on a proprietary model. The Allocated Economic Capital (AEC) model was adopted for the financial statements by segments, and as from 2015, we changed the calculation methodology. The AEC considers, in addition to Tier I allocated capital, the effects of the calculation of expected loan losses, supplementary to the requirements of the Central Bank of Brazil, pursuant to CMN Circular No. 2.682/99. Accordingly, the Allocated Capital comprises the following components: Credit risk (including expected loss), operational risk, market risk and insurance underwriting risk. Based on the portion of allocated capital tier I, we calculated the Return on Economic Allocated Capital, which corresponds to
an operational performance indicator consistently adjusted to the capital required to support the risk associated to asset and liability positions assumed, in conformity with our risk appetite.

**Income tax rate:** We consider the total income tax rate, net of the tax effect from the payment of interest on capital, for the Retail Banking, Wholesale Bank and Activities with the Market segments. The difference between the income tax amount calculated by segment and the effective income tax amount, as stated in the consolidated financial statements, is allocated to the Activities with the Market + Corporation column.

- **Reclassification and application of managerial criteria**

  The managerial statement of income was used to prepare information per segment. These statements were obtained based on the statement of income adjusted by the impact of non-recurring events and the managerial reclassifications in income.

  From the first quarter of 2013 on, some changes were made in the consolidation criteria for managerial results presented in order to better reflect the way Management monitors the bank’s figures. These adjustments change the order of presentation of the lines only and, therefore, do not affect the net income disclosed. Through these reclassifications, ITAÚ UNIBANCO HOLDING seeks to align the way it presents its results and enables a better comparison and understanding of the bank’s performance assessment.

  We describe below the main reclassifications between the accounting and managerial results:

  **Banking product:** The banking product considers the opportunity cost for each operation. The financial statements were adjusted so that the stockholders' equity was replaced by funding at market price. Subsequently, the financial statements were adjusted to include revenues related to capital allocated to each segment. The cost of subordinated debt and the respective remuneration at market price were proportionally allocated to the segments, based on the economic allocated capital.

  **Hedge tax effects:** The tax effects of the hedge of investments abroad were adjusted – these were originally recorded in the tax expenses (PIS and COFINS) and Income Tax and Social Contribution on net income lines – and are now reclassified to the margin. The strategy to manage the foreign exchange risk associated to the capital invested abroad aims at preventing the effects of the exchange rates variation on income. In order to achieve this objective, we used derivative instruments to hedge against such foreign currency risk, with investments remunerated in Reais. The hedge strategy for foreign investments also considers the impact of all tax effects levied.

  **Insurance:** Insurance business revenues and expenses were concentrated in Income related to Insurance, pension plan and capitalization operations. The main reclassifications of revenues refer to the financial margins obtained with the technical provisions of insurance, pension plan and capitalization, in addition to revenue from management of pension plan funds.

  **Other reclassifications:** Other Income, Share of Income of Associates, Non-Operating Income, Profit Sharing of Management Members and Expenses for Credit Card Reward Program were reclassified to those lines representing the way the institution manages its business, enabling greater understanding for performance analysis. Accordingly, equity in earnings of investment in Banco CSF S.A. ("Banco Carrefour") was reclassified to the financial margin line. Additionally, for better comparison with the new consolidation criteria, 100% of the results from partnerships were consolidated (they were previously proportionally consolidated), and expenses for provisions associated to securities and derivatives were reclassified (from Non-interest expenses income to Expenses for allowance for loan losses).

  The adjustments and reclassifications column shows the effects of the differences between the accounting principles followed for the presentation of segment information, which are substantially in line with the accounting practices adopted for financial institutions in Brazil, except as described above, and the policies used in the preparation of these consolidated financial statements according to IFRS. Main adjustments are as follows:

  - Allowance for Loan Losses, which, under IFRS (IAS 39), should be recognized upon objective evidence that loan operations are impaired (incurred loss), and the Expected Loss concept is adopted according to Brazilian accounting standards;
• Shares and units classified as permanent investments were stated at fair value under IFRS (IAS 39 and 32), and their gains and losses were directly recorded to Stockholders’ Equity, not passing through income for the period;

• Effective interest rates, financial assets and liabilities stated at amortized cost, are recognized by the effective interest rate method, allocating revenues and costs directly attributable to acquisition, issue or disposal for the transaction period of the operation; according to Brazilian standards, fee expenses and income are recognized as these transactions are engaged.

• Business combinations are accounted for under the acquisition method in IFRS (IFRS 3), in which the purchase price is allocated among assets and liabilities of the acquired company, and the amount not subject to allocation, if any, is recognized as goodwill. Such amount is not amortized, but is subject to an impairment test.

[1] Includes interest and similar income, dividend income, net gain (loss) on investment securities and derivatives, foreign exchange results, and exchange variation on transactions.
[2] ITAÚ UNIBANCO HOLDING does not have clients representing 10% or higher of its revenues.
In addition to the aforementioned operations, ITAÚ UNIBANCO HOLDING and non-consolidated related parties, as an integral part of ITAÚ UNIBANCO HOLDING Agreement for Apportionment of Common Costs, recorded in General and Administrative Expenses - Other, the amount of R$ (4) (R$ (5) from 01/01 to 12/31/2014 and (5) from 01/01 to 12/31/2013) due to the use of the common structure.

Pursuant to the current rules, financial institutions cannot grant loans or advances to the following:

a) any individuals or companies that control the Institution or any entity under common control with the institution, or any executive officer, director, member of the fiscal council, or the immediate family members of these individuals;

b) any entity controlled by the institution; or

c) any entity in which the bank directly or indirectly holds more than 10% of the capital stock.

Therefore, no loans or advances were granted to any subsidiary, executive officer, director or family members.

b) Compensation of the key management personnel

Compensation for the period paid to key management members of ITAÚ UNIBANCO HOLDING consisted of:
Note 36 – Management of financial risks

Credit risk

1. Credit risk measurement

Credit risk is the possibility of losses arising from the breach by the borrower, issuer or counterparty of the respective agreed-upon financial obligations, the devaluation of loan agreement due to downgrading of the borrower’s, the issuer’s, the counterparty’s risk rating, the reduction in gains or compensation, the advantages given upon posterior renegotiation and the recovery costs.

The credit risk management of ITAÚ UNIBANCO HOLDING’s is the primary responsibility of all business units and aims to keep the quality of loan portfolios in levels consistent with the institution’s risk appetite for each market segment in which it operates.

ITAÚ UNIBANCO HOLDING establishes its credit policies based on internal factors, such as the client rating criteria, performance of and changes in portfolio, default levels, return rates, and the allocated economic capital; and external factors, related to the economic environment, interest rates, market default indicators, inflation, changes in consumption.

ITAÚ UNIBANCO HOLDING has a structured process to keep a diversified portfolio deemed as adequate by the institution. The ongoing monitoring on the concentration level of portfolios, by assessing the economic activity sectors and major debtors, enables it to take preventive measures, to prevent that defined limits be breached.

The process for analyzing the policy and products enables ITAÚ UNIBANCO HOLDING to identify potential risks, so as to make sure that credit decisions make sense from an economic and risk perspective.

The centralized process for approval of credit policies and validation of models of ITAÚ UNIBANCO HOLDING assures the synchrony of credit actions.

The table below shows the correspondence between risk levels attributed by all segments of ITAÚ UNIBANCO HOLDING internal models (lower risk, satisfactory, higher risk and impaired) and the probability of default associated with each of these levels, and the risk levels assigned by the respective market models.

</table>

The credit rating in corporate transactions is based on information such as economic and financial condition of the counterparty, its cash-generating capabilities, the economic group to which it belongs, the current and prospective situation of the economic sector in which it operates. The credit proposals are analyzed on a case by case basis, through an approval-level mechanism subordinated to the Superior Credit Committee.

Regarding retail (individuals, small and middle-market companies), the rating is assigned based on application and behavior score statistical models. Decisions are made based on scoring models that are continuously followed up by an independent structure. Exceptionally, there may also be individualized analysis of specific cases where approval is subject to competent credit approval levels.

Government securities and other debt instruments are classified by ITAÚ UNIBANCO HOLDING according to their credit quality aiming at managing their exposures.

In line with the principles of CMN Resolution N° 3,721, of April 30, 2009, ITAÚ UNIBANCO HOLDING has structure and corporate guidelines on credit risk management, approved by its Board of Directors, applicable to companies and subsidiaries in Brazil and abroad.
2. Credit risk management

The centralized control over credit risk is carried out by the independent executive area responsible for controlling risks and segregated from the business units, as required by regulation in force.

ITAÚ UNIBANCO HOLDING strictly controls the credit exposure of clients and counterparties, taking action to address situations in which the actual exposure exceeds the desired one. For that purpose, contractually provided actions can be taken, such as early payment or requirement of additional collateral.

3. Collateral and policies for mitigating credit risk

ITAÚ UNIBANCO HOLDING uses guarantees to increase its recovery capacity in transactions involving credit risk. The guarantees used may be personal guarantees, collateral, legal structures with mitigation power and offset agreements.

For collaterals to be considered instruments that mitigate credit risk, they must comply with the requirements and standards of the rules that regulate them, be them domestic or not, and they must be legally valid (effective), enforceable and assessed on a regular basis.

ITAÚ UNIBANCO HOLDING also uses credit derivatives, such as single name CDS, to mitigate credit risk of its portfolios of loans and securities. These instruments are priced based on models that use the fair value of market inputs, such as credit spreads, recovery rates, correlations and interest rates.

The credit limits are continually monitored and changed according to customer behavior. Thus, the potential loss values represent a fraction of the amount available.

4. Policy on the provision

The policies on the provision adopted by ITAÚ UNIBANCO HOLDING are aligned with the guidelines of IFRS and the Basel Accord. As a result, an allowance for loan losses is recognized when there are indications of the impairment of the portfolio and takes into account a horizon of loss appropriate for each type of transaction. We consider as impaired loans overdue for more than 90 days, renegotiated loans overdue by more than 60 days and Corporate loans below a specific internal rating. Loans are written-down 360 days after such loans become past due or 540 days of being past due in the case of loans with original maturities over 36 months.

5. Credit risk exposure

</tbody>
</table>
The table above presents the maximum exposure at December 31, 2015 and December 31, 2014, without considering any collateral received or other additional credit improvements.

For assets recognized in the balance sheet, the exposures presented are based on net carrying amounts. This analysis includes only financial assets subject to credit risk and excludes non-financial assets.

The contractual amounts of endorsements and sureties and letters of credit represent the maximum potential of credit risk in the event the counterparty does not meet the terms of the agreement. The vast majority of commitments (real estate loans, overdraft accounts and other pre-approved limits) mature without being drawn, since they are renewed monthly and we have the power to cancel them at any time. As a result, the total contractual amount does not represent our effective future exposure to credit risk or the liquidity needs arising from such commitments.

As shown in the table, the most significant exposures correspond to loan operations, financial assets held for trading, and securities purchased under agreements to resell, in addition to sureties, endorsements and other commitments.

The maximum exposure to the quality of the financial assets presented highlights that:

- 87.7% of loan operations and other financial assets exposure (Table 6.1 and 6.1.2) are categorized as low probability of default in accordance with our internal rating;
- only 3.6% of the total loans exposure (Table 6.1) is represented by overdue credits not impaired;
- 5.7% of the total loans exposure (Table 6.1) corresponds to overdue loans impaired.

5.1 Maximum exposure of financial assets segregated by business sector

</tbody>
</table>

The difference between the total loan portfolio and collateralized loan portfolio is generated by non-collateralized loans amounting to R$ 176,046 (R$ 175,325 at 12/31/2014).

ITAÚ UNIBANCO HOLDING uses collateral to reduce the occurrence of losses in operations with credit risk and manages and regularly reviews its collateral with the objective that collateral held is sufficient, legally exercisable (effective) and feasible. Thus, collateral is used to maximize the recoverability potential of impaired loans and not to reduce the exposure value of customers and counterparties.

**Individuals**
- Personal – This category of credit products usually requires collateral, focusing on endorsements and sureties.
- Vehicles – For this type of operation, clients' assets serve as collateral, which are also the leased assets in leasing operations.
- Mortgage loans – Regards buildings themselves given in guarantee.

**Small, Medium Businesses and Corporate** – For these operations, any collateral can be used within the credit policy of ITAÚ UNIBANCO HOLDING (chattel mortgage, assignment trust, surety / joint debtor, Mortgage and others).

**Foreign loans – Latin America** – For these operations, any collateral can be used within the credit policy of ITAÚ UNIBANCO HOLDING (chattel mortgage, assignment trust, surety/joint debtor, Mortgage and others).
7. Repossessed assets

Repossessed assets are recognized as assets when possession is effectively obtained.

Assets received from the foreclosure of loans, including real estate, are initially recorded at the lower of: (i) the fair value of the asset less the estimated selling expenses, or (ii) the carrying amount of the loan.

Further impairment of assets is recorded as a provision, with a corresponding charge to income. The maintenance costs of these assets are expensed as incurred.

The policy for sales of these assets (assets not for use) includes periodic auctions that are announced in advance and considers that the assets cannot be held for more than one year as stipulated by the BACEN. This period may be extended at the discretion of BACEN.

The amounts below represent total assets repossessed in the period:

Market risk

Market risk is the possibility of incurring financial losses arising from the changes in the market value of positions held by a financial institution, including the risks of transactions subject to foreign exchange variation, interest rates, share prices, price indexes and commodity prices, among other indices related to risk factors.

Market risk management is the process through which the ITAÚ UNIBANCO HOLDING monitors and controls the risks of variations in financial instruments market values due market changes, aimed at optimizing the risk-return ratio, by using an appropriate structure of limits, alerts, models and adequate management tools.

The policy of risk management the ITAÚ UNIBANCO HOLDING is in line with the principles of CMN Resolution No. 3,464 of June 26, 2007, and posterior amendments, comprising a set of principles that drive the institution’s strategy of control and management of market risks in all business units and legal entities of ITAÚ UNIBANCO HOLDING.

The risk management strategy of ITAÚ UNIBANCO HOLDING tries to achieve a balance between business objectives, considering among others:

- Political, economic and market context;
- Portfolio profile of ITAÚ UNIBANCO HOLDING;
- Capacity to operate in specific markets.

The process for managing the market risk of ITAÚ UNIBANCO HOLDING is conducted within the governance and hierarchy of committees and a framework of limits and warnings approved specifically for this purpose, covering different levels and classes of market risk (such as interest rate, and exchange variation risk, among others). This framework of limits and warnings covers from the monitoring of risk aggregate indicators (portfolio level) to granular limits (individual desk level). The framework of market risk ranges from the risk factor level, with specific limits aiming at improving the risk monitoring and understanding process, and at avoiding risk concentration. These limits are quantified by assessing the forecasted results of the balance sheet, size of stockholders' equity, liquidity, markets complexity and volatility and the institution’s appetite for risk. Limits are monitored daily and excesses and potential violations are reported and discussed for each established limit:

- Within one business day, for management of business units in charge and executives of the risk control area and business areas; and
- Within one month, for proper committees.

Daily risk reports, used by the business and control areas, are issued to the top management. Additionally, risk control and management process is submitted to periodic reviews.

The structure of limits and alerts follows the Board of Directors' guidelines and is approved by panels. The process to definite limit levels and violation reports follow the governance to approve the internal policies of ITAÚ UNIBANCO HOLDING. The information flow established aims at disseminating information to the several levels of executives of the institution, including the members of the Executive Board, by means of the Committees in charge of risk management. This limit and warning framework increases effectiveness and the control coverage is reviewed at least on an annual basis.

The purpose of market risk of ITAÚ UNIBANCO HOLDING structure is:

- Providing visibility and assurance to all executive levels that the assumption of market risks is in line with ITAÚ UNIBANCO HOLDING and the risk-return objective;
- Promoting disciplined and educated discussion on the global risk profile and its evolution over time;
- Increasing transparency on the way the business seeks to optimize results;
- Providing early warning mechanisms in order to make the effective risk management easier, without jeopardizing the business purposes; and
- Monitoring and avoiding risk concentration.

The market risk control and management process is periodically reviewed with the purpose of keeping the process aligned with best market practices and complies with continuous improvement processes at ITAÚ UNIBANCO HOLDING.
The market risk is controlled by an area independent from the business areas, which is responsible for the daily activities of: (i) risk measurement and assessment, (ii) monitoring of stress scenarios, limits and warnings, (iii) application, analysis and tests of stress scenarios, (iv) risk reporting for individuals responsible within the business areas, in compliance with governance of ITAÚ UNIBANCO HOLDING, (v) monitoring of actions required for adjustment of positions and/or risk levels to make them feasible, and (vi) support to the launch of new financial products with security. For that purpose, ITAÚ UNIBANCO HOLDING has a structured reporting and information process and an information flow that provides input for the follow-up by committees and complies with the requirements of Brazilian and foreign regulatory agencies.

ITAÚ UNIBANCO HOLDING hedges transactions with clients and proprietary positions, including foreign investments, aiming at mitigating risks arising from fluctuations in market factors and maintaining the classification the transactions into the current exposure limits. Derivatives are the most frequently used instruments for these hedges. When these transactions are designed for as hedge accounting, specific supporting documentation is prepared, including continuous review of the hedge effectiveness (retrospective and prospective) and other changes in the accounting process. Accounting and managerial hedge are governed by corporate guidelines of ITAÚ UNIBANCO HOLDING.

Hedge accounting is treated in detail in the financial statement notes.

The market risk structure categorizes transactions as part of either the banking portfolio or the trading portfolio, in accordance with general criteria established by the National Monetary Council Resolution No. 3,464 and BACEN Circular No. 3,354.

The trading portfolio consists of all transactions involving financial instruments and goods, including derivatives, which are carried out with the intention of trading.

The banking portfolio is basically characterized by transactions from the banking business and transactions related to the management of the balance sheet of the institution. It has the no-intention of resale and medium and long term time horizons as general guidelines.

Exposures to market risks inherent in the many different financial instruments, including derivatives, are broken down into a number of risk factors, primary market components for pricing. The main risk factors measured by ITAÚ UNIBANCO HOLDING are:

- Interest rates risk: risk of financial losses on operations subject to interest rates variations;
- Foreign exchange-linked: the risk of losses arising from positions in transactions which are subject to a foreign exchange-linked interest rate;
- Foreign exchange rates: risk of losses in operations subject to foreign exchange variation;
- Price index-linked: risk of financial losses on operations subject to changes in price index coupon rates;
- Variable income: risk of losses in operations subject to variation in goods prices and commodities.

The CMN has regulations that establish the segregation of exposure to market risk at least in the following categories: interest rate, exchange rate, shares and commodities. Inflation rates are addressed as a group of risk factors and received the same treatment as the other risk factors, such as interest rates, exchange rates, etc., and follow the structure of risk and limits governance adopted by ITAÚ UNIBANCO HOLDING to manage market risk.

Market risk is analyzed based on the following metrics:

- Value at risk (VaR): statistical metric that estimates the expected maximum potential economic loss under normal market conditions, taking into consideration a certain time horizon and confidence level;
- Losses in stress scenarios (Stress test): simulation technique to assess the behavior of assets, liabilities and derivatives of a portfolio when several risk factors are taken to extreme market situations (based on prospective and historical scenarios) in the portfolio;
- Stop loss: metrics which purpose is to review positions, should losses accumulated in a certain period reach a certain amount;
- Concentration: cumulative exposure of a certain financial instruments or risk factor calculated at market value ("MtM – Mark to Market"); and
- Stressed VaR: statistical metric resulting from the VaR calculation, with the purpose of capturing the highest risk in simulations for the current portfolio, considering the returns that can be observed in historic scenarios of extreme volatility.
In addition to the risk measures, sensitivity and loss control measures are also analyzed. They comprise:

- Gap analysis: accumulated exposure, by risk factor, of cash flows expressed at market value, allocated at the maturity dates;
- Sensitivity (DV01 – Delta Variation): the impact on the cash flows market value when submitted to an one annual basis point increase in the current interest rates or index rate;
- Sensitivity to the Several Risk Factors (Greeks): partial derivatives of an options portfolio in relation to the underlying assets price, implicit volatility, interest rate and timing.

ITAÚ UNIBANCO HOLDING uses proprietary systems to measure the consolidated market risk. The processing of these systems principally takes place in São Paulo, in an access-controlled environment, being highly available, which has data safekeeping and recovery processes, and counts on such an infrastructure to ensure the continuity of business in contingency (disaster recovery) situations.

VaR - Consolidated ITAÚ UNIBANCO HOLDING

The Consolidated VaR of ITAÚ UNIBANCO HOLDING is calculated by the Historical Simulation method. This methodology performs a full revaluation of all positions through the actual historical distribution of assets.

The Consolidated Total VaR table provides an analysis of the exposure to market risk of ITAÚ UNIBANCO HOLDING portfolios, and to its foreign subsidiaries by showing where the largest concentrations of market risk are found. (foreign subsidiaries: Itau BBA International Plc, Banco Itaú Argentina S.A., Banco Itaú Chile S.A., Banco Itaú Uruguai S.A., Banco Itaú Paraguai S.A. and Itaú BBA Colombia S.A. – Corporación Financiera).

ITAÚ UNIBANCO HOLDING maintaining its conservative management and portfolio diversification, continued with its policy of operating within low limits in relation to its capital in the period.

From January 1st to December 31, 2015, the average total VaR in Historical Simulation was R$ 207.0 million, or 0.18% of total stockholders’ equity (throughout 2014 it was R$ 131.9 million or 0.13% of total stockholders’ equity).

Interest rate

The table on the positions of accounts subject to interest rate risk groups them by products, book value of accounts distributed by maturity. This table is not used directly to manage interest rate risks; it is mostly used to enable the assessment of mismatching between accounts and products associated thereto and to identify possible risk concentration.

The following table sets forth our interest-earning assets and interest-bearing liabilities and therefore does not reflect interest rate gap positions that may exist as of any given date. In addition, variations in interest rate sensitivity may exist within the repricing periods presented due to differing repricing dates within the period.

The exposure to share price risk is disclosed in Note 7 related to financial assets held for trading and Note 10, related to available-for-sale financial assets.
Liquidity risk

Liquidity risk is defined as the existence of imbalances between marketable assets and liabilities due – mismatching between payments and receipts - which may affect payment capacity of ITAÚ UNIBANCO HOLDING, taking into consideration the different currencies and payment terms and their respective rights and obligations.

Policies and procedures

The management of liquidity risks seeks to guarantee liquidity sufficient to support possible outflows in market stress situations, as well as the compatibility between funding and the terms and liquidity of assets.

ITAÚ UNIBANCO HOLDING has a structure dedicated to improve the monitoring, control and analysis, through models of projections of the variables that affect cash flows and the level of reserves in local and foreign currencies.

The document that details the guidelines established by the internal policy on liquidity risk management, that is not part of the financial statements, may be viewed on the website www.itau.com.br/relacoes-com-investidores, in the section Corporate Governance/Rules and Policies / Public Access Report – Liquidity Risk.

The liquidity risk measurement process makes use of corporate and own in-house developed application systems. ITAÚ UNIBANCO HOLDING manages proprietary IT systems to support the liquidity risk measurement process.

Additionally, ITAÚ UNIBANCO HOLDING establishes guidelines and limits. Compliance with these guidelines and limits is periodically analyzed in technical committees, and their purpose is to provide an additional safety margin to the minimum projected needs. The liquidity management policies and the respective limits are established based on prospective scenarios periodically reviewed and on the definitions of the top management.

These scenarios may be reviewed in view of cash requirements resulting from atypical market situations or arising from strategic decisions of ITAÚ UNIBANCO HOLDING.

In compliance with the requirements of CMN Resolution No. 4,090 of May 24, 2012 and BACEN Circular N° 3,749 of March 5, 2015 , the Statement of Liquidity Risk (DRL) is sent to BACEN on a monthly basis, and the following items for monitoring and supporting decisions are periodically prepared and submitted to top management:

- Different scenarios projected for changes in liquidity;
- Contingency plans for crisis situations;
- Reports and charts that describe the risk positions;
- Assessment of funding costs and alternative sources of funding;
- Monitoring of changes in funding through a constant control over sources of funding, considering the type of investor and maturities, among other factors;

Primary sources of funding

ITAÚ UNIBANCO HOLDING has different sources of funding, of which a significant portion is from the retail segment. Total funding from clients reached R$ 586.2 billion (R$ 538.1 billion at 12/31/2014), particularly funding from time deposits. A considerable portion of these funds – 34.5% of total, or R$ 202.1 billion – is available on demand to the client. However, the historical behavior of the accumulated balance of the two largest items in this group – demand and savings deposits - is relatively consistent with the balances increasing over time and inflows exceeding outflows for monthly average amounts.
ITAÚ UNIBANCO HOLDING manages its liquidity reserves based on estimates of funds that will be available for investment, considering the continuity of business in normal conditions.

During the period of 2015, ITAÚ UNIBANCO HOLDING maintained appropriate levels of liquidity in Brazil and abroad. Liquid assets (cash and deposits on demand, securities purchased under agreements to resell - funded position and government securities – available, detailed in the table Undiscounted future flows – Financial assets) totaled R$ 156.6 billion and accounted for 77.5% of the short term redeemable obligations, 26.7% of total funding, and 18.1% of total assets.

The table below shows the indicators used by ITAÚ UNIBANCO HOLDING in the management of liquidity risk:

Note 37 – Supplementary Information

Itaú Chile Holdings - On July 17, 2015, after approval of proper regulatory authorities, the subsidiary Itaú Chile Holdings (ICH) was dissolved. Therefore, the investments held by ICH were transferred to ITAÚ UNIBANCO HOLDING. The transaction had an accounting effect of R$ (251) million.

Note 38 - Subsequent events

CIB - In January 21, 2016, the ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A., signed a Memorandum of Understanding with Banco Bradesco S.A. Banco do Brasil S.A., Banco Santander S.A. and Caixa Econômica Federal in order to create a credit intelligence bureau (“CIB”) which will enable greater efficiency in the management and granting of credit lines at long and medium terms.

CIB will be structured as a corporation and the Parties, each of them holding a 20% equity ownership, will share its control.

CIB's incorporation is subject to the execution of definitive documents among the Parties, as well as the satisfaction of certain conditions precedent, including the approval by applicable regulatory authorities.

Acquisition of CorpBanca - On January 29, 2014, ITAÚ UNIBANCO HOLDING, through its subsidiary Banco Itaú Chile S.A. (BIC), entered into a Transaction Agreement with CorpBanca and its controlling stockholders (Corp Group), establishing the terms and conditions of the merger of operations of BIC and CorpBanca in Chile and in the other jurisdictions in which CorpBanca operates.

CorpBanca is a commercial bank headquartered in Chile, which also operates in Colombia and Panama. Focused on individuals and large and middle-market companies, it offers global banking products. In 2015, an accordance with the Chilean Superintendence of Banks, it was one of the largest private banks in Chile, in terms of overall size of loan portfolio, with a market share of 7.1%.

This agreement represents an important step in ITAÚ UNIBANCO HOLDING’s internationalization process and in its aim to become a leading bank in Latin America. As a result of the merger, ITAÚ UNIBANCO HOLDING rose from the seventh (7th) to the fourth (4th) place in the ranking of the largest banks in Chile.

The merger was approved by the stockholders of CorpBanca and BIC and by all proper regulatory authorities in Chile, Brazil, Colombia and Panama. As set forth in the amendment to the Transaction Agreement, entered into on June 2, 2015, the parties closed the operation on April 1, 2016, when they had full conditions for the corporate reorganization process.

The operation was consummated by means of:

i. Increase in BIC’ capital in the amount of R$ 2,309 million concluded on March 22, 2016;

ii. Merger of BIC into CorpBanca, with the cancellation of BIC’s shares and issue of new shares by CorpBanca, at the rate of 80,240 shares of CorpBanca for one share of BIC, so that interests resulting from the merger, named Itaú CorpBanca, are 33.58% for ITAÚ UNIBANCO HOLDING CONSOLIDATED and 33.13% for Corp Group.

iii. The following corporate structure resulted from the transaction:

<table>
<thead>
<tr>
<th>Ownership interest</th>
<th></th>

<td>33.29%</td>
</tr>
</tbody>
</table>

Itaú CorpBanca will be controlled from April 1, 2016 by ITAÚ UNIBANCO HOLDING, which entered into a Shareholders’ Agreement with Corp Group upon the closing of the operation. This Shareholders’ Agreement entitled ITAÚ UNIBANCO HOLDING to appoint members for the Board of Directors of Itaú CorpBanca.

The amounts of Itaú CorpBanca’s assets, liabilities, income and expenses were not included in the Consolidated Financial Statements of ITAÚ UNIBANCO HOLDING for the period ended December 31, 2015. The management of Itaú Unibanco Holding is assessing possible impacts in the allocation of goodwill of said operation and will disclose further details in the next financial statements. Said operation will not have significant accounting effect on the results of ITAÚ UNIBANCO HOLDING.
6_Sustainability

We believe that sustainable performance is generating shared value in the long term. Read about our operational strategy and 2015 highlights.
Our corporate vision is “to be the leading bank in sustainable performance and customer satisfaction”. This challenge can only be met by collaborative work involving our main stakeholders. We believe that challenging careers based on merits help to boost pride in belonging to our organization. Moreover, engaged employees deliver better services for their customers. The more customers are satisfied, the more they will remain loyal to the bank, developing lasting relationships that add value for stockholders and ensure results that enable society to develop. This is how we can create shared value, achieve positive results and encourage development for people, society and countries where we operate as part of a virtuous cycle of sustainable performance.

Materiality \( \text{GRI G4-18} \)

We consider a material theme any matter that has the capacity to affect our shared value creation in the short, medium or long term, from the standpoint of the organization and its main stakeholders. Determining material themes is crucial to guide decision-making, since it provides a broader vision of the risks and opportunities inherent to the business and connects the strategies to the multiple outside interests.

In 2014, we conducted a comprehensive process of defining material themes, which comprised environmental, social, economic and governance aspects. This study was developed by a diversified working group comprised of the areas of Corporate Communication, Finance, Investor Relations and Sustainability. The methodology used to determine our material themes consists of four distinct stages:

1. Identification
2. Prioritization
3. Validation
4. Evaluation

In the first stage (1), the main goal was to identify the key issues in our communication channels and the most suitable stakeholders to start the process of determining materiality. The methodology consisted of two stages: (i) identify the most relevant issues in our main communication channels; and (ii) identify the most suitable stakeholders for this consultation. We defined approximately 500 relevant issues for Itaú from our main communication channels and our reporting, listed below:

**Management and People**
- Organizational climate survey and union demands

**Financial and Operational Performance**
- Presentations of results aimed at investors: conference calls, APIMEC meetings and reports

**Business Sustainability**
- Sector studies by GRI (GRI-G4 – Financial Services Sector Disclosures) and SASB (Sustainability Accounting Standards Board) and Questionnaires from the Dow Jones Sustainability Index and BM&FBovespa Business Sustainability Index

**Analysis of Market Scenarios**
- Reports from the Ombudsman and our social media channels; Meetings with investors; and Materiality analysis from domestic and international financial institutions that are considered a benchmark in sustainability

This methodology of indirectly consulting our stakeholders to construct our materiality is only responsible for identifying the key issues for our stakeholders, not for incorporating them into the management. All the issues raised, regardless of the stakeholder group or the channel, are addressed and taken into consideration in the bank’s management directly by the area responsible and the channel of origin. For this reason, we shall not present here the details and the steps take on these issues. **GRI G4-27**
We determined the main stakeholders in accordance with our Sustainable Performance Spiral and we identified what they considered the most relevant issues through indirect consultations on our pre-established, impartial and legitimate communication channels. **GRI G4-25**

In the next stage (2), the issues were consolidated into more comprehensive themes, applying a preliminary analysis of materiality for management and stakeholders. The consolidated themes were then plotted in a prioritization matrix divided into two sections: (I) evaluation of the influence of the themes for the stakeholders and (II) analysis of the materiality for management.

In the stakeholder section, we analyzed the interest and the power of influence of each stakeholder in the theme. We assigned the same weight in the assessment to each of the four stakeholders. In the management section, meanwhile, we defined the questions or “drivers” that were used to assess each theme, all of which had the same weight in the assessment, in accordance with the bank’s management approach, as shown below:

Once this had been done (3), the prioritized themes were debated and validated internally by the Reporting Committee, a sustainability governance forum dedicated to implementing the best practices of reporting and transparency. Afterwards, the materiality study was submitted to the Audit Committee, the Disclosure Committee and the Sustainability Committee. The process of defining materiality was externally assured by PwC based on the guidelines of the AA1000 standard. **GRI G4-33**

Over the course of 2015, this working group performed an assessment of the matrix (4), refining the names of the themes and the issues related to each one of them. It was a thorough work of terminology, which was also approved by the Reporting Committee. This stage identified the need to integrate the theme “Environmental and Social Risk” with the theme “Risk and Capital Management”, reflecting more properly the management of the bank on these themes and observing the guidelines of Central Bank Standard: CVM Resolution No. 4,327.

We also performed an assessment of the impacts of each material theme on the organization and on our stakeholders. The assessment was performed for each of the indicators comprising the material theme and afterwards an analysis was conducted to prioritize the most relevant impacts on our business and on our stakeholders. As part of this stage, all the indicators deemed material until the 2014 report were also analyzed. A number of changes were made, with the inclusion and exclusion of some GRI G4 indicators, as presented below:
### Indicators included

<table>
<thead>
<tr>
<th>Indicator</th>

### Indicators excluded

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Justification</th>
</tr>
</thead>
<tbody>
<tr>
<td>GRI G4-LA7</td>
<td>Workers with high incidence or high risk of diseases related to their occupation. We reassessed the relevance of this indicator for the nature of our business and the functions of our employees and we considered that it is more suitable for non-financial services sectors. Our employees are minimally exposed to this risk, therefore we no longer consider this a material indicator.</td>
</tr>
<tr>
<td>GRI G4-SO11</td>
<td>Percentage of operations with implemented local community engagement, impact assessments and development programs. As a financial service provider, we are present all over Brazil. In addition, we see some difficulty in defining the term “Local Community”, adapting it to the reality of our business (branches, building administration and Data Centers) and measuring the different impacts in each of our locations. As such, the impact we cause on society is very complex to monitor and assess. We have made the decision to improve our management on the theme and to start to report it again when we develop the matter further.</td>
</tr>
</tbody>
</table>

Our commitment is to recreate the full methodology for constructing the matrix of material themes every 2 years, as we consider this the right time frame for our internal management guidelines. Therefore, in 2016 this will be one of the projects prioritized by the working group to be reported in our next report.

We present below the materiality matrix containing the 22 relevant themes. By clicking on each of the themes it is possible to view the main points: related matters, Global Compact Principles, Sustainable Development Goals (SDG) and GRI aspects. It is also possible to check the prioritized indicators for the management of the theme, the main capital affected and the impact on the business, together with the type of impact on our stakeholders. Based on this analysis, we associate the impacts directly with the capital. **GRI G4-19 | G4-20 | G4-21**
Material themes

Select the desired theme to see the issues directly impacted by it, the main capital exposed in these relations and other details.

Other themes

- Ecoefficiency and environmental management
- Diversity equity and inclusion
- Occupational health, safety and well-being

Most Relevant to stakeholders

- Supplier and supply chain management
- Innovation
- Financial education and inclusion
- Corporate citizenship

Most Relevant for management

- International operations
- Remuneration and incentives
- Brand and reputation
- Fight against corruption and illegal activities
- Information technology

Relevant to management and stakeholders

- Efficiency
- Credit and default
- Diversification of income and insurance
- Customer satisfaction
- Ethics and transparency
- Governance
- Attraction, retention and development
- Scenario forecast
- Information security
- Risk and capital management
Credit and default
(Click on X to go back to the Material themes diagram.)

Related matters
- Profile of the credit portfolio
- Risk appetite
- Financial margin and insolvency

GRI Aspects | Related indicators | SDG* | Global Compact |
---|---|---|---|
| ADA¹ Balance/Credit Portfolio | - | - |
| Non-Accrual Loans/Credit Portfolio Balance | - | - |
| ADA¹ Balance/Renegotiated Portfolio | - | - |
| Insolvency | - | - |
| Net Financial Margin | - | - |

1. ADA = Allowance for Doubtful Accounts

Capital most exposed to the subject

- Financial capital
- Social capital

Related themes
- Efficiency
- Risk and capital management
- International operations
- Remuneration and incentives
- Financial education and inclusion

Most affected stakeholders
- Direct
- Direct
- Direct
- Indirect

*The analysis of the Sustainable Development Goals (SDGs) was based on the study published by SDG Compass, which cross-referenced the information from the GRI documents (GRI G4 Sustainability Reporting Guidelines and GRI G4 Financial Service Sector Disclosure) with the SDGs. However, an internal assessment was also conducted, which included and removed some topics depending on our interpretation of their importance to our business.
Risk and capital management

(Click on X to go back to the Material themes diagram.)

Related matters
- Management and governance of risks
- Administration of capital (including borrowings)
- Adequacy and Basel III
- Risk management and assessment with environmental and social criteria
- Environmental and social impacts associated with credit, investment and insurance
- Environmental and social policy and human rights policies

---

### GRI Aspects Related indicators SDG* Global Compact

- **G4-DMA Product Portfolio (former FS1)** Policies with specific environmental and social components applied to business lines.
  - SDG 10: Responsible finance – 10.5
  - Global Compact

- **G4-DMA Product Portfolio (former FS2)** Procedures for assessing and screening environmental and social risks in business lines.
  - SDG 10: Responsible finance – 10.5
  - Global Compact

- **G4-DMA Product Portfolio (former FS3)** Processes for monitoring clients’ implementation of and compliance with environmental and social requirements included in agreements or transactions.
  - SDG 10: Responsible finance – 10.5
  - Global Compact

- **G4-DMA Product Portfolio (former FS4)** Processes for improving staff competency to implement the environmental and social policies and procedures as applied to business lines.

*The analysis of the Sustainable Development Goals (SDGs) was based on the study published by SDG Compass, which cross-referenced the information from the GRI documents (GRI G4 Sustainability Reporting Guidelines and GRI G4 Financial Service Sector Disclosure) with the SDGs. However, an internal assessment was also conducted, which included and removed some topics depending on our interpretation of their importance to our business.*
Sustainability management and governance  

We incorporate sustainability into corporate strategy through a consolidated governance structure that is integrated with our business, thus making environmental and social (E&S) issues part of our daily activities and processes, identifying areas capable of addressing them and periodically tracking performance and indicators for these issues.

In 2014, we made progress toward integrating sustainability management into the bank’s management through two initiatives: (1) prioritizing and valuing E&S projects, focusing on the progress of the agenda in the coming years; and (2) monitoring these priority projects through our corporate risk prevention process.

We have a project management panel to track, monitor and assess all our initiatives in this field. The panel provides support for analysis and decision-making at all levels of our governance structure. This helps ensure that the sustainability strategy is aligned with the organization’s guidelines, verify compliance with our policies and ensure that new products and services incorporate E&S aspects.

We also incorporate parameters from the Dow Jones Sustainability Index (DJSI) and the BM&F Bovespa Business Sustainability Index (local acronym ISE) as market references to guide improvements, mitigate risks and detect sustainability trends.

Sustainability and Governance

Sustainability is also part of the bank’s overall governance agenda and thus helps to add value and integrate the topic with the conglomerate’s business agenda. Our activities include discussions, meetings and committees to ensure the topic is brought into decision-making and effectively integrated with our business.

Evaluating and developing products and services  

Based on the Corporate Product Evaluation policy, any project that alters products and services or creates new ones is subjected to rigorous analysis focused on risk management. This requires integration across product areas and the units evaluating them, including but not limited to Legal, Tax, Corporate Security, Accounting, Internal Controls and Sustainability. Our Retail and Wholesale Products Committees consist of their officers meeting periodically to discuss projects.

This process handled over 206 projects in 2015. As one of the areas involved, our sustainability team evaluates them and suggests adjustments to ensure that products and projects are aligned with these three pillars: financial education, transparency and E&S risks.

Environmental and Social (E&S) Risk Committee  

Consisting of heads of the Risk, Legal, Credit and Collection business areas, as well as Sustainability, this committee meets quarterly or as required. It is responsible for:

- Suggesting institutional positions on E&S risk-exposure related matters for the bank’s activities and operations;
- Recommending roles and responsibilities on issues related to E&S risk management;
- Monitoring compliance with E&S risk-management policies and procedures and monitoring their ongoing controls and action plans;
- Referring cases of non-compliance with E&S risk-management policies to the relevant forums.

Our sustainability governance structure  

- **Board of Directors**: discusses strategic and long-term sustainability decisions and approves policy guidelines. In 2015, the theme was discussed at a meeting which addressed, among other issues, governance challenges and impacts of climate change in the financial system.
- **Sustainability Executive Committee**: consisting of Executive Committee members, it aims to integrate sustainability practices with business strategies to address climate change. This committee met twice (2) in 2015, one being a joint agenda with Ethics.
- **Sustainability Committee**: consisting of officers, this committee is responsible for setting Itaú Unibanco’s sustainability strategy and ensuring its management, while overseeing its evolution by monitoring action plans, indicators and targets. This committee held one (1) meeting in 2015 to address ways of strengthening our sustainability strategy.
- **Specific committees**: set up to enhance the execution of our sustainability strategy and integrate sustainable initiatives into business areas. In 2015, these committees were divided into: Internal Management, Investment, Reporting and Financial Education.
Sustainability strategy for business GRI G4-27

Our sustainability strategy is based on in-depth analysis of our vision, Our Way, corporate policies, voluntary commitments and agreements, surveys and meetings with stakeholders in order to understand the material issues.

We started by publishing “Essence of Sustainability” in 2009 to address eight key topics. In 2010, we defined a new vision, culture, brand and purpose as key inputs to formulate our strategy. In 2011, we held workshops, interviews and internal and external panels based on the bank’s new position. After listening to a number of experts and executives, the Executive Committee approved our sustainability strategy.

In 2011, this study led us to establish our Sustainability Map determining three strategic focus points for our activities: Dialogue and Transparency, Financial Education, and Environmental and Social (E&S) Risks and Opportunities. These are supported by four fronts: Governance and Management, Efficiency, Incentives and Culture. On this basis, the Map guides our operational and business units as they incorporate sustainability values into their decision-making processes.

We have a Sustainability & Environmental and Social Responsibility Policy, which formalizes our commitment to pursuing sustainable development and a sustainability strategy.

You can read more about our strategic focus in the pages ahead.

Strategic focus

Environmental and Social (E&S) Risks and Opportunities GRI G4-DMA Product Portfolio (former FS1 | former FS5)

Banks interact with all economic sectors and therefore have significant power to influence positive changes in society. Itaú, whose mission is to be a leader in sustainable performance, integrates E&S issues into its business, taking into account the needs of its clients and employees, civil society and regulatory bodies.

In the last 15 years, we have developed and participated in various initiatives to reduce risks and seize E&S opportunities. We have created strategies, routines, processes and products, adopted specific policies and adhered to voluntary commitments such as PRI (Principles for Responsible Investment), EP (Equator Principles), CDP (Carbon Disclosure Project) and the Global Compact that guide our business and institutional practices.

This journey started in 2000, when Itaú BBA, now our Corporate Banking unit, became the first bank in emerging markets to develop a formal system to manage E&S risks. Later, we expanded these assessments to other types and volumes of credit, with an innovative scope.

This learning experience allowed us to extend the identification of E&S risks to other business units, such as Credit, Insurance and Investments.

We know that the increasing societal awareness of the E&S challenges we face makes these issues more relevant to our operations, products and services. By integrating E&S risks and opportunities into our strategy, governance, processes, management policies, products and services, we are creating a virtuous circle that can help society to prosper.

Environmental and Social risks have gained more importance and relevance since CVM Resolution No. 4,327, which set the minimum standard to be met by all financial institutions.

In 2015, we published a paper with our Environmental and Social Risks and Opportunities strategy, showing our learning experiences, practices and challenges. Our commitments for the next few years are to:

1. Expand the scope of our Sustainability & Environmental and Social Responsibility Policy;
2. Increase our list of restricted activities and integrate different types of E&S risks into our process;
3. Train constantly our employees; and
4. Pursue and increase E&S business opportunities.

Our Environmental and Social paper and more information about our practices are available on our sustainability website.
Human Rights  
*GRI G4-DMA Non-discrimination*

In 2015, in order to reinforce our respect for human rights in relations with employees, customers and suppliers, Itaú Unibanco revised its Commitment to Human Rights launched in 2014.

Driven by the “Protect, Respect and Remedy” framework established by the United Nations Guiding Principles on Business and Human Rights, the commitment provides guidelines to prevent the human rights risks to which our business and relationships are exposed.

In addition to the UN Guiding Principles, Itaú Unibanco also joined a series of commitments that help the organization apply the best practices of corporate governance and social responsibility, such as:

- Universal Declaration of Human Rights (United Nations);
- International Covenant on Civil and Political Rights (United Nations);
- International Covenant on Economic, Social and Cultural Rights (United Nations);
- International Labour Organization (ILO);
- Global Compact (United Nations);
- Corporate Charter on Human Rights and the Promotion of Decent Work, of the Ethos Institute; and
- National Pact to Eradicate Slave Labor, of the Brazilian government.

The topic of human rights is always discussed with employees, suppliers and customers, so that all stakeholders understand the importance of these values within our organization.

In order to evolve more on human rights, we monitor and oversee the impacts of our activities involving this topic through internal audits, including a third party monitoring. Therefore, we can say that Itaú Unibanco's commitment is ongoing and permeates our policies, procedures and all our day-to-day activities.

Learn more about our work with suppliers on page A-192; with employees on page A-179; with clients on page A-188; and see this link as well.

Environmental and Social (E&S) Risks  
*GRI G4-DMA Product Portfolio (former FS1) | former FS2 | former FS5*

Our management of E&S risks has the purpose of identifying, measuring, mitigating and monitoring risks. To mitigate these risks, we have engagement initiatives with areas that are involved in the process, such as training sessions, workshops and talks. In addition, we have measures to improve control based on results from adherence tests reported periodically to our Environmental and Social Risk Committee, which is part of our Sustainability Governance. *GRI G4-DMA Product Portfolio (former FS4)*

We consider E&S risks as a component of the other types of risks to which our business is subjected, such as credit, reputational and legal risks. Being continuously aware of E&S risks influences the best practices not only of the bank but also of our clients.

In 2014, CVM Resolution No. 4,327 required the development of a Sustainability & Environmental and Social Responsibility Policy by all financial institutions, which must include risk management, governance and stakeholder relationship measures.

To ensure compliance with the resolution, we organized working groups formed by representatives of the highest-impacted areas and engaged internal and external partners. After a thorough and participative process, we included E&S responsibility issues in our existing Sustainability Policy. The new Sustainability & Environmental and Social Responsibility Policy ratifies the guidelines and principles to include E&S issues in our business practices, activities and operations (from the headquarters to the branches and data centers).

We also reviewed other Sector Environmental and Social Policies, such as credit (Corporate, Middle Market, Retail, Mortgage Loans and Vehicle Financing), insurance and investment, always based on the principles of relevance and proportionality, and we also have trained these areas on their policies. *GRI G4-DMA Product Portfolio (former FS4) | G4-DMA Product and Service Labeling (former FS15)*

As one part of monitoring procedure for the Risks Analyses, our areas go through an Internal Audit. These audit is controlled by the area which evaluates, among other issues, the observance to the Sustainability and Environmental Responsibility Policy and the voluntary commitments and agreements engaged by the Bank, such as Equator Principles associated with Project Finance. *GRI G4-DMA Product Portfolio (former FS3) | G4-DMA Audit (former FS9)*

Our business lines are guided by: a list of restricted activities, a list of prohibited activities, compliance with environmental licensing, the inclusion of E&S contractual clauses and specific rules for providing real estate guarantees.
• **Prohibited List**: Contains activities that contradict our corporate principles and values. As such, we do not lend to companies involved in activities related to:
  - Prostitution;
  - Illegal use of child labor; and
  - Work under conditions similar to slavery.

• **Restricted List**: Activities that have the most potential to cause E&S damage. Accordingly, there are specific procedures for environmental risk analysis of companies that develop activities related to the production or marketing of:
  - Firearms, ammunition and explosives;
  - The extraction and production of wood from native forests;
  - Fishing activities;
  - Extraction and industrialization of asbestos;
  - Abattoirs and beef packaging plants.

• **Project Finance**: We observe the criteria defined by type of operation/project.

• **Real Estate Guarantees**: We have specific requirements for the composition of our real estate guarantees.

• **Contractual Clauses**: In the formalization of lending or financing, we consider the E&S risks of the type of credit and the financing objective.

• **Competency**: The E&S risk areas evaluate and rate the E&S risks according to their potential impact. According to the risk identified, the case is taken to the competent area responsible for approval.

**Credit**

[GRI G4-DMA Product Portfolio (former FS1 | former FS2)]

Environmental and Social (E&S) analysis minimizes risks, identifies opportunities and motivates best practices for our clients.

Launched in 2007, our E&S Risk Policy for Credit contains specific guidelines and rules for credit concession that strengthen our E&S risk governance by establishing analytic tools. Among these instruments are lists of prohibited and restricted activities, the inclusion of contractual clauses, requirements for guarantee analysis and compliance check of the company and the project. In addition, we also evaluate practices related to topics such as: environment, climate change, biodiversity, human rights.

The Credit policy is divided into sector policies for the various different business segments: Corporate, Middle Market and Retail, Mortgage Loans, and Vehicle Financing. It is important to highlight that, in 2014, after the new CVM Resolution No. 4,327, all policies were reviewed and aligned to the new Sustainability & Environmental and Social Responsibility Policy following the principles of relevance and proportionality. This means that the extent of E&S due diligence depends on the segment under assessment. [GRI G4-DMA Product and Service Labeling (former FS15)]

The values for the E&S risk analysis vary depending on the segment and the type of analysis, as shown in the box below:

<table>
<thead>
<tr>

<td>Middle Market – R$500 thousand</td>
<td>N/A</td>
</tr>
</tbody>
</table>

In keeping with E&S Responsibility regulations for financial institutions, issued by the Central Bank of Brazil in April, our focus for 2014 was to review the Sustainability & Environmental and Social Responsibility Policy, the processes and the sector-wide E&S Risk policies for credit. The remaining sector policies and procedures were reviewed in 2015 as per the schedule determined and approved by the Board of Directors.

Besides complying with regulatory and legal requirements, as part of our strategy, more than 30 professionals work in our E&S risk units: economists, engineers, biologists, geographers, environmental managers and lawyers. They all receive continuous education - sometimes abroad - through lectures, workshops and training sessions led by the HR area. [GRI G4-DMA Product Portfolio (former FS4)]

Moreover, other employees in the credit area are also trained on E&S risks. In 2015, approximately 85% of staff in the credit segment were trained - and our objective is to keep this above 75%. This structure gives Itaú a huge operational leverage. [GRI G4-DMA Product Portfolio (former FS4)]

All this information is available [here](#).

To understand more about how our loan portfolio is allocated between economic sectors, see [Note 8 Item III GAAP Segments by business sector, on page 133](#).

**Wholesale**

[GRI G4-DMA Product Portfolio (former FS1 | former FS2 | former FS3 | former FS5)]

Through our Wholesale Bank, responsible for financing infrastructure projects, we apply the Equator Principles as criteria for E&S risk analysis, including the risk identification, mitigation and monitoring stages. In addition, we apply Environmental and Social Risk Policy criteria to smaller projects and other project-finance related products, such as bridge loans and issuance of guarantee letters. In these cases, we evaluate how clients manage their potential E&S impacts, including impacts on traditional communities, as well as cultural heritage and biodiversity.
Regarding the careful diligence with which we manage E&S risk in project financing, we reached in 2015 a total of 164 projects already contracted in previous years, in the monitoring stage. Each monitoring cycle involves, depending on the risk category, field visits, documentary analysis, meetings with clients and the support of expert consultants in different environmental issues.

The Environmental and Social Risk Policy, however, is not restricted to the assessment and monitoring of projects. Clients that may be associated with activities on our Prohibited Activities list, clients who develop activities on the Restricted Activities list and the real estate pledged as collateral are also subject to E&S analysis.

In the case of property-collateralized loans, the analysis starts from a questionnaire that provides information about the history of occupation, as well as its current use, to diagnose possible sources of contamination. In this context, we achieved in 2015 the analysis of more than 300 questionnaires, representing 100% verification of real estate offered as collateral.

Moreover, for all types of loans we monitor our clients to check if they are associated with the activities on our Prohibited Activities list by monitoring media reports. When it comes to the activities on our Restricted Activities list, we monitor the adherence of clients to specific sector-wide compliance guidelines. This assessment is required to approve or renew a credit line. Any E&S restrictions affecting customers are reported in our Credit Risk System, which is consulted by both the Credit and Commercial business areas and contains all customer credit data, such as the loan amounts approved and borrowed and the risk rating.

As an early adopter of E&S criteria for evaluating loans, our wholesale bank strives to disseminate best practices in the market and internally enhances practices through employee training programs. In 2015, members of our wholesale bank’s E&S risk assessment team, numbering 8 persons in all, attended over 340 hours of training sessions. This training, with national and international scale, includes courses, lectures, forums and workshops, as well as symposiums and discussion groups on E&S issues involved in development projects, with an emphasis on the Infrastructure sector.  

Furthermore, the team was also involved with the training of the bank’s own employees and professionals from other institutions. We developed an Environmental Risk e-learning course, which was taken by more than 75% of professionals in the Credit, Commercial and Products areas. We also promoted an increase in the qualification of the Back Office and Front Office areas with reference to checking the compliance of rural properties concerning the challenges of implementing the Environmental Rural Registry (Cadastro Ambiental Rural – CAR), an event that was attended by representatives of the São Paulo’s State Environmental Protection Agency (local acronym CETESB).

**Equator Principles**

Since 2004, we have been a member of the Equator Principles, a risk management framework adopted by more than 80 financial institutions around the world. The Equator Principles is a benchmark for determining, assessing and managing E&S risk in Project Finance deals that reach at least US$10 million in total investment. The Equator Principles is also triggered in Corporate Related Project Loans when the following criteria are reached simultaneously: (1) the investment is primarily for a single project over which the client has operational control; (2) total debt reaches at least US$100 million; (3) individual lender commitment is at least US$50 million; and (4) the length of the deal is more than 2 years. When acting in project financial advisory service or when providing bridge loans that will be refinanced by Project Finance or Corporate Related Project Loans that reach the above criteria, we also apply the guidelines established by the Equator Principles.

Projects submitted to the application of the Equator Principles may require the hiring of an independent consultancy to execute the environmental evaluation for the signing, disbursement and monitoring phases. An external (independent) evaluation is mandatory for all high risk projects and for some medium risk projects, if the Itaú Unibanco environmental team considers it necessary. In projects with medium or low risk, the analysis could be executed by our wholesale environmental technical team.

The analysis according to the criteria of the Equator Principles occurs throughout the duration of the financing. The environmental team develops an Action Plan and the client must agree to make the project reach these standards. The extent of this diligence in the management of environmental risk was disclosed in 2015, when we published the article “The Equator Principles and the IFC Performance Standards – Itaú Case Study in energy project financing”. Using the energy sector as a backdrop, we presented some challenges and difficulties faced by our team and the lessons learned over the past 10 years in applying the Equator Principles.
Finally, data on the projects submitted to the application of the Equator Principles III and our Sustainability & Environmental and Social Responsibility Policy can be consulted on page A-225 of this report.

In 2015, Itaú published the article “The Equator Principles and the IFC Performance Standards – Itaú Case Study in energy project financing” about the lessons learned and the challenges and difficulties faced by our environmental team. See the full article.

Middle Market and Retail Operations **GRI G4-DMA Product Portfolio (former FS2 | former FS3)**

For the E&S analysis of small and medium enterprises, E&S categorization is carried out considering criteria such as water and energy consumption, wastewater discharge, atmospheric emissions and occupational health and safety risk. Companies are categorized as A, B or C for high, medium and low potential environmental risk. Environmental and social analysis is performed for companies categorized as A and B involving at least a R$5 million bank loan. Companies engaged in branches of businesses on the restricted list, such as lumber extraction from native forests, fishing, meat packers, weapons and ammunition and activities using asbestos, are also analyzed for loans of R$500,000 or more.

Specific tools are used in the E&S risk analysis, such as E&S self-declaration questionnaires, research on environmental agency websites, courts and contaminated area lists, additional information from the company and other sources.

It is important to highlight that our questionnaires address not only environmental issues such as waste treatment, supplier management, pollution control and relations with employees and society, but they also verify matters such as indigenous areas, Quilombolas1 and preservation of historical and cultural heritage.

We monitor our clients to check if they are associated with activities in our Prohibited Activities list by monitoring media reports. Upon identifying a potential risk, the E&S team may visit sites and ask the company for additional details. Identified risks are monitored and if action plans are not developed or the necessary documents are not supplied, the E&S report will issue an unfavorable opinion.

In 2015, some major changes were made. First was the alteration of our Credit Policy, now clients who fail environmental or social standards are prevented from receiving new credit. Before, the analyses were only qualitative. Second, more than 80% of our employees involved with credit concession have taken our e-learning course on Sustainability & Environmental and Social Responsibility Policy.

In 2014, we redesigned the contamination risk analysis process for properties pledged to the bank as collateral, with a more assertive version of the Preliminary Environmental Assessment Questionnaire for Properties. We also trained more analysts to apply it.

1. Communities originally formed by runaway slaves in colonial times.
2. Favorable report after measures taken to comply with Environmental and Social policies and regulations in force.

Vehicle Financing

**GRI G4-DMA Product Portfolio (former FS2)**

Our methodology for assessing E&S risks that affect customer vehicle financing is in line with our Corporate Environmental and Social Risk Policy. The analysis applies to all corporate clients, whether account holders or not, and vehicle financing applicants, and it encompasses media searches for every customer requirement and the environmental permit and/or documents, where applicable.
To administer the E&S risks and adopt mitigation measures, an E&S risk analysis is used as a guideline for credit decisions. This guidance is made constructively, seeking to stimulate the improvement of the client's E&S practices.

We do not provide auto financing to customers involved with the activities on the List of Prohibited Activities. This identification occurs early in the relationship with the customer, through monitoring of the media and/or judicial decisions and/or valid official list. The activities included on the Restricted List represent a greater environmental risk potential, so specific Sectoral Guidelines should therefore be noted before the beginning of the relationship with the customer.

To implement this policy, our corporate credit team participated in training programs monitored by the human resources department in addition to hiring specific E&S area professional. GRI G4-DMA Product Portfolio (former FS4)

Mortgage Loans GRI G4-DMA Product Portfolio (former FS1 | former FS2)
Our Mortgage Loans unit also follows the Environmental and Social Risk Policy. Guidelines apply to all loans for commercial and residential construction projects in all regions of Brazil. In 2015, our corporate plan was offered mainly to companies posting over R$30 million annual earnings and the portfolio totaled R$10 billion. GRI G4-FS6

Our evaluation questionnaire covers general aspects of building sites, including environmental issues. For the proposed scope, we retain partner engineering firms, as well as our professionals who are tasked with visual surveys and consultations on the websites and portals of municipalities or other entities when necessary. Visual analysis covers apparent contamination issues and site locations. If sites are near gas stations, old factories or cemeteries, there may be indications of contamination. In addition to the initial analysis, a specialist conducts monthly inspections, developing Technical Feasibility Studies and construction measurement.

If E&S credit or image/reputation risks are identified, the operation is analyzed by our Environmental and Social Unit, which will issue a report. The transaction is approved by internal authorities to decide whether the bank will go ahead with the transaction. Action plans may be developed too. If necessary, our Legal department is also engaged to take appropriate measures.

Insurance GRI G4-DMA Product Portfolio (former FS1 | former FS2)
Our assessment takes into consideration the guidance from the Principles for Sustainable Insurance (PSI), of which we have been signatories since 2012, and which provides guidelines to minimize exposure to E&S risks and to boost proper management by insurance companies.

In order to implement PSI, we have created an internal portal that comprises all the topics related to sustainability and we have also developed a tool to assess how a given product adheres to the PSI principles.

In 2014 we launched an on-line platform with tips and guidance on protection and insurance, video tutorials that provide tips and answer didactically the main insurance questions. The objective of this platform is to make the public in general aware of the importance of this “protection” and to help people better understand the insurance sector in a simple and uncomplicated manner. The platform, which is called Proteja (www.itau.com.br/proteja), has sections with explanations on the different products offered by this market, as well as tips and graphics, with an intuitive organization of the information. The interface was planned to answer the main questions related to insurance, so it can help people make decisions about what protection is best suited to them, according to their own particular needs. There are also videos tutorials available, which were created to answer questions on the various types of protection and the issues that the consumer must pay attention to before contracting an insurance policy.

This is yet another educational initiative of the bank, for which education is the starting point to help people to better manage their finances. These actions include the educational platforms for Credit (Conscious Usage) and Investments (Invista).

In 2015, we reviewed the Environmental and Social Risk Policy, which includes E&S guidelines applicable to insurance operations for corporations and permeates all business lines, considering the specifics of each product, service or process. It defines rules to manage activities that represent E&S risk, regardless of the product or service marketed, and it provides general and specific guidelines for risk analysis.

Also in 2015, with the intention of disseminating the Policy and the importance of E&S issues in Insurance, we conducted training sessions for Insurance Products, Back Office and Claim Department, which were attended by 88% of the employees. GRI G4-DMA Product Portfolio (former FS4)

Investments GRI G4-DMA Product Portfolio. (former FS1 | former FS2 | former FS5) | G4-FS10 | G4-FS11
Itaú Asset Management signed the Principles for Responsible Investment (PRI) in 2008. Since then, we have developed action strategies to study impacts for investors in addition to supporting signatories to incorporate these issues into decision making.
Therefore, we developed our own methodology to integrate environmental, social and corporate governance (ESG) into the valuation process of companies held in our equity funds. This methodology considers materiality, sectoral relevance, temporality, risks and opportunities, metrics and management, as presented in the following diagram:

Currently, we cover 100% of the Ibovespa and ISE indexes using this methodology.

In 2015, we developed an ESG methodology for sovereign bonds and continued to apply our ESG methodology to value corporate bonds. Currently, we have 70% of the corporate bonds in our portfolios covered.

We have a dedicated structure to evaluate these criteria, which includes a portfolio manager and a SRI analyst who model the ESG impact and engage with investee companies. In addition, we work in partnership with independent consultants who are specialized in ESG, one of whom is connected to the academic community.

Itaú Asset Management is also responsible for managing E&S funds that donate part of their management fees to projects developed by non-profit organizations, focusing on education, environment and culture.

Furthermore, we attended several industry events in 2015, in order to present our methodology and discuss the integration of environmental, social and governance issues into the valuation procedure for investee companies.

We are also signatories to the Carbon Disclosure Project (CDP). As a signatory investor, together with other signatory investors, we ask companies about their climate change impacts, and their risks and opportunities. The information that these companies reported to the CDP is included in our models to integrate environmental, social and corporate governance aspects into the investment process.

Our Policy for voting on investee companies at Annual General Meetings (Proxy Voting Policy) is based on the code of Self-Regulation and Best Practices for Investment Funds, developed by the Brazilian Association of Financial and Capital Market Entities (Anbima). When exercising our voting rights, we take into account sustainability related aspects based on three pillars: environmental responsibility, social development and fostering good corporate governance. GRI G4-DMA Active Ownership (former FS12)

Itaú Asset Management’s Proxy Voting Policy establishes that voting rights will be exercised when its funds have more than 5% of their assets invested in a company, or when a company has a participation of more than 10% of a single fund. Convocations to stockholders’ meetings are analyzed in advance by the SRI analyst and Portfolio Managers. Holdings exceeding 5% of the total capital of the investee company are made public, in accordance with the requirements of Brazilian legislation. The exercise of voting rights is public to the extent that the companies publish the minutes of their meetings. GRI G4-DMA Active Ownership (former FS12)

Environmental and Social (E&S) Funds GRI G4-EC1

- **Itaú Excelência Social Fundo de Investimento (FIES):** since their launch in 2004, these equity funds have invested in socially responsible companies. Additionally, 50% of the management fees from this family of funds is donated to educational projects developed in Brazil by NGOs and UNICEF. From 2004 to 2015, more than R$27.5 million was transferred to 157 NGOs, benefiting 35,500 children and 2,900 educators. In 2016, another 8 organizations will receive over R$1.6 million.

- **Itaú Fundo Ecomudança:** Ecomudança funds donate and lend 30% of their management fees to support greenhouse gas (GHG) reduction projects in order to develop initiatives related to: urban mobility, energy efficiency, renewable energy, waste management, sustainable agriculture and forests. Since 2009, the Ecomudança program has invested approximately R$4.5 million in 25 organizations and loaned R$39,000 to another institution.

- **Itaú Fundo Futura:** from 2010 through 2015, the Itaú Futura DI Social Fund donated 30% of its management fee, amounting to over R$1,400,000, to educational projects developed by the Roberto Marinho Foundation’s Future TV channel.

Itaú Asset Management and Principles for Responsible Investment (PRI) GRI G4-DMA Product Portfolio (former FS5)
In 2015, Itaú Asset Management participated in the annual meeting of the signatories of the United Nations Principles for Responsible Investment (PRI). Institutional investors, asset managers and service providers attended the event in September, in London. The agenda included discussions varying from ESG integration to responsible ownership, and how these topics affect investment decisions. At this event, we presented our two White Papers: "ESG Integration into fundamental equity valuation" and "ESG Integration into fixed income research".

Environmental and social (E&S) Opportunities

Pursuing opportunities for E&S initiatives is a given for Itaú Unibanco, therefore we not only develop specific lines of business and on-lending of own funds, but we also join with partners to expand this activity as much as possible.

Standout partners include the IDB (Inter-American Development Bank), IIC (Inter-American Investment Corporation), BNDES (Brazil’s Economic and Social Development Bank), CEBDS (Brazilian business council for sustainable development), EPC-FGV (Companies for Climate, of Getúlio Vargas University) and others that assist with on-lending or joint work on projects.

In 2015, we can highlight two studies in association with FEBRABAN (Brazilian Banking Federation). One of them had the objective to measure the total capital amount allocated in green loans in the Brazilian economy.

Through this study, we captured the total amount of loans made to green economy sectors banks portfolio. This amount represented about 9.6% of all loans made in Brazil in 2014, a slight increase from the figure in 2013 (8.8%).

The other study in association with FEBRABAN raised the Brazilian green bonds market main opportunities and challenges.

Another important forum that Itaú attended was the CEBDS and WBCSD LCTPi (Low Carbon Technology Partnerships Initiative), on the theme of Green Bonds for Energy Efficiency and Renewables.

Also related with the topics mentioned above, we worked with EPC in order to start the operationalization of the Low Carbon Industry Program. In 2015, the goal of this initiative was to understand the best mechanisms to provide loans for energy efficiency in industries.

Some of the other highlight activities are shown below by business segment.

Itaú Microcredit

Itaú Microcredit is available in economically underprivileged regions in the metropolitan areas of São Paulo and Rio de Janeiro. Each agent has a 5-km² area allocated by georeferencing that permits a close relationship with clients. In order to protect and educate our clients, we provide insurance without cost. In case of death or permanent disability, it guarantees the payment of the balance due on the credit and the microentrepreneur’s family also receives a food staple and funeral assistance. We have already provided 30,045 such insurance policies. As part of the inclusive strategy, the loan agent can provide entrepreneurs with POS machines, providing access to some financial services for microentrepreneurs.

Until 2015, we had disbursed approximately R$249.5 million to about 65.5 thousand clients. In 2015, we reached 8.1 thousand clients and our portfolio totaled R$27.6 million. Clients that were served by the first time represent 35% of our portfolio.

Microcredit agents analyze characteristics of both borrowers and locations, evaluating criteria such as character, repayment ability, capital, conditions and impacts on the life of entrepreneurs and communities.

Agents visit enterprises, fill out forms assessing their economic and financial data, and then forward the information required by the Credit Committee, which is responsible for analyzing loans. Two weeks after the disbursement, the loan agent visits the client to monitor the use of the funds and, in the event that the requirements for the loan are not being met, the agent will offer advice. If the recommendations are not followed, the loan may not be renewed.
The field team has a special training plan that includes practical and theoretical classes on credit analysis, collection and sales techniques, accounting and guidance on the product. After each course, agents are submitted to a written test. In 2015, approximately 60 employees received training, which takes place on a recurrent basis. **GRI G4-DMA Product Portfolio (former FS4)**

**Women Entrepreneurs Program**
Itaú Women Entrepreneur is the result of a partnership with the IFC – World Bank and the Inter-American Development Bank to offer financial and non-financial solutions to women entrepreneurs. Currently, the working capital to our portfolio of women-led SMEs is US$684.6 million, which represents 36% of our total. In 2015, this figure increased 4% from 2014.

Moreover, the bank has developed a program to offer attendance and non-attendance solutions to empower women entrepreneurs. The online platform offers content related to entrepreneurship, management tools and motivational videos, and is intended to help connect users. The program has reached 2,803 women entrepreneurs through the platform and has involved 19,547 people through our Facebook page. The attendance solutions include networking events, business round tables and workshops organized in partnership with top universities and strategic partners such as Google.

The main objective is to empower women entrepreneurs in Brazil, who are growing in number and increasing their share in the economy. The program aims to test hypotheses about women's relationship with financial institutions. We are using an impact assessment model to measure the program outcomes. The results will help the bank to improve products and services, regarding women's preferences. The program fosters the discussion about setting an example in gender equality and there is a partnership with the Supply team to increase the number of women-led enterprises as our suppliers.

The bank decided to take part in discussion forums regarding gender inclusion, and was represented at both the Global Banking Alliance for Women Council and the Grupo Mulheres do Brasil (Women of Brazil Group). We also support other initiatives such as the Forum Empreendedoras (Forum on Women Entrepreneurs) and Tedx Women.

**Retail Bank**
Retail Bank serves business customers posting annual revenues of R$30 million or less. This segment covers micro, small and medium businesses with different needs of capital and banking products.

In 2014, through the Environmental and Social Financing of the Inter-American Investment Corporation (IIC), we allocated US$280 million to the financing of small and medium companies with practices that are in accordance with the E&S risk of Itaú Unibanco and with IIC’s eligibility criteria. In 2015, this mortgage was payed, making way for another credit line with the same characteristics as the old one. In the total amount of US$455 million, the credit has a term of payment of 5 years, and will be used to finance small and medium companies with good practices that are in accordance with the IIC’s E&S criteria.

We also have two more programs related do microcredit and gender strategy. These programs will be described below.

**Wholesale Bank**
Our Wholesale bank concentrates on customer companies posting revenues of over R$30 million.

The Corporate and Investment Banking analysis, before any credit decision, contemplate E&S aspects. This analysis may affect client’s credit rating, cost of transactions, sectorial allocations, and types of guarantee and mix of products to be offered.

All the sectors that we act were studied by our environmental technical team, considering international environmental standards and geography region issues. We could, if an environmental condition is added in our credit rating model, reanalyze our relationship with our clients, provide incentives or limit credit access.

We are concerned with the climate change, water and energy issues. For that reason, for the last years, the environmental team dedicated to on-lending US$150 million from the Inter-American Development Bank (IDB) for renewable energy, energy efficiency, clean production, biofuels, sustainable construction and green projects. In addition, only in 2015, we disbursed from the International Finance Corporation (IFC) line the amount of US$400

---

2. The exchange rate used in the calculation is R$1.00 = US$3.95
million for renewable energy generation, energy and water efficiency and GHG reduction projects. Finally, we supported, independently of multilateral lines, wind power projects in the amount of R$992.7 million, we advised the finance structure of 14 projects to mitigate the climate change.

Other environmental benefits were attained using on-lending facilities from Brazilian Economic and Social Development Bank (BNDES) through the BNDES Finem, BNDES Autômático, Rural Credit and Brazilian Federal Bank (Caixa Econômica Federal – CEF) lines. Through BNDES Finem, we allocated funds to energy efficiency and renewable energy projects including biomass - totaling R$1.02 billion signed and R$636 million disbursed in 2015. Additionally, we disbursed from CEF for sanitation projects in the amount of approximately R$200 million. Through BNDES Autômático, we financed three projects for sanitation and renewable energy generation totaling R$45.5 million loans signed and R$27.5 million effective disbursed.

We also offer on-lending through the ABC Program (Low Carbon Agriculture), the agribusiness line from BNDES to finance projects reducing greenhouse gas emissions from agriculture, livestock and deforestation by expanding cultivated forests and recovering degraded areas. In 2015, we signed the amount of, approximately, R$15 million through this program. For more information, please visit www.bndes.gov.br/apoio/abc.html.

In addition, in 2015 we kept all the multilateral funds to promote social benefits in amount of US$1.75 billion. The IFC, Inter-American Investment Corporation (IIC) and Overseas Private Investment Corporation (OPIC) allocated these funds for projects and companies in Brazil’s North and Northeast regions, including small and medium firms managed by women.

Finally, we disbursed almost R$55 million from BNDES, through the BNDES Finem product for special social projects benefiting the local communities around projects. These low-rate credits in partnership with public or non-profit associations finance companies aim for higher levels of corporate social responsibility. In addition, we signed in 2015 the amount of R$70.04 million, that will be disburse for the next years.

In 2015, the lending for E&S benefits accounted for approximately 1% of Itaú BBA’s loan portfolio and totaling R$2.08 billion.

Financial Education GRI G4-DMA Product and Service Labeling (former FS16)
A way of contributing to the development of society is to understand people’s needs in order to offer knowledge and suitable financial solutions that enable people to have a better relationship with their money.

We know that the most important changes come from individual behavior. But we believe that it’s our role to guide our employees, customers and society, enabling them to make financial decisions that are more aligned with their needs and life stages.

Our main initiatives are highlighted below.

Financial Education Program for Employees
Since 2009, the financial education program for employees gives advice and tools to help them make more conscious decisions with their money, in order to enable them to reach personal goals.

• Education: we provide online and on-ground courses, which promote a deep thinking about the relation between consumption, personal goals and how people manage their finances. We developed a quiz to improve our knowledge about our employees’ financial profile, which since its launch in 2014 has had more than 50,000 hits. In 2015, we released another four online courses, which trained almost 30,000 employees. Furthermore, from 2013 to 2015, almost 1,000 employees voluntarily attended to our on-ground courses on personal finances.

• Financial advice: a project offering confidential expert advice free of charge. From 2013 to 2014, 354 employees received free financial advice. In 2015 we had an expansion that reached more than one thousand employees. At the start of the project, our analysis showed that it was well accepted by our employees, who expressed satisfaction, with 40% saying it increased their level of awareness about financial planning, 57% saying they had a greater intention to save and invest money and, of those in debt, 50% declaring a decrease in their debt level.

Volunteering Program: Uso Consciente do Dinheiro
In 2015, a new Uso Consciente do Dinheiro (Conscious Use of Money) volunteering workshop was implemented, applied by the Itaú Unibanco volunteering program, which aims to share financial education with young people and adults from low-income areas. The workshop is practical, has a fun approach and encourages reflection on consumption, financial behavior and personal goals. Additionally, we provide tools to help people manage their finances and tips on keeping spending under control. The Mobiliza Itaú committees across Brazil are all able to autonomously apply the workshops in their respective cities. The program is already present in the cities of São Paulo, Mogi Mirim, Santo André, Belo Horizonte, Porto Alegre and Salvador, impacting more than 3,000 people from NGOs and schools, and involving almost 500 active volunteers.

Financial Education Program for Corporate Customers
The Financial Education Program offers content, PABs, videos and talks given by branch managers free of charge to employees of more than 700 corporate customers that have banking service centers. Since 2014, the program has impacted more than 15,000 customers and more than 350 talks have been given around the country.
Financial education integrated with preventive action

This initiative focuses on credit customers, who we analyze in order to identify those who need financial orientation. Through a renegotiation center that uses financial guidance as an approach, we contact customers to understand their needs, so we can provide instruction and offer the correct products to reorganize their credit according to their income. In addition, we send communications in electronic channels.

Campaigns and Websites

Digital financial education content is available on four websites, each one focusing on different topics: The website Uso Consciente do Dinheiro (Conscious Use of Money) offers free content through videos, texts and tools for different financial situations, while Proteja (Protect), Invista (Invest) and Crédito Consciente (Conscious Credit) provide guidance connected to financial products such as insurance, investment and credit. Since 2014, these websites received more than 7.4 million views.

We released the campaign “Como falar de Dinheiro com as crianças” (“How to talk about money with children”) on social media, which had more than 8 million views on YouTube since it was launched.

Over the course of 2015, we took part in 12 participations on the TV Globo program - Encontro com Fátima Bernardes - aiming to share financial advice in a simple and practical approach, reaching out more than 38 million people.

Partnerships

We support the Financial Behavior Center at the Getúlio Vargas Foundation in São Paulo and the Capital Market Financial Lab (LABMEC) at Pontifícia Universidade Católica in Rio Grande do Sul (PUCRS). The students of LABMEC provided free financial advice to 412 people in local communities in 2015. The initiative hosted lectures and events attended by 1,054 people, and more than 1,100 received printed content. News and media action reached around 1.5 million people.

In 2015, a Brazilian version of the “Behavioral Economics Guide” was developed with the support of Itaú. The guide provides a list of concepts in simple vocabulary, serving as a reference for beginners in the field. Its distribution is free and nationwide.

Itaú’s financial education initiatives received the National Strategy of Financial Education (ENEF) certification as a result of their alignment with the strategy’s principles and guidelines.

Knowledge Generation

How to help people make better use of their money? How to help people accomplish their goals? To answer these kinds of questions and to understand more about how people take financial decisions in their daily lives, we developed the study “Choices and Money”.

The lessons and insights from the study address the influences of our economic and social past on our financial behavior, and the meanings and feelings related to our choices with money. To access the complete results of the study, go to the link.

The results have guided our financial education strategy and initiatives. Itaú Unibanco’s goals for the next three years are:

- Contribute to people’s financial choices:
  - Provide products, services and transparent offers that help our customers make more conscious decisions with money, to enable them to reach personal goals.

- Provide assistance in the financial decision-making process:
  - Provide content, tools and solutions that help employees and banking and non-banking clients to make better choices with their money, through multiple points of contact with the bank, and according to their needs and moments of life.

- Enhance the topic across society:
  - Contribute to the discussion of the topic among society, and inspire people to make better decisions with their money, promoting individual and collective prosperity.

- Digital platform that integrates knowledge of financial education, embracing different moments of life and financial products and services, offering content and solutions to banking and non-banking clients.

- Communication campaigns related to financial decisions, reaching 50 million people.
- Reach more than 3,000 active volunteers for the Uso Consciente do Dinheiro (Conscious Use of Money) program in Brazil and Latin America.
- Financial orientation aligned with products, services and solutions offered by the bank, with impact evaluation about the offer of the right product in the right moment.
- Improvement of customer satisfaction performance, by Cultura de Atendimento project and excellence in solutions and offers.
- Expansion of financial orientation to all training in the commercial area.
Dialogue and Transparency
An important part of our strategy is the promotion of initiatives to establish a transparent and ongoing relationship with our internal and external stakeholders. We believe that by sharing practices, results, knowledge and also by promoting dialogue with different audiences, we can inspire initiatives and boost transformations in society and in our business. The priority stakeholders are employees, clients, suppliers, press, opinion formers, and stockholders. For each stakeholder group we have specific initiatives that will be explored in later chapters.

We also seek dialogue with various different sectors of society, anticipating trends and developing a positive agenda. In 2015 our principal interlocutions occurred in the following forums: CEBDS, FGV, FDC, UNEP-FI, Ethos, Febraban and CNSEG.

Content Generation
We support studies and research related to our topics of interest in sustainability. This content influences our internal initiatives and is made public so that more people and institutions can have access. Major studies launched in 2015 to support and/or develop:

  - Environmental and Social Risks and Opportunities (Riscos e Oportunidades Socioambientais) - Itaú Unibanco's practices and history;
  - Choices and Money (Escolhas e Dinheiro) - A study about financial decisions and behaviors;
  - Brazil: The Water Shortage and its Economic Impacts (Brasil: A Escassez Hídrica e Seus Impactos Econômicos);
  - Financial Planning (Planejamento Financeiro): The importance of the analysis of the family balance sheet; and

- Externally:
  - Research in partnership with Febraban. See two examples, one of [September/2015](http://www.itau.com.br/sustentabilidade) and another of [November/2015](http://www.itau.com.br/sustentabilidade);
  - Research in partnership with CEBDS; and
  - Behavioral and experimental economics guide (Guia de economia comportamental e experimental).

Capital Market Indices
We are listed on the major sustainability market indices such as the Dow Jones Sustainability Index (DJSI), the BM&FBovespa Corporate Sustainability Index (local acronym ISE) and the Carbon Efficient Index (ICO2). We have also been included, for the first time, on the Euronext Vigeo Emerging Markets 70, new sustainability index developed by Vigeo, a French rating agency also present in Japan, Africa and South America. Formed by the 70 most sustainable emerging market companies picked from among a total of 900 companies, Euronext Vigeo selects companies based on 330 environmental indicators, and a survey of public information provided by companies.

By responding to questionnaires used to compile these indices, we help to advance the sustainability agenda among companies and also foster transparent communication, since we voluntarily disclose our ISE questionnaire answers. These indices are also an important source of trends for environmental, social and governance issues. We use annual results to assess progress and identify points for improvements that may be incorporated into our management.

Integrated reporting
In order to make our reporting simpler and more efficient, we signed up to a partnership with the International Integrated Reporting Council (IIRC) in 2013. Through a working group drawn from our Corporate Communications, Finance, Investor Relations departments and Sustainability, we are reviewing our reporting and aligning processes with IIRC guidelines. This effort culminated in the publication of our Integrated Report, a concise piece of communication focused on our ability to create value for stakeholders over time. We were the first Brazilian bank to disclose an Integrated Reporting in 2013. The report is a new international model for accountability that seeks to meet the expectations of stakeholders about transparency, connectivity and a future vision of environmental, social, economic and governance. The report includes everything from financial and pre-financial information to the organization’s strategies. We adhered to the pilot program in 2013 and we are currently cited as a leading market reference on the subject. Our 2015 Integrated Report may be accessed at [www.itau.com.br/relatorio-annual/relato-integrado](http://www.itau.com.br/relatorio-annual/relato-integrado).
Stakeholder Engagement

GRI G4-26

Our engagement processes are based on guidelines and criteria of the international standard AA1000 and on an internal circular, developed and published in 2014, that establishes the stakeholder engagement methodology in relation to the sustainability strategy. Our methodology begins with the prioritization of stakeholders (employees, customers, stockholders, suppliers and society) and the identification of critical issues, selected according to actual and potential environmental, social and economic impacts for the organization and the stakeholders involved. GRI G4-24

Our engagement action plan for sustainability issues covers the following stages: defining scope, identifying stakeholders, determining the degree of engagement, selecting method for engagement, assessing the risks involved and carrying out the engagement process. GRI G4-25

Environmental and Social Risks and Opportunities is an important topic for Itaú Unibanco. We have been working with this topic for 15 years, and in 2015 we released a document about Itaú Unibanco’s Environmental and Social Risks and Opportunities, covering our past performance, our practices and our views of the future. At the launching event, we had two dialogue panels formed by 9 specialists. It was an important event to demonstrate our commitment to the topic and to targets for the next few years. The publication is available at Itaú’s website.

In 2015, our stakeholder engagement performance on the topic of Financial Education was highlighted by the launch of the publication “Escolhas e Dinheiro” (Money and Choices). Itaú invited Studio Ideias (a Brazilian research company) to include in this document the results of an analysis presenting insights about people’s relationship with money and the factors that influence their financial choices. The document presents Itaú Unibanco’s initiatives on the topic and our future commitments. The publication is available at Itaú’s website.

In addition to engagement processes for specific issues, we have a number of tools that involve and preserve ongoing dialogue with stakeholders such as: workshops, publications, talks and lectures, surveys, public meetings and social media. We have channels for specific contacts available on our website, emails and exclusive telephone lines for press and media relations, an External Ombudsman service and consumer protection agencies etc.

Details of our business are easily accessible and are disclosed through the following channels: our investor relations website, the Itaú Shares in Focus publication, our Facebook and Twitter profiles, and public meetings with investment analysts, stockholders and other stakeholders.

We strive to address and provide feedback for considerations raised by our stakeholders. Through our consolidated annual report, we offer this accountability covering our materiality and sustainability strategy, thus transparently catering to different groups of stakeholders without distinction. GRI G4-27

The following table shows our most significant tools for engaging with our stakeholders.
Tools of Engagement
Click on the + sign to learn more about the engagement.
Employees

Itaú Unibanco's human resources area

The aim of Itaú Unibanco's Human Resources Area is to attract, retain and develop the organization's talents, disseminate the organizational culture (Our Way) and work in partnership with the business units in the quest for sustainable performance and customer satisfaction. Our actions are based on the People Committee's strategic guidelines and we work with a structure of 370 professionals, who are responsible for approximately 90,000 of the organization's employees throughout Brazil and overseas.

The Area is made up of Human Resources Services and Products Department and Business Partners Departments, which are responsible for the needs of the bank's business or administrative units in each Vice Presidential Area.

We promote continuous improvement in our people management practices by constantly monitoring indicators that provide us support in implementing best-tailored strategies to the needs of the organization. Some of the main indicators we follow are compensation, employee satisfaction, engagement, turnover, absenteeism, performance, diversity, development and career. You can see some results on pages A-231 and A-233.

We seek professionals who, besides having the necessary competencies for developing their activities, are committed to increasing customer satisfaction and becoming future leaders of the organization. These professionals will thus contribute to the generation of long-term value, which brings benefits to society as a whole and promotes business growth. For this reason, it is essential that new employees’ values and principles are aligned with the new corporate culture and with our Code of Ethics.

<th>What are the results?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reformulate the themes of Diversity in leadership training</td>
<td>In progress</td>
<td>Revised strategic plan for each training theme comprising our program in order to achieve efficiency in the instruction of managers on each topic involved in the inclusion and management of employees with disabilities.</td>
</tr>
<tr>
<td>Prepare managers and teams for receiving a new employee with a disability</td>
<td>In progress</td>
<td>Preparation of managers and teams in receiving persons with disabilities on three key fronts: 1) Strategic reformulation of the primer on leadership of diverse teams, resulting in a more assertive and efficient content in the communication of laws governing the inclusion of PWDs and critical instructions for leadership of teams including employees with disabilities, showing clearly the challenges and benefits. 2) A four-hour workshop offering managers who are to receive a new PWD employee: structure for handling PWD inclusion, thereby stimulating reflection and demystification of the issue. The end objective is to better equip the manager to evaluate the employee with disabilities in terms of their capabilities. These go beyond the need for adaptation to the working environment due to disability. Thanks to the management of a diverse team, the proposal is to show how to handle the benefits of having different experiences and life stories in their teams, benefits which are enhanced by coexistence with a PWD. 3) The institutional positioning of the Diversity area in relation to managers, teams and the People Consultancy as a focal point for clarifying doubts and managing conflict.</td>
</tr>
<tr>
<td>Induction program</td>
<td>In progress</td>
<td>Consolidation of a proposal for an induction program for PWD employees structured in the form of rotations through different areas and participation in a program of specialized training. The two together offer and guarantee the qualification of PWD employees so that they are able to take up functions in the bank with solid prospects for retention and career progression within the institution. In this way, the aim is also the demystification of the difficulties involved with the inclusion of PWD employees and their conditions for professional development.</td>
</tr>
<tr>
<td>Alignment with training services suppliers</td>
<td>In progress</td>
<td>To ensure the efficiency of PWD inclusion programs, which have as a core factor for success the mobilization of stakeholders, indispensable partners in the realization of projects in this area. Consequently, the aim is the practical implementation of the bank’s institutional proposal for diversity.</td>
</tr>

Diversity

GRI G4-DMA Diversity and Equal Opportunity

As a recognized and valued theme in our culture, diversity is managed by our Human Resources Area and guided by our Internal Policy for Diversity Enhancement based on three basic principles: fair competitiveness in relation to differences; heterogeneity within the organization (gender, persons with disabilities, sexual diversity, ethnicity/race); and implementation of policies and projects that value and promote diversity. We also have specific guidelines, such as the Inclusion Policy for Persons with Disabilities (PWDs), our Apprentice Program and a Human Rights Policy. We endeavor to show the importance of valuing the diversity of sexual orientation, gender, ethnicity, persons with disabilities, generation or beliefs through seminars, training and other activities involving communication such as lectures, information posted on the intranet and videos. In this way, we seek to foster respectful dialogue and the elimination of judgmental views that lead to discrimination. We have also held workshops for our suppliers (selection, training and outsourced companies) with the purpose of expanding, disseminating and promoting diversity. GRI G4-DMA

Supplier Human Rights Assessment

Additionally, we have arranged awareness lectures and workshops with managers and their teams on supporting the Program for Persons with Disabilities.

</table>

**Employee health and safety**

**GRI G4-DMA Occupational Health and Safety**

**Safety**

We have a specific department for managing, running and developing the activities that make an ongoing contribution to occupational safety and to the facilities, equipment and tools used in our business. Through internal procedures and policies known as RP - REGULATION OF PERSONNEL, we have established institutional guidelines for the issues involving Occupational Safety and Medicine, which provide support for the Occupational Health Management model, such as:

- **Program for professional rehabilitation and readaptation and support upon return to work.**
  
  This program consists of a team of doctors and psychologists trained to support and guide the employee, adjusting progressively the latter’s activities to his health limitations so that he can fully resume his functions after the conclusion of the readaptation plan. The aim is also to support management in running the program.

- **Professional Rehabilitation**
  
  Designed to reintegrate the employee – who has been on leave of absence - into the labor market through reeducation or readaptation. Eligibility for the program is based on social security (INSS) criteria, method of reeducation or readaptation.

- **Fique OK Program**
  
  Fique Ok (Be OK) is a Personal Support Program open to all Itaú Unibanco’s employees and their families. The program is
operated by a multidisciplinary team and attendance is by telephone, round the clock (throughout the night and weekends in the event of emergencies), 7 days a week on a rapid, confidential and free basis.

- **Occupational medical examinations**
  To provide clarification on 5 types of medical examinations, which meet the Ministry of Labor and Employment’s NR 7 regulatory requirements, the latter establishing the introduction of the mandatory PCMSO program - Program for Medical Control of Occupational Health. The aim of this program is to promote and preserve employee health as well as to prevent and secure an early diagnosis of diseases related to activities linked to the workplace or the employee’s work itself.

- **CIPA and Safety Representatives**
  To establish the responsibilities and necessary actions to ensure compliance with Ordinances 3,214/78 and SIT 14/07 of the Ministry of Labor and Employment. These govern the mandatory organization of an Internal Accident Prevention Committee (CIPA) and, depending on the extent of its responsibilities, require the appointment of a Workplace Safety Representative (RSLT) trained in accident prevention.

- **Complementary Clinical Evaluation**
  This policy establishes procedures and responsibilities for leave of absence for health treatment against the presentation of a medical source statement. The policy’s objective is to broaden the scope within which employee health is monitored, as well as to set out terms and rules for presenting documents, medical leave of absence registration (doctor’s letter) and approving employee absences.

Our other employee safety-related activities are as follows:

<table>
<thead>
<tr>
<th>Activities</th>
<th>Description</th>
</tr>
</thead>
</table>
| SIPATs (Internal Accident Prevention Week)       | This is held annually at the organization’s major administrative hubs with a focus on prevention and raising awareness on the topic of occupational accidents. This initiative is run jointly with CIPA (Internal Accident Prevention Commission), representing 36% of the total headcount* and made up of staff from different hierarchical levels such as managers, coordinators and analysts.  
  *The percentage relates to the total number of employees at administrative hubs, including Branches, International Units and Outsourced Sites. |
| Accident Investigation with preventive actions   | Analysis of causes of accidents to further work on prevention and identification of other situations. Covering all employees. |
| Ergonomic analysis of jobs                      | Preventing employee discomfort when executing daily activities, including the verification of the state of furniture (chairs and desks), equipment, description of activities undertaken, working hours and workplace organization. This initiative is executed in the workplaces of all company employees. |
| Environmental survey                            | Visit the units to check temperature levels, lighting, noise, speed and relative humidity of the air in order to comply with legislation. This initiative is executed in the workplaces of all company employees. |
| Ergonomic adjustment training                   | Provides ergonomic information for telemarketing operators, advice on the correct use of the furniture and equipment in order to ensure quality of life and comfort in the workplace, thereby reducing absenteeism. Occupational safety experts at the São Paulo telemarketing hubs carry out training. Recycling of this training program is periodically conducted via e-learning. |
| Training by e-learning of Workplace Safety Representatives | At company units where a CIPA is not required, we provide e-learning training for the managers to advise them on occupational accident and disease prevention. This training is designed for branch managers and operational supervisors. |
| Training by e-learning in Employee Health and Safety (NR-1) | Employees receive full guidelines relating to the prevention of accidents and occupational diseases. |
| Ratification of ergonomic accessories            | Prior assessment of ergonomic accessories (footrests, mouse and keyboard wrist rest, monitor stand), furniture (table and chairs), and equipment to ensure better employee comfort. This initiative applies to all employees. |
| Ergonomics training for Tellers                 | Following the installation of new cash counters in the branch network, all tellers are trained in the correct use of the new installations to avoid instances of occupational diseases. |
| Workstation evaluation                          | With a view to enhanced employee comfort (including PWD – Persons with Disabilities), the Occupational Safety Specialist and Engineering team undertake individual workplace evaluations to improve the working postures. Each evaluation produces a technical report, which is forwarded to managers with recommendations and guidelines as to the suitability of workplace furniture and equipment. |
| Environmental Risk Prevention Program – PPRA    | Rates the performance of the business units in order to verify physical, chemical and biological hazards in the environment and proposes necessary adaptations for eliminating exposure to such risks. |
| Preparation of Reports on Insalubrious or Dangerous Conditions | On-site inspections made at specific business units to determine insalubrious or dangerous conditions as required by Brazilian legislation on the subject. Conducted in all workplaces where employees are potentially exposed to environmental risks. Inspection reports propose measures for reducing/eliminating these risks and protecting the employee’s health. |
The company uses internal indicators and rules to manage various Occupational Health and Safety-related programs.

**Occupational Health and Safety issues** are also addressed in the Collective Bargaining Agreements with labor unions and the Occupational Safety and Health Sub-Commission of the Brazilian Banking Federation (Febraban).

Our employees are not subject to specific occupational diseases. Incidents are due principally to carelessness or unsafe actions on the part of employees, such as falls between their residence and the company and vice versa, in which cases the company has no management control.

See more details on occupational safety and health-related rates on page A-232.

**Quality of life**

Our actions and programs focused on health education are designed to prevent illnesses and provide advice on the adoption of healthy and balanced lifestyles. They cover both employees and their family members, also involving the communities surrounding our administrative hubs whenever possible. These initiatives include:

</table>
Performance
GRI G4-LA11 | G4-DMA Training and Education

Meritocracy
Meritocracy is our way of managing people and we believe that this ranks us among the most outstanding global companies. For us, meritocracy means leading people, recognizing and differentiating them on the basis of their relative performance.

Honest and transparent feedback is part of this exercise, as are opportunities for development suited to employee needs and also the role of each one in continually pursuing the best opportunities.

We do this by using performance assessment tools and fostering development as described in greater detail below.

Performance Management Program
GRI G4-LA10
Our program proposes to measure employee performance over a one-year period using three evaluation tools:

- Evaluation of goals: the objective here is to evaluate “what” was achieved through an analysis of the employee’s results over the year when set against preset goals and levels of achievement; and
- Behavioral evaluation: the objective here is to evaluate “how” results were achieved by the employee based on an analysis of behavioral attitudes deemed as fundamental by the organization and set out in our corporate culture of, “Our Way”.

For more information on “Our Way” and “Our Culture”, see the section on page A-22.

Strategic People Plan (acronym in Portuguese - PEP): consolidation of scores in relation to the evaluation of goals and behavioral attitudes in order to analyze performance relative to the employee’s peers on a group basis.

For the assessment period ending December 2014, approximately 47,242 employees were evaluated as part of the PEP (including external units), corresponding to about 51% of the total headcount. Others participate only after an individual evaluation (goals and behavioral attitudes evaluation) or other specific evaluation models. This ensures that 100% of eligible employees in the organization are subject to some form of performance evaluation. The 2015 process is still underway. GRI G4-LA11

At the end of each process, our employees receive feedback in order to understand their strengths and where there are opportunities for improvement. The feedback exercise provides each employee with ideas for the creation of an Individual Development Plan (acronym in Portuguese – PDI).

Strategic People Plan – PDI GRI G4-LA11
Our meritocracy cycle was completed last year with the inclusion of the PDI program. In addition to performance assessment (setting goals, evaluation of goals and behavior, and group discussion), we included two new stages focusing on development:

1) Development committee; and
2) Feedback and PDI (Individual Development Plan).

To ensure that each employee’s development is continuous and structured, this year 129 senior managers and 500 officers took part in a new process in which performance record and career stage are taking into account in the discussion of development, in order to define consequential measures.

Training and development GRI G4-DMA Training and Education
The Itaú Unibanco Business School devises learning solutions that match the organization’s culture and strategies. It offers specific training programs covering technical and behavioral themes for the needs of the various areas of Itaú Unibanco.

It fosters initiatives for developing and continuously improving teams and leaders through the use of a range of methodologies and medias, since people are seen as fundamentally material to the perpetuation and sustainability of the business, delivering results and benefits to stockholders, employees and society alike.

Our Corporate Portal includes policies on training, education and development, providing guidelines for planning and corporate educational initiatives for leaders and their teams. In 2015, the bank invested R$128 million in training with more than 5,700 groups completing on-site training activities.

We use two types of indicators to enhance training program management: process (budget, volume and efficiency) and quality (reaction, learning and applicability), thus ensuring the input to improve our programs.

See more information on training in the table by clicking here.

Itaú Unibanco Business School in numbers
Average rate of adherence for training events was 91%
Number of trained employees: 97,304 participations in on-site actions (numbers may reflect one employee participating in more than one program)
1,073,869 participations in remote training programs
5,417 scholarships for academic education and 101 scholarships for language study
A total of 1.5 million hours (on-site classroom hours) GRI G4-LA10

1. Information for the 2015 period was not available at the time of publication.
Leadership Training
We also adopt a strategy for training leaders through initiatives and tools for developing coordinators, managers, senior managers and officers to ensure the sustainable performance of our business.

Itaú Unibanco Business School’s target for 2014 and 2015 is to have all its leaders take the basic training program in up to two years based on three pillars: people management, an ethics workshop and good labor practices. In addition to our in-house programs, we offer continued internal education programs in leadership including both on-site and remote learning solutions. These include continued education online platforms, language courses, postgraduate and MBA programs, seminars, congresses and short courses both in Brazil and abroad.

The training strategy focuses on leadership roles and each program is aligned with the stage each executive has reached in their career and tailored to their Individual Development Plan.

<td>In 2015: Expatriates: 10 Job Swap: 34</td>
<td>100% 97%</td>
</tr>
</tbody>
</table>

Career Opportunity Program (POC) **GRI G4-LA10**
POC encourages our employees to take full advantage of in-house opportunities for a change in department or activity. In addition, this provides managers with an effective instrument to fill vacancies from the internal labor pool.

With the support of career management, POC gives preference to those professionals already working at Itaú Unibanco to take up vacant positions. This allows a broadening of development horizons and enhances the value of the talents of those who are already part of our team. In 2015, 1,598 employees were transferred under this scheme.

Available opportunities are announced internally to employees through the corporate portal. Opportunities can be consulted according to location, department and job position, among other filters. Regardless of whether they apply for existing job vacancies, employees may register their prior interest for up to three executive areas and six careers. Whenever a vacancy becomes available for the chosen careers and areas, an advisory e-mail is sent to registered employees notifying them of their eligibility for the positions in question.

Special programs for talents
In order to ensure sustainability for our business, we must prepare leaders to meet future challenges. Based on this premise, we run attraction and development programs to supply and train future leadership.
Speak Frankly Survey  GRI G4-DMA Labor Practices Grievance Mechanisms | G4-DMA Human Rights Grievance Mechanisms

The Speak Frankly survey is held annually with all the employees in Brazil and the International Units for measuring the level of staff satisfaction in relation to the working environment and people management.

In 2015, the survey reported satisfaction levels of 82% from a voluntary participation of 88% of all employees. Compared with the preceding year, the overall result was a 2 percentage point improvement.

This is an important moment to understand the path we are following in building an ever-improving working environment for our employees.

<table>

</tbody>
</table>

The survey's results are forwarded to all the bank’s managers and staff, who can access not only the overall result but also the numbers for their own area. With these results at hand, managers are encouraged to prepare action plans together with their teams to work on points where the survey has indicated there is room for improvement.

Recognition

Each year, we stage the Walther Moreira Salles Award, one of Itaú Unibanco’s most important forms of recognition, the purpose being to enhance the value of the organizational culture by showcasing exceptional employee projects and practices.

The award covers both projects and also managers who have achieved notable results in themes as of efficiency, customer satisfaction, innovation and leadership. Each successful entrant is awarded a trophy while Itaú Unibanco shares are distributed equally among the winners. In the 2015 event, there were: 803 entries, nine finalist projects and three finalist leaders, and a total of 31 employees who received awards.

Compensation

Fixed and Variable Compensation Policy

The purpose of fixed compensation is to recognize a professional’s competence and seniority. Employees may have their fixed compensation altered in accordance with our promotion and merit policy, which takes into account an individual’s consistent performance and exercise of their responsibilities. Fixed compensation for our employees, plus payroll charges and benefits, totaled approximately R$13 billion in 2015.

Variable compensation recognizes individual performance levels, the bank’s earnings, and its short, medium and long-term sustainability. Each employee has targets to meet that are linked to each area’s strategy, which in turn reflects our global strategy.

Our policy for fixed and variable compensation is in line with market practices and our compensation strategies depend on the unit in which each employee works. Market alignment is assessed annually through a survey conducted by specialized consultants. We also take part in surveys held by other companies while also attending forums specializing in this subject.

Fixed compensation is in line with market practices and our compensation strategies depend on the unit in which each employee works. Market alignment is assessed annually through a survey conducted by specialized consultants. We also take part in surveys held by other companies while also attending forums specializing in this subject.

A committee involving our senior management supervises our governance model and determines general principles and guidelines, in line with market practices and regulations. For more details on our compensation practices, see the Our Governance section, Administrative Structure item, Compensation Committee.

Additionally, our employees are assured salary increases and profit sharing based on the collective bargaining agreements signed with the unions for each employee category.

Our variable compensation programs are the following:

- **Profits sharing (local acronym PLR)** Distribution of a percentage of our net income up to an amount specified in the collective bargaining agreement signed with the relevant trade union.
- **Profit Sharing (local acronym PR)** Our profit sharing program reflects our business performance (such as a business area’s results) and the individual's performance.
- **Supplementary Profit Sharing Program (local acronym PCR)** Participation in profit-sharing programs that depend on the results of our corporate performance (example: Itaú Unibanco Holding’s performance). It consists of payment of an amount determined in accordance with the trade union concerned.
- **High Performance Compensation Program (local acronym PRAD)** Additional profit sharing for the 20% of employees who were best evaluated and not covered by profit-sharing programs. This program also depends on our business performance.
- **Differentiated Performance (local acronym PD)** is a program for employees in leadership or similar positions in our conglomerate. Compensation takes the form of deferred vesting of our preferred shares (ITUB4).

This model reflects individual assessments to reward professionals who have been outstanding in their results and behavior. Its aim is to strengthen personnel management, self-development and team building.

Partners Program: we adopt a long-term incentive program which recognizes and highlights professionals who make a difference, spearheading the building of the conglomerate’s future as well as reinforcing and disseminating the vision, the “business owner” attitude, strengthening and propagating the organization’s culture. Under this program, employees and members of management who are partners or associates may invest part of their Profit Sharing in the purchase of shares of Itaú Unibanco Holding, receiving a corresponding matching (partners’ shares). For greater details, please see section Our profile - Compensation and Benefits.

</table>
| Private Pensions                 | - There are 22 pension plans managed by 2 closed funds and one open fund. Two main aims are served by these plans: topping up social security benefits and maintaining standards of living for retirees.  
- Our contributions to pension plans totaled approximately R$112 million in 2015. Around 2/3 of employees have voluntarily adhered to some of the plans offered. |
| Group Life Insurance             | Group life insurance covers a beneficiary’s death or disability. The plan automatically includes spouses and children and extended funeral assistance coverage. Employees who already have life insurance may get a supplementary policy to increase the amount insured. |
| Financial products and services with discounts for employees (loans, purchasing consortium schemes, insurance, credit cards) | Banking products at discounts and/or special tariffs, such as paycheck loans, overdrafts, banking charges, auto insurance, home insurance, purchasing consortia and housing loans. |
| Pharmaceuticals                  | Discounted prices for medications and perfumes from the Droga Raia chain stores using an identification card. |
| Tuition                          | 5,500 tuition grants, 1,000 were primarily for employees with disabilities allocated in the banking sector; 4,000 were for bank employees and 500 for non-banking staff, subsidizing primary, secondary and tertiary education, including postgraduate courses. |
| Itaú Unibanco Club               | Leisure, recreation, cultural and sporting activities foster integration and quality of life for our employees, retirees and their families. We have three clubs, located in Guarapiranga, Itanhaém and São Sebastião. |
| Itaú Unibanco World Partnership Program | Our Itaú Unibanco World program provides benefits, discounted prices and services from several partners in Brazil and Latin America. |

Ethics GRI G4-S6
At Itaú Unibanco, our business is based on ethical principles, which reflect the transparency, respect and honesty present in our relationship with stakeholders, the quality of our products and services, as well as our concern with E&S responsibility and financial performance. It is also expressed in internal relationships, through which we cultivate environments that are conducive to quality and relevant to those doing the work, to the organization and to society. This is evidence of our practices that corroborates one of our values that ethics is not negotiable.

That is why our Code of Ethics exists to provide guidance, and to prevent or resolve ethical dilemmas or conflicts of interest related to our businesses and internal relations. This document helps in our activities and in the decision-making throughout the relationship with our stakeholders: employees, customers, stockholders, suppliers, partners, government, competitors, media and society.

Our Code of Ethics is divided into four basic principles:
- Identity (aspect that distinguishes us from other companies);
- Interdependence (the engine of coexistence in society);
- Good faith (trust building trust); and
- Excellence (continuously pursuing the highest levels of quality).

The Code reflects our attitudes towards building a set of values, corporate culture, beliefs and attitudes practiced at all times by all our employees.

Our Code of Ethics is approved by the Board of Directors and applies to all directors, officers and employees of our conglomerate in Brazil and abroad. It is available in four languages (Portuguese, English, Spanish and Japanese) and we require our employees to formally acknowledge and accept its terms electronically once a year.

In addition, our Code of Ethics stipulates our formal commitment to the themes set forth in the ILO’s fundamental conventions and in other international agreements such as eradication of child, forced or compulsory labor, combating all forms of discrimination, fostering appreciation of diversity, preventing workplace and sexual harassment, and respecting the rights of free association and collective bargaining.

In addition to these guidelines, the Code of Ethics stipulates reporting and analysis by the competent areas for cases of misconduct, interpersonal conflicts, violation of rules and conflicts of interest in the context of our operations. More complex cases are referred for decision by our specific bodies for integrity and ethical issues.

Our Code of Ethics is available for all employees on the intranet and on our Investor Relations website for our stakeholders. We communicate and train our employees on the guidelines of our Code of Ethics through classroom and distance learning courses. In addition, all employees must adhere annually to the guidelines of the Code of Ethics.

Internal Ombudsman GRI G4-S7 | G4-S8
G4-HR3 | G4-LA16 | G4-HR12 | G4-DMA Labor Practices | Grievance Mechanisms | G4-DMA Non-discrimination | G4-DMA Human Rights Grievance Mechanisms
To strengthen our non-negotiable commitment to ethics, the Internal Ombudsman channel exists as a tool for dialogue with employees, in order to promote a healthy environment, guiding us to cultivate respect and ethics in our relationships and business dealings.
The Internal Ombudsman provides means a guarantee of responsibility and respect in all our relations. It is also an example that we follow our principles and pursue our goals without deviating from what we believe – our values.

With this in mind, the Internal Ombudsman received 921 complaints in 2015 from our employees, of which 745 were resolved during the year and 176 are still being analyzed. In the same period, we resolved 116 complaints that were received before 2015.

In all proceeding situations, disciplinary measures are applied, based on Itaú Unibanco’s policies that are available to all employees. In 2015, of the cases recorded by the channel, 6 were classified as discrimination, of which 5 cases were resolved over the course of the year and classified as unfounded and 1 case is still being handled.

Senior management, through integrity and ethics committees that meet every four months on average, drives our integrity and ethics governance. This includes sectoral integrity and ethics committees chaired by the senior executives from each area and by those reporting directly to them. Subjects covered are treated on the operational level. Itaú Unibanco’s Integrity and Ethics Committee is chaired by the Director of Compliance and Internal Controls and is formed by directors and officers from all the organization’s business areas. International units also have integrity and ethics committees that meet twice a year on average. These forums deal with strategic issues related to ethics in business. The Senior Integrity and Ethics Committee is chaired by Itaú Unibanco Holding’s President and is formed by the Executive Committee, the Internal Control and Compliance Director, the Sustainability Department, the Internal Ombudsman Department and other senior executives who may be invited to attend. This forum deals with matters related to corporate integrity and ethics in the Financial Holding.

Combating Corruption GRI G4-56 | G4-SO4 | G4-DMA Anti-corruption

Based on best practices worldwide, Itaú Unibanco’s purview of corruption covers corrupt relations between public and private actors, as well as those involving private agents only.

Our Bribery Prevention Corporate Policy reinforces our commitment to cooperate proactively with national and international initiatives for preventing and combating all forms of corruption. It also sets guidelines for the conception, execution and continuous improvement of our corporate program for preventing, monitoring and combating corrupt practices, using reporting channels and holding awareness campaigns and training programs on the topic.

The document is available in English and Spanish for all employees on the intranet and on our Investor Relations website for others. A multidisciplinary group is tasked with disseminating these concepts through the bank and discussing risks (threats and opportunities) involving these issues.

Based on national and foreign legislation (Brazil’s Federal Law 12.846/2013; the Foreign Corrupt Practices Act and the UK Bribery Act), case law and global market information, we identify countries with the highest risk of corrupt practices. In all countries where we operate, we have processes in place to monitor relations with the public sector, clients and third parties (such as commercial and administrative partners, suppliers and service providers), and we conduct due diligence audits for mergers and acquisitions.

The Compliance channel is available to receive all opinions on the subject with confidentiality assured. There is also a channel available to answer questions and receive complaints from employees and stakeholders about any suspicions of corruption, which may culminate in dismissal or suspension. In 2015 we received two complaints of possible acts of corruption among private agents, and for one of them we confirmed the origin of irregular activity by a service provider, resulting in suspension of the employee’s supplier. In the other case, the complaint proved unfounded. GRI G4-57 | G4-58

By 2014, all at-risk employees had attended corruption prevention modules as part of training programs. For 2016, we shall continue our ongoing education program through distance learning and on-ground facilities, especially for the areas that have relations with governments or suppliers. Additionally, we shall continue to conduct institutional communication campaigns on our corporate policy for preventing corruption and related guidelines for all employees and managers. By August 2014, all employees and senior management in Brazil had been informed of the prevention of corruption policy and of the classroom or remote training on the subject.

In order to guarantee the continuous improvement of the Integrity and Ethics Program, periodic reviews are conducted of the main processes and controls of Itaú Unibanco related to anticorruption, based on the monitoring of existing regulations and market’s best practices.

Any identified opportunities for improvement are discussed in the Integrity and Ethics Committees mentioned in the previous item and presented to senior management.

We believe that through an education program and ongoing communication, coupled with a strong system of internal controls and compliance, as well as the means to diagnose, suppress and combat misconduct, we have an effective process to mitigate the risk across the organization.
We believe that customer satisfaction and financial results are inseparable goals. Our corporate vision of “being the leading bank in sustainable performance and customer satisfaction” shows how we view the complementary nature of these goals in our business approach. For Itaú Unibanco, ensuring customer satisfaction means being prepared for constant change.

In 2015, we celebrated the 25th anniversary of the Brazilian Consumer Protection Code and looking back over these decades we observe that customer relations in Brazil have matured. Customers are better informed and increasingly aware of their rights and responsibilities. They are more connected to networks and more likely to collaborate, make suggestions and build a company’s reputation. However, troubleshooting, transparency, reliability, convenience and speed are requirements identified by customers as essential for the use of banking services.

Deliver the expected banking services and meet the client’s expectations are challenges that drive our teams. We have stepped up our efforts to deliver prompt services to our customers; Itaú Unibanco’s average response time on social networks improved by 33%, from 6 minutes and 35 seconds in 2014 to 4 minutes and 26 seconds in 2015.

In 2015, 98.22% of the records in the SAC have been resolved in three working days, benefiting more than 10 million customers.

We invest continuously to improve the quality and safety of our operations, to reach higher levels of customer satisfaction every time. We make every effort to avoid mistakes, but we know that processing billions of transactions every day will incur in some degree of failure. Even though the percentage of clients that go to consumer protection agencies is small at 0.29%, considering the size of the company, it represents an important portion of our clients.

We believe in dialogue and that it is the best way to reach a solution. That is why we have a permanent dialogue with Consumer Protection Agencies and Regulators (refer to page A-178 – Clients). They bring us their perceptions about problems that occur and the means of solution in their own regions. In 2015, we had several meetings, the most prominent being the Fifth Dialogue Forum with Consumer Protection Agencies that was attended by the National Consumer Bureau (Senacon), representatives from 36 consumer protection agencies (Procons) and civil society organizations. This edition of the Dialogue Forum represented a milestone in its history. The participants formed a cohesive group committed to dialogue and improvement, and they were all united around a common goal: customer satisfaction - the main pillar for sustainable performance. Below we present more information about the ways we monitor our clients’ satisfaction.

### Customer satisfaction survey

**GRI G4-PR5**

We conduct competitiveness surveys jointly with leading research institutes in Brazil to measure customer satisfaction regarding banking services from specific business units and compare the results with those of our competitors. Our annual telephone survey contacts a representative sample from each segment’s portfolio. Thus, monitors key players and understand the market requirements on satisfaction of impartial market realities, allowing us to define action plans focusing on improvements to better serve and attract new customers.

In 2013, the system for measuring competitiveness was also implemented in other countries where Itaú Unibanco operates: Argentina, Paraguay, Uruguay and Chile.

Reiterating our commitment to the satisfaction of our customers, the results of the surveys directly influence variable compensation whether for executives or the teams at branch level.

Survey data collected from each segment are consolidated into an overall customer satisfaction index. In 2015, we achieved a score of 8.02, but since some segments were included to the survey each year (i.e.: Credicard and Redecard in 2014 and Corporate Banking in 2015), we cannot compare them with numbers from previous years.

### Complaint management

The External Ombudsman is part of the Itaú Unibanco service system and acts when the customer is not satisfied with the solution offered by our regular channels, namely Service Centers, Customer Services and Internet. In addition to searching for the best solution for the presented request, the External Ombudsman acts directly on the process of Client Demand Management and its goal is to mobilize the organization to identify the main causes of dissatisfaction among customers and to develop action plans to improve them.
In addition to direct customer service, the External Ombudsman acts on the processes of complaint resolution in critical channels, such as consumer protection bodies, the Central Bank and the insurance regulator, ensuring the best solution for the customer. The indexes of SINDEC, the National Consumer Protection Information System, for example, indicate that Itaú Unibanco has solved over 86% of the complaints registered in the consumer protection bodies in the preliminary phase.

Considering all the internal channels of face-to-face or remote service, such as Customer Services, External Ombudsman and branches, 143 million contacts have been registered, of which 93.28% referred to information, questions and requests, and 6.43% referred to dissatisfaction. From the total amount of complaints, 99% were solved or explained in the customer services area of the bank and the remaining 0.29% progressed to other consumer service bodies or to the justice system. In spite of the high retention rates presented by these services, we remain committed to straighten out errors and improve our products and services.

In 2015, 97.5% of the customers that used the External Ombudsman services did not pursue the matter in external bodies, such as Procon (consumer protection body) or the court system. Over 95% of the incidents were solved within 15 days, and 80.8% of those incidents were solved within 5 working days.

On the website Complain Here (Reclame Aqui) our reputation, which is generated based on an analysis of customer service, content and conversations related to our campaigns, is very high. The results obtained using these indicators are analyzed by internal committees at board level. Based on these analyses and discussions, it is possible to improve inadequate systems, strengthen communication mechanisms. Amongst all the tools we use to measure and map this impact include: client satisfaction surveys; pre-test and post-test surveys during our campaigns analyzing the performance of our communication; monitoring the number of interactions and views related to our campaigns on social media and our company-owned media; and lastly, monitoring the public response during our campaigns analyzing the performance of our communication.

We are also investing in streamlining the processes of conflict resolution, especially those conflicts submitted to the Judiciary. We have, therefore, adhered to the consumidor.gov.br platform of the Ministry of Justice and the National Consumer Department, and to the agreements with the court system such as the Judiciary Centers of Conflict Settlement and Citizenship (CEJUSC) and the Permanent Center of Consensual Methods of Conflict Settlement (NUPEMEC).

Customer satisfaction is a fundamental value for Itaú Unibanco and is stated in our vision: “to be a leader in sustainable performance and customer satisfaction.” We will keep on strengthening the relationship and dialogue with our customers, consumer protection bodies, regulators and the Judiciary.

**Communication**  
GRI G4-DMA Marketing Communications

The communication process – that can be understood by subjects such as advertising, promotions, sponsorships and events, among others – is one of the main ways we can relate to our stakeholders and connect with them. Communication is an essential tool in our business because it contributes to our client satisfaction, boosts our financial results and reinforces the reputation of our company. This is how we enhance the value of our brand and guarantee the continuity of our business.

In order to manage risks in the marketing of our products and the dissemination of our banking services, we operate guided by the Itaú Unibanco Code of Ethics, the Sector Policy on Money Laundering Prevention and other internal policies that standardize marketing processes. They are internal policies related to the management of our brand and the way we develop communication with our employees and with the various target audiences with whom we do business.

Our communication projects are developed respecting the rules and regulations of CONAR (National Council for Self-Regulation in Advertising). In 2015, we did not identify any cases of non-compliance with the marketing communication codes and we did not face a single lawsuit. **GRI G4-PR7**

The management of the impact that our communication projects have on our brand and our business is carried out using certain monitoring mechanisms. Amongst all the tools we use to measure and map this impact include: client satisfaction surveys; pre-test and post-test surveys during our campaigns analyzing the performance of our communication; monitoring the number of interactions and views related to our campaigns on social media and our company-owned media; and lastly, monitoring the public response during our campaigns on social media.

The results obtained using these indicators are analyzed by internal committees at board level. Based on these analyses and discussions, it is possible to improve inadequate systems, strengthen communication projects even further and clearly observe how much our communication process is able to positively impact our financial results.

**Transparent communication**  
GRI G4-DMA Product and Service Labeling (former F515)

The purpose of this initiative is to be as clear as possible in communicating the tariff charges, rates, features and conditions of our products and services. In 2014, we completed a study of problems affecting customers due to unclear communication. This diagnosis was based on an analysis of customer service, content and conversations with directors, opinion makers and consumers in general.
We then structured a work front to handle the application of transparency guidelines to our business. This work front has developed a guide containing general guidelines and systematized efforts as part of the governance of product evaluation. The project was first implemented in the communication of products and services, then presented to call centers and is due to be extended to product and commercial areas.

**Accessibility** [GRI G4-FS14]

We develop countless initiatives intended to promote the autonomy and the economic development of the disabled.

**At branches**
- **Parking lot**: with larger and demarcated spaces;
- **Ramps and/or lifts** that facilitate access for wheelchair users and persons with reduced mobility;
- **Tactile paving** to guide visually impaired people to the first service point or to the accessible teller machine;
- **Preferential seats** for the elderly, pregnant women, breastfeeding mothers, and the disabled next to teller windows;
- **Employees trained** in communication with the disabled, adhering to the principle of absolute naturalness;
- **Teller windows** adapted to priority service;
- **Bathrooms adapted**;
- **Password letters and credit card invoice** in Braille or with large characters;
- **Account statement** in Braille or with large characters, requested at the branch when opening the account, to be received at the mailing address; and
- **Priority service table** (hybrid terminal).

**At cash dispensers**

The branches have electronic cash dispensers that follow the precepts of a universal teller, as determined by the Brazilian Technical Standards Association (ABNT). They provide autonomous and safe use to any person, no matter their mobility or limitations of perception.

In the case of visually impaired persons, the bank has voice command navigation available, by connecting headphones to the Itaú teller machine. If necessary, we have trained employees on hand to inform customers which support they can use depending on their needs.

**By telephone**

For persons with hearing impairments, we offer a service through the “Talk to us” channel, which, by means of equipment called TDD, one can send and receive text messages. The services available are:
- Checking and savings account balance;
- Recent entries;
- Position of investments;
- Information; and
- Complaints and suggestions for services and products.

**On the internet**

“Itaú on the internet” was adapted to be accessed by a voice synthesizer (software) installed on the customer’s computer, which captures and transforms the customer’s account information into audible answers. The services available are:
- Checking and savings account balance;
- Recent entries; and
- General Conditions of Itaú Universal Account and Services, available in PDF format, audio and video.

**Devices**

We also provide access to our services through special versions of apps for tablets and cell phones (iOS, Android) for visually impaired persons. Services available both to individuals and companies are:
- Tokpag;
- Itaucard;

**Information Security** [GRI G4-DMA Customer Privacy]

Itaú Unibanco is committed in protecting corporate information and ensuring customers’ privacy for transactions. The purpose of our Corporate Information Security Policy is to ensure that data security and intellectual property principles and guidelines are applied to protect the organization, customers and the public in general.

To ensure that the information manipulated is adequately protected, we adopt the following processes: assets’ management, data classification and access control; risk management for vulnerabilities analysis, threats and impacts on information assets; treatment of incidents involving data security; awareness program; independent evaluation of auditing and governance specifically for critical areas (technology, business units...
and international units). We also assess risk involved in new or revised products and services, once risk has been identified; we issue security reports and monitor implementation of the measures suggested. Our 24/7 Security Operation Center (SOC) monitors our operation to minimize the risk of a security incident.

The following key initiatives were taken in 2015:
- **E-learning course on the subject** (14,179 employees trained in 2015);
- **Campaigns done throughout the year**;
- **Talks to raise the level of our awareness for executive levels and new employees** (4,367 trained in 2015);
- **Talks to raise the level of our awareness for international units from Swiss, Lisbon, London, Miami, Bahamas, OCA Uruguay and Chile were trained** (1,826 trained in 2015); and
- **In 2014, a new information security governance policy was created and published at the corporate portal.**

**Fraud Prevention GRI G4-DMA Anti-corruption**

Itaú Unibanco has a series of measures, rules, policies, awareness and training programs for the prevention of fraud with best practices in local and international markets.

The following key initiatives were taken in 2015:
- **Fraud Prevention:**
  - Training programs were held for managers from the Commercial and Operational departments throughout the year (1,531 were trained in 2015);
  - Inclusion of both Anti Money Laundering/Combat the Financing of Terrorism and Bribery Prevention on Fraud Prevention training programs (236 were trained in 2015);
  - Lectures and workshops for client-companies (159 people trained in 2015);
  - Lectures for quality-of-life program Itaú Viver Mais (Itaú Live Longer) participants, for people aged over 55 (255 trained in 2015);
  - Lectures for Itaucred Vehicles call center supervisors (77 trained in 2015); and
- **E-learning courses:**
  - E-learning about fraud prevention and social engineering/entrapment for call center operators (1,056 trained in 2015); and
  - E-learning to prevent fraud in insurance (150 trained in 2015).
- **Digital Channels** (more than eight million users of the channel):
  - Mathematical model able to analyze the behavior of internet banking customers and quickly identify possible profile deviations;
  - When the risk of fraud is detected, the transaction is not authorized and the customer is advised to use additional security mechanisms.

**Money Laundering Prevention GRI G4-DMA Anti-corruption**

With the purpose of preventing and combating illegal activities, among which are money laundering and terrorism financing, Itaú Unibanco has rules and procedures, aligned with the legislation number 9,613/98 updated by the legislation number 12,683/12, with the regulation stipulated by the regulatory bodies and with the local and international best practices.

The following key initiatives were taken in 2015:
- **New e-learning courses on AML corporate procedures and cash transactions controls**;
- **New tutorials on Know your Customer (KYC) guidelines and procedures**;
- **Face-to-face training courses for employees at branches in border/high-risk areas, foreign exchange operations, private banking and brokerage**; and
- **Corporate awareness campaign about the risks of money laundering, composed of emails, chats, screensaver, messages and videos on Intranet.**
Bribery Prevention  
GRI G4-DMA Anti-corruption
Itaú Unibanco prohibits the practice of offering or accepting undue advantage for or by public or private individuals or companies in the exchange of the commission or omission of acts inherent to their duties or to facilitate business deals.

The following key initiatives were taken in 2015:

- **Bribery Prevention:**
  - Awareness campaign on this theme on executive areas and international units;
  - E-learning courses for central management staff (29,560 trained in 2015);
  - Classroom training for the for business areas (1,604 trained in 2015); and
  - Corporate training for employees at Swiss, Uruguay Bank, OCA Uruguay, Miami and Bahamas.

Customer Privacy  
GRI G4-DMA Customer Privacy
The privacy of our customers is a sensitive issue, which is handled with confidentiality and accuracy. Therefore, the number of complaints about breach of customer privacy is confidential information.  
**GRI G4-PR8**

Considering the sensitivity of this issue, we are committed to ensuring our customers a safe and reliable environment. We have invested in infrastructure, technology and human resources to prevent information privacy violations, based on policies and guidelines covering several fronts of action.

Examples of actions that exist in products and services are the development and application of security devices for authentication and use of the electronic channels and certification of channels according to the strictest standards of security and reliability.

Another existing measure that we can mention is the protection and preservation of confidential information in its various forms, including encryption of the information flow on the Internet.

Stockholders

Please refer to section Our Profile, item Our Shares for further details about our common and preferred shares and further information for the investor.

We have several activities aiming to engage our stockholders, to find out our engagement with stockholders please refer to the item Stakeholder engagement on page A-178.

Distribution of added value  
GRI G4-EC1 | G4-DMA Economic Performance
The distribution of added value is an accounting reference that allows us to see how the generation of the bank’s value is distributed among its different audiences. Our added value, which shows the wealth generated for the community, reached R$44.53 billion in 2015. This result refers to the direct economic value generated and distributed by us, including income, operating costs, employee compensation, donations and other investments in the community, retained earnings and payments to capital providers and governments.

Suppliers  
GRI G4-12 | G4-DMA Procurement Practices | G4-DMA Supplier Environmental Assessment | G4-DMA Supplier Assessment for Labor Practices | G4-DMA Supplier Human Rights Assessment | G4-DMA Supplier Assessment for Impacts on Society

Our supply chain covers a wide range of segments - such as Telecommunications, Call Centers, Cash and Valuables Deliveries, Market Research, Furnishings, Electricity, Training Programs - in which our relationships are based on transparency, sustainability and adding shared value.

In the last five years we have had about 9,000 partners that have provided goods or services to the bank. This partnership is made through a formal contract process whose objective is to minimize
possible financial, reputational, operational and legal impacts during the provision of the service or upon the termination of the contract. We also work to enhance sustainable practices as well as compliance with legal and ethical principles that must govern business relationships.

**Procurement of goods and services**

Goods and services for our supply chain are centrally managed by our Procurement area with the involvement of the contracting and legal areas among other areas of support.

The Procurement area operation model allows the understanding of each market in order to identify the most appropriate procurement strategy for each type of business and ensure consistent supplier relationships. The negotiations conducted by the Procurement area follow a process of three stages:

- **Pre-purchase**
  - Annual procurement study
  - Market analysis
  - Definition of the strategy for the procurement of goods and services
  - Development of suppliers
  - Development and evaluation of scope
  - Administrative evaluation of the financial, reputational, regulatory, E&S conditions of suppliers (CNPJ)
  - Assessment of the technical and operating capacity of the supplier to work in the activity for which they will be contracted
  - Technical visits

- **Purchase**
  - Implementation of the bid or negotiation
  - Development of the contractual instrument
  - Signing of the contractual instrument

- **Post-purchase**
  - Monitoring of the delivery of the material or service
  - Monitoring of performance indicators to verify the adherence to the standards of quality and service level agreements established
  - Control of the consumption (quantity and value) and duration of the contract
  - Monitoring of financial, reputational, regulatory, E&S conditions of suppliers (CNPJ)
  - Monitoring of risks linked to employees of our suppliers located within our operation
  - Deployment of action plans for the mitigation of the risks identified, whenever necessary
  - Vendor Relationship Management (VRM): relationship management with key suppliers and stakeholders in order to ensure efficiency throughout the contract life cycle
  - Vendor Technical Management (VTM): centralized management of contracts and renewal of information with suppliers in order to support strategic decisions
  - Vendor Governance Management (VGM): medium and long term vision of processes and tools in order to reduce risks and promote continuous improvement
Suppliers Assessment
GRI G4-HR11 | G4-SO10

We have a structured process for the evaluation of suppliers, whose function is the mitigation of risks in our supply chain. This process starts with the access and registration of the supplier on the website, where the procurement policy, E&S responsibility, code of ethics, information security and general conditions applicable to the procurement of goods and services are published for awareness and acknowledgment. When registering on the website or participating in a procurement process, the supplier adheres to these policies by electronic acceptance.

After registration, these companies go through a process of technical and administrative evaluation which consists of an analysis of the supplier’s adherence to the practices of E&S responsibility, compliance with and concerning fiscal, tax and employment legislation (regularity of certificates, licenses, payment of taxes, salaries and contributions) and fulfillment of their corporate obligations through the same tools used to assess customers (credit analysis, indebtedness with the market and suppliers, MLP - Money Laundering Prevention, fraud, anti-corruption law and other discrediting facts). Going through these criteria and having been approved, the company will be able to participate in contract procedures.

In August 2015, we improved the criteria for the administrative evaluation of suppliers and started assessing with a specific view considering the risks of the category of products or services supplied. This assessment is based on the risk matrix of suppliers which is composed by the four pillars below:

1. Reputational / Regulatory: risks of the supplier and the corporate structure related to image, compliance with existing legislation, illicit acts, human rights (child labor, dirty list of slave labor) and environmental impact, among others;
2. Financial: risk related to the financial health of the supplier;
3. Dependence: risks related to the dependence of the bank on the supplier to mitigate the possibility of a rupture in the provision of services or supply; and
4. Labor: risks relating to the provision of services involving intensive labor.

The approval is valid until the company ceases to meet the criteria for approval.

Our suppliers are distributed throughout all the regions of Brazil, because we encourage the hiring of local suppliers, envisaging the development of the regions in which we operate. GRI G4-EC9

Among the categories with the highest number of suppliers, we highlight Maintenance, Works and Equity, which serves the hubs and branches scattered throughout the country.
**Contractual formalization, breaches and penalties**
Supplier contracts include specific requirements for the proper monitoring of E&S issues – such as labor and employment obligations, occupational health and safety standards, adherence to environmental legislation, liability for damages and information security – that are applicable to our suppliers and their supply chain. If irregularities are detected, penalties will be applied and may lead to an action plan to help a supplier solve the problem, or, in certain situations, suspension or termination of the respective contract.

**Monitoring**
In August 2015, we also started monitoring, on a monthly basis, the approved suppliers in the administrative evaluation with a specific view considering the risks of the category of products or services supplied. The monitoring criteria are the same as those used in the administrative evaluation process (ESG - environmental, social and corporate governance), having as an objective to check the maintenance of the initial condition, and, in the case of identification of relevant facts, suppliers may have their contracts terminated. We have a governance model (Vendor Management) applied specifically to software development suppliers. The model is divided into Governance, Relationship and Technical Management. This allows Itaú a vision of the business life cycle, value gain, cost control, service excellence and risk reduction. We plan to implement this model for other categories of purchases in 2016.

We periodically conduct announced and semi-announced independent audits of our critical suppliers (tier 1) and their respective suppliers (tier 2) with the objective of assessing the risks across our supply chain, as well as interviews with employees of third parties to identify non-compliances related to the same issues verified in the audits: Environmental, Social, Health and Safety, Human Rights and Supply Chain Management. From the audits we did in 2014, 94% generated an action plan. In 2015, those companies underwent another audit, and we verified an evolution of 79% in the generated action plans.

**Transparency**
We provide our suppliers with communication channels through which they can make suggestions, ask questions or report any violations or misconduct (including for issues of an environmental or social nature).

To ensure the sustainable growth for our supply chain, we believe we must develop ongoing practices for joint development with our suppliers and their supply chain operations. Therefore, our website shows the initiatives we see as good E&S practices, as well as our Code of Ethics.

In addition, semiannually we forward these same recommendations, through a formal statement by email, to all the suppliers of the bank.

**Training**
We train our suppliers and employees to promote their development and strengthen their commitment to our culture, recognizing good risk-mitigation practices and discussing opportunities for making our operations more efficient.

We organized, in 2015, our first Sustainability Workshop with the 2nd tier of the supply chain. At this meeting we explored sustainability within Itaú and disseminated the best practices conducted by the bank and its suppliers. Through our partnership with the Brazilian Business Council for Sustainable Development (CEBDS), in a program conducted with the consultancy firm Ernst & Young, we performed the Training in Sustainable Procurement with employees from the procurement and contract management areas.

We also participated in the fourth edition of the program Carbon Management in the Value Chain of CEBDS, which raised the awareness of our suppliers on the issue of climate change and trained them in the measurement of greenhouse gas effects in its supply chain through the tool GHG Protocol.

In 2015, the Corporate Integrity Team of Itaú Unibanco developed training on the Prevention of Illegal Acts for our suppliers. In this meeting the following subjects were addressed: Prevention of Corruption, Money Laundering Prevention, Fraud Prevention and Ethics.

---

5. 25% concluded more than 50% of the action plan and 21% concluded less than 50% of the action plan.
Focusing on continuous improvement, the procurement area went through five Kaizen processes in 2015. Two of them were focused on reducing supplier risk exposure and the other three processes aimed to improve the performance indicators in the telecom, cleaning and advertising agency categories. The Kaizen processes are adapted to the financial market and conducted by Japanese consultants specialized in the methodology.

All these actions were attended by 278 participants, of whom 172 were suppliers (tiers 1 and 2), representing 36% of our contracted suppliers, and 106 were employees of the bank (procurement and contract management areas).

In addition, we are always taking part in forums and training sessions promoted by other entities, either as participants (Women Vendors Exhibition and Forum – International Trade Center Brazil, Annual Event of the Brazilian GHG Protocol Program – Gvetes, Sustainable Supply Chains – DNV GL, Sustainable 2015 – CEBDS, Forum ISE 10 Years – Corporate Sustainability Index, II Forum of Inclusive Economic Development – Municipal Government of São Paulo, Municipal Department for the Promotion of Racial Equality and Inter-American Development Bank) or as speakers (Webinar Sustainability Strategies X Impact on the Supply Chain, web conference held in partnership with DNV GL and Carbon Management in the Value Chain, training conducted in partnership with CEBDS).

**Achievements and challenges**

The procurement area contributes significantly to a reduction in costs and resource optimization through actions such as: partnerships with our suppliers, innovations in our supply chain, developing new suppliers, consolidating volumes, reconfiguring the value chain, reviewing specifications, initiatives to renegotiate contracts, managing consumption, improving processes and assessing E&S gains.

We finalized, in 2015, the deployment of the new ERP system for better management and control of hirings and payments, and we began using the telemetry cell responsible for the timely monitoring of the indicators of the operation.

---

In 2013, we encouraged medium and long-term targets (2015 and 2020, respectively) determining responsibilities and measures required to cope with the challenge of implementing engagement and risk mitigation measures with more transparent disclosure of operational and supplier indicators.

We have fulfilled our objective of monitoring, on a monthly basis, all the approved suppliers in the administrative approval process, thus guaranteeing better control of risks in our supply chain. We have also included in the process of risk mitigation the second tier of our supply chain, which, like the first tier, participated in the E&S research where we were able to map the risks and draw up improvement plans to be monitored in the coming years.

In addition to holding various forums and training sessions, we also raised the awareness of our suppliers on the sustainability recommendations that are disclosed on our website and sent every six months to all the suppliers.

We are increasingly improving our process of conducting external audits of suppliers and establishing indicators related to the evolution of the companies evaluated over the years.

Through the engagement of our entire team, obtained by means of the actions carried out since 2013, we were able to include in 2015 specific sustainability objectives in the contracting of targets by the Executive Procurement Board. We believe that this will be the main mechanism for further enhancing our Supply Chain Management, and finally achieving our objectives for 2020.
Breakdown of the targets measured in 2015:

</table>

Through all processes described in this document we seek to avoid potential impacts in our value chain. Among them we highlight GRI G4-EN33 | G4-LA1S | G4-HR11 | G4-SO10:

- Varied environmental impacts, impacts related to illegal labor practices such as child labor, forced labor, slave labor, inadequate working conditions and the impact of human rights, all considered in the approval process;
- Impacts on society, which are mitigated through the hiring of committed suppliers, which in turn helps to promote responsible and ethical practices in the market, cooperating as well with Brazilian society.

**Community**

GRI G4-26 | G4- EC1 | G4-DMA Local Communities

We have a program to identify needs and opportunities in regions where we have large operational centers. This process has enabled us to study ways of working together with local community leaders and governments to improve the quality of life in areas around our administrative centers.

We participate in discussions with communities around our Business Center and Technical Operations Center, located respectively in the Jabaquara and Mooca neighborhoods of São Paulo.

Main activities in 2015:

- We offered support for the Jabaquara and Mooca neighborhoods’ anniversary festivities and also the Christmas Tree in the Mooca neighborhood;
- We also started improving the structure of street sellers near the Jabaquara Business Center;

**Society**

Our strategy relates to social development initiatives, such as financial education, culture and urban mobility, which are delivered to all communities in which we have operations. These initiatives are extended to the media, opinion leaders, the market and several social organizations. We also work together with various levels of government in order to improve public policy models in the many countries where we operate.
• In addition, we implemented Itaú Viver Mais (Itaú Live Longer) program near the Technical Operations Center, in Mooca Park.

We are also responsible for the maintenance of public spaces, such as the Alfredo Egydio de Souza Aranha square and the Lina e Paulo Raia park, both located in the area surrounding our head office, and also the “Passarela Verde” (Green Walkway) pedestrian overpass in the Pinheiros neighborhood. The walkway has been renovated to reflect concepts of sustainability, such as green roofing, recycled rubber flooring for the visually impaired, and elevators to assist those with limited mobility. This was the first project of its kind in the city and the walkway’s maintenance was based on a partnership agreement between Itaú and the São Paulo municipal government.

We also have several initiatives in Mogi Mirim, in the state of São Paulo, where our new Technical Operations Center started working this year. We work jointly with community representatives to support local initiatives, including a local orchestra (Banda Lyra), events at FATEC (Institute of Technology, the town’s leading college), projects at a local hospital - Santa Casa de Mogi Mirim, donation of fitness equipment for seniors in 2013 and support of children’s parties with games and other activities at the Sol Nascente Association, donation of equipment to help the city fight dengue and, finally, the organization of two workshops with the community on rational use of money given by bank volunteers.

Furthermore, we stepped up our actions to support Brazilian communities in emergencies, such as the mining disaster in Mariana (Minas Gerais), the windstorm in Foz do Iguacu (Paraná), the tornado in Xanxeré (Santa Catarina), flooding in Rio Branco (Acre) and torrential rains in Salvador (Bahia). We donate emergency items, such as drinking water, food staples and construction materials.

**Membership of associations**

We seek to contribute to the development of society and markets through relationships of trust and collaboration, working with entities such as:
In the following table, we list some of the principles and voluntary commitments together with our internal policies underpin our management, allowing these issues to pervade all areas of the bank and direct relationships with all our stakeholders.

**Press**

With the mission of spearheading the management of Itaú Unibanco’s reputation, the Corporate Communications Department’s work is focused on ensuring that the bank’s discourse matches its practice. Our aim is to contribute to the realization of the organizational vision: to be the leading bank in sustainable performance and customer satisfaction. And it is precisely because we are an increasingly sustainable bank that we need to maintain an open and transparent relationship with opinion formers in general.

To implement this strategy, the bank researched the perceptions and expectations of key stakeholders for its business, namely academia, the press, consumer relations institutions, NGOs and the financial market. This study has been instrumental in improving the guidelines for the Department’s actions, providing the general outlines for initiatives to be executed during the course of the year and thereby reducing reputational risk and creating opportunities for stakeholder engagement.

In 2015, we sponsored a series of discussions on topics that contribute to the development of society. One of the most successful initiatives in this context was the holding of meetings and workshops for propagating relevant information on matters that help understand the contribution of the financial sector in a globalized world. In a further development on the same theme, we held events covering some issues as financial education, sustainability, urban mobility and encouragement of reading.

As part of our contribution to being an increasingly digital bank focused on efficiency, the Corporate Communications Department has been a member of a working group that has delivered projects such as the Mogi Mirim Data Center and Cubo – a pioneering initiative in the sector of technological entrepreneurship. Again, in line with Itaú Unibanco’s objective of internationalization, the Department has played an active role in the process of corporate governance among Latin American countries. A good example of this is the recent merger with the Chilean bank Corpbanca, where we collaborated with an agenda of engaging different overseas stakeholders.

In addition to its proactive initiatives, Corporate Communications also works reactively in response to the demands of the press. Last year, calls from journalists were answered and journalists from the leading media outlets were received by bank executives with the objective of highlighting the organization’s projects and actions. These contacts served to present initiatives for improving dialogue and enhancing transparency with Itaú Unibanco’s various stakeholder groups. There are some spokespersons in the bank authorized to talk to the press and they receive ongoing training from the Department. New training cycles are held as and when additional executives begin talking to the media.

CDN, a communications agency focused on building and strengthening image and reputation, is charged with monitoring Itaú Unibanco’s exposure in the national and international press using image audits. Information, which is analyzed both qualitatively and quantitatively, is used to construct the Media Exposure Quality Index (IQEM), an indicator that is tracked on a monthly basis. In 2015, Itaú Unibanco accounted for 36.8% of the financial sector’s positive exposure in the national printing press.

Since 2008, the bank’s reputation has been monitored with a view to identifying and managing reputational risks and opportunities. This process is conducted annually through the RepTrak® DeepDive study in partnership with the Reputation Institute (RI). An innovative strategic unit dedicated to the topic has been installed for monitoring stakeholders deemed a priority for the bank. In practice, the results of the study influence not only the Department’s processes but also discussions with the areas relating directly to these stakeholder audiences. The data raised is for internal use and just as in the case of the IQEM, also provides support for the strategic communication plan, the setting of performance goals as well as permitting the evaluation of the results of departmental initiatives.

The Corporate Communications Department focuses its efforts on actions that contribute to the realization of the bank’s vision, working continually to ensure the alignment between discourse and practice. By intensifying stakeholder engagement, Itaú embraces its role as a responsible change agent in society.
Government GRI G4-26 | G4-EC1 | G4-DMA  
Economic Performance | G4-DMA Public Policy

We seek to work closely with public organizations in all branches of governments in the countries where we operate. Our intention is to build partnerships that can benefit society. Our work is guided by ethics and transparency and our goal is to provide authorities with consistent information so as to allow the appropriate assessment of issues that may involve our business or the causes we support.

At the federal level in Brazil: GRI G4-15

• We are following the progress of more than 1,300 bills in Congress;
• We conducted visits to over a hundred lawmakers and public administrators who have significant activity in fields such as safety, consumer rights, urban mobility, judicial mediation, tax issues and the Civil Rights Framework for the Internet ("Marco Civil da Internet");
• With the Executive Branch: partnerships with the Ministries of Cities, Health, Sports, Science and Technology, Justice and Transport;
• We comply with the national Pact for Life campaign, announced through our communication channels;
• As a partner of the Health Ministry, we announced in our communication channels various campaigns related to health (Organ donation, Breast Cancer Awareness, HPV Vaccines and Blood donation);
• We also support the Science without Borders (Ciência sem Fronteiras) program; and
• As a financial supporter, we made improvements to the technology system of the Justice Ministry and to the modernization program of the public administration of the Transport Ministry.

At the state and municipal levels in Brazil:

• We are closely monitoring discussions on more than 3,000 bills, as in the following subjects: banking security, consumer rights, taxes and urban mobility;
• We act together with the city council of Mogi Mirim, in the state of São Paulo, to detail the construction of our new data center, as well as to understand the demands of the local government, the community and the Attorney General, and to contribute to Mogi Mirim’s economic and social development. Among other actions, in 2014 we donated bike racks and safety kits for cyclists;
• We are committed to managing the Ibirapuera Auditorium in the city of São Paulo, with support from Instituto Itaú Cultural (Itaú Cultural Institute);
• We also ran the 9th edition of the Solidarity Campaign (Gincana da Solidariedade), which encourages our employees to donate clothes, shoes, blankets and personal hygiene products. In 2015, approximately 189,000 kilograms of those products were donated to NGOs or municipal social development departments. In addition, the bank donated approximately 51,000 blankets and bed sheets to NGOs in the cities and states that took part in the campaign.

Political campaigns and donations GRI G4-S06

All donations made by our group in connection with political elections are in compliance with Brazilian laws and regulations, duly recorded and follow our policy for donations to political campaigns. Donations are made in a manner to facilitate tracking (through a single entity of our group) and the respective process is conducted by a political assessment committee composed of board members and senior executives, so as to assure transparency.

In 2015, there were no elections held in Brazil.

Government tax incentives GRI G4-EC1 | G4-EC4

In 2015, we received R$197.9 million in tax incentives, donations and sponsorships for sports projects and the extension of maternity leave.

3. Funds with tax incentives through laws such as Rouanet, Sports Incentive Law, among others.

### Education

#### Fundação Itaú Social (Itaú Social Foundation)

Education is the key to a country’s sustainable development. Delivering quality education for all Brazilian children and youth is such a large-scale and complex challenge that requires effective government policies combined with the extensive involvement of different sectors of society.

Itaú Unibanco set up the Fundação Itaú Social (Itaú Social Foundation) to organize and deploy its social investment nationally. The Foundation’s purpose is to develop, implement and disseminate social methodologies for the advancement of public education, while boosting the engagement of Itaú Unibanco employees – and society in general – through volunteering culture and a systematic impact evaluation of social projects and policies. Its operation is fully based upon partnerships with government, NGOs and businesses, in order to promote broader understanding and cooperation around public policy and to enhance the potential of these diverse stakeholders around a common goal.

#### Expanded Learning

Providing Expanded Learning for public school students means expanding time span and reducing social and economic inequalities in order to broaden their repertoires, horizons and ability to engage in inclusive and creative circulation of learning and ideas in our cities. Brazil still provides public schooling on a part-time basis (only 4 hours a day). This concept becomes strategic not only to ensure quality, but also to promote fairness. Therefore, the Fundação Itaú Social (Itaú Social Foundation) develops the following programs: Itaú-Unicef Award (Prêmio Itaú-Unicef), Urban Youth (Juventude Urbana) and Advisory Services for Integral Education Policies.

#### Economic Evaluation of Social Projects

Evaluation is a key means for enhancing social investment and policy made by public and private organizations. By verifying the efficacy of public initiatives and policies, we search for evidence on whether they are improving real-life situations or not. Since 2004, the Foundation has been developing its economic impact evaluation program for social projects guided by the bank’s Investment Valuation staff, applying their skills in the economic impact area applied to the social sector. To spread the impact evaluation culture and practices, the Foundation has organized seminars, workshops and conferences for project managers working directly for NGOs and governmental agencies, while also developing impact evaluations of its own projects and programs.

#### Social Mobilization

Engaged persons are powerful agents for promoting societal change and mobilization is a means of engaging people beyond conventional obligations to build cooperative networks that enhance life for everyone. By investing in mobilization of its employees and society at large, the Foundation reinforces a volunteering culture and a systematic impact evaluation of its business network, and the strength of its brand. Therefore, the Foundation runs the following programs: Itaú for Children (Itaú Criança), Volunteering (Voluntariado) and Community, Here! (Comunidade, Presente).

Please refer to [www.fundacaoitausocial.org.br](http://www.fundacaoitausocial.org.br) for further details.
### Instituto Unibanco (Unibanco Institute)

Founded in 1982, the Instituto Unibanco (Unibanco Institute) is one of the institutions managing private social investment for the Itaú Unibanco conglomerate and it is currently working to raise the quality of Brazilian public education and secondary schools in particular. The institute develops, evaluates and disseminates solutions to ensure that schools provide more educational opportunities for young people, while pursuing a fairer and more broadening society.

Since the institution believes that high-quality and results-oriented school management may significantly impact school results and learning outcomes, it provides technical assistance, training and educational technologies and methodologies for state education departments and schools.

#### Programs

<table>
<thead>
<tr>
<th>Programs</th>
<th>Description</th>
</tr>
</thead>
</table>
| Jovem de Futuro           | • Provides training and technical assistance to State Education Departments in order to enhance public school management capacity and to improve students’ learning outcomes.  
                              | • After the pilot project was initiated in the states of Minas Gerais, Rio de Janeiro, Rio Grande do Sul and São Paulo in 2008, we scaled it up to include five other states. From 2012 to 2014, the Youth of the Future program was run as a partnership with the Innovative High School Program (Programa Ensino Médio Inovador), an initiative of the Ministry of Education of Brazil, and it was implemented in the states of Ceará, Goiás, Mato Grosso do Sul, Pará and Piauí. In 2015 a new stage started in Espírito Santo, Pará and Piauí and it has continued in Ceará and Goiás as part of the partnership with the Innovative High School Program.  
                              | • In 2015, 1,394 public schools took part in the program, which benefited 644,591 students (according to the 2014 School Census) in seven states.  
                              | • About 3,820 principals and coordinators of public schools and staff from Education Departments received training in school management. In addition, more than 28,450 teachers have enrolled for distance-learning courses covering educational and mobilization methodologies developed by the institute.  
                              | • From 2008 to 2018, the program is expected to reach almost 2,500 public schools and benefit about 2 million students.  
                              | Jovem de Futuro: [www.institutounibanco.org.br/jovem-de-futuro/que-e](http://www.institutounibanco.org.br/jovem-de-futuro/que-e) |
| Volunteer programs: Studying is Worthwhile (Estudar Vale a Pena) | • Itaú Unibanco employees help to raise awareness of the benefits of education among high school students from the public system.  
                              | • In 2015, 848 volunteers worked on initiatives that benefited more than 6,840 high school students.  
                              | Estudar Vale a Pena: [www.institutounibanco.org.br/lo-instituicd/voluntariado](http://www.institutounibanco.org.br/lo-instituicd/voluntariado) |
| Grants                    | • Support for initiatives of civil society organizations and public schools in order to enhance school management towards gender and racial equality. In 2015, the Instituto Unibanco (Unibanco Institute) supported 10 projects chosen from 124 racial equality initiative applications, and it received 171 gender initiative applications, whose selected projects will be supported in 2016.  

Please refer to [www.institutounibanco.org.br](http://www.institutounibanco.org.br) for further details.

### Culture

#### Instituto Itaú Cultural (Itaú Cultural Institute)

In 2015, Itaú Cultural celebrated 28 years of commitment to Brazilian culture. By operating in a number of fronts to map, support and disseminate Brazilian arts and culture, the institute promotes an intensive free-of-charge programming nationwide with events held in its headquarters - in Sao Paulo - and in partner institutions located in other cities in Brazil and abroad.

Over 740 face-to-face activities were carried out in 2015 with a total of more than 395,000 visitors. In the virtual setting, the institute's website recorded more than 10.5 million accesses. In September of 2015, its library was reopened with a new format to serve visitors.
One of the main actions developed by Itaú Cultural, the Ocupação program, puts together shows about core personalities in various fields of artistic expression – exploring their creative processes and presenting their careers to new generations. The show dedicated to cartoonist Laerte, for example, received the HQMix award in the category of 2015 best exhibition.

The 11th edition of the Brazilian Graphic Design Biennial also highlighted the products produced by Itaú Cultural: the Revista do Observatório magazine and printed publications for the exhibitions Oscar Niemeyer: Clássicos e Inéditos and Ocupação Zuzu, the latter dedicated to fashion designer Zuzu Angel.

In addition, Itaú Cultural received an award from the APCA (São Paulo Association of Art Critics) for the project Artigas, 100, the exhibition Sérgio Camargo and for the show O Terno & Boogarins at the Ibirapuera Auditorium – Oscar Niemeyer. The Institute also received national and international awards for the documentary A Paixão de JL (about the life of the visual artist José Leonilson), produced by Itaú Cultural.

The experience acquired throughout the last 28 years also contributed to make Itaú Cultural a managing institution or partner in literary initiatives like Oceanos – Prêmio de Literatura em Língua Portuguesa and Jornada de Literatura de Passo Fundo.

<table>
<thead>
<tr>
<th>Programs</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rumos</td>
<td>For 18 years, artistic and cultural actions have been carried out nationwide under the umbrella of the Rumos Itaú Cultural program. The 1,231 projects developed with the support of this program have reached over 6 million people. In 2015, Rumos' 16th edition marked a new phase of this initiative. After reconsidering the traditional ways in which the calls for proposals related to the arts and culture are made in this country, its format went through a deep change. Now open to producers from a wide variety of areas of artistic expression – no longer separated by specific calls for proposals – the program created, among other initiatives, Mostra Rumos, a show displaying the works developed with the program's support and promoting round tables with selected artists and researchers. In 2015, a press conference brought together journalists from all over the country to present Rumos' 17th edition. The program absorbed the changes of the previous edition and set off on a new journey to all Brazil's state capitals, where it raised and stressed reflections on the making of culture nowadays to more than 2,000 people. Altogether, the new call for proposals received 12,126 registrations – from Brazil and abroad.</td>
</tr>
<tr>
<td>Ibirapuera Auditorium – Oscar Niemeyer</td>
<td>In 2015, the Ibirapuera Auditorium – Oscar Niemeyer was visited by about 371,000 people who saw 164 performances there – 82 of which were free of charge. The highlights of the year's programming included album releases by Elza Soares and André Abujamra and performances by the Paraisópolis Ballet and the singer Maria Gadú – in addition to the screening, open to the audience outside the auditorium, of a film from the São Paulo International Film Festival.</td>
</tr>
<tr>
<td>Exhibitions with the Itaú collection</td>
<td>The exhibitions of the artworks belonging to the Itaú Unibanco collection – which is maintained and managed by Itaú Cultural and has over 12,000 items – have traveled across the country and abroad since 2010. In 2015, for example, the Moderna para Sempre – Fotografia Modernista Brasileira na Coleção Itaú Cultural photographic show visited Brasília, Recife and Santos. In the same year, over 100,000 people were reached by the exhibitions. Between early 2010 and late 2015, the different approaches to the collection resulted in 51 exhibitions – that traveled through 19 cities in 8 countries and were visited by about 1.5 million people.</td>
</tr>
<tr>
<td>Virtual actions</td>
<td>In January 2015, Itaú Cultural launched the website O Mundo de Bard [Bartotacultural.org], a new source of entertainment and knowledge for children. Under the leadership of a mouse called Bartolomeu, the website presents, among other attractions, interviews with personalities from the children's world and tips about films, books and shows. There are also a number of electronic magazines with various types of games to color and cut plus texts using simple language and addressing subjects related to the realms of arts and culture. Although it is especially geared to children aged between 5 and 12 years, the website is also a space for the whole family. The Enciclopédia Itaú Cultural de Arte e Cultura Brasileiras, a virtual encyclopedia of art and culture, is still a reference containing information about Brazilian output of visual arts, art and technology, literature, theater, cinema, dance and music (the latter three still in preparation). There are over 8,000 entries and more than 170,000 records of artists, institutions, groups, exhibitions, shows and works. Itaú Cultural continues to be a benchmark in the field of social networks. On Facebook, the institute keeps the largest page by any Brazilian cultural institution with over 735,000 fans. Additionally, it is also present on Twitter (94,000 followers), You Tube (13,559 followers, more than 4.6 million views and over 4,600 videos) and Instagram (a network where it has been for less time, with over 22,000 followers).</td>
</tr>
<tr>
<td>Olavo Setubal Exhibition Hall</td>
<td>A permanent exhibition installed in the headquarters of Itaú Cultural, the Olavo Setubal Exhibition Hall, celebrated one year of operation in December 2015. Since its opening, about 57,000 visitors have come into contact with two portions of the largest art collection owned by a private company in Latin America: Brasiliaena Itaú and Olavo Setubal. The show brings together 1,364 items – including paintings, drawings, engravings, maps, manuscripts and first editions of literary works, coins, medals and other objects. At the end of 2015, the institute staged an advertising campaign – using street furniture – to inform people that admission to the hall is free.</td>
</tr>
<tr>
<td>Heritage</td>
<td>The Espaço Memória center, located in the Centro Empresarial building, received the shows entitled Filmes e Vídeos de Artistas da Coleção Itaú Cultural and Ocupação Alôsio Mogiabáns – which were organized and showcased at Itaú Cultural’s headquarters in 2014. An educational program called Cominhando com Arte was also developed by Espaço Memória with the purpose of presenting to Itaú Unibanco’s employees the artworks displayed in the Centro Empresarial, and it was attended by 2,000 participants. In all, about 23,500 people visited Espaço Memória in 2015. Itaú Cultural provided support for the cataloging and digitization of the collections of musician Eломar Figueira de Melo, urban planner Lucio Costa, fashion designer Zuzu Angel and visual artist Regina Silveira.</td>
</tr>
</tbody>
</table>

Please refer to www.itaucultural.org.br for further details.
We are constantly making improvements, by investing in social networks, online divulgation exposure and accessibility for disabled people, such as educational tours and activities in Brazilian Sign Language (Libras).

**Target for 2016**

- New highlights of the Itaú collection in Brazil (a facet of *Livro de Artistas*)
- Santos Dummond – 100 anos de 14 Bis exhibition
- 2016 Ocupação Projects: Person; Glauco; Cartola and Abdias do Nascimento
- Selected artists for the 2015-2016 Rumos program
- Covenant renewal to be the Ibirapuera Auditorium manager for over 1 year
- Channel launch, space on the institute's website that will work editorially audiovisual Itaú Cultural productions
- Seminar achievement to celebrate 10 years of the Observatory, at Ibirapuera Auditorium
- Planning of the 30 years of the IC with a lecture and events. The tangibilization will be through the implementation of activities in 2017

**Espaço Itaú de Cinema**

Originally opened under the name Espaço Unibanco in 1995, the movie theaters sponsored by Itaú Unibanco now screen independent films all over Brazil at eight different complexes with a total of 56 screens and 186 places for disabled people in six cities, thus reinforcing access to culture in Brazil. Around 3.5 million people visited these complexes in 2015.

We also have some social programs, which are described below:

- Discount session: Over the course of a week, one movie screened daily at a specific time at a discount price. A total of 8,075 people attended the session in 2015.
- Session for underprivileged children: Over the course of the year, we staged free sessions for underprivileged children. In 2015, we reached around 1,200 children.
- School project: Its aim is to integrate different forms of expression, always seeking to correlate areas of knowledge in its programs. The project is not limited to just screening the movie. It also stages workshops, debates and other complementary activities to address the content and understand the issues that are presented. As such, it seeks to help develop viewers who are critical and more active in society. In 2015, this project reached 28,088 students.

**Other cultural events and sponsorships**

Itaú believes that the support of and access to national culture are fundamental for the development of a critical and independent society. For many years, the institution has been supporting important festivals around the country, with the purpose of promoting the initiatives of the communities where it operates and encouraging the social and cultural development of these locations. In 2015, the bank sponsored the Carnival of Salvador, Joinville Dance Festival, FLIP – Paraty International Literary Festival, Fliporto – Pernambuco Literary Festival and Rock in Rio, the world’s largest music and entertainment festival, among others.

**Sport**

Appreciation of sport is part of our DNA. We believe that sport – together with education and culture – helps to build citizenship in a changing society. Therefore, Itaú sponsors several different projects that aim to make practicing sport a social activity - one that benefits communities and transform people’s worlds.

Our involvement with soccer goes back over 20 years, and our sponsorship of TV broadcasts of various competitions ranges from Brazil’s national championship to FIFA World Cup qualifying rounds and the Brazilian national team’s friendly matches. Since 2008, we have sponsored Brazil’s national team in all its categories.

In 2009, we were the first Brazilian company to sign a sponsorship contract for the FIFA World Cup 2014TM. According to a survey conducted by IBOPE, our brand was the
second most associated with the event by the end of the tournament. Our relationship initiatives managed to impact more than 28,000 customers and our brand reached around 6 million people at the games and Fan Fests.

In addition to soccer, we are heavily involved in tennis and the bank supports projects such as the Tennis Institute and the School and University Tennis Circuit in order to foster sport-related education. Our sports training programs include sponsorship of one of the most traditional international youth tennis championships, which is presented by Itaú in partnership with Gerdau. We also support the Itaú Women’s Tennis Circuit, South America’s only all-female event certified by the Brazilian Tennis Club (CBT) and by the International Tennis Federation, as well as some rounds of the ATP Challenger Men’s Tennis Tournament in Brazil. Our annual Itaú Masters Tour has now reached its 13th year as Latin America’s only senior tennis circuit with rounds held in several cities, which constantly draws top players. Our brand was also seen at high-performance tournaments such as the Rio Open, which is South America’s only tournament to combine ATP World Tour 500 and WTA International rounds, and the Miami Open, one of the most traditional and reputable ATP World Tour Masters 1,000 and WTA Premier events. In 2015, Itaú was the main sponsor of this event, thus further strengthening our international presence.

Finally, we support the Sports Convoy program, a traveling program that assists cities referred to us by UNICEF. Since 2009, it has provided training for almost 30,000 coaches in 22 Brazilian states, reaching over 290,000 children directly and 2.64 million indirectly. For yet another year, we sponsored the University Sports League, Brazil’s largest project of its kind.

Urban mobility
Urban mobility is one of Itaú’s causes and an important topic of our interaction with certain governments. Our focus is to promote the bicycle as an alternative transportation to improve mobility, reduce traffic and emissions of greenhouse gases. We have 3 pillars of action on the theme: bike sharing, urban infrastructure and awareness raising for a more peaceful traffic.

On bike sharing, we sponsor the system on 7 state capitals, as specified below:

</tbody>
</table>

Since the beginning of the project, we have more than 2,000,000 of registered users, that have access to our various bicycle rental programs and more than 11.2 million rentals were made in the period.

On urban infrastructure, we expanded our actions by sponsoring bike parking. Besides Largo da Batata (SP), which we started sponsoring on 2014, we launched 3 new bike parking spaces: one of them in São Paulo, on Praça dos Arcos, and the other two in Salvador, more specifically on Farol da Barra and Ribeira. We also donated automatic cyclists counters for different cities, to contribute to city planning on cycling, and bike racks. Moreover, we launched a plan of sustainable mobility in Fernando de Noronha (PE), which includes donation of bikes to permanent residents, the establishment of partnerships with the hotels to offer bikes for tourists and several awareness raising initiatives on the island.

Finally, on awareness raising, we have partnerships with several organizations that work to promote mobility by bikes, such as Transporte Ativo, Ciclocidade, BH em Ciclo, AMECICLO, Bike é Legal, Bike Anjo, Vá de Bike, among others. Apoiamos também a participação de cicloativistas brasileiros no Fórum Mundial da Bicicleta e no Velocità. We also sponsored the inclusion of bikes on the driver’s license obtainment process of Pernambuco, in partnership with the Traffic State Department. In addition, we launched “Escolinha Bike”, an educational initiative focused on children from 2 to 7 years, where the kids ride bikes and learn how behave on traffic as cyclists.

Itaú Viver Mais
Itaú Viver Mais (Itaú Live Longer) is a non-profit association that targets the senior population (older than 55). Our goal is to help people to live better and healthier lives in better company by providing cultural, physical and social activities in partnership with shopping malls, supermarkets, clubs and movie theaters. In 2015, Itaú Viver Mais (Itaú Live Longer), impacted approximately 12,000 people in 42 locations, in six states and the Federal District.

The association runs the following projects:
• Physical and cultural activities: yoga, dance and tai chi chuan classes, physical activities, musical instruments and handicraft workshops in 35 locations in 4 states (approximately 5,000 people reached);
• Itaú Viver Mais Cinema (Itaú Live Longer Cinema): free commented movie sessions and in partnership with Espaço Itaú de Cinema in 7 locations in 5 states and the Federal District (6,393 people reached);
• Reading mediation: In partnership with the Fundação Itaú Social (Itaú Social Foundation), we trained our public to read voluntarily to children in 5 locations in 3 states. In 2015, we increased the number of those trained from 41 to about 100;
• Caminhando com Arte (Walking with Art): in partnership with Instituto Itaú Cultural (Itaú Cultural Institute) we promote guided visits.
to Itaú’s art collection at the Itaú Unibanco Business Center in São Paulo. In 2015, we had almost 300 visitors; 
- Itaú Viver Mais Tenis (Itaú Live Longer Tennis): Tennis workshops adapted to elderly people in 3 locations. We had 113 attendees; and 
- Diálogos Itaú Viver Mais (Itaú Live Longer Dialogues): an event dedicated to the exchange of knowledge about the elderly population. In 2015, we addressed the themes of technology and entrepreneurship (more than 100 people reached).

For 2016, the main challenge is to provide scale to the initiative in order to increase the impact in the population older than 55. For this purpose we will focus on events that instigate reflection on getting old and we will participate actively in the discussions on public policies for elderly.

**Environment**

**GRI G4-DMA Economic Performance**

Banks have a special relationship with the economy because they associate with all production sectors. This gives us enormous potential to affect positive changes in society and promote a low-carbon economy.

We seek to incorporate climate change-related variables into our operations and business affairs (credit, insurance and investment) by managing risks using our E&S risk analysis and developing solutions that adequately respond to our GHG emissions reduction targets and adapt our operations to climate change.

There are various trends of discussion in the scientific community as to the potential climate-change scenarios we are exposed to. Therefore, we understand the importance of taking part in national and international movements related to climate change, in addition to sticking to the voluntary commitments to which we are signatory and/or partners, such as CEBDS, FEBRABAN, FGV and being co-chair at UNEP FI. Our presence in a wide range of forums concerning the issue, the studies we conduct and our involvement in specific working groups also shows how we are aware of the topic.

Faced with this scenario, it is important for us to identify which risks and “new risks” we will be exposed to, in order to adapt ourselves and to increase our resilience, thus guaranteeing the perpetuity of our business and the wellbeing of society.

**Water Crisis Study**

In 2014 and 2015, Brazil’s southeast region faced its worst water crisis in the last 80 years. The main cause of the crisis was the reduced volume of rainfall over the last 4 years, aggravated by structural problems related to increased water distribution losses, low capacity and dependence on water storage.

Studies supervised by the bank’s macroeconomic department mapped the sectors and regions most affected by the water crisis, as well as its impact on Brazilian GDP.

Another important study concerning the water crisis, was developed by Itaú Asset Management, which mapped the extent to which water prices affected the specifications of companies.

These studies and analyses are fundamental for integrating new types of risk (such as hybrid risk or even climate-related risk) into the bank’s business and minimizing the potential impacts.

See below our environmental strategy:

**Climate change**

We are convinced of Human contribution to the intensification of climate change via increased greenhouse gases (GHG), which can cause environmental imbalances of unprecedented magnitude and recurrence.

Upon perceiving the importance and urgency of climate change, Itaú since 2008 has been increasingly intensifying its efforts in relation to the issue; and we foresee the generation of value for our business. We believe that our strategic, proactive commitment is leading us to the forefront, making it possible to identify new opportunities, avoid exposure to greater risks and assist our stockholder, customers and communities to develop agendas focusing on the topic. As a financial institution, we have a responsibility to mitigate such risks – as do all sectors of society – and to act as facilitators in supporting the transition to a low-carbon economy.

We are constantly preparing ourselves to deal with the economic and financial impacts of climate change, the emergence of new regulations and even changes in our relationship with stakeholders.

Climate change is also addressed in our Sustainability and E&S Responsibility Policy, which provides guidelines for the entire organization, and in our recently launched article on Environmental and Social Risk, which describes our commitments and targets for the years ahead. Our Corporate Policy and Stance are available on our [website](#).
Climate Change Commitment and Targets

In 2015, we revised our Climate Change Commitment, making it more comprehensive and progressive, so as to reflect the bank’s endeavors with respect to the topic and share our vision for the future. Our commitment objectively and transparently reflects the bank’s vision and responsibility, such as our natural resource management strategy, which involves continuous monitoring, the establishment of voluntary reductions targets, increased efficiency and the search for innovative solutions. We also discuss the governance of the topic within the bank and our practices in relation to our internal operations and our business (credit, insurance and investments).

Furthermore, during the second half of 2015, we released our reduction targets, which take into consideration water and power consumption, waste and transportation, since we are convinced there is a direct correlation between improper use of natural resource and climate change. For example, we have committed to reduce our Scope 2 emissions by 34% per R$MM of operating income between 2012 and 2020.

For more information about our Climate Change Commitment, please see our sustainability website.

To view our targets, please refer to the Eco-Efficiency chapter of this publication.

Emissions Offsetting

As part of our commitment to Climate Change mitigation and reflecting our pursuit of sustainable performance and the evolution of our strategic carbon management, we initiated in 2015 Itaú Unibanco’s Greenhouse Gas (GHG) Emissions Offsetting Program (“Itaú Unibanco’s Emissions Offsetting Program”).

This program consolidated Itaú Unibanco’s carbon management cycle, which, as of now, consists of 5 phases: quantification of our GHG emissions, independent third-party verification of our GHG inventory, publication of our results, implementation of internal emissions reduction projects and carbon offsetting through certified carbon credits with co-benefits standards.

We developed and disclosed a public notice, where carbon credits from projects with pre-determined characteristics could be registered. Twelve (12) projects were selected for analysis and, in the end, we acquired our carbon offset from 3 different projects:

1. Ceramic Fuel Switch in Maracá
2. Ceramic Fuel Switch in Rio Negro
3. Ceramic Fuel Switch in Assunção
4. SOCIALCARBON standard

The projects consist mainly of switching fuel from native wood to renewable biomass for brick production used in local construction. The three projects have significant social co-benefits, attested by the SOCIALCARBON standard, and they focus on promoting biodiversity conservation, education, culture and sport in disadvantaged regions. Considering the size of our operations in Brazil, we understand that our main impacts are in the country, which led us to focus on projects in different regions in Brazil: Manaus, Minas Gerais and Ceará.

We are committed to offset all our direct emissions (scope 1) from 2012 to 2015, as well as all the indirect emissions from energy consumption (scope 2) from our new data center (CTMM) in Mogi Mirim, São Paulo, totaling 47,332.33 tCO2e.

Ecoefficiency

We understand that, even though we are a service business, our activities have an impact on the environment through the operation of our administrative units, branch networks and technology centers. Our main sources of electricity and water consumption, for example, come from cooling systems and the use of electronic equipment. We continuously strive to improve our energy efficiency through best market practices, ambitious goals and an increasingly robust management of natural resource consumption.

Reinforcing our long-term commitment to the environment, in 2015 Itaú established long-term ecoefficiency targets, in addition to the ones we were already committed. Additional details about each target can be found in the chapters of related indicators.
The management of natural resources is a challenge in itself, due to the penetration and variety of Itaú’s more than 4,000 branches, and the highly complex systems for energy distribution in over 60 administrative buildings. Our management is segregated by administrative units, branches and data centers, and all areas work with the sustainability team.

All data concerning the water consumption, energy, waste generation, effluent treatment, CO₂ emissions, etc. are collected on a monthly basis, following a common methodology for the three areas above and consolidated by the sustainability team. The reduction targets and improvement actions to achieve these goals are managed jointly, seeking the highest efficiency in the use of resources and a smaller environmental impact.

The list of indicators collected encompasses water, energy and waste sent to landfills or recycled.

It is important to note that some executives and managers of areas directly related to the topic have ecoefficiency performance goals such as water and energy consumption reduction and clean energy usage.

Environmental investment and expenditures

<table>

1. Spending totals reflected new BMS system for more efficient use of energy, diesel oil and GHG treatment, which was completed in 2013.
2. Carbon credit purchase and assessment to offset strategy.
3. The action plans, developed based on the maintenance audit for the ISO 14001 environmental management system at the Tatuapé administrative center, were considered and incorporated as building management as of 2015.
4. Expenses were significantly higher in 2013 and 2014 due to the LEED certification for the new data center buildings. In 2015, the value presented includes energy and water efficiency projects and LEED certification for the Faria Lima 3500 building.
5. Includes ISO 14001 diagnosis for the buildings Centro Empresarial, CTO and CA Pinheiros, communication campaign, target, scope, green walkway and expenses with the GHG emissions inventory and its assurance.
6. Considering 2012 Grid emission factor
7. Does not include IBBA
In 2014, we invested R$823,924.12 in remediation for contaminated areas. We also paid R$1 million to be used by the University of São Paulo Support Foundation (local acronym FUSP) and the São Paulo's State Environmental Protection Agency (local acronym CETESB) in environmental compensation measures, used to manage contaminated areas and restore vegetation at a Permanente Preservation Area (local acronym APP) near to our Raposo Administrative Center. This payment was due to a Conduct Adjustment Agreement with the Public Prosecutor's Office, which we signed in 2013.

In 2015, we invested R$122,000.00 in restoring vegetation, concluding the Conduct Adjustment Agreement. We also invested R$4.5 million in environmental protection of which R$1.7 million was spent on waste management (treatment and disposal), R$838,946.00 was invested on remediation of contaminated areas and R$937,844.40 on environmental prevention and management.

**CTMM Technological Center**

How the construction of a new data center gives our impacts a new dimension

The Mogi Mirim Technological Center (CTMM) currently has three commercial buildings (DC1, DC2 and NOC), which are interconnected in a unique architectural design, and it encompasses the use of more efficient equipment that consumes less energy and takes up less space, as well as being equipped with leading-edge technology. The CTMM will increase our data processing capacity by 25 times and support the expansion of bank transactions for the next 10 years.

Reflecting the bank’s growth over 30 years, the Mogi Mirim Technological Center is one of the world’s largest data centers. The construction of this center was so significant that it caused a stir and heated up the Brazilian and global IT market.

The CTMM project was divided into three phases, to be implemented between 2012 and 2050. The first phase was completed in late 2014 and includes the construction of data centers 1 and 2, covering 59,815 m² and following the active-active processing model, allowing synchronous replication of data and raising the level of availability and resilience of information.

The entire project was focused on quality and sustainability and achieved four certifications that prove this commitment:

- **TIER III Gold**: Continuity and availability certification, granted to sites DC1 and DC2;
- **TIER III Gold**: Operation certification, granted to sites DC1 and DC2;
- **LEED Gold** for DC1 and DC2 buildings and LEED Silver for NOC building: Green IT certification, the main sustainable construction seal used in Brazil; and
- **TIA 942**: For a dual approach to access and routes of the communication/telecom links.

Furthermore, with the focus on increasing its positive externalities, the bank has been involved, from the construction of the CTMM to the present time, in a number of projects and initiatives in the region of Mogi Mirim, such as:

- In 2013, contribution of R$8 million to the Senior Citizen Council was made, benefiting 10 institutions dedicated to serving senior citizens in Mogi Mirim;
- Transfer of knowledge from the urban mobility project Bike Itaú para Mogi Mirim, which allowed the Transportation Department to expand the network of bike lanes and to disseminate the explanatory material provided by Itaú Unibanco relating to the safe use of bicycles. The Technological Center itself also has bicycles and bike racks for employee transportation between the buildings;
- Purchase of construction materials for local suppliers, reducing CO₂ emissions by trucks and helping boost the local economy; and
- **GRI G4-EN30**
- Preservation of water sources within the project, by maintaining the slope at the point where the DC6 building will be built, ensuring the same water flow in the ground before construction begins.

Despite operating according to the highest energy efficiency standards, the expansion of our business results in a natural absolute increase in the Data Center’s consumption of resources such as water and energy. In this sense, being aware of our environmental impact and in order to reduce and mitigate them as efficiently as possible, we will offset all the direct (Scope 1) and indirect (Scope 2) emissions of the CTMM’s operations through the purchase of carbon credits from certified carbon projects that are in line with the bank’s values and have proven co-benefits.

With the new Technological Center, we will be able to provide better services to our customers while providing more effective and responsive services and actually being a digital bank, with the least possible E&S impact.

**Water**

**Indicator management and key initiatives for reducing water consumption in 2015**

The year 2015 was critical from the standpoint of water resources throughout Brazil. The Southeast was the main region affected by water scarcity and it concentrates much of our demand, so the work on this issue is extremely relevant for us. In summary, our water resources come mostly from the public water supply and to a lesser extent from artesian wells. Therefore, the water crisis could pose a significant risk to continuity for our business, particularly with regard to cooling...
administrative buildings, data centers and branches, both for operating our equipment and for maintaining thermal comfort of our employees and customers.

In 2014, a response plan for emergency water and energy rationing was prepared to ensure the supply and business continuity of the bank. Following the implementation of the plan in 2015, we continued actions to monitor and improve the bank’s resilience in a possible event of rationing. These actions include:

- Periodic monitoring of water and electricity reservoir levels and rainfall rates;
- Development of a risk aversion curve for water rationing;
- Prioritization plan for operation of strategic branches in a scenario of water rationing/shortages;
- Periodic awareness campaign with employees on the importance of the responsible use of water and energy; and
- Actions to reduce water and electricity consumption in all departments of the institution.

As previously mentioned, water management at Itaú Unibanco is divided amongst administrative centers, branch networks and technological centers. There are specialized teams to manage all sites. These teams are qualified to design, implement and monitor practices and initiatives aimed at infrastructure, in addition to addressing the operation and maintenance of the buildings. Our data centers also have an automation system that allows immediate monitoring of consumption and performance indicators.

As part of the management, every year actions are implemented to reduce water consumption, always aiming to optimize the use of this resource. In 2015, the following initiatives were implemented or continued:

<table>
<thead>
<tr>
<th>Initiative</th>
<th>Description</th>
<th>Consumption Reduction (m³)</th>

<td>Incentive for reducing water consumption</td>
<td>Actions for internal communication, through outreach of initiatives and tips, aiming to reduce water consumption.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Optimization of the CTMM Cooling System</td>
<td>This initiative aims to integrate the availability, safety, reliability and operational sustainability of the cooling system at the Mogi Mirim Technological Center (CTMM). The changes made provide hydraulic system efficiency through better performance of the cooling equipment, ensuring a longer service life for the system.</td>
<td>5,400.00</td>
<td>60,000.00</td>
</tr>
</tbody>
</table>

**NM** – Not measured

1. We understand that “curtain water” (spillway) should be considered reused water and not water consumption, and it is therefore an initiative. This water springs spontaneously from the water table and it would be wasted if not used by us.
## Consumption and analysis

Reflecting our commitment to the issue of water scarcity in Brazil, in 2015 we consumed 63% more reused water than in 2014, equivalent to a total consumption of 138,546.8 m³. **GRI G4-EN10**

Regarding water consumption, in 2015 Itaú’s facilities have used 1,472,460.63 m³ in our Administrative Centers, Technological Centers and Branches, as detailed below:

**GRI G4-EN10**

**NE** - Not established

1. Administrative buildings in Brazil were monitored; 2. Brazilian branches were monitored; 3. Data centers were monitored; 4. Amount relating to FL 3500 buildings; and 5. Targets do not include IBBA building.
Itaú’s water consumption target for 2016 was established during 2015, showing reductions when compared to the 2015 target. The result of our effort to lower water usage led to a reduction beyond the established target for 2016. Nonetheless, Itaú’s main goal is to reduce by 28.2% its overall water consumption per R$MM of income between 2012 and 2020, as detailed in the item below, “Targets and vision for the future”.

Itaú’s target¹ for 2015, of 1,851,662.00 m³, was achieved and surpassed. More details on each area performance can be found below:

1. Administrative Centers:
The target set for this year was to not exceed total consumption of 354,336.00 m³, representing a 3% reduction compared to 2014. The target already considered the inclusion of the ITM building, mainly supplied by artesian well, whose specific target was set at 23,500.00 m³.

Due to our effective water management, we were able not only to reach our target established for 2015, but also to lower our total water consumption in administrative buildings by 18%, consuming 292,103.19 m³. Our strong performance led us to stay below the target set for 2016.

The quantity of reused water in 2015 was 92,655.3 m³, including rainwater collection and irrigation system, water from the water curtain (spillway) and water used in the fountains.

It is important to note that, by the end of 2015, our Faria Lima 3500 administrative building had a higher concentration of employees, leading to a higher consumption when compared to the same period of 2014.

2. Branch Network: There was 834,364.44 m³ of water consumption in the branch network, representing an average reduction of approximately 20% from 2014. This reduction in consumption was obtained through campaigns on rational use and leakage prevention activities.

In the branch network, the actions for the year 2015 brought about a major reduction in water consumption, which led to the revision of the consumption target for 2016, to 834,192.62 m³.

3. Technological Centers: There was 368,312.50 m³ of water consumption in the technological centers, 12.5% (45,891.50 m³) from the Sewage Treatment System (STS). Considering the size and structure of the new Mogi Mirim Technological Center (CTMM) in São Paulo, it has the latest water efficiency standards for data centers, with more efficient equipment and less power consumption, leading to less water usage. In addition to giving continuity to the activities carried out in 2015, we will implement blank panels in IT equipment racks in the CTMM. Blank panels will be used to seal empty vertical spaces in the racks, providing better distribution of the ventilation in the IT equipment environment. This initiative provides an increase in the air supply temperature in the precision fan coils, thereby reducing the amount of power used by the cooling machines, reducing water consumption. This initiative has already been implemented in the São Paulo Technological Center (CTSP). GRI G4-ENT10

In addition, with the construction of the new Mogi Mirim data center, we were required to optimize our infrastructure, causing the start of the shutdown of the CAS and CAR data centers. Consequently, water consumption in these buildings should be reduced to zero at the time of their shutdown.

**Targets and vision for the future**

Reinforcing our governance related to water management and demonstrating our long-term commitment to the topic, in addition to the measures above, we have committed to reduce by 28% our water consumption per R$MM of banking product in the 2012-2020 period. This is equivalent to a 5.85 m³/R$MM reduction, which illustrates our commitment to using this resource efficiently.

The table below shows the evolution of water consumption over the past few years and its relationship with the targets stipulated:

<table>
<thead>
<tr>
<th>Year</th>
<th>Water Consumption (m³)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2012</td>
<td>22.74</td>
</tr>
<tr>
<td>2013</td>
<td>21.88</td>
</tr>
<tr>
<td>2014</td>
<td>18.78</td>
</tr>
<tr>
<td>2015</td>
<td>16.89</td>
</tr>
<tr>
<td>2020</td>
<td>16.32</td>
</tr>
</tbody>
</table>

Our water performance in 2015 allowed us to reach and surpass our established target by 17.44%, with an indicator of 13.94 m³/R$MM⁸.

---

⁸ Considering our 2015 consumption of 1,448,888.63 m³ (excluding IBBA) and the banking product published in our MD&A, of 103,910 R$MM.

**Energy** GRI G4-DMA Energy

**Indicator management and key initiatives for energy consumption reduction in 2015**

As part of the services sector, the main sources of electricity consumption at Itaú Unibanco are the cooling and electronic equipment. Aware that our operation depends largely on the availability of electricity, we continually seek to improve our energy efficiency through best market practices and reduction targets.

In the pursuit of an increasingly improved management indicator, we have divided the controls amongst the administrative buildings, technological centers and branch network, which participate in a working group that addresses energy, amongst other items, led by the sustainability area.

Currently, 81% of all electricity consumption in administrative buildings comes from the free market, more specifically from renewable sources such as solar, wind and biomass power and SHP (Small Hydro Power Plant). Our goal is to achieve 96% participation by 2020.

However, the capillarity of the branch network presents a challenge to the standardization of electricity use. For this reason, the management of nearly 4,000 of the bank’s branches relies on the aid of a algorithm specifically designed to perform a continual analysis of each branch’s consumption in order to identify abnormalities and consumption peaks.

As in other areas within the bank’s IT (Information Technology) department, there is a department responsible for the engineering and physical infrastructure (civil, electrical, mechanical and hydraulic) of Itaú Unibanco’s data center, which currently has four buildings: the Mogi Mirim Technological Center (CTMM), the São Paulo Technological Center (CTSP), the Campinas Alternate Center (CAS) and the Raposo Administrative Center (CAR).

This structure allows us to perform energy management with the expertise of specific, qualified professionals, taking advantage of an automation system that enables the immediate monitoring of the data center infrastructure.

Some of the main initiatives in 2015 to reduce energy consumption include: GRI G4-EN6

<table>
<thead>
<tr>
<th>Initiative</th>
<th>Description</th>
<th>Consumption Reduction (MWh)</th>
<th>Results Savings (R$/year)</th>

1. - Not established
2. - Not including IBBA and Latam.
3. - Data from 2015, reflects the real consumption from January to December.
4. - Data collected from our 2015 GHG Emissions Inventory.

---

Even with the start-up of the CTMM, our new Technological Center in Mogi Mirim, our total energy consumption increased only 0.14% in 2015 when compared to 2014. It is also important to mention that the established energy target for 2015 was achieved.

In 2016 and 2017, our absolute energy consumption is expected to increase due to the growth of our operations, guaranteed by the CTMM. The site will operate in parallel with the existing ones until this transition is completed in 2017, when two technological centers will be shut down, leading to a reduction in energy consumption compared to the year prior to the shutdown.

It is important to note that our targets exclude IBBA and Latam. This means that our previous and future targets should be compared to the consumption of 668,404.35 MWh.

Our targets for 2016 were established during 2015, showing reductions when compared to the 2015 target (except for the data centers as mentioned above). Nonetheless Itaú’s main goal is to reduce by 34.1% its overall energy consumption per R$MM of income between 2012 and 2020, as detailed in the item below, “Targets and prospects for the coming years”.

---

**Sustainability**
Targets and vision for the future

In the constant pursuit of sustainable performance and taking another step towards sustainability governance, more specifically with regard to energy, Itaú Unibanco formally established three reduction targets in 2015:

- Reduce by 34% our energy consumption per R$MM of banking product, between the years 2012 and 2020, as shown below;
- Reach, by 2020, a PUE (Power Usage Effectiveness) of 1.60, 19% lower than 2015; and
- Acquire, by 2020, 96% of energy for the administrative buildings from renewable sources – 55% more than in 2012.

Given the specificity of the activities performed in the technological centers, administrative buildings and branches, each area will continue with specific targets and monitoring, which will be added to the institutional commitments made by the bank as from 2015.

Our energy performance in 2015 allowed us to reach and surpass our established target by 2.43%, with an indicator of 6.43 MWh/R$MM9.

Emissions GRI G4-EN19 | G4-EN30 | G4-DMA Emissions

Indicator management and key initiatives for emissions reduction in 2015

We share the view that there is no management without measurement. Therefore, for over seven years we have quantified, provided third-party assurance and annually disclosed our GHG emissions, working hard to reduce them. Our inventory is prepared in accordance with the methodology of the Brazilian GHG Protocol Program. Furthermore, as from 2015, we began to offset direct emissions and part of our indirect emissions coming from our newly launched CTMM Data Center through the purchase of certified carbon credits with proven co-benefits. With the purchased carbon credits, we offset our 2012, 2013, 2014 and 2015 scope 1 emissions as well as the CTMM’s scope 2 emissions, totaling 47,332.33 tCO2e.

Also, Itaú Unibanco is a signatory to the Carbon Disclosure Project (CDP) besides being part of the ISE, ICO2 and DJSI portfolios, in which we annually report our emissions.

In line with the commitment to mitigate the impact of our operations, we purchase over 81% of the electricity used in our administrative buildings from clean energy sources, such as Small Hydro Power Plants (SHP), biomass plants or windmills. During testing or in the event of failures in the power distribution system, we are required to turn on our generating system in order to ensure 100% availability of our facilities and business continuity.

In this sense, we have implemented measures that reduce, directly or indirectly, emissions of greenhouse gases (GHG) and other pollutants associated with our business.

We have installed a gas scrubber and low-emission devices in the administrative buildings with higher consumption levels. These devices are generally used for gas neutralization (vapor retention) and particulate matter retention. In addition, we have invested in low-emission engine-generator assemblies. Today, 70% of our installed capacity in the administrative buildings comprises low-emission power, which is up to 53% cleaner than the old machines.

We have also conducted a comparative study of emissions from cooling gases used in the administrative buildings, with the aim of mapping the most efficient alternatives, with less environmental impact and lower greenhouse gas emissions. Therefore, our premise is that each new project (e.g. CTMM) is equipped with more efficient devices in terms of both power generation and thermal comfort. These are considered low-emission devices.

9. Considering our 2015 consumption of 668,404.3 MWh (excluding IBBA and Latam) and the banking product published in our MD&A, of 103,910 R$MM.
Some of our major initiatives that have led to the reduction of GHG emissions by the bank can be seen below:

<td>Shutdown of CAS and CAR data centers</td>
<td>With the construction of the new Mogi Mirim Center, we were required to optimize our infrastructure, triggering the start of this project, whose aim is to shut down the CAS and CAR hubs. It is an ongoing project that will reduce emissions in these buildings, with a trend toward zero.</td>
<td>NM</td>
<td>NM</td>
</tr>
</tbody>
</table>

NM – Not Measured
¹ Estimated based on the amounts from 2014.

Consumption and analysis
In 2015, our Scope 1 emissions showed an increase of 23% compared to 2014, mainly due to the implementation of the new Technology Center in Mogi Mirim. Despite the overall increase in our Scope 1 emissions, mainly caused by emergency generators, it is important to emphasize a reduction in our total emissions. In 2015, we decreased the use of our own aircraft by 27% compared to 2014. In 2015, we reported an amount of 9,872 tons of CO₂e emitted (Scope 1).

Regarding Scope 2 emissions, we reported a decrease of 3.6% compared to 2014. This reduction is mainly due to the decrease in the national grid’s emissions factor. In 2015, the total amount of Scope 2 emissions was 96,154 tons of CO₂e.

Our Scope 3 emissions showed a significant reduction of 15% compared to 2014. The main reason for this reduction was the decrease in the use of fuel in Itaú’s service vehicles, which resulted from the operational changes for making transport more efficient. Our emissions of scope 3 in 2015 totaled 121,521 tons of CO₂e.
Targets and vision for the future

We look at our emission sources with a view to a lower, more efficient consumption of natural resources, resulting in reduced greenhouse gas emissions generation.

In 2015, we assumed a long-term goal of reducing by 34% our energy consumption per R$MM of banking product, leading to a 34% reduction of scope 2 emissions between 2012 and 2020. This bold reduction will be the result of our ongoing investments in activities that improve our energy efficiency, as well as continual awareness raising and mindset changing activities to encourage our employees.

We anticipate the construction and start-up of a major administrative building starting in 2016. Therefore, we expect an increase in B5 diesel and natural gas consumption in the next three years. Nevertheless, we intend to use the natural gas employed in electricity cogeneration, which will meet most of the site's demand, thereby reducing our dependence on the national grid. The cogeneration system also has a regeneration device, which uses the heat produced in the generation of cold water to operate the air conditioning system. As regards scope 1 emissions, we are committed to maintaining our LPG consumption stable between the years 2015 and 2017 (20,809.00 kg), even with the expansion of the bank's premises, as well as reducing, from 1,928.5 kg to 1,848.5 kg, the cooling gas used in the administrative buildings.

1. Grid emission factor for 2012 used to calculate the targets.
2. R22, R134a, R141b, 407C and M099.
Transportation GRI G4-EN30 | G4-DMA Transport

Indicator management and key initiatives for mileage reduction in 2015

The control of data relating to air and land transportation includes information about the executive and civil aviation of employees, as well as taxis, vans and executive vehicles.

The information is provided by the services providers and is reported, consolidated and stored by a management company hired by Itaú, thus ensuring an adequate control of the indicator. Furthermore, every month we update a book on CO₂ emissions. This tool enables the management of the indicator in integration with the emissions inventory database. By using the database, we are able to perform a quarterly follow-up of the compliance with the stipulated target, which allows better targeting of actions to reduce and control consumption peaks.

We continually invest in projects that make our transportation more intelligent and efficient, thus reducing the mileage in various modes of land and air transportation. The table below summarizes these initiatives throughout the year 2015, as well as those of previous years, which continued to generate results for the bank.

| Total                              | 195,066,000 | 173,886,000 | 200,059,000 | 192,588,882.89 |

We have improved our data collection, especially in regards to IBBA information. As a result of our constant efforts to reduce business travel, Itaú’s data analysis for corporate air transport and land transport showed a decline of 3.73% when compared to 2014.

Our target for 2015¹,² was to not exceed 2,000 km/R$MM. It was fully achieved, and we reached an indicator of 1,351 km/R$MM.

¹ Includes Itaú, IBBA and Latam (Argentina, Chile and Paraguay) data.
² Includes fuel and tax refunds, taxi vouchers, vans and buses.

12. Not including Latam and IBBA travel

NM – Not Measured

¹ The calculation was based on the number of trips made in 2014, with an increase of 25% in the use of virtual rooms in 2015, according to the assumptions of the area.

Consumption and analysis

Click on + for more information.
Targets and vision for the future
As a result of the bank’s maturing process over the years regarding the issue, long-term reduction targets have been established. We thus undertook to reduce the mileage traveled per R$MM of banking product by 32.1%, between 2012 and 2020, demonstrating continual improvement in Itaú’s transportation strategy as illustrated below.

The vision of the bank, of becoming increasingly a digital bank strongly contributes to the reduction of paper generation and, in this sense, most of our internal projects already have streamlining and Electronization of the processes as a guideline.

It is worth mentioning that the use of paper in the communication with our customers represents most of the volume generated by the bank. Therefore, campaigns such as the digital invoice and sending bank statements in PDF have helped decrease this amount. It is also noteworthy that 100% of the paper printed in the bank is FSC certified.

### Initiative Description

</table>

Note: The established target includes corporate travel arrangements (airline tickets) and taxis.

Paper GRI G4-EN1 | G4-DMA Materials

Indicator management and key initiatives to reduce paper consumption in 2015
We understand that paper usage is a relevant subject for the bank and we work to minimize this impact in several ways. Throughout 2015 we kept on improving our monitoring process of paper consumption, reporting a larger quantity of consuming sources. In addition, until 2014 our reporting was based on paper purchase data and not on paper usage. Last year we collected retroactive information in order to standardize reporting on consumption and not on the purchase of this material. Several internal initiatives such as, for example, an outsourcing in the whole branch network that allowed absolute control of printing, increased the level of management of this indicator, making it more accurate and better reflecting the reality of the bank.
Consumption and analysis

Due to the improvement in data collection we noticed a natural increase in the volume of paper used between 2014 and 2015. Our pursuit to reduce the use of paper brought relevant results, such as those achieved by GiM (correspondence to customers), which decreased consumption by 55%. Efficiency initiatives aimed at sending mail through electronic means, for example, significantly reduced the printing and mailing volume.

In addition, other projects contributed to this reduction, such as:

• Access to bank statements through the Internet for all segments of the bank (30horas), impacting the volume of paper, coils and envelopes;
• Migration from printing on A4 paper (Xerox) to coils (Ricoh), which influence the reduction in the volume of A4 paper; and
• Several projects to discourage the sending of mail.

Targets and vision for the future
The projects deriving from Kaizens carried out during 2015 will keep on delivering results in the coming years, as they involve permanent reviews and processes. In addition, key efforts are being made to increase our employees’ awareness regarding not using paper.

Simplification and electronization of processes where paper is used, such as communication with customers, account opening, internal printing, mailing of bank statements, etc., are totally aligned with the positioning of Itaú, which is being a digital bank.

Waste GRI G4-DMA Effluents and Waste
Indicator management and key initiatives to reduce waste generation and improve waste disposal in 2015
We are making great efforts with regard to the management of waste generated by our operations, by discouraging the generation of waste and encouraging recycling and the disposal of waste in an environmentally responsible way. Furthermore, we aim to reduce the waste sent to landfills, detailed later on, which applies to our administrative installations.

In addition to encouraging regular awareness campaigns for our employees, we have adopted selective waste collection in our
major centers and organized a collection for sustainable disposal of all electrical and electronic waste generated at Itaú Unibanco, i.e., in branches, administrative units and stock.

We face the challenge of standardizing the waste management practices in all our branches, considering their quantity and penetration in the country. Therefore, we conducted periodic warnings of the focal points in the branches, and at the beginning of 2015 we initiated a process to monitor the volume of waste generated by each branch, in São Paulo. The survey covered 40 key branches in the city.

<tr>
<td><strong>Deployment of Reverse Logistics for light bulbs in the main administrative buildings</strong></td>
<td>In line with the new National Policy of Solid Waste, we signed a partnership with the manufacturer to practice reverse logistics of the light bulbs used in the main administrative buildings of the Bank. Previously, the light bulbs were sent for disposal by one of the bank’s service providers.</td>
<td>Reverse logistics of 49,729 bulbs</td>
<td>59,674.8</td>
</tr>
<tr>
<td><strong>Sustainable Disposal of WEEE (Waste Electrical and Electronic Equipment)</strong></td>
<td>We have sought to dispose of our technological waste (obsolete computing equipment) in an environmentally responsible way. When it reaches the end of its life cycle, the equipment undergoes a reverse manufacturing process and is reinserted into the productive chain as raw material.</td>
<td>Reverse manufacturing of 525.67t of WEEE</td>
<td>NM</td>
</tr>
<tr>
<td><strong>Reuse of Equipment in the data center</strong></td>
<td>Equipment is purchased to meet IT applications. When the application is disabled, a technical analysis of the machine is carried out. With more effective performance being the desired result, the machine is reused for new applications, avoiding the purchase of new equipment.</td>
<td>Reuse of Equipment avoided 2 tons of WEEE disposal</td>
<td>1.7 MM</td>
</tr>
<tr>
<td><strong>Internal Awareness</strong></td>
<td>An awareness campaign for the correct allocation of waste generated by the bank’s activities.</td>
<td>NM</td>
<td>NM</td>
</tr>
<tr>
<td><strong>Sustainable Disposal of iTokens</strong></td>
<td>In the second half of 2015 we carried out an important campaign to deactivate iTokens, making our clients’ operations faster, secure and digital. In addition to various collection points available in administrative buildings, all branches were advised to accept any disabled Tokens. All equipment collected was sent for sustainable disposal.</td>
<td>NM</td>
<td>NM</td>
</tr>
<tr>
<td><strong>Supply Chain Initiatives</strong></td>
<td>During 2015, several suppliers’ contracts were reviewed or established, and sustainability clauses were included. Several contract reviews led to waste reduction in the supplier processes. We can mention the partnership with: • The drugstore which includes sustainable disposal of expired medicine • The beauty salon where nail polish containers are collected • Food suppliers to collect and recycle kitchen oil and reuse organic waste etc.</td>
<td>NM</td>
<td>NM</td>
</tr>
</tbody>
</table>

In 2015, we maintained our focus on reducing our share of waste sent to landfills, therefore reducing our impact on the environment.

We are constantly working with our value chain on initiatives and awareness programs, aiming to reduce the generation and to ensure the correct allocation of the waste deriving from the bank’s activities. In 2015, our management announced these main results:

- Reduction in the generation of waste intended for landfills, in comparison to 2014;
- Increase in the recycling of the waste generated, in comparison to 2014;
- Expansion of number of buildings with composting of waste from restaurants in the administrative buildings: We have expanded the composting process to one more important administrative center, and with this action, we stopped 35 tons being sent to the sanitary landfill. We have a composting system in four administrative buildings, which together represents 62% of Itaú’s staff at the head office; and
- An internal awareness campaign, whose objective is to reduce waste generation, as well as raise awareness of the correct arrangement and stimulus for recycling, therefore replacing disposal in landfills.

Buildings with a greater number of employees have a selective collection system. Another action carried out this year was the deployment of reverse logistics of light bulbs in the main buildings, with expansion to the smaller buildings.

In addition to our continuous effort to have a more efficient waste management, in 2016 we
will be conducting a new sourcing for the selective collection system, seeking to implement the best and most inclusive current models of waste management in our facilities.\(^\text{13}\)

**Incentive for digital iTokens**

**Description:** With the objective of increasing the security of our digital channels, we incentivized the use of digital, SMS and App iTokens, eliminating the use of the key holder iTokens and reducing the generation of WEEE.

**Reduction in consumption:** 45% daily consumption

Due to the incentive to use digital, SMS and App iTokens, the volume of requests for this device in branches fell by 46%, from 1,545,735 to 839,633 units. This initiative lead to a reduction of 45% in daily consumption, from 6134/day in 2014 to 3454/day in 2015.

---

1. Hazardous waste sent for recycling: approximately 96% of all electronic waste generated and 97% of batteries. It also includes used parts replaced during repairs, such as TV tubes, screens, metal wires, plastic parts, circuit boards, electric cables and motors, and no-break batteries.
2. Non-hazardous waste sent for recycling: aluminium and other metals, wood, paper, plastic and glass.
3. Hazardous waste from the Technological Centers sent for recycling: approximately 98% of electronic waste.
5. Hazardous waste from the Technological Centers sent to landfills: approximately 2% of electronic waste.
6. Other forms of reusing/disposing of hazardous waste: refers to batteries and waste from gas scrubbers.

**Consumption and analysis** GRI G4-EN23

In 2014, we defined as our target for 2015 to reduce our waste disposed in landfills by 0.5% compared with the result of 2014. However, we achieved a reduction of 16.54% compared with the previous year.

---

6. Other forms of reusing/disposing of hazardous waste: refers to batteries and waste from gas scrubbers.

Note: In 2015, we disposed of 49,729 lamp bulbs. A total of 42 sqm of waste from the grease traps of the administrative buildings was collected and treated.

---

\(^{13}\) Administrative units
In accordance with our constant efforts to have a better control of our environmental impact, starting in 2015 we will report composting and recycling data as well as established targets.

**Targets and vision for the future**

In 2015, we formalized our long-term vision of establishing a reduction target of 32% of waste from administrative units sent to landfills, between 2012 and 2020\(^1\). This objective will guide our initiatives by 2020, as well as will highlight the improvement of the bank’s performance regarding the issue.

Itaú Insurance  

Products and portfolio  

Group Life Insurance and Personal Accident Insurance - aimed at state-owned and private companies in the industrial, commercial and service segments. It provides their employees, partners and owners, in the event of the death of the policyholder, benefits such as: indemnity coverage, funeral grant and “Fique Bem”, a psychological and financial assistance program.

Business Insurance - aimed at micro, small and medium-size companies to protect physical assets (building and content) against unexpected events such as fire, strong winds, hailstorm, property theft, fixed expenses, civil liability and more that may cause losses to the client/policyholder.

Lender Insurance - financial protection: aimed at clients that contract debt, take out a loan or assume a monthly payment obligation with a bank. The insurance covers full or partial repayment of the debt for the following coverages: unintentional termination for employees, full and temporary disability, permanent disability due to accident and death by any cause. There is also a Lender Insurance aimed at microcredit loans. In 2015, we had 7,136,361 active Lender contracts. In this report, we consider Lender Insurance for Overdrafts, Credit, Life Insurance, Credit and Debt Cards, Insurance Cards and Loans for Individuals and Corporations.

</tbody>
</table>

¹ Call center operations and collection firms were not included.

² In 2015, there was an increase in the amount of outsourced labor compared to previous years, due to a change in the methodology for collecting information from the management areas, extending the control of third parties to several operations. Additionally, there was the inclusion of the Redecard operation. In order to make the comparison between years possible, we recalculated the amount for 2014, which was not possible for 2013 due to the lack of data necessary for the calculation.

</tr>
<tr>
<td>2015*</td>
<td>Brazil</td>
<td>49,602</td>
<td>33,876</td>
</tr>
</tbody>
</table>

In 2015, there was an increase in the amount of outsourced labor compared to previous years, due to a change in the methodology for collecting information from the management areas, extending the control of third parties to several operations. Additionally, there was the inclusion of the Redecard operation. In order to make the comparison between years possible, we recalculated the amount for 2014, which was not possible for 2013 due to the lack of data necessary for the calculation.

<table>
<thead>

¹ In 2015, the increase in occupational health rates was strongly impacted by external factors such as changes in Social Security legislation: MP 644/2014, which amended from 15 to 30 days the company's responsibility on the time before sending the employee to the INSS - National Social Security Institute. MP 664 was changed again in June 2015, which interrupted this bias (no impact in 2016). There was also a paralysis of public INSS servers for about six months (June-December 2015), impacting the performance of medical expertise and the revision of pension benefits, which made employees prolong their licenses due to a lack of public INSS servers to sign their releases.

Unfair Competition
GRI G4-DMA Anti-competitive behavior

Means of Preventing Unfair Competition
No cases alleging unfair competition, trust or monopoly practices were filed against Itaú Unibanco Holding in 2015.

GRI G4-SO7
Our legal department’s specialized teams address demands related to unfair competition and protection of intellectual property.

To preserve competition and prevent the occurrence of unfair practices, the Code of Ethics stipulates the principle of interdependence related to competitors, the need to respect intellectual property and not to use the competitor's information without their express consent.

Also according to the Code of Ethics, it is unacceptable to make comments that could affect the image or contribute to the dissemination of rumors about our competitors.

Antitrust GRI G4-DMA Anti-competitive behavior

Guidelines for Antitrust Assurance
The legal department of M&A, Corporate and International Affairs is the area responsible for any subject related to trust practices, monopoly and setting guidelines and general rules to preserve competition and prevent violations of the economic order in corporate transactions, business practices and interactions with competitors, either directly or through trade associations.

Free competition is the competition between producers of goods and services suppliers, rivals and independent, that are active in the same market, for consumer preference. In a market where competition for consumers is not limited by unlawful arrangements between competitors or their abusive practices, society as a whole can benefit by having lower prices, more innovation and other positive effects.

According to the principle of interdependence contained in Itaú Unibanco’s Code of Ethics, the Corporate Antitrust Policy establishing guidelines and general rules to guarantee the protection of competition by Itaú Unibanco Holding and its subsidiaries in Brazil is in full force.

In addition, the Code of Ethics also establishes the need to act in accordance with the precepts of free competition, respecting the reputation and the opinions of our competitors. Based on this principle, we participate in trade associations and professional associations always in the spirit of cooperation, aimed exclusively at seeking to improve the economic sectors in which we operate.

Cases of discrimination
We did not register any cases of discrimination with clients or employees, either through legal action or through our Internal Complaints Channels. For more details on our Complaint Channels, go to page A-186 for employees (Internal Ombudsman) and page A-188 for clients (External Ombudsman). GRI G4-HR3

The percentage of the total value spent on suppliers, in the year of the report, that was spent with local suppliers. The information is subject to specific confidentiality constraints. One of the items considered confidential in the previous report (the total amount of spending on suppliers) was addressed and is published in this report. However, the proportion of spending on local suppliers is confidential information for the company and we therefore prefer not to disclose it.

Assurance report on the GHG inventory

Verification Statement

The inventory of Greenhouse Gas emissions in enter verified Monitoring
Period of 2015

Itaú Unibanco Holding
Praça Alfredo Egydio do Souza Aranha, 100 - Jabaquara
São Paulo – SP – 04344-902 – BR

has been verified in accordance with ISO 14064-3:2007
as meeting the requirements of

ISO 14064-1:2007 and
Programa Brasileiro GHG Protocol

For the following activities:

Disclosing emissions of 227.548 metric tonnes of CO2 equivalent

Lead auditor: Fabian Peres Gonçalves

Authorized by

Vanda Nunes
Diretora
Data: 5 December 2016

SGS ICS Certificadora Ltda.
Av. Andrade Neves, 812 - 5º And - Barra da Tijuca – CEP 02130-000
Fone: 11-3833 8890
Fax: 11-3833 8899
www.br.sgs.com

This Statement is not valid without the full Greenhouse Gas Assesment and the verification
report, objectives, criteria and findings available on pages 1 to 4 of this Statement.

This document is issued by the Company subject to its General Conditions of Certification Services accessible at
www.sgs.com/terms_and_conditions.html. Attention is drawn to the limitations of liability, indemnification and jurisdiction
issues established therein. The authenticity of this document can be verified at http://www.sgs.com/en/Our-
Company/CertifiedClients/Directories/Certified-Client/Directories.aspx. Any unauthorized alteration, forgery or falsification
of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.
SGS has been contracted by Itaú Unibanco Holding (hereinafter referred to as “CLIENT”), Praça Alfredo Egydio de Souza Aranha, 100 - Jabaquara - São Paulo - SP – CEP 04344-902, for the verification of direct and indirect Greenhouse Gas in accordance with ISO 14064-3: 2007.

As provided in the Greenhouse Gas (GHG) Assertion in the form of report covering GHG emissions of the period 2015.

Roles and responsibilities

The client is responsible for the organization’s GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.

It is SGS’s responsibility to express an independent GHG verification opinion on the GHG emissions as provided in the GHG Assertion for the period 2015.

SGS conducted a third party verification of the provided GHG assertion against the principles of ISO 14064-1: 2007 and ISO 14064-3: 2007 and Programa Brasileiro GHG Protocol in the period 2015. The verification was based on the verification scope, objectives and criteria as agreed between Itaú Unibanco Holding and SGS on 25/11/2015.

Level of Assurance

The level of assurance agreed is that of limited assurance.

Scope

The client has commissioned an independent verification by SGS ICS Certificadora Ltda of reported GHG emissions of 2015 arising from “financial activities, insurance and related services” activities, to establish conformance with ISO 14064 principles within the scope of the verification as outlined below.

The data and information supporting the GHG assertion were hypothetical, projected and/or historical in nature.

This engagement covers verification of emission from anthropogenic sources of greenhouse gases included within the organization’s boundary and is based on ISO 14064-3:2007.

- The organizational boundary was established following: operational control approach.
- Title or description activities: financial activities, insurance and related services.
- Location/boundary of the activities: Praça Alfredo Egydio de Souza Aranha, 100 - Jabaquara, São Paulo/SP
- Physical infrastructure, activities, technologies and processes of the organization: Praça Alfredo Egydio de Souza Aranha, 100 CEP: 04344-902 – São Paulo – SP and also emissions of all administrative buildings, agencies, technological data enters of Itaú, according to the information from annual report.
- GHG sources, sinks and/or reservoirs included: Scope 1, Scope 2 and Scope 3 (Transport of employees, Transport and Distribution – Upstream, Transport and Distribution – Downstream, Business travel, Waste treatment and disposal).
- Types of GHGs included: CO2, CH4, N2O, HFC.

This Statement is not valid without the full Greenhouse Gas Assertion and the verification scope, objectives, criteria and findings available on pages 2 to 9 of this Statement.
Directed actions: NA.
GHG information for the following period was verified: 2015.
Intended user of the verification statement: Itaú Unibanco Holding.

Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:
- Whether the GHG emissions are as declared by the organisation’s GHG assertion
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

Criteria

Criteria against which the verification assessment is undertaken are the principles of ISO 14064 and Programa Brasileiro GHG Protocol.

Materiality

The materiality required of the verification was considered by SGS to 5%, based on the needs of the intended user of the GHG Assertion.

Conclusion

The client provided the GHG assertion based on the requirements of ISO:14064-1:2007 and Programa Brasileiro GHG Protocol. The GHG information for the period 2015 disclosing emissions of 227.548 metric tonnes of CO2 equivalent are verified by SGS to a reasonable level of assurance, consistent with the agreed verification scope, objectives and criteria.

SGS’s approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our
examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions.

We planned and performed our work to obtain the information, explanations and evidence that we considered necessary to provide a limited level of assurance for the GHG emissions for the period 2015.

We conducted our verification with regard to the GHG assertion of Itaú Unibanco Holding which included assessment of GHG information system, monitoring and reporting plan/protocol. This assessment included the collection of evidence supporting the reported data, and checking whether the provisions of the protocol reference, were consistently and appropriately applied.

In SGS's opinion the presented GHG assertion
- is materially correct and is a fair representation of the GHG data and information, and
- is prepared in accordance with ISO14064-1: 2007 on GHG quantification, monitoring and reporting.

This statement shall be interpreted with the GHG assertion of Itaú Unibanco Holding as a whole.
Independent auditor’s limited assurance report on the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report

To the Management and Stockholders of
Itaú Unibanco Holding S.A.
São Paulo - SP

Introduction
We have been engaged by Itaú Unibanco Holding S.A. (“Itaú Unibanco”) to present our limited assurance report (i) on the compilation and proper presentation of the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, of Itaú Unibanco Holding S.A., for the year ended December 31, 2015, and (ii) on compliance of such information with the principles detailed in AA1000 AccountAbility Principles Standards 2008 (“AA1000APS”) as regards the process of engaging stakeholders and defining materiality.

Management’s responsibility
The management of Itaú Unibanco Holding S.A. is responsible for the compilation and proper presentation of the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, in accordance with the guidelines of the Global Reporting Initiative (GRI-G4) and for such internal control as it determines is necessary to enable the preparation of information to be free from material misstatement, whether due to fraud or error, and is also responsible for complying with the principles detailed in AA1000APS as regards the process of engaging stakeholders and defining materiality.

Independent auditor’s responsibility
Our responsibility is to express a conclusion on the compilation and proper presentation of the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, based on our limited assurance engagement carried out in accordance with the Technical Communication CTO 01, “Issuance of an Assurance Report related to Sustainability and Social Responsibility”, issued by the Federal Accounting Council (CFC) and based on the Brazilian standard NBC TO 3000, “Assurance Engagements Other than Audit and Review”, also issued by the CFC, which is equivalent to the international standard ISAE 3000, “Assurance engagements other than audits or reviews of historical financial information”, issued by the International Auditing and Assurance Standards Board (IAASB). Those standards require that we comply with ethical requirements, including independence requirements, and perform our engagement to obtain limited assurance that the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, taken as a whole, is free from material misstatement.

Our responsibility is also to express a conclusion on the process of engaging stakeholders and defining materiality, based on our limited assurance engagement conducted in accordance with AA1000 Assurance Standard (“AA1000AS”) 2008 - Type 1, which establishes the following procedures:

- confirm the existence of a process for identification and participation of key stakeholders;
- confirm the existence of transparent procedures for determining the materiality of significant issues; and
- confirm the existence of a communication process with key stakeholders, and also for the presentation of a well-defined structure in the Consolidated Annual Report, as regards the process of responsiveness to sustainability-related issues.

A limited assurance engagement conducted in accordance with NBC TO 3000, ISAE 3000 and AA1000AS mainly consists of making inquiries of management and other professionals of the entity involved in the preparation of the sustainability information, as well as applying analytical procedures to obtain evidence that allows us to issue a limited assurance conclusion on the information, taken as a whole. A limited assurance engagement also requires the performance of additional procedures when the independent auditor becomes aware of matters that lead him to believe that the sustainability information taken as a whole might present significant misstatements.

Main procedures performed
The procedures selected are based on our understanding of the aspects related to the compilation and presentation of the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, other circumstances of the engagement and our analysis of the areas in which significant misstatements might exist. The following procedures were adopted:
(a) planning the work, taking into consideration the materiality and the volume of quantitative and qualitative information and the operating and internal control systems that were used to prepare the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report;
(b) understanding the calculation methodology and the procedures adopted for the compilation of indicators through interviews with the managers responsible for the preparation of the information;
(c) applying analytical procedures to quantitative information and making inquiries regarding the qualitative information and its correlation with the indicators disclosed in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report;
(d) comparing the financial indicators with the financial statements and/or accounting records; and
(e) obtaining evidence about the more significant GRI-G4 indicators included in the Consolidated Annual Report for 2015 and presented in the “GRI Content Index”.

The limited assurance engagement also included the application of procedures to assess compliance with the criteria and guidelines of the Global Reporting Initiative (GRI-G4) applied in the preparation of the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, and the verification of the compliance with the principles of AA1000APS in the process of engaging stakeholders and defining materiality.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our limited assurance conclusion.

Scope and limitations
The procedures applied in a limited assurance engagement are substantially less detailed than those applied in a reasonable assurance engagement, the objective of which is the issuance of an opinion on the sustainability information of the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, and the compliance with the principles of AA1000APS. Consequently, we were unable to obtain reasonable assurance that we would become aware of all significant matters that might be identified in a reasonable assurance engagement, the objective of which is the issuance of an opinion. If we had performed an engagement with the objective of issuing an opinion, we might have identified other matters and possible misstatements in the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report or instances of non-compliance with the principles of AA1000APS. Therefore, we do not express an opinion on these matters.

Non-financial data are subject to more inherent limitations than financial data, due to the nature and diversity of the methods used to determine, calculate and estimate these data. Qualitative interpretations of the relevance, materiality, and accuracy of the data are subject to individual assumptions and judgments. Furthermore, we did not consider in our engagement the data reported for prior years, nor future projections and goals.

Conclusion
Based on the procedures performed, described herein, no matter has come to our attention that causes us to believe (i) that the sustainability information in the 2015 Consolidated Annual Report, included in the “Sustainability” chapter and the Attachments to this report, of Itaú Unibanco Holding S.A., for the year ended December 31, 2015, has not been compiled, in all material respects, in accordance with the guidelines of the Global Reporting Initiative (GRI-G4), and (ii) that the process of engaging stakeholders and defining materiality has not been performed in accordance with the guidelines established in the AA1000 AccountAbility Principles Standard.

Selected Statistical Information

The following information is included for analytical purposes and should be read in together with our section Performance, Item Financial Performance, Significant Accounting Policies, Assets and Liabilities and Item Consolidated Financial Statements (IFRS).

The data included or referenced in this section are presented in accordance with IFRS, unless otherwise indicated.

Average Balance Sheet and Interest Rate Data

The following table presents the average balances of our interest-earning assets and interest-bearing liabilities, other assets and liabilities accounts, the related interest income and expense amounts and the average real yield/rate for each period.

We calculated the average balances using monthly book balances as we believe such balances are representative of our operations and it would be too costly to produce average balances using daily book balances in IFRS.

The majority of our business is comprised by operations with individuals and corporates, which have grown organically and without significant fluctuations over short periods. Non-accrual loans and leases are disclosed as a non-interest earning asset for the periods indicated in the table below:

Changes in Interest Income and Expenses – Volume and Rate Analysis

The following table sets forth the allocation of the changes in our interest income and expense in terms of average volume and changes in the average yields/rates for the periods indicated below. Volume balance and rate variations have been calculated based on variations of average balances over the period and changes in average interest yield/rates on interest earning assets and interest-bearing liabilities from one period to the other.

### (In millions of R$, except percentages)

</table>

Note:
1. Volume change has been computed as the change in the average interest-earning assets or interest-bearing liabilities from one period to the other multiplied by the average yield/rate in the earlier period.
2. Yield/rate change has been computed as the change in the yield/rate in the period multiplied by the average interest-earning assets or interest-bearing liabilities in the earlier period.
3. We allocated the net change from the combined effects of volume and yield/rate proportionately to volume change and yield/rate change, in absolute terms, without considering positive and negative effects.
Net Interest Margin and Spread
The following table sets forth our average interest-earning assets, total average interest bearing liabilities, net interest income and the comparative net interest margin and net interest spread for the periods indicated below.

Please refer to section Our profile, item In numbers, Selected Financial Data for additional information on the computation of both dividend and interest on shareholders' equity and basic earnings per share.

Exchange Rates
Currently, the Brazilian foreign exchange system allows the purchase and sale of foreign currency and the performance of international transfers in reais by any individual or legal entity, subject to certain regulatory procedures.

The Brazilian government may impose temporary restrictions on the conversion of Brazilian currency into foreign currencies and on the remittance to foreign investors of proceeds from their investments in Brazil. Brazilian law allows the government to impose these restrictions whenever there is a serious imbalance in Brazil's balance of payments or there are reasons to foresee a serious imbalance. We cannot predict whether the Brazilian government will impose remittance restrictions in the future. The real may depreciate or appreciate substantially against the U.S. dollar in the future.

Please refer to section Our Risk Management, item Risk Factors, Macroeconomic Risks, item Instability of foreign exchange rates may negatively affect us, for further details.

As of April 27, 2016, the U.S. dollar-real exchange rate (PTAX) was R$3.5295 to U$1.00.

The following table sets forth information on the selling rate for U.S. dollars and euro as reported by the Central Bank for the periods and dates indicated.

Considerations for ADS holders

Risks related to our ADSs

Before investing in our shares and ADSs, it is important for the investor to know that, in addition to the risks related to our business, which may impact the value of our securities and our ability to perform certain obligations, including the payment of dividends and interest on capital, the investor will be exposed to additional risks, as described below. Additional risks and uncertainties that we are unaware of, or that we currently deem to be immaterial, may also become important factors that affect us and/or ADS holders.

The relative price volatility and limited liquidity of the Brazilian capital markets may significantly limit the ability of our investors to sell the preferred shares underlying our ADSs, at the price and time they desire.

The investment in securities traded in emerging markets frequently involves a risk higher than an investment in securities of issuers from the U.S. or other developed countries, and these investments are generally considered more speculative. The Brazilian securities market is smaller, less liquid, more concentrated and can be more volatile than markets in the U.S. and other countries. Thus, an investor's ability to sell preferred shares underlying ADSs at the price and time the investor desires may be substantially limited.

The preferred shares underlying our ADSs do not have voting rights, except in specific circumstances.

Pursuant to our Bylaws, the holders of preferred shares and therefore of our ADSs are not entitled to vote in our general stockholders' meetings, except in specific circumstances. Even in such circumstances, ADS holders may be subject to practical restrictions on their ability to exercise their voting rights due to additional operational steps involved in communicating with these stockholders, as mentioned below.

According to the provisions of the ADS deposit agreement, in the event of a general stockholders' meeting, we will provide notice to the depositary bank, which will, to the extent practicable, send such notice to ADS holders and instructions on how such holders can participate in such general stockholders' meeting, and ADS holders should instruct the depositary bank on how to vote in order to exercise their voting rights. This additional step of instructing the ADS depositary bank may make the process for exercising voting rights longer for ADS holders.

Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares

We may not be able to offer the U.S. holders of our ADSs preemptive rights granted to holders of our preferred shares in the event of an increase of our share capital by issuing preferred shares unless a registration statement relating to such preemptive rights and our preferred shares is effective or an exemption from such registration requirements of the Securities Act is available. As we are not obligated to file a registration statement relating to preemptive rights with respect to our preferred shares, we cannot assure that preemptive rights will be offered to you.

In the event such registration statement is not filed or if the exemption from registration is not available, The Bank of New York Mellon, as depositary bank, will attempt to sell such preemptive rights within the exercise period, and, in case such a sale is effective, our ADS holders will be entitled to receive the proceeds from such sale. However, the U.S. holders of our ADSs will not receive any value from the granting of such preemptive rights if the depositary bank is unable to sell the preemptive rights during the exercise period.

The surrender of ADSs may cause the loss of the ability to remit foreign currency abroad and of certain Brazilian tax advantages

While ADS holders benefit from the electronic certificate of foreign capital registration obtained in Brazil by the custodian for our preferred shares underlying the ADSs, which permits the depositary bank to convert dividends and other distributions with respect to the preferred shares underlying the ADSs into foreign currency and remit the proceeds abroad, the availability and requirements of such electronic certificate may be adversely affected by future legislative changes.

If an ADS holder surrenders the ADSs and, consequently, receives preferred shares underlying the ADSs, such holder will have to register its investment in the preferred shares with the Central Bank of Brazil either as (i) a Foreign Direct Investment, subject to Law No. 4131/62, which will require an electronic certificate of foreign capital registration, the Electronic Declaratory Registration of Foreign Direct Investment (RDE-IED), or (ii) as a Foreign Investment in Portfolio, subject to Resolution CMN No. 4373/14, which among other requirements, requires the appointment of a financial institution in Brazil as the custodian of the preferred shares and legal representative of the foreign investor in the Electronic Declaratory Registration of Portfolio (RDE-Portfolio). The failure to register the investment in the preferred shares as foreign investment under one of the regimes mentioned above (E.g. RDE – IED or RDE – Portfolio) will impact the ability of the holder to dispose of the preferred shares and to receive dividends. Moreover, upon receipt of the preferred shares underlying the ADSs, Brazilian regulations require the investor to enter into corresponding exchange rate transactions and pay taxes on these exchange rate transactions, as applicable.

The tax treatment for the remittance of dividends and distributions on, and the proceeds from any sale of, our preferred shares is less favorable in case a holder of preferred shares obtains the RDE-IED instead of the RDE-Portfolio. In addition, if a holder of preferred shares attempts to obtain an electronic certificate of foreign capital registration, such
holder may incur expenses or suffer delays in the application process, which could impact the investor’s ability to receive dividends or distributions relating to our preferred shares or the return of capital on a timely manner.

The holders of ADSs have rights that differ from those of stockholders of companies organized under the laws of the U.S. or other countries

Our corporate affairs are governed by our Bylaws and Brazilian Corporate Law, which may have legal principles that differ from those that would apply if we were incorporated in the U.S. or in another country. Under Brazilian Corporate Law, the holders of ADSs and the holders of our preferred shares may have different rights with respect to the protection of investor interests, including remedies available to investors in relation to any actions taken by our Board of Directors or the holders of our common shares, which may be different from what is provided in U.S. law or the law of another country.

**Taxation for the ADS holders**

This summary is based upon tax laws of Brazil and the United States in effect as of the date hereof, and contains a description of the main Brazilian and U.S. federal income tax considerations regarding the acquisition, ownership and disposition of our preferred shares or ADSs, but it does not purport to be a comprehensive description of all the tax considerations that may be relevant to these matters, considering that laws are subject to change and to differing interpretations (possibly with retroactive effect). Although there is no income tax treaty between Brazil and the United States in place, the tax authorities of the two countries have agreed in applicable provisions of reciprocal tax treatment as to compensation of tax withheld at the source country in the residence country. No assurance can be given, however, as to whether or when a treaty will enter into force in accordance with Brazilian law, as regulated by Article 1 of Normative Instruction No. 1,037 of June 4th, 2010, as amended, a “tax haven” is defined as a country or location (a) that does not impose any income tax or where the maximum income tax rate is 20% or below or (b) where the local legislation imposes restrictions on disclosure regarding shareholder composition or investment ownership. A list of current tax haven jurisdictions has been published per such Normative Instruction.

Non-Resident Holders resident or domiciled in tax haven jurisdictions may be subject to withholding tax in Brazil at higher rates than Non-Resident Holders not resident or domiciled in tax havens, as described below.

**Taxation of Dividends**

Payment of dividends derived from profits generated after January 1st, 1996, including dividends paid in kind, are not subject to withholding tax in Brazil. Payment of dividends derived from profits generated before January 1st, 1996 may be subject to Brazilian withholding tax at varying rates, according to the year when the profits have been generated.

**Taxation of Interest on Net Equity**

Law No. 9,249, dated December 26, 1995, as amended, allows a Brazilian corporation, such as ourselves, to also make payments of interest on net equity in addition to dividend distributions. Please refer to section Our Risk Management, item Regulatory Environment, Taxation for further information. Currently, payments of interest on net equity are subject to withholding tax at a general rate of 15%, or 25% in the case of a Non-Resident Holder that is resident or domiciled in a tax haven jurisdiction.

**Taxation of Gains**

(a) Sales or Other Dispositions of ADSs

Gains realized outside Brazil by a Non-Resident Holder from the sale or other disposition of ADSs to another Non-Resident Holder are not subject to Brazilian taxation. However, according to Law No. 10,833, dated December 29, 2003, as amended, the disposition of assets located in Brazil by a Non-Resident Holder may be subject to Brazilian withholding tax at a general rate of 15% (a 25% rate may apply if the foreign beneficiary is resident or domiciled in a jurisdiction deemed to be a tax haven for Brazilian tax purposes). Although the referred Law is not completely clear with respect to what is considered to be an asset located in Brazil, ADSs generally should not be considered to be assets located in Brazil for purposes of such Law because they represent securities issued and negotiated in an offshore exchange market. It is important to note that even if ADSs were considered to be assets located in Brazil, Non-Resident Holders not resident or domiciled in tax haven jurisdictions may still apply for exemption from capital gains tax according to Article 81 of Law No. 8,981, dated January 20, 1995, as amended.

**Brazilian Tax Considerations**

The following discussion summarizes the main Brazilian tax consequences related to the acquisition, ownership and disposition by Non-Resident Holders of our ADSs.

**Non-Resident Holders Resident or Domiciled in Tax Haven Jurisdictions**

In accordance with Brazilian law, as regulated by Article 1 of Normative Instruction No. 1,037 of June 4th, 2010, as amended, a “tax haven” is defined as a country or location (a) that does not impose any income tax or where the maximum income tax rate is 20% or below or (b) where the local legislation imposes restrictions on disclosure regarding shareholder composition or investment ownership. A list of current tax haven jurisdictions has been published per such Normative Instruction.

Non-Resident Holders resident or domiciled in tax haven jurisdictions may be subject to withholding tax in Brazil at higher rates than Non-Resident Holders not resident or domiciled in tax havens, as described below.

**Taxation of Dividends**

Payment of dividends derived from profits generated after January 1st, 1996, including dividends paid in kind, are not subject to withholding tax in Brazil. Payment of dividends derived from profits generated before January 1st, 1996 may be subject to Brazilian withholding tax at varying rates, according to the year when the profits have been generated.

**Taxation of Interest on Net Equity**

Law No. 9,249, dated December 26, 1995, as amended, allows a Brazilian corporation, such as ourselves, to also make payments of interest on net equity in addition to dividend distributions. Please refer to section Our Risk Management, item Regulatory Environment, Taxation for further information. Currently, payments of interest on net equity are subject to withholding tax at a general rate of 15%, or 25% in the case of a Non-Resident Holder that is resident or domiciled in a tax haven jurisdiction.

**Taxation of Gains**

(a) Sales or Other Dispositions of ADSs

Gains realized outside Brazil by a Non-Resident Holder from the sale or other disposition of ADSs to another Non-Resident Holder are not subject to Brazilian taxation. However, according to Law No. 10,833, dated December 29, 2003, as amended, the disposition of assets located in Brazil by a Non-Resident Holder may be subject to Brazilian withholding tax at a general rate of 15% (a 25% rate may apply if the foreign beneficiary is resident or domiciled in a jurisdiction deemed to be a tax haven for Brazilian tax purposes). Although the referred Law is not completely clear with respect to what is considered to be an asset located in Brazil, ADSs generally should not be considered to be assets located in Brazil for purposes of such Law because they represent securities issued and negotiated in an offshore exchange market. It is important to note that even if ADSs were considered to be assets located in Brazil, Non-Resident Holders not resident or domiciled in tax haven jurisdictions may still apply for exemption from capital gains tax according to Article 81 of Law No. 8,981, dated January 20, 1995, as amended.
(b) Conversion of Our Preferred Shares into ADSs
The deposit by a Non-Resident Holder of our preferred shares with the depositary for conversion into ADSs may be subject to Brazilian capital gains tax, if such Non-Resident Holder is resident or domiciled in a tax haven jurisdiction or if such preferred shares have not been registered under the Central Bank according to CMN Resolution No. 4.373, dated September 29, 2014, effective as of March 30, 2015 (former CMN Resolution No. 2,689, dated January 26, 2000, and CMN Resolution No. 1,927, dated May 18, 1992), as amended. In those cases, the difference between the acquisition cost of such preferred shares or the amount otherwise previously registered under the Central Bank and the average price of such preferred shares, according to the mentioned CMN Resolution No. 4.373/14, may be considered taxable capital gain, and may be subject to income tax at a general rate of 15%. Please refer to section Our Risk Management, item Regulatory Environment, Funds of foreign investors, for further details.

Non-Resident Holders that are resident or domiciled in tax haven jurisdictions may be subject to capital gain tax at a 25% rate on sale or transfer of shares out of the financial markets upon such a conversion.

On the other hand, when Non-Resident Holders that are not resident or domiciled in tax haven jurisdictions deposit preferred shares registered according to CMN Resolution No. 4.373/14 in exchange for ADSs, such deposit should not be subject to capital gain tax.

c) Sales or Other Dispositions of Our Preferred Shares
Non-Resident Holders not resident or domiciled in tax haven jurisdictions that register their portfolio according to CMN Resolution No. 4.373/14 benefit from a special tax treatment according to which any capital gain arising from the sale of securities within Brazilian stock exchanges is exempt from income tax. On the other hand, sale of shares not registered according to CMN Resolution No. 4.373/14 or made outside of Brazilian stock exchanges is generally subject to 15% capital gain tax.

Such special treatment is not applicable to Non-Resident Holders resident or domiciled in tax haven jurisdictions, who are subject to general taxation rules applicable to Brazilian residents on the sale of their investments in the financial markets, including stock exchanges and over-the-counter markets. The taxation rate is then generally of 15%. If such Non-Resident Holders sell shares outside of the financial markets, the income taxation rate will instead be of 25%

Any exercise of preemptive rights related to our preferred shares (and in connection with the ADS program) will not be subject to Brazilian taxation. The gains from the sale or assignment of preemptive rights will be subject to income tax according to rates that vary depending on the location of the Non-Resident Holder and the market in which such rights have been sold. If the Non-Resident Holder is not resident or domiciled in a tax haven jurisdiction, the sale of preemptive rights is exempt from tax if made within the Brazilian stock exchange markets or is subject to 15% income tax if made outside such stock exchange markets. If the Non-Resident Holder is resident or domiciled in a tax haven, the sale of preemptive rights is generally subject to 15% income tax if made within Brazilian financial markets or 25% tax if the rights have been sold outside such markets.

Tax on Financial Transactions

IOF/Exchange (IOF/FX) and IOF/Securities

According to the Decree No. 6,306/2007, and further amendments, Tax on Financial Transactions may levy some foreign exchange transactions. Please refer to section Our Risk Management, item Regulatory Environment, Taxation, for further details about Tax on Financial Transactions.

The acquisition of ADSs is not subject to IOF tax. As of December 24, 2013, pursuant to Decree No. 8,165, the IOF/Securities tax levied on the assignment of shares traded in the Brazilian stock exchange market in order to permit the issuance of depositary receipts to be negotiated overseas has been reduced to 0% rate.

Other Brazilian Taxes

There are no Brazilian inheritance, gift or succession taxes applicable to the transfer of ownership or title (ownership without beneficial interest) of our preferred shares or ADSs or the vesting of free beneficial interest of such shares or ADSs outside Brazil by a Non-Resident Holder, except for gift, inheritance and legacy taxes that are levied by some states of Brazil if bestowed in such states of Brazil or abroad when the receiver is resident or domiciled in these states of Brazil. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable to Non-Resident Holders of our preferred shares or ADSs.

U.S. Federal Income Tax Considerations

The following is a general discussion of certain U.S. federal income tax considerations relating to the purchase, ownership and disposition of our preferred shares or ADSs by U.S. Holders (as defined below) who hold such preferred shares or ADSs as capital assets within the meaning of section 1221 of the U.S. Internal Revenue Code of 1986, as amended (the “Code”). This discussion does not address all of the U.S. federal income tax considerations that may be relevant to specific U.S. Holders in light of their particular circumstances or to U.S. Holders subject to special treatment under U.S. federal income tax law, such as banks, insurance companies, retirement plans, regulated investment companies, real estate investment trusts, dealers in securities, brokers,
tax-exempt entities, certain former citizens or residents of the United States, U.S. Holders that hold our preferred shares or ADSs as part of a “straddle,” “hedging,” “conversion” or other integrated transaction, U.S. Holders that mark their securities to market for U.S. federal income tax purposes, U.S. Holders that have a functional currency other than the U.S. dollar, U.S. Holders that own (or are deemed to own) 10% or more (by voting power) of our shares or U.S. Holders that receive our preferred shares or ADSs as compensation. In addition, this discussion does not address the effect of any U.S. state, local or non-U.S. tax considerations or any U.S. estate, gift or alternative minimum tax considerations.

This discussion is based on the Code, U.S. Treasury regulations promulgated or proposed thereunder and administrative and judicial interpretations thereof, all as in effect on the date hereof, and all of which are subject to change, possibly with retroactive effect, or subject to differing interpretations. This discussion also assumes that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms.

For purposes of this discussion, the term “U.S. Holder” means a beneficial owner of our preferred shares or ADSs that is, for U.S. federal income tax purposes, (i) an individual who is a citizen or resident of the United States, (ii) a corporation created or organized in or under the laws of the United States, any state thereof, or the District of Columbia, (iii) an estate the income of which is subject to U.S. federal income tax regardless of its source, or (iv) a trust (x) with respect to which a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of its substantial decisions or (y) that has in effect a valid election under applicable U.S. Treasury regulations to be treated as a U.S. person.

If an entity treated as a partnership for U.S. federal income tax purposes invests in our preferred shares or ADSs, the U.S. federal income tax considerations relating to such investment will depend in part upon the status and activities of such entity and the particular partner. Any such entity should consult its own tax advisor regarding the U.S. federal income tax considerations applicable to it and its partners relating to the purchase, ownership and disposition of such preferred shares or ADSs.

INVESTORS ARE STRONGLY ADVISED TO CONSULT THEIR OWN TAX ADVISORS AS TO THE U.S. FEDERAL, STATE AND LOCAL TAX CONSIDERATIONS RELATING TO THE PURCHASE, OWNERSHIP AND DISPOSITION OF OUR PREFERRED SHARES OR ADSS IN LIGHT OF THEIR PARTICULAR CIRCUMSTANCES, AS WELL AS THE EFFECT OF ANY NON-U.S. TAX LAWS.

Except where specifically described below, this discussion assumes that we are not and will not be a passive foreign investment company (a “PFIC”), for U.S. federal income tax purposes. Please see the discussion under “Passive Foreign Investment Company Considerations” below.

Treatments of ADSs

A U.S. Holder of ADSs generally will be treated for U.S. federal income tax purposes as the owner of such U.S. Holder’s proportionate interest in our preferred shares held by the depositary (or its custodian) that are represented and evidenced by such ADSs. Accordingly, any deposit or withdrawal of our preferred shares in exchange for ADSs generally will not result in the realization of gain or loss to such U.S. Holder for U.S. federal income tax purposes.

Distributions

A U.S. Holder that receives a distribution with respect to our preferred shares (whether held through ADSs or directly), including payments of interest on net equity as described above under “Brazilian Tax Considerations – Taxation of Interest on Net Equity,” generally will be required to include the amount of such distribution (without reduction for any Brazilian withholding tax with respect thereto) in gross income as a dividend to the extent of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) on the date such U.S. Holder (or the depositary, in the case of ADSs) actually or constructively receives such distribution, and will not be eligible for the dividends received deduction allowed to corporations. A distribution on our preferred shares (whether held through ADSs or directly) in excess of current and accumulated earnings and profits generally will be treated first as a non-taxable return of capital to the extent of such U.S. Holder’s basis in such preferred shares or ADSs, as the case may be, and thereafter as gain from the sale or exchange of such preferred shares or ADSs (which will be treated in the same manner described below under “Sale, Exchange or Other Disposition of Preferred Shares or ADSs”). We have not maintained and do not plan to maintain calculations of earnings and profits for U.S. federal income tax purposes. As a result, a U.S. Holder may need to include the entire amount of any such distribution in income as a dividend.

The U.S. dollar value of any distribution on our preferred shares made in Brazilian reais generally should be calculated by reference to the exchange rate between the U.S. dollar and the Brazilian real in effect on the date of receipt of such distribution by the U.S. Holder (or the depositary, in the case of ADSs), regardless of whether the reais so received are in fact converted into U.S. dollars. Such U.S. Holder generally will have a basis in such reais equal to the U.S. dollar value of such reais on the date of receipt. Any gain or loss on a subsequent conversion or other disposition of such reais by such U.S. Holder generally will be treated as ordinary income or loss and generally will be income or loss from sources within the United States.
Distributions treated as dividends that are received by certain non-corporate U.S. persons (including individuals) in respect of shares of a non-U.S. corporation (other than a corporation that is, in the taxable year during which the distributions are made or the preceding taxable year, a PFIC) that is readily tradable on an established securities market in the United States generally qualify for a 20% reduced maximum tax rate (and potentially additional tax discussed below under “Medicare Tax”) so long as certain holding period and other requirements are met. Since the ADSs will be listed on the NYSE, unless we are treated as a PFIC with respect to a U.S. Holder, dividends received by such a U.S. Holder in respect of the ADSs should qualify for the reduced rate. Based on existing guidance, it is not entirely clear whether dividends received by such a U.S. Holder of our preferred shares in respect of such shares will qualify for the reduced rate, because our preferred shares are not themselves listed on a United States exchange. Special rules apply for purposes of determining the recipient’s investment income (which may limit deductions for investment interest) and foreign income (which may affect the amount of U.S. foreign tax credit) and to certain extraordinary dividends. Each U.S. Holder that is a non-corporate taxpayer should consult its own tax advisor regarding the possible applicability of the reduced tax rate and the related restrictions and special rules.

Sale, Exchange or Other Disposition of Preferred Shares or ADSs

Upon a sale, exchange or other disposition of our preferred shares or ADSs, a U.S. Holder generally will recognize gain or loss for U.S. federal income tax purposes in an amount equal to the difference, if any, between the amount realized on such sale, exchange or other disposition and such U.S. Holder’s adjusted tax basis in such preferred shares or ADSs. Any gain or loss so recognized generally will be long-term capital gain or loss if such U.S. Holder has held such preferred shares or ADSs for more than one year at the time of such sale, exchange or other disposition. Certain non-corporate U.S. Holders are entitled to preferential treatment for net long-term capital gains. The ability of a U.S. Holder to offset capital losses against ordinary income is limited.

A U.S. Holder that receives Brazilian reais from the sale, exchange or other disposition of our preferred shares generally will realize an amount equal to the U.S. dollar value of such reais on the settlement date of such sale, exchange or other disposition if (i) such U.S. Holder is a cash basis or electing accrual basis taxpayer and our preferred shares are treated as being “traded on an established securities market” or (ii) such settlement date is also the date of such sale, exchange or other disposition. Such U.S. Holder generally will have a basis in such reais equal to the U.S. dollar value of such reais on the settlement date. Any gain or loss on a subsequent conversion or other disposition of such reais by such U.S. Holder generally will be treated as ordinary income or loss and generally will be income or loss from sources within the United States. Each U.S. Holder should consult its own tax advisor regarding the U.S. federal income tax consequences of receiving reais from the sale, exchange or other disposition of our preferred shares in cases not described in the first sentence of this paragraph.

Foreign Tax Credit Considerations

Distributions on our preferred shares (whether held through ADSs or directly), including payments of interest on net equity as described above under “Brazilian Tax Considerations – Taxation of Interest on Net Equity,” that are treated as dividends, before reduction for any Brazilian withholding taxes with respect thereto, will generally be included in the gross income of a U.S. Holder. Thus, such U.S. Holder may be required to report income for such purposes in an amount greater than the actual amount such U.S. Holder receives in cash. Distributions treated as dividends generally will constitute income from sources outside the United States and generally will be categorized for U.S. foreign tax credit purposes as “passive category income” or, in the case of some U.S. Holders, as “general category income.” Subject to applicable limitations and holding period requirements, a U.S. Holder may be eligible to elect to claim a U.S. foreign tax credit against its U.S. federal income tax liability for any such Brazilian withholding taxes. Under current law, gain resulting from a sale or other disposal of our preferred shares or ADSs may be subject to Brazilian income or withholding taxes. A U.S. Holder’s use of a foreign tax credit with respect to any such Brazilian income or withholding taxes could be limited, as such gain generally will constitute income from sources within the United States. A U.S. Holder that does not claim a U.S. foreign tax credit generally may instead claim a deduction for any such Brazilian taxes, but only for a taxable year in which such U.S. Holder elects to do so with respect to all non-U.S. income taxes paid or accrued by such U.S. Holder in such taxable year. Foreign currency exchange gain or loss generally will constitute income from sources within the United States. The rules relating to foreign tax credits are complex, and each U.S. Holder should consult its own tax advisor regarding the application of such rules.

Passive Foreign Investment Company Considerations

Special U.S. federal income tax rules apply to U.S. persons owning shares of a PFIC. A non-U.S.-corporation generally will be classified as a PFIC for U.S. federal income tax purposes in any taxable year in which, after applying relevant look-through rules with respect to the income and assets of certain subsidiaries, either: at least 75% of its gross income is “passive income”, or on average at least 50% of the gross value of its assets is attributable to assets that produce passive income or are held for the production of passive income.

For this purpose, passive income generally includes, among other things, dividends, interest, rents, royalties, gains from the disposition of passive assets and gains from commodities transactions.
The application of the PFIC rules to banks is unclear under present U.S. federal income tax law. Banks generally derive a substantial part of their income from assets that are interest bearing or that otherwise could be considered passive under the PFIC rules. The United States Internal Revenue Service (or “IRS”), has issued a notice, and has proposed regulations, that exclude from passive income any income derived in the active conduct of a banking business by a qualifying foreign bank, also known as the Active Bank Exception. The IRS notice and proposed regulations have different requirements for qualifying as a foreign bank, and for determining the banking income that may be excluded from passive income under the Active Bank Exception. Moreover, the proposed regulations have been outstanding since 1994 and will not be effective unless finalized.

Based on estimates of our current and projected gross income and gross assets, we do not believe that we will be classified as a PFIC for our current or future taxable years. The determination of whether we are a PFIC, however, is made annually and is based upon the composition of our income and assets (including income and assets of entities in which we hold at least a 25% interest), and the nature of our activities (including our ability to qualify for the Active Bank Exception).

Because final regulations have not been issued and because the notice and the proposed regulations are inconsistent, our status under the PFIC rules is subject to considerable uncertainty. While we conduct, and intend to continue to conduct, a significant banking business, there can be no assurance that we will satisfy the specific requirements for qualifying as a foreign bank, and for determining the banking income that may be excluded from passive income under the Active Bank Exception. Accordingly, U.S. Holders could be subject to U.S. federal income tax under the rules described below.

If we are treated as a PFIC for any taxable year during which a U.S. Holder owns our preferred shares or ADSs, any gain realized on a sale or other taxable disposition of such preferred shares or ADSs and certain “excess distributions” (generally distributions in excess of 125% of the average distribution over the prior three-year period, or if shorter, the holding period for such preferred shares or ADSs) will be treated as ordinary income and will be subject to tax as if (i) the excess distribution or gain had been realized ratably over the U.S. Holder’s holding period for such preferred shares or ADSs, (ii) the amount deemed realized in each year had been subject to tax in each such year at the highest marginal rate for such year (other than income allocated to the current period or any taxable period before we became a PFIC, which would be subject to tax at such U.S. Holder’s regular ordinary income rate for the current year and would not be subject to the interest charge discussed below), and (iii) the interest charge generally applicable to underpayments of tax had been imposed on the taxes deemed to have been payable in those years.

We do not expect to provide information that would allow U.S. Holders to avoid the foregoing consequences by making a “qualified electing fund” election.

If we are treated as a PFIC and, at any time, we invest in non-U.S. corporations that are classified as PFICs (“Subsidiary PFICs”), U.S. Holders generally will be deemed to own, and also would be subject to the PFIC rules with respect to, their indirect ownership interest in any such Subsidiary PFIC. If we are treated as a PFIC, a U.S. Holder could incur liability for the deferred tax and interest charge described above if either (i) we receive a distribution from, or dispose of all or part of our interest in, any such Subsidiary PFIC or (ii) such U.S. Holder disposes of all or part of our preferred shares or ADSs.

A U.S. holder of shares in a PFIC (but possibly not a Subsidiary PFIC, as discussed below) may make a “mark-to-market” election, provided the PFIC shares are “marketable stock” as defined under applicable Treasury regulations (i.e., “regularly traded” on a “qualified exchange or other market”). Under applicable Treasury regulations, a “qualified exchange or other market” includes (i) a national securities exchange that is registered with the U.S. Securities and Exchange Commission or the national market system established under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or (ii) a foreign securities exchange that is regulated or supervised by a governmental authority of the country in which the market is located and meets certain trading, listing, financial disclosure and other requirements set forth in applicable Treasury regulations. The ADSs are traded on the NYSE and the preferred shares are traded on the BM&FBovespa. The NYSE constitutes a qualified exchange or other market. Although the IRS has not addressed whether the BM&FBovespa meets the requirements to be treated as a qualified exchange or other market, we believe that the BM&FBovespa should be so treated. PFIC shares traded on a qualified exchange or other market are regularly traded on such exchange or other market for any calendar year during which such shares are traded, other than in de minimis quantities, on at least 15 days during each calendar quarter. We cannot assure U.S. Holders that our preferred shares or ADSs will be treated as “marketable stock” for any taxable year.

The tax consequences that would apply if we were a PFIC would be different from those described above if a “mark-to-market” election is available and a U.S. Holder validly makes such an election as of the beginning of such U.S. Holder’s holding period. If such an election were made, such U.S. Holder generally would (i) include in gross income, entirely as ordinary income, an amount equal to the excess, if any, of the fair market value of our preferred shares or ADSs as of the close of each taxable year and such U.S. Holder’s adjusted tax basis in such preferred shares or ADSs, and (ii) deduct as an ordinary loss the excess, if any, of such U.S. Holder’s adjusted tax basis in such preferred shares or ADSs over the fair market value of such preferred shares or ADSs at the end of the
taxable year, but only to the extent of the net amount previously included in gross income as a result of the mark-to-market election. Any gain from a sale, exchange or other disposition of our preferred shares or ADSs in a taxable year in which we were a PFIC would be treated as ordinary income, and any loss from such sale, exchange or other disposition would be treated first as ordinary loss (to the extent of any net mark-to-market gains previously included in income) and thereafter as capital loss. A U.S. Holder's adjusted tax basis in such preferred shares or ADSs would increase or decrease by the amount of the gain or loss taken into account under the mark-to-market regime. Even if a U.S. Holder is eligible to make a mark-to-market election with respect to our preferred shares or ADSs, however, it is not clear whether or how such election would apply with respect to the shares of any Subsidiary PFIC that such U.S. Holder is treated as owning, because such Subsidiary PFIC shares might not be marketable stock. The mark-to-market election is made with respect to marketable stock in a PFIC on a shareholder-by-shareholder basis and, once made, can only be revoked with the consent of the IRS. Special rules would apply if the mark-to-market election is not made for the first taxable year in which a U.S. Holder owns any equity interest in us while we are a PFIC.

A U.S. Holder who owns our preferred shares or ADSs during any taxable year that we are treated as a PFIC generally would be required to file an information return with respect to us and any Subsidiary PFIC in which the U.S. Holder holds a direct or indirect interest. U.S. Holders should consult their own tax advisors regarding the application of the PFIC rules to our preferred shares or ADSs and the availability and advisability of making a mark-to-market election should we be considered a PFIC for any taxable year.

Medicare Tax

In addition to regular U.S. federal income tax, certain U.S. Holders that are individuals, estates or trusts are subject to a 3.8% tax on all or a portion of their “net investment income,” which may include all or a portion of their income arising from a distribution with respect to a preferred share or ADS and net gain from the sale, exchange or other disposition of a preferred share or ADS.

Backup Withholding and Information Reporting

Backup withholding and information reporting requirements generally apply to certain U.S. Holders with respect to payments made on or proceeds from the sale, exchange or other disposition of our preferred shares or ADSs. A U.S. Holder not otherwise exempt from backup withholding generally can avoid backup withholding by providing a properly executed IRS Form W-9. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules generally will be allowed as a refund or a credit against the U.S. Holder’s U.S. federal income tax liability, provided the required information is timely furnished by the U.S. Holder to the IRS.

Disclosure Requirements for Specified Foreign Financial Assets

Individual U.S. Holders (and certain U.S. entities specified in U.S. Treasury Department guidance) who, during any taxable year, hold any interest in any “specified foreign financial asset” generally will be required to file with their U.S. federal income tax returns certain information on IRS Form 8938 if the aggregate value of all such assets exceeds certain specified amounts. “Specified foreign financial asset” generally includes any financial account maintained with a non-U.S. financial institution and may also include our preferred shares or ADSs if they are not held in an account maintained with a financial institution. Substantial penalties may be imposed, and the period of limitations on assessment and collection of U.S. federal income taxes may be extended, in the event of a failure to comply. U.S. Holders should consult their own tax advisors as to the possible application to them of this filing requirement.

Disclosure Requirements for Certain U.S. Holders Recognizing Significant Losses

A U.S. Holder that claims significant losses in respect of our preferred shares or ADSs for U.S. federal income tax purposes (generally (i) US$10 million or more in a taxable year or US$20 million or more in any combination of taxable years for corporations or partnerships all of whose partners are corporations, (ii) US$2 million or more in a taxable year or US$4 million or more in any combination of taxable years for all other taxpayers, or (iii) US$50,000 or more in a taxable year for individuals or trusts with respect to a foreign currency transaction) may be required to file Form 8886 for “reportable transactions.” U.S. Holders should consult their own tax advisors concerning any possible disclosure obligation with respect to our preferred shares or ADSs.

U.S. Foreign Account Tax Compliance Act (FATCA)

Please refer to section Our Risk Management, item Regulatory Environment, Taxation, U.S. Foreign Account Tax Compliance Act (FATCA) for more clarification on FATCA.

Controls and Procedures

(a) Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer (“CEO”), and our chief financial officer (“CFO”), of the effectiveness of our “disclosure controls and procedures” (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e) as required by paragraph (b) of the Exchange Act Rules 13a-15 or 15d-15, as of December 31, 2015.

A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. Therefore, our management does not expect that the controls will prevent all errors and all fraud.
Based upon the evaluation performed, our CEO and CFO have concluded that as of December 31, 2015, our disclosure controls and procedures were effective to provide reasonable assurance that material information relating to us and our consolidated subsidiaries is (i) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) accumulated and communicated to our management, including our principal executive officers and principal financial officers, to allow timely decisions regarding required disclosure.

(b) Management’s Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes, in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions, or a decline in the level of compliance with policies or procedures may occur.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2015. In making this assessment, our management used the criteria set forth in "Internal Control – Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on its evaluation and those criteria, our management has concluded that our internal control over financial reporting was effective as of December 31, 2015. The effectiveness of the Company’s internal control over financial reporting as of December 31, 2015, has been audited by PricewaterhouseCoopers Auditores Independentes, an independent registered public accounting firm.

(c) Attestation Report of the Independent Registered Public Accounting Firm

The report of PricewaterhouseCoopers Auditores Independentes, our independent registered public accounting firm, dated April 29, 2016, on the effectiveness of our internal controls related to the consolidated financial statements as of December 31, 2015 is presented with our consolidated financial statements.

Please refer to Performance, item Consolidated Financial Statements (IFRS) for further details about our independent auditor's report.

(d) Changes in Internal Control Over Financial Reporting

In connection with the evaluation required by the Exchange Act Rule 13a-15(d), our management, including our CEO and CFO, concluded that the changes that occurred during the year ended December 31, 2015 have not materially affected, or are not reasonably likely to materially affect, our internal control over financial reporting.

Glossary

A
- AEL – Associação Brasileira de Empresas de Leasing (Brazilian Association of Leasing Companies)
- Aberje – Associação Brasileira de Comunicação Empresarial (Brazilian Association of Corporate Communication)
- ABRCAB – Associação Brasileira de Companhias Abertas (Brazilian Association of Public Companies)
